*Worldwide

Adolph Coors Co., Golden, Colo., the 93rd largest national advertiser with advertising expenditures estimated by ADVERTISING AGE at $63.6 million in 1983, continues an aggressive expansion program in its efforts to become a national brand by the end of the decade.

Expansion was the central focus of Coors and Coors Light throughout 1983, as the company stretched into six southeastern states—Alabama, Georgia, Florida North and South Carolina, Virginia—and the District of Columbia. By the end of 1983, Coors' distribution encompassed 28 states.

The company's income in 1983 mushroomed a staggering 122%, to $89.3 million, on sales of $1.11 billion, up 21%. Over-all production for the company was 13.7 million bbls., 15% higher than in 1982, a year in which total bbls. dropped 10.5% below 1981.

"These expansion efforts are the result of being able to run this place full out," said Rob Klugman, vp-marketing.

The expansion helped bolster sales that had dropped in 1982 because of a significant loss of market share in Texas and California.

During the Coors' heyday of the mid-1970s, it boasted a 40% share of market in California and a 29% share in Texas.

Currently, Mr. Klugman said, the company has only a 15% to 20% share of market in both states. The company said it believes its market share has stopped eroding.

Over-all advertising at Coors during 1983 increased about 30%, as did measured advertising for Coors beer, climbing from $13 million to $16.9 million, according to LNA.

Advertising spending for Coors Light beer nearly doubled, to $10.1 million from $5.8 million.

Golden Lager was allotted $395,000 for its introduction into selected markets, and Herman Joseph's 1868 increased marginally to $809,600, from $803,000.

George Killian's Irish Red Ale, which received $2.1 million in measured media in 1982, got only $556,800 in 1983. Coors, however, in mid-August, 1984, unveiled a multi-million-dollar ad campaign for Irish Red aimed at the "yuppy" consumer (young, upwardly mobile college-educated audience) in Coor's 20-western-state primary market.

Irish Red beer will be distributed in Alaska, Virginia, North Carolina and South Carolina for the first time and expanded into areas of Florida and Tennessee.

"The best of the Rockies is here" has heralded the introduction of Coors and Coors Light into its new markets over the past two years. Subsequently, Coors was promoted under the "best of the Rockies is yours" throughout the company's entire marketing area. Coors Light was promoted under "Turn it loose."

After moving its Coors Light account from Ted Bates Advertising/New York to Foote, Cone & Belding, Chicago, in 1982, the company moved its Coors, George Killian's and Herman Joseph's from Ted Bates to FCB in 1983.

Herman Joseph's was moved in 1983 to J. Walter Thompson USA, Chicago, where the "We make the best of time" campaign will continue.

Initially, FCB handled only the eastern rollout for the Coors beers as a special project, but then won the national business because the company liked the introductory "Best of the Rockies."

In 1984, Coors already has expanded into Alaska, North and South Dakota, Wisconsin, Ohio, Maryland and West Virginia—for a total of 35 states.

Such rapid growth over the past two years has been "taxing," Mr. Klugman said. Despite the widespread acceptance of Coors and Coors Light, the entries of the company's other products into the market have not been so stellar.

Nevertheless, the three brands continue in test markets, albeit with "mixed results," Mr. Klugman said.

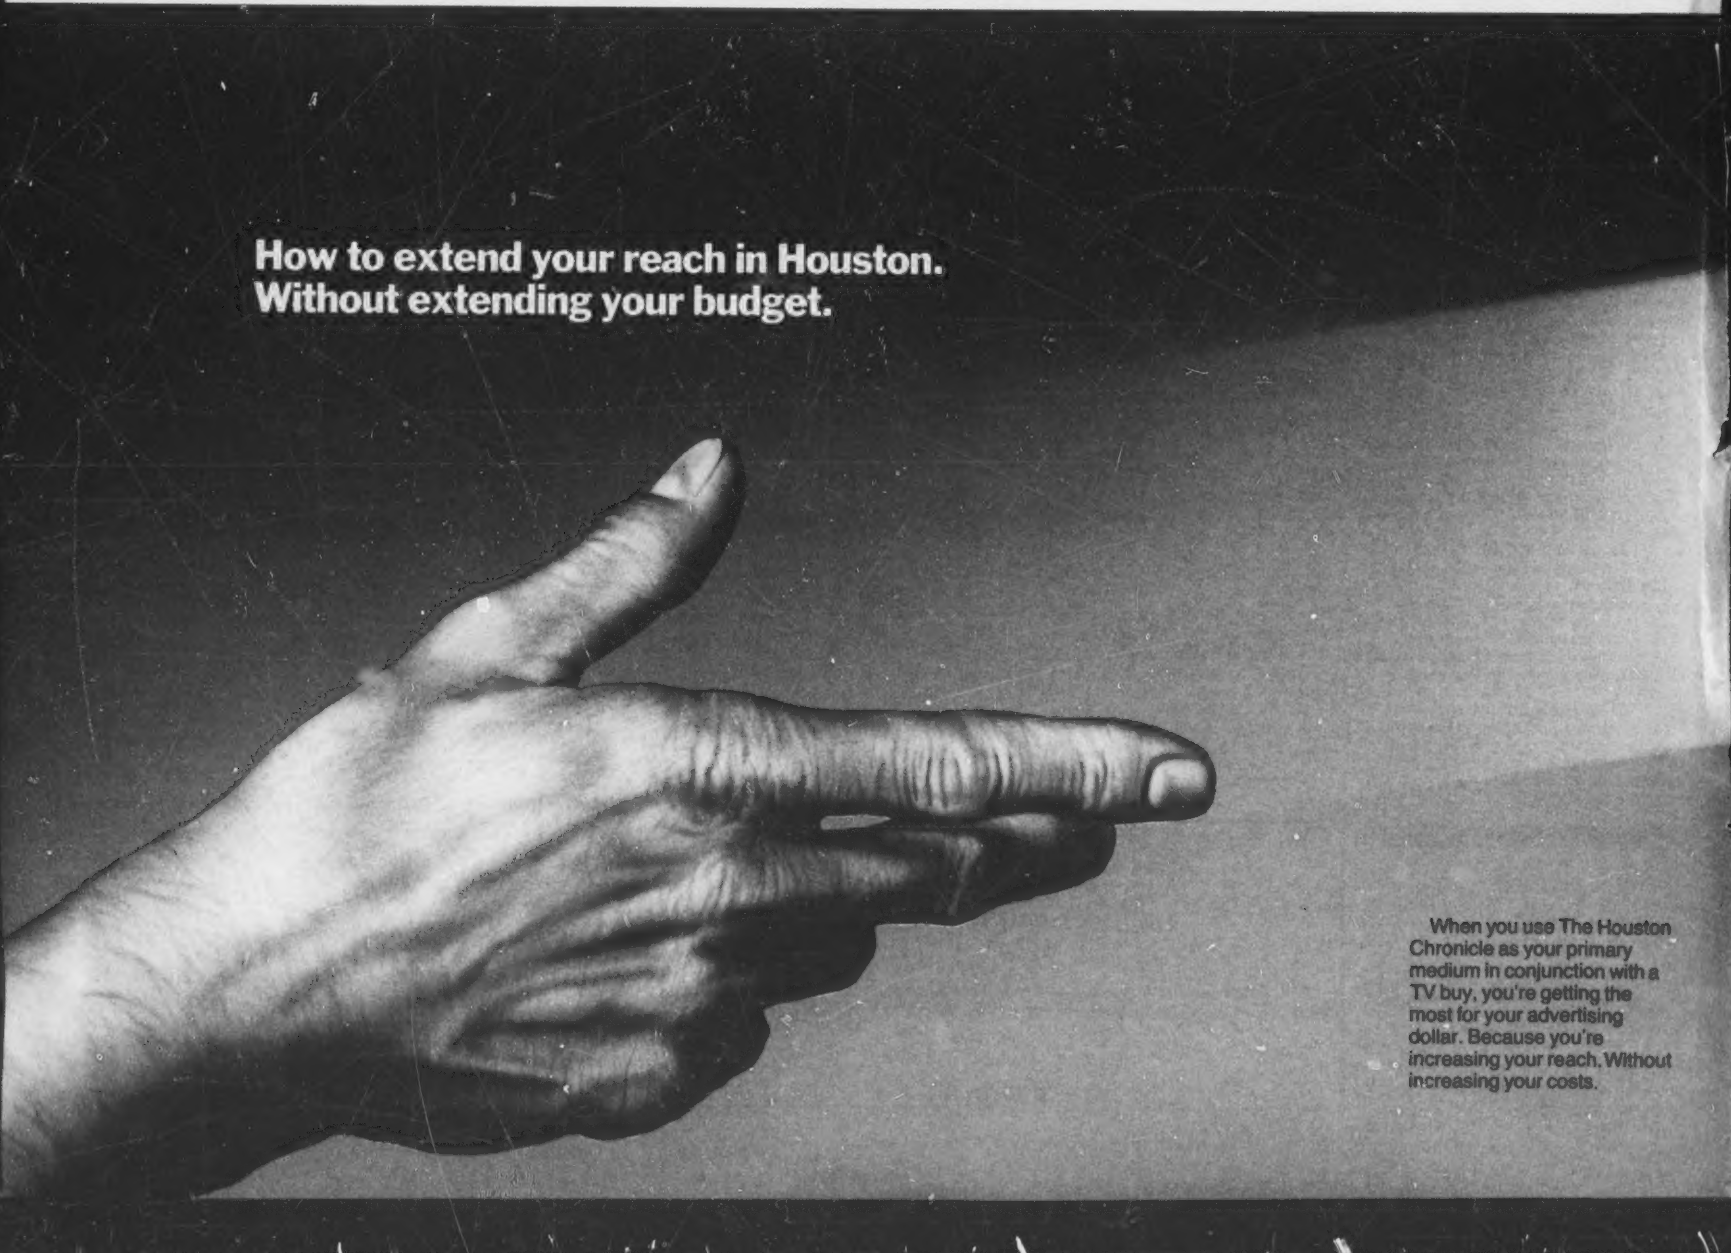
The company's domestic George Killian Irish Red Ale, which has been on the market since 1981, is being repositioned this year to compete more directly with the import beers. Its current campaign, by FCB, proposes "Kil-lian's Red, Instead . . ." of gre [illegible] tled beers from abroad.

Coors is hoping that its new premium-price brew, Golden Lager—introduced into the market in 1983 with a campaign tagged "The Fresh Competition" by Tatham-Laird & Kudner, Chicago—will attract drinkers who don't buy Coors Premium and Coors Light, both lighter-tasting beers. Golden Lager has a much heavier taste and is priced directly against Anheuser-Busch's Budweiser.

Despite the disappointing reception of Coors new beer products, other new products are to follow.

Coors hints it is considering a low-alcohol beer, but hedges on details. "Everybody has worked or is working on a low alcohol beer, but it is just not yet clear that it will be profitable," Mr. Klugman said. "It's had good distribution and good trial, but it has not shown strong repeat."

However, he said, "Everyone is



How to extend your reach in Houston.
Without extending your budget.

When you use The Houston Chronicle as your primary medium in conjunction with a TV buy, you're getting the most for your advertising dollar. Because you're increasing your reach. Without increasing your costs.

aware that it is a possibly strong emerging segment."

As Coors continues its expansion, industry observers contend it has yet to face a decided disadvantage over the majors. Coors has only one brewery—in Colorado—while the other beer majors operate a brewery in the Sunbelt.

Analysts estimate that costs of shipping from Colorado into the Southwest is $7 to $8 per barrel, compared with a normal $3-per-barrel cost. While Coors officials dispute those figures, they say that, for the moment, shipping by rail is satisfactory. In the event it decides to build a second brewery, Coors continues to hold an option on land aptly located in Rocky Mountain, Va.

Earnings*	N/A	N/A
U.S. Advertising	69,955,000	47,659,000

*Worldwide **Estimated combined sales of Cosmair and Warner

Cosmair Inc., New York, which plans to double its advertising in 1984, increased ad expenditures 46.8%, to $70 million, in 1983 to rank as the 87th largest national advertiser.

In business and marketing news, 1983 was the year of the merger and the year of the mousse, and Cosmair scored banner headlines on both counts.

The privately held U.S. agent and distributor for L'Oreal and Lancome cosmetics dramatically broadened its reach across the domestic cosmetic counter with the purchase of Warner Cosmetics, a subsidiary of Warner Communications. And Cosmair was first to introduce a mass market hairstyling mousse to domestic consumers, getting a lead in that new category that competitors continue to run hard to beat.

Cosmair purchased Warner Cosmetics in January, 1984, for $146 million and in doing so bought a significant and ready-cut niche in the U.S. cosmetic marketplace.

In 1983, Cosmair's sales reached $330 million in the U.S. Warner sales grew to about $150 million for the year. Combined, the two present a formidable challenge to 1983 industry leaders Avon, with an estimated $850 million in sales; Revlon, with about $800 million in domestic sales, and Estee Lauder, with about $550 million.

The Cosmair-Warner combination is expected to draw as much as $600 million in sales for 1984, much of the growth attributed to three major product thrusts in the past year supported by record ad budgets for the company.

In L'Oreal brand activity, the bulk of advertising and marketing money was placed behind L'Oreal eye, lip and nail color cosmetics, $17.2 million, up from $7.7 million in 1982, and Preference hair color products, $7.9 million, the same as 1982.

Projected advertising for those two products and sizable outlays for L'Oreal's new Free Hold styling mousse introduced in February will generate over-all media ad spending of $45 million in 1984, compared with the $30 million in measured media in 1983 as monitored by Leading National Advertisers. L'Oreal also is spending heavily in tv on lipstick and eyeshadow in 1984, a pace to continue into 1985 when L'Oreal will add a new mascara commercial.

Cosmair expects to increase the $45 million expenditure "substantially" in 1985 as well, though not by the same 50%, the source said.

In the past year, the two-year-old L'Oreal color cosmetics line was repackaged and restaged with a cohesive department store-style packaging and advertising look as opposed to the previous drugstore line appearance.

Free Hold styling mousse, the first mass market mousse in the U.S., was introduced originally in one formula but quickly was expanded to two styles —regular and extra hold—to remain competitive in a market suddenly flooded by entries from aggressive competitors such as Alberto-Culver and Helene Curtis.

The Lancome brand of color cosmetics will spend more than $20 million on advertising in 1984, a company spokesman said. The measured media buy for the brand in 1983 was $7.5 million, an increase of 60% over 1982. That budget is expected to increase at least 25% and include tv advertising for Nutribel, Progres Plus, Forte-Vital (launching this fall) through 1985.

Lancome also will spend an undisclosed amount on the scheduled March, 1985, introduction of a new Biotherm brand of treatments for body and face.

Biotherm has been marketed in Europe for several years and will be positioned in the department store-style packaging in the U.S., Cosmair said. Kenyon & Eckhardt of New York will handle the new product introduction.

From Warner in 1984 came the introduction of the Paloma Picasso fragrance bearing the name of the daughter of the Spanish artist. Warner anticipated spending at least $1.3 million in 1984 advertising the new product, which sells for as much as $160 an ounce.

Further activity in fragrances are expected to include introduction of a new Ralph Lauren men's fragrance. Total advertising on Ralph Lauren, Polo and Vanderbilt brand cosmetics and fragrances topped $9.5 million in 1983.

As a result of the Warner acquisition and other developments, a major corporate staff reorganization by Cosmair was scheduled to be announced in early September.

Earnings*	136,200,000	231,609,000
U.S. Advertising	96,627,300	96,700,000

*Worldwide.

Although CPC International's earnings plunged during 1983, advertising expenditures remained fairly constant at the Englewood, N.J.-based conglomerate, which spent an estimated $96.6 million on advertising in 1983. That made it the 71st largest national advertiser. Worldwide advertising was $181.5 million.

Worldwide sales dipped slightly to $4.011 billion from $4.092 billion in 1982, a decrease of 2%. CPC attributed the decline to a strong dollar. Sales outside the U.S. are $2.486 billion, or 62% of total sales.

Earnings, which plummeted 41% from $231.6 million in 1982, to $136.2 million, also were hurt by the currency exchange rates. But CPC's decision to rebuild two of its major manufacturing facilities, a corn wet milling plant in Argo, Ill., and a mayonnaise and other oil-based product plant in Bayonne, N.J., resulted in a $55 million after-tax charge. This was the major factor in the company's drastically reduced earnings. CPC's sales and earnings were affected less dramatically by dollar losses in corn wet milling, one of its major business lines.

The grocery products area, which includes soups, sauces and bouillons, mayonnaise and corn oil, bread spreads and starches, syrups, desserts, cheese, baking and other goods, accounted for 58% of the company's

The Chronicle
TV, Radio, Other

Source: Belden Multi-Media Study, 1983. Based on 26 30-second spots on local network affiliates, BAR estimates, versus three SAU 12 1,000-line Chronicle ads at 25,000-line national contract rate plus 15 30-second spots. Represented by Sawyer Ferguson Walker.

sales and 77% of operating income. Keeping with the trend of past years, sales growth of foodservice products for restaurants, hotels, schools and other establishments outpaced sales of products for home use.

CPC is the largest corn miller in the world, producing a wide range of products used by paper, corrugating, confection, processed foods, chemical and pharmaceutical, baking, brewing and soft drink industries.

While dollar sales from CPC's corn wet milling business dropped to $1.5 billion in 1983, a decrease of 1% from 1982, the unit sales increased. Worldwide income from this segment of the business dipped to $90 million, one-third lower than the previous year.

As part of its effort to rebound after 1983's difficult year, CPC is upgrading its production facilities, broadening its two major lines of business through acquisitions and restructuring the company, forming eight new divisions, including a worldwide division for corn wet milling, a diversified unit that includes U.S. businesses in chemicals, foundry products and contract packaging, and six divisions for grocery products—set up according to geographic regions.

In 1983, CPC made four acquisitions, including one that will have an impact on its grocery products area and its U.S. marketing and advertising expenditures. CPC acquired C.F. Mueller Co. (pasta products) last fall from Foremost McKesson Corp. for $122 million. CPC hopes to take Mueller from its East Coast base into the national market.

The other acquisitions included one in the corn wet milling area, a grocery business in Denmark and one in Colombia.

CPC's products aimed at the home market garner the major share of the company's ad dollars. CPC's Best Foods business features many strong branded products, including Skippy peanut butter, Mazola corn oil, Karo corn syrup and Hellmann's and Best Foods mayonnaise. These products, in competitive areas, carry heavy ad expenditures.

Mazola oil was backed by slightly more than $10 million in measured advertising, with more than $7 million spent on network tv. Hellmann's and Best Foods mayonnaise were backed with nearly $8 million in measured spending, with nearly three-fourths of that figure going to network tv. The ads for Hellmann's sought to reinforce the product's value and quality as well as explain its multiple uses. This message also was carried in print advertising for the mayonnaise, which carried photos of different potential uses of the product and recipes.

Sales of Skippy peanut butter held with 1982's levels and ad expenditures were similar with 1982 levels, as well. CPC spent about $6.9 million advertising Skippy, stressing its nutritional value and its low sugar content.

CPC's specialty baking business in the U.S, S.B. Thomas Inc., experienced a 5% increase in sales as it continued to expand distribution and production of its English muffins. Ad expenditures for Thomas' remained flat, at 1982's level of $7 million. However, $10 million has been budgeted for 1984.

In 1983, CPC ran tv spots using the slogan "the original one and only funny looking, tasty cooking Thomas' English muffins" in spot tv as the distribution of Thomas' expanded from 53% of the U.S. to 70%. New markets were in the Northwest, Midwest and Florida.

During the year, CPC increased its use of spot tv, newspapers and outdoor media, but expenditures on network tv and magazines decreased.

Measured expenditures on spot tv rose 15%, to $15.5 million, and newspapers rose 13%, to $965,700. Both these increases are seen as part of CPC's efforts to be more responsive to local markets.

People weekly performs

"People helped make Stetson the big success of the '80s."

—Joseph M. DiPietro
Group Marketing Director
Coty Division/Pfizer Inc.

Expenditures on outdoor advertising soared to $1.1 million in 1983, more than twice the amount spent the previous year; magazine spending dropped 22.8%, to $7.9 million.

CPC changed agencies for several of its major products, moving the Hellmann's/Best Foods mayonnaise account from Dancer Fitzgerald Sample to Ogilvy & Mather, and switching the Mazola corn oil account to DFS from D'Arcy McManus Masius.

Dart & Kraft

	1983	1982
Sales*	$9,714,000,000	$9,974,000,000
Earnings*	435,100,000	350,300,000
U.S. Advertising	210,279,360	199,195,000

*Worldwide

Dart & Kraft, the nation's 30th largest advertiser in 1983, increased ad spending to $210.3 million, up 5.6% from 1982.

The company had 1983 net earnings of $435.1 million, up 24.2%, on sales of $9.714 billion, a decline of 2.6%. D&K again was dominated by its food products segment, which accounted for 69% of Dart & Kraft sales and 58% of operating profit.

For the second year in a row, Kraft's most heavily advertised food brand was Velveeta cheese. The processed cheese line, promoted in ad campaigns as having superior cooking qualities, received $15 million in measured ad support in 1983, less than a 1% increase over 1982.

The U.S. government's free cheese distribution program cut into Kraft cheese sales by reducing consumer purchases, the company said. The program, which gave away more than 550 million lbs. of cheese during the year, reduced total industry tonnage by more than 3%.

Kraft extended its cheese lines with the acquisition of Churny Co., an importer and producer of specialty cheeses with annual sales of $20 million. The acquisition signaled Kraft's entrance into the specialty cheese business, a high-growth market segment.

The company continued to expand its line of Philadelphia Brand pourable dressings, which were introduced nationally in early 1983. Philadelphia Brand cream cheese salad dressings received $5.6 million in measured ad spending, up from $560,400 in 1982, with the largest amount of ad dollars going to spot tv.

Kraft also increased its ad spending 18% for regular Kraft pourable dressings, to $10 million. The dressings hold an estimated 70% market share, said analyst Leonard Teitelbaum at Merrill Lynch.

After consumer research showed a preference for bacon-flavored dressings, Kraft expanded its line in early 1983 with Creamy Bacon, Buttermilk & Bacon and Reduced-Calorie Bacon & Tomato dressings. The latest introductions to the pourable dressings line are Kraft Thousand Island & Bacon and Taco salad dressings, introduced in early 1984.

Advertising for Kraft real mayonnaise spread the word about the "creaminess" of the product, which was supported by $8.5 million in ad spending, up 2.7% from 1982. Market share for 1983 was about 60%.

The company boosted ad spending for Miracle Whip salad dressing 39.4%, to $12.2 million. "A sandwich just isn't a sandwich without the tangy zip of Miracle Whip salad dressing" was the theme of the advertising, which was concentrated in network and spot tv. The company also supported the product with a Miracle Whip salad dressing contest and a mail order promotion.

A 1984 addition to the fast-growing Kraft barbecue sauce line was Thick 'n Spicy barbecue sauce, in original and hickory-smoked flavors, which is "spicy right out of the bottle and thick, both before and after cooking," the company said. Ad spending for Kraft barbecue sauce rose from $113,400 in 1982, to $1.8 million in 1983.

Kraft introduced its Light n' Lively low-fat yogurt in a convenient six-pack in 1983. The entire Light n' Lively yogurt line was supported by $1.4 million, up 27%, in measured ad spending, all of which went to spot tv. The new six-pack yogurt line continues the dairy group's emphasis on value-added products. Breyer's yogurt, playing on the strong Breyer's quality image, received $1.4 million in media spending, the same as in 1982.

Kraft dairy group also continued market expansion for ice cream and cultured products. Breyer's ice cream, a premium brand, attracted $3.4 million in media spending, up 10% from 1982. Sealtest ice cream also is being elevated to premium status, and received $3.5 million in media backing in 1983, up 21%.

In the first quarter of 1984, Kraft entered into an agreement to acquire Celestial Seasonings of Boulder, Colo., the largest U.S. manufacturer and marketer of herb teas. Kraft said the product quality and brand strength of the Celestial Seasonings line fits Kraft's strategy to acquire companies with expansion potential. Purchase price was not disclosed. Kraft said it will operate the tea company as a free-standing unit of its retail food group.

Early 1984 saw the loss of Justin Dart, executive committee chairman of Dart & Kraft. He died Jan. 26 at the age of 76. Mr. Dart was chairman of Dart Industries when that company merged with Kraft in 1980. He had served the company as a director for more than 40 years.

A leader in innovative media use, Kraft this spring tested the first interactive tv commercials in a network show, using Warner Amex Cable Communications' Qube cable system in Columbus, O. Homes subscribing to Qube received four 90-second test commercials for Kraft recipes, carrying a superimposed message instructing viewers to "touch in" for a copy of the recipes.

Dart & Kraft's consumer and commercial products group, made up of Duracell Inc., Hobart Corp. and West Bend Co., posted a sales increase of 16% and an operating profit increase of 43% for fiscal 1983.

Duracell Inc., the leading producer of high-performance consumer batteries worldwide, continued strong ad spending support for the Duracell batteries line, which received $20.6 million in ad dollars, $17.5 million of which was in network tv. Duracell holds a 60% share of the U.S. alkaline battery market. It is in constant battle for market share with Union Carbide's Eveready batteries. D&K's $20.6 million in measured media for Duracell in 1983 was the same as in 1982. The Eveready line was being backed by $22.4 million in measured spending at Union Carbide.

Duracell's Durabeam line of portable lighting products, introduced in early 1983, was supported by $2.3 million in ad spending, mostly in network tv.

Hobart's KitchenAid segment accounted for 23% of total 1983 Hobart sales. Ad spending for KitchenAid dishwashers was $4 million in 1983, a 5.3% increase over 1982. KitchenAid food mixers were supported by $273,000 in ad spending in 1983, all of which was in magazines, and ad support for KitchenAid food processors was boosted 209%, to $645,800. KitchenAid introduced in 1983 its first solid-state dishwasher, the KDSS-20 Selectra, targeted at the upscale segment of the market.

West Bend Co., widening its focus to include physical fitness, acquired the Total Gym line of home physical fitness equipment in 1983. West Bend also announced an agreement to acquire Precor Inc., a manufacturer of premium line rowing machines, exercise bicycles and running machines.

West Bend's sales and operating profits declined, due in part to withdrawal from the retail cookware and humidifier business, the company said. A new cordless iron is being introduced by West Bend and is expected to be available in retail outlets in the fourth quarter of 1984.

Tupperware International, Dart & Kraft's direct-selling unit, reported a decline in both sales and operating profit in 1983, results affected by exchange rate translations and a reduction in U.S. dealers. Ad spending for Tupperware housewares increased 62.1%, to $3.9 million, mostly in magazines.

The Tupperware Modular Mates line of compact, stackable containers, introduced in 1983, became Tupperware's largest-selling line. New products included Big Wonders and Little Wonders storage containers, Flavor Saver container and Velveeta Keeper. In the spring of 1984, Tupperware launched a consumer sweepstakes contest designed to boost Tupperware party attendance.

Delta Air Lines

	1983*	1982*
Sales*	$3,616,413,000	$3,617,523,000
Earnings*	(86,700,000)	20,814,000
U.S. Advertising	63,944,300	49,328,000

*Worldwide, fiscal years ended June 30.

Delta Air Lines, Atlanta, the 92nd largest national advertiser, increased its ad spending 29.6% in 1983, to an estimated $63.9 million.

Sales for the carrier were down slightly in 1983, to $3.6 billion, while earnings tumbled deep into the red, showing the first loss for the airline in its 36-year history. Long known for its ability to best archrivals in financial performance, the carrier finally succumbed to the effects of unfriendly skies.

Although passenger traffic in fiscal 1983 was up 7%, stiffened competition, a soft economy in the first half of that fiscal year, and severe discounting took a serious toll on the carrier's balance sheets.

For fiscal 1984, however, the company showed signs of returning to its historichealth.

Last October, to fend off further losses attributed to the poor economy, deeply discounted fares and increased competition, Delta sought to reposition itself in the marketplace with a major new advertising campaign by BDA/BBDO.

Delta has come under increasing competitive pressure in the West from Continental Airlines and the rebirth of Braniff Inc. To some observers, it seemed the design of the campaign partially was to play off the instability of archrival Eastern Air Lines, based in Miami.

The effort, which marks Delta's first extensive use of network tv, emphasizes its financial health, excellent maintenance record and uninterrupted systemwide flight operations. Although Delta's marketing venture has led industry observers to label the airline a conservative carrier—the new campaign is hard-hitting. And in addition to addressing newly reorganized competitors, it also takes on expanding regional airlines, such as Southwest Airlines.

In route improvements, Delta stepped up flight schedules from Dallas/Fort Worth and D/FW feeder markets, adding service to such cities as Portland, Ore.; El Paso, Tex.; Ontario, Cal.; Richmond, Va.; Albuquerque, N.M., and Norfolk/Virginia Beach/Williamsburg.

Additionally, it continued to add nonstop flights to 15 existing markets. From the Dallas/Fort Worth area, Delta increased its flights to a number of cities, including New York's LaGuardia, Austin, San Antonio, Kansas City, Oklahoma City and wide-body service to Houston. Additionally, the company introduced nonstop flights to Frankfurt, West Germany, from D/FW four times a week.

Du Pont

	1983	1982
Sales*	$35,378,000,000	$33,331,000,000
Earnings*	1,127,000,000	894,000,000
U.S. Advertising	102,637,000	92,912,000

*Worldwide

E.I. du Pont de Nemours & Co., Wilmington, Del., which posted $1.13 billion in net income in 1983, up 26% from 1982, was the nation's 67th largest advertiser with total estimated advertising expenditures of $102.6 million, a 10.4% increase over 1982.

Du Pont returns came from sales of $35.4 billion worldwide, 73%, or $25.8 billion of which, is in U.S. business. Total sales increased 6% over 1982, while U.S. sales were up 10%.

For the year, five of the company's eight industry segments experienced an increase in sales: Marketing and transportation rose 11.3%, to $16.8 billion; fibers jumped 15.2%, to $4.7 billion; industrial and consumer products rose 2%, to $2.54 billion; polymer products rose 11.5%, to $3.4 billion, and biomedical products rose 2%, to $1.05 billion.

Three divisions had sales declines: Agricultural and industrial chemicals, down 5.4%, to $3.5 billion; petroleum exploration and production, down 12.2%, to $1.8 billion, and coal, down 12.5%, to $1.4 billion.

Du Pont's measured advertising spending in 1983 increased 8.5%, to $50.2 million.

Du Pont fibers attracted much of the advertising dollars. Du Pont Antron carpet fibers drew $7.3 million in measured spending, 95% of which was in magazines and 5% in newspaper supplements. Dacron fibers drew $4.6 million, Du Pont Lycra, $5.3 million, and a general Du Pont fiber category (aerobic wear, Speedo, Jantzen) drew $1.5 million.

Last fall, the company began a series of marketing promotions to boost sales of carpeting woven with Antron. The company gave away some 50,000 home computers to consumers who bought carpeting containing Antron. This spring, it launched a pre-sale rebate program where customers could get coupons for as much as $200 off on Antron-woven carpeting.

This fall, carpet buyers will be given coupons for $100 off on the purchase of an AT&T telephone, said Bill Spencer, carpet division marketing manager.

Direct, consumer-oriented marketing promotions such as this represent a new direction for Du Pont but, "our marketing research has shown we're making a contribution to the carpet industry in this area," Mr. Spencer said. "As long as it shows we contribute, we'll continue the activity."

Other fiber division marketing included sponsorship of a tennis tournament at Hilton Head Island, S.C., to market Du Pont's line of sports apparel fibers.

This year, denim blue jeans containing Du Pont's stretch polyester cotton blend, "Denimotion," has been the subject of a tv ad campaign.

Spending continued strong for Silverstone and Teflon products. Silverstone, the stick-free coating for cookware, drew $7.5 million in measured advertising, and Teflon attracted $4.1 million for its coating, carpet protector and stain repellent products.

The polymer products division continued to hammer away at new and developing markets in the auto and packaging industries. Two engineering resins, Delrin and Rynite, were introduced in 1983 in the automotive and appliance finishes industries, and Selar, another resin, was introduced in 1983 as a replacement for metal and glass in blow-molded containers.

A continuing trend toward the use of plastic rather than metals in packaging is creating substantial new markets, a Du Pont spokesman said.

Also hitting the market last year was the acetal resin, Delrin ST, for use in durable gears, bearings and exterior hardware.

Last fall, Du Pont announced a major breakthrough in polymer design called group transfer polymerization. The process could lead to development of new, stronger, more scratch-resistant acrylic plastic, but a commercial product is still "three to five years away," the spokesman said.

Agricultural and industrial product sales sagged 6% last year from 1982 despite a turn to profitability for the weed-control herbicide, Oust. Glean, introduced in 1982 along with Oust, is expected to turn a profit this year. Ally and Londax, two new herbicides, are scheduled to make their debuts this year for use on overseas cereal crops and rice.

Major developments in industrial and consumer products included initial construction of a new development and manufacturing facility for electronic products at Research Triangle Park, N.C.; high-speed coating facilities for graphic arts films at Parlin, N.J., and expanded capacity for chromium dioxide at Newport, Del. In 1983, Du Pont also entered into a joint development agreement with Storage Technology Corp. of Louisville, Colo., for development of an optical disk.

A new laboratory for biomedical product and instrument systems was opened at Glasgow, Del., and a new pharmaceuticals process development facility was opened at Jackson Laboratory, Deepwater, N.J. Also, the company has allocated a significant portion of its $173 million in capital expenditures over the past two years for construction of a new life sciences facility near Wilmington, Del., scheduled for completion this year.

In petroleum, Du Pont trimmed its debt by $600 million with the sale of chemical assets stemming from the $6.8 billion acquisition of Conoco Inc. Measured ad spending was only $859,800 for Conoco.

Eastern Air Lines, Miami, which emerged from a difficult 1983 as the 86th largest national advertiser, increased its ad budget 22% to an estimated $70 million in an effort to counter increased competition.

The airline slipped from No. 1 to No. 2 in terms of passengers carried in 1983, according to company sources. This contributed to losses of $183.7 million, compared with losses of $74.9 million the previous year. Revenues increased nearly 4.6%, to $3.9 billion.

The carrier, overburdened financially when it entered the fierce competition of a deregulated industry, has not shown a profit since 1979. Yet, despite threats of filing for Chapter 11 under the Federal Bankruptcy Act that surfaced late in 1983, Eastern has taken steps toward regaining its health, largely due to new labor programs.

Through the first half of fiscal 1984, Eastern had accumulated losses of $59.7 million, compared to a first half loss of $94.4 million a year earlier. Revenues for the six-month period were $2.16 billion, compared to $1.96 billion in 1983. Air traffic control-related delays cost the airline $15 million in extra expenses in the second quarter of 1984 when losses totaled $24.1 million, according to chairman Frank Borman. Delays were primarily in the northeast, but the costs were spread out because the delays affected the entire system.

The much-publicized labor disputes in 1983 were countered by Eastern's $70 million ad campaign, launched in January. Themed "Wc earn our wings everyday," the effort replaced the four-year-old "America's favorite way to fly," featuring Mr. Borman as spokesman. The new ads feature various Eastern employes, and that employe involvement also reflects new ownership structures at the airline. Some of the new ads continue to feature Mr. Borman.

Under an agreement with its employes, which Eastern said it needed if it were to avert bankruptcy, most employes gave up 18% of their pay in exchange for 25% of Eastern's common stock. Employes also received 3 million shares of junior convertible preferred stock and representation on the board of directors.

Improved employe relations also are being credited with Eastern's successful establishment of its new Kansas City hub. Set in place last December, the hub is said to exemplify new flexibility among Eastern workers.

The Kansas City hub, which was expected to become profitable this summer, provides the airline with a strong midwestern base. Its prime competitor in the market is Trans World Airlines, whose midwest base is St. Louis.

The company is so pleased with its operation there that recently it introduced ads in feeder markets, inviting travelers to compare its Kansas City service to other areas, according to William Dowse, vp-advertising.

Other developments at Eastern include the addition of a San Jose/Costa Rica route in May of this year, strengthening its presence in South and Central America, which it entered two years ago. Additionally, in April it introduced a $2.5 million Hispanic ad push themed "Wings of America."

Cable spending for the carrier was about $3.1 million in 1983, according to Mr. Dowse, and will remain at about that level through this year, largely through the company's sponsorship of the Atlanta Braves on WTBS, the Turner Broadcasting System superstation.

Eastman Kodak Co., the 47th largest national advertiser, spent an estimated $141.3 million on advertising in 1983, a 1% decline from 1982.

Sales and earnings continued to be sluggish for Kodak. In 1983, sales were down 6%, to $10.17 billion. Earnings from operations declined 45%, to $1 billion. Net earnings showed the steepest decline—a 51% drop, to $565 million in 1983.

It was a year of recovery for Kodak, one that saw its entry into a number of new product arenas—from motion picture products and photography to 8mm video to floppy disks for personal computers. Concerning the latter analysts are concerned that Eastman Kodak may be straying too far from the company's field of dominance.

Kodak juggled its advertising media mix during the year, hiking spending in newspapers, magazines and spot tv, while reducing network tv by 11%. Spending in network radio also declined more than 50%.

Kodak film received the largest advertising expenditures—a little more than $40 million, up from $17.3 million. Most of this went to network tv. Similarly, the second biggest expenditure—$28 million—was spent on Kodak disc photography camera and film, mostly for network tv. Kodak photographic paper received $6.2 million in media advertising, $5.3 million went to network tv.

During 1983, sales of the company's photographic products declined 9%, to $8.09 billion. Significantly, record sales in the U.S of $4.78 billion—a 2% increase over 1982—were offset by a decline of 22% outside the U.S.

Within the U.S., retail sales of Kodak disc cameras increased, but total shipments from the company were lower when compared with the strong introductory and inventory-building year of 1982. Sales of the Kodacolor disc film also were up sharply. The company said the introduction of its line of Kodacolor VR films with speeds ranging from 150 to 1000 ASA was received with great enthusiasm.

In January, 1984, Kodak entered the world of video imaging with the announcement of its 8mm video-camera recorder and a complete line of videocassettes. Kodak marketing executives were quick to point out that the 8mm video recorder (called a camcorder) was not meant to compete with the traditional Beta and VHS video recorders in the market. It was in a market by itself, taking over from the 8mm film format generally used for the home. The 8 mm system will be available on the market by late summer.

Sales of Kodak instant cameras and films declined in 1983 although the Kodamatic Trimprint instant color film introduced at midyear performed better than the others. The company spent $2.7 million in media on Trimprint products, all in magazines.

For the professional and finishing markets, Kodak introduced a new professional video analyzing computer (PVAC) that accurately simulates color photographic prints by scanning negatives or transparencies and displaying the electronic picture on a high-resolution screen. The readings then are translated into digital data compared with optimum densities and color balances to help a photographic paper printer obtain consistent results.

In the graphics markets, worldwide sales were lower in 1983. However, the company was encouraged by its increased sales in the U.S. and Europe. In domestic markets, Kodak Ultratec products were introduced, providing the industry with an important breakthrough in prepress photographic technology.

Late in 1983, Kodak introduced two new medical X-ray films for the health sciences market. This year, it plans to make its Kodaflex products generally available.

The motion picture and audiovisual markets registered a slight decline in sales primarily because of poor sales to nonentertainment markets. Kodak is confident that the introduction of videocassettes for the consumer market as well as professional videotape will provide this segment of the company with increased revenues in the coming year.

In the business systems division, Kodak experienced strong revenue gains for its copy products as well as excellent growth of sales in its computer-output microfilm systems. The company was especially enthusiastic about sales of its Ektaprint 200 copier duplicator and Komstar microimage processor.

The chemicals division rebounded from its poor showing in 1982 to a 7% increase in sales of $1.84 billion. The encouraging results were attributable to a strong showing for acids and anhydrides and healthy increases in solvents sales, cellulose esters and health and nutrition products. Textile fibers also showed an improved sales performance.

*Worldwide

Ford Motor Co., Dearborn, Mich., the seventh largest national advertiser, increased advertising 23.8% to an estimated $479.1 million in 1983, a year when profits replaced losses.

Ford posted worldwide earnings of $1.87 billion, compared with a loss of $657 million in 1982—the largest one-year turnaround from a loss position in U.S. corporate history. Worldwide sales rose 20%, to $44.4 billion in 1983.

The profit picture reversal was staged mainly in the U.S., where net income came to $1.5 billion, against a loss of $1.1 billion the preceding year.

Chairman Philip Caidwell said the strong U.S. performance was led by the new Thunderbird-Cougar and Tempo-Topaz cars. Both vehicles used aerodynamic styling in an effort to set the styling apart from competition.

Ford's U.S. market share continued to increase. Ford's U.S. sales of 1,671,837 autos gave the company a 17.2% market share, up from 16.9% a year earlier. Truck sales rose to 31.3%, from 30.6%, on sales of 993,874. Chevrolet beat Ford for the 1983 model year bragging rights on truck sales, but Ford regained the lead for the calendar year.

Ford bankrolled the sales with in-

creased advertising expenditures that included $172 million in network tv, up from $126 million a year earlier. Magazines got $80 million, up from $58 million, as Ford, like Chrysler, imposed rate, location and circulation rules that in isolated cases resulted in less advertising in magazines that did not comply. Spot tv grew to nearly $38 million, from $20 million, as Ford tried for more regional impact. Ford corporate advertising was estimated at $53 million, up slightly from $51 million in 1982.

As usual, Ford divisions claimed the bulk of the total ad budget—$210.9 million, up 31% from 1982.

Among the company's two divisions, Ford division measured spending included $148 million on tv, up 38.3%. Magazine spending climbed to $43 million, from $31 million. Spot radio fell to $14.6 million, from $17.6 million in 1982.

Measured ad spending at the company's other division, Lincoln-Mercury, increased 34.5%, to $74.8 million, with the biggest increase in tv—$53 million, up 33.5%. Magazines rose 30.4%, to $18 million.

Lower earnings in Europe triggered rumors of agency shakeups—J. Walter Thompson USA was said to be vulnerable on the continent with its $45 million in Ford billings. But the movement came at executive levels of the client. James Capolongo, president-chief operating officer of Ford of Europe, resigned in June, 1984, in an apparent dispute with Robert A. Lutz, exec vp-international.

Ford division stepped up its aggressiveness in ad claims. It one-upped the corporate ad claim that "Quality is Job 1" by asking, "Have you driven America's best-built cars and trucks?"

The "best-built" claim was added for 1984 to the carry-over theme line, "Have you driven a Ford lately?" If the tag was long, the controversy was longer. Chryler Corp. challenged Ford's claim with the Federal Trade Commission and Better Business Bureaus in vain. Ford's claim was based on a study of reported flaws in new cars over the first three months of ownership.

Chrysler then replied with its own "best-built" claim, using the number of safety recalls as a measure. General Motors Corp. followed with a corporate ad citing insurance industry data on car crashes, showing seven of ten "best" models were GM's.

Ford pushed out in a number of new directions, in marketing, media and ad creativeness.

Marketing was directed more specifically toward the young, upwardly mobile professionals, who are the cream of the baby boom, especially on big-ticket items.

"We have products with qualities that happen to align with the prejudices of [yumps]—aerodynamics, comfortable interiors, higher quality and a European look," said Mark McNeely, manager of advertising strategy for contemporary markets.

Ford chose youthful spokesmen for Tempo tv commercials, skater Dorothy Hamill and football stars Joe Montana and John Riggins. The spots closed with "Tempo, the car designed to do everything a modern car should. It just looks better doing it."

Ford supplemented its traditional Bill Blass designer-editions models with more youthful and sporty looks, an Eddie Bauer Bronco II and a Thunderbird tied to Fila sportswear.

Like other domestic auto makers, Ford has a special marketing effort aimed at California, a traditional bellwether market where import penetration is close to 50%. Ford division took over in 1983 as the best-selling combined car and truck nameplate in the state, based on R.L. Polk registration data.

Ford captured a 23.5% share of the California truck market and 10.7% of passenger cars. Stephen C. Taylor, California marketing manager, set a 1984 goal of 26% truck and 11.5% to 12% car share. Ford division and its California car dealers association backed that with a $1.5 million to $2 million ad campaign designed for the state by the San Francisco office of J. Walter Thompson USA.

Ford division also added Burrell Advertising, Chicago, to its agency list after two years of minority-specialist work on a project basis. Ford targeted special ad efforts to blacks and Hispanics. The Hispanic effort ties Ford to Hispanic regard for tradition and family, with shots of an Escort as a graduation gift, closing, in Spanish, with "from one family to another."

Ford branched out in media also. One of the early experimenters with cable tv, Ford increased its cable spending to $3.8 million in the first nine months of the year, compared with $2.1 million for the similar period in 1982, making it the eighth largest spender on the BAR Cable TV Network Report tally.

Ford tried its first fiber-optic outdoor display with a Thunderbird shot with a caption that alternated between "Thunderbird" and "Wonderbird." The 75-by-25-ft. board is located at the intersection of two Detroit freeways, visually fronting GM headquarters. T-bird advertising was measured at $35.1 million.

While direct mail isn't new to Ford, the size of a "VIP Program," inviting 406,000 executives and professionals to test drive a Thunderbird for a day, was. Ford said results showed 10% of those who accepted said they'd buy a T-bird and 84% said they'd recommend it to a friend.

The tightest race for Ford division was an early-year challenge from GM's Oldsmobile. Olds crept up on Ford division's position as the No. 2 nameplate behind Chevrolet for the first five months of 1983, with Fairmont out of production and Tempo just introduced. But Ford rebounded to its accustomed second slot with the arrival of Tempo in normal volume. Measured ad support of about $28 million backed Tempo.

Lincoln-Mercury division continued to broaden its marketing image in 1983, showing more distinction between the two nameplates and preparing for the 1985 debut of a third line of Ford of Europe imports called Merkur.

Mercury's separate ad campaign for 1984 targeted younger, better educated and more affluent buyers, stressing functional performance and handling with long-copy ads and a cerebral theme line: "Mercury. A more enlightened approach."

The hot-selling aerodynamic-styled Cougar, which added a zippy XR7 turbo version for 1984, got the most measured advertising as the division's image leader—about $24 million. It was portrayed as a sophisticated performer rather than a muscle car. One print ad called it "One car that asks to be judged on more than merely its ability to accelerate."

After a splashy April, 1983, debut, Topaz got strong ad support for 1984, with a series of tv spots focusing on individual engineering features. Ad spending for Topaz for the year was $19.6 million. L-M also tagged tv with an invitation to call a special 800 telephone number for additional information, its first such effort. It was tested in five western states, then rolled out nationally.

Mercury advertising was aimed at import-intenders for 1984, but likely will swing more directly opposite Japanese imports this fall when the first Merkur (pronounced: MARE-koor, from the German word for the Roman god of trade, Mercury) models arrive to challenge upscale European imports.

L-M projects 1985 sales at 20,000 for its Sierra XR4Ti, a high-equipment version of a Ford of Europe car. It will be sold as a separate line in L-M dealerships. At least one more model will follow for 1986. L-M intends to build Merkur to 100,000 annual sales by 1990, more than any other European importer currently sells here.

Lincoln sticks to its traditional luxury market, but even it addresses competition from European luxury carmakers. A Euro-style version of the Lincoln Continental Mark VII introduced in November, 1983, was advertised heavily in car enthusiast magazines. The new Mark VII, borrowing heavily in styling and mechanics from the Thunderbird/Cougar, dominated Lincoln marque advertising for '84. Media ad spending for the Continental hit $7.4 million.

Lincoln got a full 30% of L-M ad spending because of the Mark VII and spent a fifth of it on a multiletter direct mail campaign designed to get potential buyers behind the wheel for test drives. The program followed a pilot in late 1982.

Lincoln media spending limited itself to upperdemographics magazines and business newspapers, all targeted at this high-income buyer pool.

Mercury media included tv with a heavy sports programing bent, but even there the long-copy theme was evident. Except for the Topaz engineering feature series, all tv was 60 seconds.

With both nameplates, the newer models were pushed and older models largely ignored, with varying results. Capri got slightly more than $1 million in media, and sales of the aging Mercury variant of Mustang fell sharply. The large Mercury Grand Marquis and Lincoln Town Car sold out with minimal advertising as gas shortage fears evaporated.

Ford Tractor operations tried tapping three new market segments as the division struggled to resume its place as a major profit center for the corporation.

Agricultural and construction categories continued to be depressed in an industry slump in 1983.

Ford Tractor fought back with a new lineup of redesigned large tractors in the spring of 1983 and followed in early 1984 with an ad campaign pitched at women.

Ford discovered women drove farm tractors more than previously thought—and made half the purchase decisions. Tractor controls and auxiliary power takeoffs were redesigned to appeal to women. And ads directly pitched to women as partners in farming followed instructions to dealers to treat women more as professionals.

Ford also pitched smaller tractors to parttime farmers, a fast-growing segment, with a $500,000 radio and print campaign via Fleishman-Hillard, Kansas City.

And in early 1984, suburbanites were targeted for an expanded line of lawn mowers, garden tractors and snow blowers with an ad campaign 2½ times bigger than the previous budget through regular agency Meldrum & Fewsmith, Southfield, Mich.

In personnel changes, Edsel B. Ford II, great-grandson of founder Henry Ford, moved to Ford division ad manager from marketing product plans manager in December. He replaced Douglas T. McClure, who became ad manager of the Ford corporate marketing staff, a vacant position.

Earnings*.....	2,024,000,000	1,817,000,000
U.S. Advertising	196,506,600	159,000,000

*Worldwide

General Electric Co., Fairfield, Conn., the 32rd largest advertiser in the U.S., increased its over-all advertising spending 23.6%, to an estimated $196.5 million in 1983.

The substantial increase can be attributed, in part, to the economic recovery and a renewed increase in consumer spending.

Among measured media, GE dramatically increased its spending in newspapers, up more than 100% from 1982. The year saw increases of 21% in magazine spending, 28% in spot tv and 26% in network tv. The only decreases were in network radio and outdoor.

The increases, while substantial, follow on the heels of drastically reduced spending in measured media in 1982.

GE has shifted its advertising focus away from image-specific advertising and now is placing a greater emphasis on the value-added services of its products.

Richard A. Costello, manager-marketing communications programs, late last year estimated that the weight between product advertising and its then image campaign was 50-50. The split for the fourth quarter of 1983 was altered to better reflect its new focus—50% in product, 30% in services and 20% in image.

As part of its shift, GE has moved away from tv spots crammed with vignettes to individual commercials that are minidramas with a single story line. Later this year, GE will launch its first corporate-level, business-to-business ad campaign in nearly 30 years.The $5 million effort, handled by Chiat/Day, New York, is designed to serve all of the company's various operations.

Earnings in 1983 rose 11% to slightly more than $2 billion, while sales continued to be relatively flat—up 1%, to $26.797 billion.

Earnings for the first quarter of 1984 were $485 million, up 14% from the first quarter of 1983. Sales for the quarter increased 8%, to $6.58 billion, from the comparable quarter of 1983.

The past year marked a time of both consolidation and acquisition for GE. The company sold its natural resources subsidiary, Utah International, to the Broken Hill Proprietary Co. Ltd. of Australia for $2.4 billion—less the value of certain properties that GE retained.

It also sold its housewares business to Black & Decker for $300 million; its Family Financial Services, a second-mortgage subsidiary of General Electric Credit Corp. to the Philadelphia Savings Fund Society for $600 million, and sold for $81 million seven radio and tv stations, thereby divesting itself of all but one—its Denver tv franchise. The company continues to operate 12 cable systems.

The sale of these properties is consistent with GE's new strategy of paring down those operations that are not in keeping with the over-all business strategy, which is to become No. 1 or 2 in market share in each business in which it is involved.

This strategy has evolved to where the company now is focusing on being No. 1 or 2 in 15 businesses in three distinct areas: High technology, services and its six core businesses (major appliances, lighting, turbine, transportation, motor and tractor equipment).

With the extremely strong cash position that GE currently enjoys, there has been much speculation as to the company's desire to make a major acquisition. In response, GE publicly has said it is taking a wait-and-see attitude and that the cash has given GE the flexibility to provide added funds for internal development.

The company, however, is not sitting idly by. In 1983, it spent more than $500 million on 62 acquisitions, joint ventures and other investments. These include Calma, a West Coast maker of computer-aided design machines; 3M's ceramic business, and North American Cars, a tank car leasing business.

In the consumer products sector, GE's 1983 revenues increased 6.5%, to $6.4 billion. Net earnings increased 36%, to $326 million.

On the new-product front, GE introduced a line of telephones featuring cordless and combination clock/radio models, a 22-cubic-ft. refrigerator, the 2800 PermaTuf dishwasher with electronic controls and the Command Performance tv line.

GE also has entered into a three-way battle with Eastman Kodak Co. and RCA for the 8mm video camera market.

The system, which made its debut in January, includes an 8mm camera and playback system in a package. Both the GE and Kodak cameras are being manufactured by Matsushita Electric Industrial Co. Hitachi is making RCA's equipment. The GE system sells for about $1,500.

The RCA system is the only one that is compatible with standard videocassette recorders. Both the GE and Kodak systems can be adaptable with the purchase of accessories.

GE products that received $1 million-plus in measured advertising in 1983 included GE can openers, coffee makers, dishwashers, light bulbs, major appliances, rechargeable battery system, space-maker appliances and GECC Financial Services.

The most heavily advertised products, according to Leading National Advertisers, were light bulbs for home use with $10 million-plus in support; dishwashers, $6 million, and Toast-R-Oven, nearly $2 million.

Early this year, GE switched its estimated $3 million-plus major appliance business group to Symon & Hilliard, New York, from BBDO. The company named J. Walter Thompson de Mexico to handle its $900,000 appliance account there. GE has done no advertising in Mexico for the past two years.

The company also geared up to support its Summer Olympic buys. Last November, it assigned Howard/Marlboro Group to develop a multi-million-dollar sales promotion campaign that included a tv viewing guide.

*Fiscal years 1984 and 1983 ended March 31.

General Foods Corp., White Plains, N.Y., the 10th largest national advertiser, reduced its ad spending 10%, to an estimated $386.1 million in 1983.

The decrease is attributed in part to a 50% decline in measured advertising for the company's pet food division (brands: Gaines, Gravy Train, Cycle, Top Choice) to $9.8 million, and a decline of 24% in ad spending on Post brand cereals to $44.6 million.

The continued cuts in the Gaines pet foods division's advertising was a prelude to the sale of the division in June, 1984, to Anderson, Clayton & Co., a Houston-based food company. For some time, industry analysts had rumored that GF would move out of the pet food business.

The company saw its worldwide sales rise 4% in fiscal 1984, ended March 31, to $8.6 billion. Earnings rose 10%, to $317 million, in the same period.

GF continued the aggressive stance in new product introductions and company acquisitions that it has been pursuing the past several years. The company expects that 15 products, now in various introduction stages, have the potential to add up to $600 million in net revenues once the products are rolled out nationally.

Early this year, GF acquired Ronzoni Corp., makers of pasta, spaghetti and seafood sauces, egg noodles, Italian frozen entrees and grated cheese. GF hopes to create a complete Italian food products business by expanding into other Italian food specialties using the established Ronzoni name.

In other main meal products, the Birds Eye line of vegetables received a new packaging look. The company is looking to tie together its many varieties with a cleaner look and more consistency, and to present the vegetables in a top quality light.

While advertising for Birds Eye frozen vegetables decreased 40% from 1982 to $2.5 million last year, spending for the Birds Eye line of International vegetables jumped to $1.3 million from $9,000 in 1982.

Spending for Birds Eye Cool Whip and its tie-in with Jell-O Pudding and Pie Filling decreased 8% to $8.9 million, although not nearly the decline of 42% registered in measured spending by the product's major category competitor, Dart & Kraft's La Creme Frozen Whipped Topping, whose measured spending in 1983 was $6.8 million.

In the beverage area, the big news continues to be aspartame-sweetened drinks. The over-all market for powdered soft drinks grew by 13% last year, and GF was firmly in the fray with Sugar Free Kool-Aid, Crystal Light and Country Time lemonade. The company expects the first two products to generate more than $300 million in sales.

The advertising support is present. Last year, GF spent $8.3 million on Kool-Aid presweetened mix and $8.8 million on Kool-Aid presweetened sugar-free drink mixes. Measured spending on all Kool-Aid brands was $26.4 million. The company says Kool-Aid has a 64% share of the powdered beverage business.

Crystal Light, which rolled national this spring, saw its advertising shoot up from $435,000 in 1982 to $6.7 million last year. Both Crystal Light and the sugar-free Kool-Aid are aimed at adults; Crystal Light's spokeswoman is Linda Evans, who with other fitness-conscious adults, reinforces the theme, "I believe in Crystal Light because I believe in me."

A restaged Country Time also rolled national this spring, as did a new sugar-free Country Time lemonade. The brand's advertising dropped from $2.8 million in 1982 to $19,000 last year.

GF is testing a sugar-free Tang, and an improved regular Tang is poised to make its debut. Young & Rubicam will handle the $25 million reintroduction. And under both the Tang and Kool-Aid names, the company is testing products packaged in aseptic containers. Some $6.7 million in measured advertising was spent on Tang brands.

In the dessert portion of packaged convenience foods, Jell-O gelatin pops have been rolled to 35% of the country. Swirl variations of the original have been added and Jell-O fruit & cream dessert bars are in test markets. Sugar-free Jell-O gelatin is now available in half the country.

Jell-O, a high ad budget brand, attracted $38.3 million in measured spending, with the big dollars going into Jell-O Frozen Pudding Pops ($12.4 million), Jell-O Gelatin Dessert ($11.1 million), and Jell-O Pudding and Pie Filling ($8.4 million).

The packaged grocery products segment was GF's healthiest in fiscal 1984. Net sales rose 12%, to $3.79 billion. Earnings grew 10%, to $470.7 million.

Coffee (Brim, Maxwell House, Maxim, Sanka and Yuban) is the leading product in this sector. Measured spending for all coffee products was $65 million, with Maxwell House garnering $29.8 million, Brim, $18 million, and Sanka, $13.6 million.

Early this year, GF's first new coffee entry in three years appeared on the West Coast. Consumers there now can sample Yuban decaffeinated coffee. The advertising, by Benton & Bowles, emphasizes the brand's "deep, dark and Colombian" taste.

On the heels of the Yuban introduction, the company unveiled a decaffeinated version of Maxwell House. The brand will be available nationally, except on the West Coast. Advertising, by Ogilvy & Mather, will concentrate on the Maxwell House heritage of "good taste."

GF already has two other decaffeinated products, Sanka and Brim. Analysts wonder whether the two new entries will cause some erosion in the sales of the existing brands, but GF says the Maxwell House entry will appeal to a younger consumer—30-plus, as opposed to a 40-plus market for Sanka.

The decaffeinated segment is the one that promises the most growth in the stagnant $4.5 billion coffee market. GF's actions are expected to goad competitor Procter & Gamble into speeding up its introduction of either a High Point vacuum ground version or a decaffeinated Folger's ground coffee.

In flavored coffees, GF introduced a new flavor, Cafe Irish Creme, to its line of International coffees. And early this year Le Cafe, a premium, ground roast coffee, was introduced to the West Coast. The product is available in cinnamon, mocha and amaretto flavors. According to trade estimates, the International coffee line has been growing at an annual rate of almost 45%.

Ron Morrow, an analyst with Smith Barney Harris Upham & Co., says GF is aiming for "higher margin and higher growth products; ones that offer consumers fresh, quality food with ease of preparation."

The company's acquisition trail also took it to the purchase of the western division of Oroweat Foods, owner of nine bakeries. This provides a line of bread and roll products and will enable GF's Entenmann's sweet goods to complete its expansion; at the end of fiscal 1984, Entenmann's was available in more than 40% of the U.S.

The one disappointing area was the company's breakfast food division. GF introduced several new Post cereals in fiscal 1983 and achieved growth both in volume and in market share. But in fiscal 1984 the brand's volume declined; the company attributed the decline to greater competitive advertising and promotional spending.

Post's cereals saw measured ad spending plummet in 1983, from $58.5 million to $44.6 million. Post Raisin Grape Nuts dropped from $10.6 million to $1.4 million; Post Grape Nuts dropped from $11.6 million to $7.4 million; Fruit & Fibre went from $10.9 million to $6.6 million; Honeycombs from $4.3 million to $2.5 million; Pebbles fell from $4.5 million to $2.9 million; Raisin Brand, however, increased from $5.8 million to $6.7 million. And new Honey Nut Crunch Raisin Bran got $6.3 million.

The company notes that in fiscal 1985, breakfast foods, "an important foundation business," will be strengthened by stronger marketing and prod-

uct development programs.

In prepared meats, GF's Louis Rich turkey product's line drew $5.2 million in measured spending, up 33%, but Oscar Mayer branded products dropped 12% in ad spending to $10.7 million.

Of the company's $284 million in measured ad spending, the largest share went to network tv—$170 million. But that was a 27% decrease from 1982. The spot tv ad spend remained relatively constant.

In the first nine months of 1983, figures available from the Cabletelevision Advertising Bureau had GF spending $8.6 million in wired tv, up from $6.9 million in 1982.

General Mills

	1983	1982
Sales*	$5,600,000,000	$5,550,300,000
Earnings*	233,400,000	245,100,000
U.S. Advertising	268,690,200	244,363,700

*Worldwide, fiscal years 1984 and 1983 ended May 27

General Mills, the nation's 23rd largest advertiser in 1983, increased its ad spending 10%, to $268.7 million.

The company had net earnings of $233.4 million in fiscal 1984, down from the previous year's $245.1 million, on sales of $5.6 billion, up less than 1% from 1983.

During the year, General Mills increased its measured media advertising portion of its ad budget 9%, to $242.1 million, with major expenditures in spot tv ($113 million, up 5%), network tv ($100.3 million, up 7.2%), and magazines ($25.5 million, up 44%), according to Leading National Advertisers.

Leading the media expenditure list of products were Big G cereals on which $72.7 million was spent during 1983, down 2.8% from 1982.

The slight decline in measured media spending for cereals apparently did not hurt General Mills' position in the over-all market. The company currently holds about 23.4% of the $3.7 billion ready-to-eat cereal market, according to Drexel Burnham Lambert, up from about 23.1% last year.

During 1983 and the first seven months of 1984, General Mills concentrated its new cereal introductions on children, providing national distribution to Cinnamon Toast Crunch, Pac-Man and E.T. cereals in the highly competitive presweetened cereal category. Pac-Man, the only one of the trendy cereals to receive media spending in 1983, gleaned $5.1 million from the General Mills budget.

Last fall, General Mills briefly entered Orange Blossom cereal into Chicago and other limited markets on a single sell-in basis, the same trial marketing basis it used for Strawberry Shortcake cereal before it went national.

Meanwhile, the Big G division substantially dropped spending on some of its earlier cereals, including Donutz (only $2,400 in 1983) and Buc-Wheats ($270,400). Spending for Crispy Wheat 'n Raisins declined from more than $5 million in 1982 to about $3.3 million last year.

The company also entered limited test markets, including Eau Claire, Wis., and Pittsfield, Mass., with aspartame-sweetened Trix cereal, the third aspartame-sweetened cereal marketed in the U.S. (Quaker Oats Co. markets Halfsies; General Foods' Post unit is testing aspartame-sweetened Alpha Bits.) In Canada, General Mills launched Pro-Stars aspartame-sweetened cereal, using Edmonton Oilers hockey star Wayne Gretzky as its spokesman.

The company's Wheaties cereal basked in the warmth of consumer awareness as a result of its "Big Boys" campaign, which began in June, 1983. Measured media was $4.8 million.

Like other cake mix and flour marketers, General Mills late last year was hit by the controversy over the presence of ethylene dibromide (EDB) in some of its products and was forced to pull some cake and muffin mixes and Gold Medal flour and Bisquick from store shelves in various states.

The company said its research suggested there was some falloff in demand for its cake mixes and possibly Bisquick as a result of the EDB scare, but it could not prove a direct relationship between soft sales and the scare. General Mills said there was virtually no effect on sales of its Gold Medal flour, which it supported with a minimal $782,000 in media spending.

General Mills met rising competition from Procter & Gamble in the fast-growing, $130 million muffin mix category by entering nationally two new Betty Crocker muffin mix flavors—apple cinnamon and tart cherry—just as P&G moved cross-country with Duncan Hines banana nut and spicy apple.

The Betty Crocker baking mixes, including chocolate-chocolate chip cake mix introduced last year, maintained second place behind Procter & Gamble's Duncan Hines mixes.

In the face of new competition by Procter & Gamble's Duncan Hines ready-to-spread frosting, Betty Crocker Creamy Deluxe frostings were reformulated with butter last fall, at the same time No. 2 Pillsbury reformulated its product with all vegetable shortening.

But General Mills' share of the $220 million frosting market slumped to 43%, from about 47% before the Duncan Hines introduction, while the P&G brand picked up about 15% of the market.

Measured ad spending for Betty Crocker canned frosting declined from about $3.3 million in 1982 to $2.3 million in 1983.

The Golden Valley division this summer introduced nationally Chicken Helper sauces and side dishes, an extension of its Hamburger and Tuna Helper lines, in a campaign calling it "a new way to dress up your chicken." The company also entered a four-item line of Betty Crocker stuffing mixes, to be advertised this fall.

Last fall, General Mills formed a new "wholesome snacks" division to handle Nature Valley and Fruit Corners products. The unit is headed by Stephen Warhover, former vp-general manager for the Betty Crocker division.

The company continued its focus on health and nutrition with its national introduction late last year of Chewy Granola Bars, an extension of the Nature Valley line and a product competitive with the Quaker Oats product of the same name. For the first time since General Mills opened up the now $350 million cereal meal bar category, the Nature Valley line fell to second place in the over-all retail market during fiscal 1984, as a result of Quaker's success with Chewy and chocolate-covered Dipps.

Also in an apparent response to Quaker's success, General Mills in April rolled national with chocolate-flavored Granola Clusters, backed by free-standing newspaper inserts calling it "Granolas' answer to chocolate candy." Total spending on the Nature Valley line was $18.9 million.

In the $126 million dried fruit snacks segment, General Mills completed a national rollout of Fruit Corners Fruit Roll-Ups. The product, geared to children, now is being joined in national distribution by Fruit Corners Fruit Bars, a four-item line of candy-bar-style dried, pressed fruit, targeted to young adults. Fruit Bars was tested about a year in Eau Claire, Wis., and Midland, Tex., where a third Fruit Corners product, Snackin' Fruit, entered test market in late December or early January.

The company's Gorton's of Gloucester unit increased measured ad spending 56%, to more than $4.4 million during the year, to promote its new light seafood lines, including a new line of Light Recipe entrees, which extended the company's fish sticks and fillets line introduced last year, and Fish Marketfresh, individually packaged pieces of frozen fish fillet, apparently intended to meet market competition from category leader Van de Kamp, which last year introduced a similar product, Today's Catch.

Ad spending for Yoplait yogurt rose to $7.47 million, up from about $4.8 million last year, as General Mills, No. 2 in the market behind Gervais-Danone's Dannon line, moved Breakfast yogurt into national distribution beginning last summer. Breakfast yogurt alone was backed by an estimated $2 million in measured spending through the end of calendar 1983. General Mills also added new strawberry-banana and pina colada flavors to its line this summer.

The company had several management changes in its consumer foods unit last fall. In October, Steven

Life Insurance Company of Georgia

Rothschild, formerly president of Yoplait USA, was named exec vp-consumer foods for Yoplait USA, Betty Crocker division and European food operations, succeeding Preston Townley, who resigned. Charles D. Weil, formerly vp-general manager of the marketing services division of consumer foods, succeeded Mr. Rothschild. Stephen Demeritt, formerly marketing director for the Golden Valley division, succeeded Mr. Weil.

Michael Cushmore, former vp-general manager of the Northstar division, was named to the same title in the Betty Crocker division, and Steven Sanger, former marketing director for the Big G division, succeeded Mr. Cushmore.

Last fall, General Mills sold its Memphis-based Donruss bubble gum unit, which marketed Super Bubble and Color Bubble single-piece bubble gums, to Huhtamaki Group's Leaf Inc.

Red Lobster Inns last year began implementing a new design concept intended to give customers a more casual and leisurely environment. About 25% to 30% of the chain's 370 units were set to be converted this year to the new design, which includes an oyster bar and open mesquite grills. Menu changes emphasizing fresh and healthy foods also are under way, with the addition of *a la carte* items and more grilled and lighter seafood entrees.

This spring, Red Lobster also rolled out seafood pasta entrees, which had been in Memphis and Milwaukee test markets since the beginning of 1984. In an effort to increase its share of the lunch business, Red Lobster late last year began advertising a "10-minute on-time" lunch guarantee.

Red Lobster moved its estimated $30 million ad account in January to Backer & Spielvogel, New York, from D'Arcy MacManus Masius, St. Louis, citing the need for "more aggressive marketing strategy" to compete with full-service restaurants. Sources said the move also was provoked by D'Arcy's strong concentration on another client, Anheuser-Busch.

Also in its restaurant group, General Mills promoted its Casa Gallardo Mexican restaurants with a tv, radio and print campaign, themed "Spice it up," that began last fall. Using the chain's founder, Ramon Gallardo, as spokesman, the campaign ran in the 34-unit chain's markets. D'Arcy MacManus Masius, St. Louis, resigned the Casa Gallardo account after losing Red Lobster, and the assignment moved to Grey Advertising, New York. Less than $1 million was spent on the Casa Gallardo account last year.

The company pared its York Steak House chain to 130 units during 1983, closing 20 "out-of-position and low-volume" units. Restaurant group president Joe Lee told securities analysts York will be repositioned from its current budget steakhouse niche to a "low price point, high-variety restaurant concept" that can better compete with Ponderosa, Sizzler and other chains that already have diversified menus. Advertising for York adopted the mouthful tag line "Bettermorebiggernicer."

The company also worked to upgrade its newer restaurant concepts—the 40-unit Good Earth healthy-foods chain and its 35-store Darryl's turn-of-the-century pub concept. This summer, a new Good Earth prototype design featuring more limited seating was unveiled.

In the toy group, Parker Bros. continued to concentrate on a limited line of strong game titles in its software unit. Three major titles—Frogger II, Montezuma's Revenge and Mr. Do!'s Castle—were introduced in June and will enter the market this fall, backed mainly by spot tv and some print in youth, computer and game magazines.

Those games follow the spring debuts of the company's Star Wars arcade game, Gyruss and James Bond 007 games.

Parker Bros. expanded its children's book publishing venture with Rose Petal and Cabbage Patch book lines, introduced nationally in February, and titles were added to the Strawberry Shortcake and Care Bears lines.

New lines, including Huddles, licensed from the National Football League, are expected in September, and other lines will be available next February.

The company introduced its first children's music album—Cabbage Patch Dreams—in February; the album received a gold record award from the Recording Industry Assn. of America in July. A Rose Petal Place album followed this summer. The recordings are available in records, tapes and cassette book combinations.

The Nerf line was expanded with Nerf pool, now being introduced nationally, and Nerf baseball items.

In January, Parker Bros. purchased Pente, an adult strategy game, from Pente Inc. and in February introduced People Weekly, a trivia game. Both a board and a card game with Cabbage Patch licenses were introduced during the year.

Body Boggle, a party game played on a mat, was introduced in February, backed by a $400,000 tv campaign, using the company's umbrella theme, "Parker Bros. kind of fun brings people together."

Also in the toy group, the company introduced in February a line of Rose Petal scented dolls with characters licensed by Kenner Products much like the company has done with the Strawberry Shortcake and Care Bears.

Kenner now is rolling out Flip Crashers, a line of toy racing cars that fall apart when they crash. Super Powers figures, based on "Superheroes," were introduced earlier this year.

The company's successful Star Wars toy line was expanded with new toys based on the "Return of the Jedi" movie.

The fashion group showed declines primarily from an earnings decline at Izod. General Mills is promising "aggressive marketing and merchandising programs supporting new and updated lines" to stabilize Izod, which commanded media spending in 1983 of $4.6 million.

Last fall, General Mills was sued by Toys "R" Us, Rochelle Park, N.J., which charged that the Izod sportswear division conspired with Federated Department Stores to prevent Izod apparel from being sold to Toys "R" Us' new Kids "R" Us discount clothing division.

Toys "R" Us eventually dropped the suit.

In the midst of declining earnings for Izod LaCoste during fiscal 1984, General Mills moved the estimated $2 million Izod ad account from Grey Advertising to Scali, McCabe, Sloves, New York.

The Izod line was expanded with accessory items and a broader line of emblem-bearing sportswear and an increased selection of clothing for women and children.

The specialty retailing unit, long a weak link in the company, is increasing the number of units in its Talbots, Eddie Bauer and Wallpapers To Go units and expanding the LeeWards concept to include a wider selection of merchandise.

The company improved results at Wallpapers To Go units by closing several "out-of-position and low-volume" stores, leaving the chain with 87 units.

After splitting with Foote, Cone & Belding, San Francisco, in the first quarter of the 1984, the long-ailing Wallpapers To Go chain named Ketchum Advertising, San Francisco, to its account, which dropped to less than $800,000 in measured media in 1983, from $2.2 million the year earlier.

According to Broadcast Advertisers Reports, General Mills spent $6.3 million in cable advertising during the first nine months of 1983, up from $2.3 million for all of 1982.

*Worldwide

General Motors Corp., Detroit, the fourth largest national advertiser, increased 1983 ad expenditures 8.2%, to an estimated $595.13 million on record sales and earnings.

Worldwide earnings rose from $962.7 million to $3.73 billion on sales of $74.6 million, which were up 24% from the previous year. U.S. sales, which rose 31.5%, to $66.16 billion, represented 88.7% of the worldwide sales.

The year, termed a "turnaround" by chairman Roger Smith, was marked by a major reorganization that reshaped the giant into big-car and small-car groups or upscale and downscale groups. The year also saw government approval of a joint venture with Toyota to make cars in California and implementation of an import car strategy with its partially owned Japanese partners, Isuzu and Suzuki.

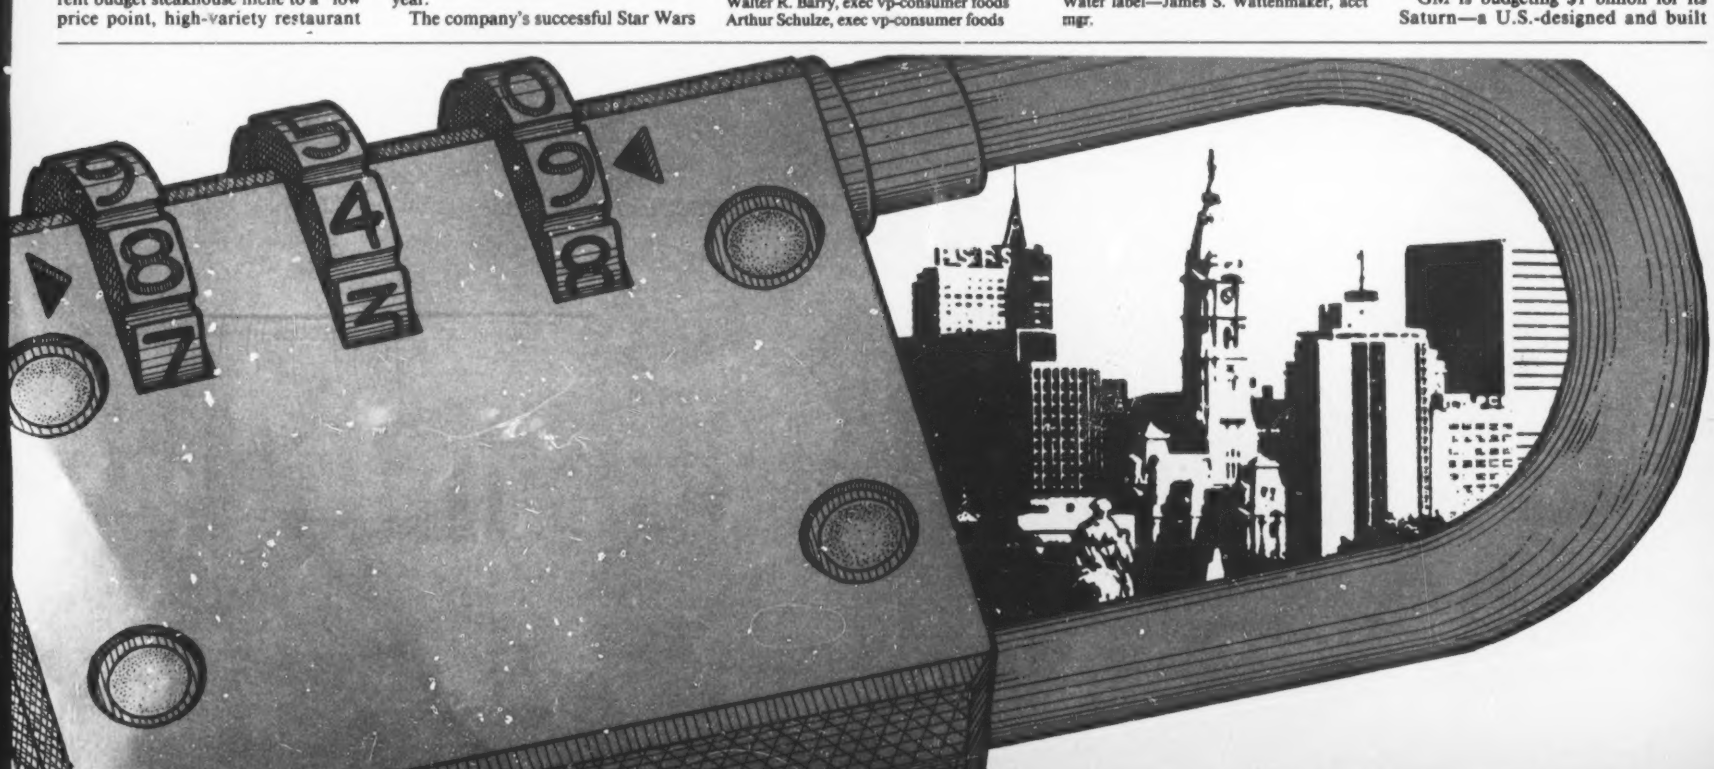
Some of the cheers during the 75th year of the company's operations were for the record $3.7 billion in profits on record sales of $74.6 billion. General Motors Acceptance Corp., the financing unit, accounted for more than $1 billion in net income alone. That topped the previous high of $688 million the year earlier.

None of GM's increased advertising went to communicate the new GM reorganization, which the corporation had kept secret until late December. The new structure put Chevrolet, Pontiac and GM of Canada in the small-car group and Buick, Oldsmobile and Cadillac in the large-car group.

Each car group will be responsible for the development of new vehicles, with the divisions surrendering some engineering and manufacturing responsibilities to concentrate on sales and marketing. There can be some swapping of products between the groups, but the aim is to give each division a clearer and more separate identity. GM divisions also will be allowed to buy cars from outside the corporation (Cadillac plans to assemble a European-designed sports car), and GM may be building domestically designed cars overseas.

For instance, GM started to market Japanese-made subcompacts with Chevrolet names in Puerto Rico (followed by U.S. introduction). A Korean-made small car for Pontiac was designed by GM's Opel unit in Germany. In addition, GM is pushing its new GM Overseas Distribution Corp., which markets U.S.-made cars overseas.

GM is budgeting $1 billion for its Saturn—a U.S.-designed and built



small car. Project Saturn envisions a sweeping integration of design and engineering within GM divisions. The car, which will be sold by Chevrolet, is to compete with Japanese small cars. "If we can't compete in small cars, we can't compete period," Mr. Smith said. Saturn is tentatively set for the 1988 model year.

Elaborating further on small cars, he described the GM-Toyota joint venture to build a small car as a stopgap measure and a means of learning Japanese production techniques. The joint venture vehicle is due out later this year.

GM was allowed to import token numbers of the small Suzuki Sprint and Isuzu Spectrum, but plans large volume as import restraints are lifted or changed next spring.

The rosy sales and profit picture in 1983 stemmed from burgeoning unit sales. The U.S. total soared 16% over 1982, to 5.3 million vehicles, while the overseas total rose 9%, to a record 1.9 million vehicles. GM accounted for 9% of overseas industry sales and inched closer to leader Ford Motor Co. in Europe. Sales in the U.S. were paced by record results at Buick and Oldsmobile, with the Olds Cutlass Supreme continuing as the best selling U.S. car. GM got 43% of the U.S. market, the same as last year. Canadian sales climbed 17%, to more than 1 million vehicles.

GM's over-all ad expenditures in the U.S. rose 13% among the media mix in 1983. Network tv buys went to $201.4 million, up 23% from 1982. Magazines got $89.0 million, up 3%; spot tv got $25.7 million, down 5.7%; network radio got $9.41 million, up 19%; and outdoor fell to $4.18 million, down 16%.

It looks like GM will have plenty to celebrate in 1984 with record first-quarter earnings of $1.6 billion on record sales of $22.9 billion. The results were fueled primarily by an increase in auto sales, a factor especially welcome to Chevrolet, which had been hard hit as the recession froze out its lower income purchasers.

After four years of sharp declines, Chevrolet sales rebounded in 1983. Sales were up 6.9%, from 1982's 1.4 million units. The resurgence was thinner than the 18% 1983 gain of all domestics, however.

Paralleling the industry, the big cars came back strong as the economy recovered and fuel shortage fears eased. Caprice and Monte Carlo unit sales were up, smaller Chevette and Citation unit sales were down. But front-wheel-drive compact Cavalier and intermediate Celebrity, "relaunched" with a big advertising push, posted the greatest gains in 1983 and into the 1984 model year. The Cavalier line attracted $21.8 million in media expenditures in 1983, and Celebrity $15.1 million.

Chevrolet increased ad spending to an estimated $178 million, from $155 million in 1982, as it battled slumping sales. The biggest expenditure went to network tv: $93 million, up from $76 million in 1982.

Two new U.S. models were added for the 1984 model year, a station wagon version of the Celebrity in the fall and a new Corvette early in the spring. Advertising was subdued for the wagon ($1.1 million in measured spending), but image-setter Corvette got the full treatment, including a 90-second tv spot with computer graphics, termed "Never Before."

The four-door, midsize Malibu was dropped for 1984, although the G-body coupe, Monte Carlo, continued with a sales increase.

Stung by continued publicity for numerous safety-related recalls of GM's X-car family, Chevrolet dubbed the carryover model "Citation II" with ads relating the changes made since the original 1980 model. But sales of the once-popular car fell further amid an ongoing federal trial charging that GM delayed making brake remedies. Advertising worth $6.7 million was bought in support of Citation passenger cars.

Chevrolet went big for tv sports in the 1984 model year, including 43 World Series spots, automotive exclusivity for the 1984 Winter Olympics, heavy buys for the Summer Games in Los Angeles and largest single sponsorship for the 1984 Super Bowl.

A marketing shift was reflected in GM tv buys for the World Championship of Women's Golf, a tie-in with Bonnie Bell cosmetics for the Boston 10-kilometer women's race, "wine-and-cheese" parties for women at Chicago dealerships and other tie-ins with Jordache jeans and Kraft Foods.

"Women will play greater and greater roles in purchasing vehicles," said Stephen McAvoy, manager-passenger vehicle advertising. Chevrolet research shows women buying three of ten cars themselves, a figure projected to rise. The division responded by increasing spending for women's magazines in 1984.

Part of Chevy's Winter Olympics airtime was used in a "tribute" to Olympics team members, combining action-slide shots of all the athletes taken at practice locations around the world with original music.

With one-fourth of GM's 48 minutes of commercial time on the "George Washington" miniseries, Chevy elected to combine existing footage into one, two and three-minute "pods" rather than run 24 30-second spots. Actor Ken Howard and actress-tv host Sarah Purcell traded banter to tie the short commercials together and lend continuity to the pods.

The S-10 Blazer dominated the compact sports utility segment, with sales of 106,214 trucks in 1983, ahead of Ford Bronco II's 63,178 units. Chevy backed the little Blazer with a high-glitz commercial showing it overcoming the four ancient elements: Earth, water, wind and fire. The media buy was $16.7 million.

In 1983, Buick showed increases in both unit sales and market share. Total Buick unit sales were 845,083, a 16.9% increase. Models with the largest sales increases were the Skylark, rising 55.5%, to 72,998 in 1983, and the Century FD, 150,280, up 50.5%. Market share rose to 9.2%, compared with 9.06% in 1982.

Buick ad spending rose in 1983 to $48.6 million, from $43 million in 1982, with major increases in magazines (to $10.6 million, from $7.9 million) and network tv (to $17.8 million, from $13.7 million.)

Buick continued to ask, "Wouldn't you really rather have a Buick?" in 1983, only this time it was directed at an audience that wasn't ready to buy. Buick wanted its cars higher on the shopping list of those who preferred vacations and education to new wheels. "It's not just Buick against Oldsmobile or Buick against imports," said John Dabels, general director of marketing, "but it's Buick against new furniture."

In September, 1982, ads for the 1983 T-types rolled across the U.S. They departed from the usual Buick tone with a high technology feel. Rather than mentioning the "Wouldn't you really" theme line, a voiceover said, "Advanced civilizations. The Buick T-types . . ." The 60-second spot showed 1909, 1940 and 1959 Buicks, and it spoke of electronics, closing with "We figure it's a lot easier to know where you're going when you're sure of where you've been."

Regal coupe ads said, "Good looking outside, good thinking inside," with a woman (50% of Regal coupe buyers were women) concluding, "whoever's in charge at Buick, well, she must really be something."

The new Buick Electra, Park Avenue and T-types bowed April 5, 1984.

Leading the measured media buys for Buick were Century cars and wagons ($6.7 million), Cimarron cars ($6.3 million), Skyhawk cars and wagons ($6.1 million) and Regal ($4.8 million).

Oldsmobile increased its market share, jumping from 10% in 1982 to 11% in 1983. Total U.S. Olds sales passed the 959,000 unit mark, with sales reaching 1,007,559 in 1983, a 26% increase from 1982 sales of 799,585. The only Olds model with declining sales was the Omega X-car, falling 31.2% from 72,392 units in 1982. All other models showed significant increases in sales volume, especially the Cutlass Ciera with a 68.3% sales jump.

Oldsmobile measured ad spending decreased to $45.5 million, from $48 million in 1982. Declines came in every category except network tv, which rose to $12 million, from $9.6 million.

Oldsmobile sales of bigger cars rose 58% in the first 10 days of April, 1983. Encouraged by the figures, Oldsmobile predicted it would pass Ford division of Ford Motor Co. for the No. 2 domestic sales position behind Chevrolet in 1984.

Plans for a four-seater sporty coupe began in the spring of 1983. The new model is expected to be as exclusive to Olds as the Fiero and the Corvette are to Pontiac and Chevrolet, respectively. However, Joseph Sanchez, general manager of Oldsmobile, said Olds doesn't want to "fix what isn't broken.

"We'd be remiss if we took the Oldsmobile image and tried to change it completely," Mr. Sanchez said. He thought that Olds meant "the type of car that you aspire to somewhere in your future."

Major goals in 1983 were establishing the two new nameplates, Firenza and Cutlass Ciera, both of which debuted in mid-1982. Actor Dick Van Patten was spokesman for Delta 88 with the theme, "The family car that didn't forget the family." The 98 theme remained "luxury and logic."

The Olds Omega X-car received the least amount of ad spending, and was discontinued for the 1985 model year. Oldsmobile rear-wheel-drive vehicles also were dropped.

Although Pontiac boosted U.S. sales, market share suffered slightly, dropping from 6.1% in 1982 to 6.03% in 1983. Pontiac unit sales rose by 550, to 483,699, in 1983. Large increases were led by the Parisienne, with 1983 sales of 26,925, up from 4,176; the 6000, with sales increasing 65.8%, and the 2000/Sunbird sales jumping 54.8%.

Pontiac's new image didn't cost materially more in ad expenditures, which rose to $55 million, from $52.8 million in 1982. The biggest jump was in spot tv, increasing to $10.8 million, from $8.9 million. Network tv dipped a bit to $19.7 million, from $20.5 million in 1982.

Pontiac rejuvenated its comeback with a sporty performance and handling route led by the 1983-introduced single-entry, two-seater Fiero. Ad spending was $9.2 million. "Our 1984 ad strategy is designed to maintain consistent Pontiac presence in the marketplace," said Charlene Curry, national ad manager for Pontiac. "The core of the lineup is image cars—6000 STE, Firebird Trans Am, the turbo-charged 2000 Sunbird and Fiero."

Media dollars allocated for these cars were $10.1 million for the 6000 STE, $7.1 million for the Firebird Trans Am, $11 million for the 2000 Sunbird and $9.2 million for the Fiero.

In November, 1983, Pontiac began researching the availability of after-market performance and accessory parts to enhance the desirability of Pontiac cars in the showroom. This move also would force imports handled by other dealers to compete in the lower price sector, rather than compete with Buick and other more expensive models.

Firebird ads featured the Firebird girl, model Natalie Carroll, who wore only black leather outfits to establish that "womanly macho," untamed look. "We feel that car has a certain attractive menace about it, a threatening look, and we're trying to bring that through in everything we do," said James Graham, director of merchandising.

However, Pontiac didn't have much of a chance to do so in early 1983 with interest-rate advertising superseding a lot of product copy.

In late 1983, GM increased Pontiac's ad budget about 10%. Pontiac decided not to advertise in a medium unless it dominated the advertising. That included 204 more magazine ad pages in model-year 1984, but in 10 fewer publications. Network tv was limited to professional football and sports.

Cadillac posted gains in market share, reaching 3.27% in 1983, compared with 3.1% in 1982. Total Cadillac U.S. retail sales rose to 300,337 units, up 20.5% fom 249,295 in 1982. Each model had significant sales increases, the Cimarron and Seville sales increasing nearly 40% each, Eldorado rising 25.1% and Cadillac 14.1%.

Cadillac had about 32% of luxury car sales, the rest going to such competitors as Lincoln-Mercury, some Oldsmobile and Buick models, and European imports, including BMW, Audi, Mercedes-Benz and Jaguar. Cadillac predicted it would take an additional 2% of the market share in 1984.

Cadillac was included in the Buick-Oldsmobile-Cadillac group, dubbed Company B, in the January reorganization of GM. John O. Grettenberger, Cadillac's new general manager, confirmed reports saying GM likely will set up its Cadillac division as an independent third Company C, although reports later were denied.

GM thought Cadillac needed its own specific identity with no blurring of images. To do this, Cadillac will introduce a new product every year for the next three or four years. This includes plans for a possible 1986 "super Cadillac," a two-seater convertible in the $35,000-to-$40,000 range, competing against such imports as the Mercedes 380SL Roadster. "We want to reestablish the degree of exclusivity the Cadillac nameplate has always stood for," Mr. Grettenberger said.

Although it is the smallest of GM's five car-making divisions, Cadillac has been the most independent and usually the most profitable on a per-unit basis. Cadillac will not emerge as a third group for at least three to five years, according to the company.

In early 1983, Cadillac was accused of building not a "world class" car, but simply a "super Chevy"—a dig at the

Cimarron. Robert Burger, then general manager of Cadillac, said that although the Cimarron is at the low end of the luxury class, it performs as an entry-level vehicle to attract younger buyers, and still has "traditional Cadillac ride and handling."

In September, 1983, Cadillac added the Eldorado Biarritz convertible to its 1984 line to lure younger buyers into the market.

Another lure was the "C-body" car, a front-wheel-drive vehicle that is about 2 ft. shorter, 600 lbs. lighter and more fuel efficient than the rwd DeVille and Fleetwood models it was designed to replace. The C-body's intended fall, 1983, introduction was moved back to April 5, 1984, due to startup problems. Cadillac said it probably would have set a new sales record in 1984 if there had been no delay, because the car tested well with younger and import buyers. About 40% of C-body sales were expected to be conquests of other makes. Cadillac's ad spending edged up to $22.5 million, from $21.6 million in 1982, with most spending in network tv and magazines.

Gillette Co., Boston, the 35th largest national advertiser, increased its ad spending 14%, to an ADVERTISING AGE estimated $185.6 million in 1982.

Worldwide sales in 1983 decreased 2%, to $2.183 billion. Earnings managed an 8% increase. Sales for U.S. and Canada were $1.02 billion in 1983, vs. $998.4 million in 1982.

Gillette's performance has picked up steam during the first half of fiscal 1984 ended June 30. During the period, earnings were $78.3 million, up 11.2% from the corresponding period a year earlier, on sales of $1.097 billion, up 2.3%.

For 1983, Gillette's four major lines and the percentage contribution to total sales of each were: Blades and razors, $755 million, 35%—a percentage virtually unchanged from the previous year; toiletries and cosmetics, $688 million, 31.5%, up from 29.8%; writing instruments, $253 million, 12%, down from 12.1%; Braun products, $382 million, 17.5%, down from 18%.

Profits decreased lightly for blades and razors and moderately for toiletries and cosmetics. Profits for Braun products were much more than those of 1982, while profits of writing instruments declined.

Over the past year, the company has continued its traditionally aggressive marketing policies, most notably in the launch of new products, which included Foamy Gel shaving cream in November, 1983; Body Flowers perfumed body spray/deodorant; the Good News Pivot, a pivoting version of its Good News razor system, and Bare Elegance, moisturizing liquid soap for use in the shower.

During the first half of 1984, Gillette announced it would launch nationally Brush-Plus, an all-in-one brush and shaving concentrate system. The company also rolled coast to coast with a revamped version of its Silkience self-adjusting haircare line. Ad campaigns for both commenced this summer.

Analysts consider the Silkience relaunch critical for the personal care division. "The shampoo market has become bitterly competitive," said Diana Temple, an analyst who follows Gillette at Salomon Brothers. "And neither FOHO nor Mink Difference seem to have what it takes to make it. Their shares have shrunk to very low, nominal levels—less than 0.5%." In the highly fragmented shampoo business, Ms. Temple said, it is difficult for brands to recover once their shares drop to such low levels.

Sales for the U.S.-based toiletries and cosmetics division posted a modest advance in 1983. Profits were moderately less than those of last year. Domestic sales grew moderately, primarily reflecting the introduction of Body Flowers body spray and the sustained vitality of Dry Idea roll-on antiperspirant.

Despite Gillette's concentration on hair and skincare products, deodorants and antiperspirants remain the most important products in the personal care division.

A dominant name in its category for more than 20 years, the Right Guard brand name was the subject of a major $28 million revitalization process during 1983 that included improved formulations and packaging, as well as dramatically increased advertising.

Spurred by the good reception given Foamy Gel shave cream, introduced in late 1983, domestic shave cream sales moved well ahead of a year earlier, with the Foamy brand maintaining its dominant market share. According to recent figures compiled by Ms. Temple, last year Gillette (with Foamy and Trac II shave creams) commanded 26.8% of the shaving preparation market, a figure that has dropped gradually over the years; it was 33.8% in 1979.

Sales and profits for blades and razors were slightly lower in 1983. In its seventh marketing year, the Atra pivoting head twin-blade shaving system continued to make progress in the U.S. Both Atra cartridges and razors retained their leading share positions, with the Atra razor growing at the fastest rate of any domestic brand.

Domestic sales of disposable razors moved well ahead of a year earlier, principally because of the Good News brand, the best-selling disposable for the past eight years. A strong surge in demand for the Daisy women's disposable razor also contributed to the upward trend.

In August, 1984, word was out that Gillette would introduce a new, state-of-the-art shaving system in 1985. Although no details on the product were disclosed, sources close to the company believe it incorporates either new metallurgical variations or wire or glass cutting edges.

Gillette has strengthened its position in the worldwide shaving market with the establishment of joint venture blade manufacturing operations in China and Egypt.

In the Paper Mate division, sales of writing instruments declined somewhat, but profits rose due to an ebbing of the price wars that had eroded profits in the early 1980s. On a global basis, Gillette remains the world's largest marketer of writing instruments, ranging from inexpensive pens to luxury fountain pens and pencils, the latter manufactured by the company's subsidiary S.T. Dupont of France.

Paper Mate also set in motion the introduction of a roller entry, dubbed the Accu-Point roller pen, which will do battle in the $125 million roller pen market that Scripto entered earlier this year. Gillette also introduced the Paper Mate Sharpwriter pencil, another first for the division. The two products together will be backed by a $5 million campaign, with McCann-Erickson, New York, handling consumer advertising and Hill, Holliday, Connors, Cosmopulos, Boston, handling trade ads and promotions.

Last year, Gillette pursued a trimming strategy in the Braun division, which produced a drop in sales—from $403.4 million to $381.7 million—but a sharp rise in profits. The company continued to divest Braun of its photo and hi-fi businesses to concentrate on small household appliances, most marketed exclusively in Europe.

But the big news at Gillette over the past year was its agreement in principal, signed in early April, to buy the toothbrush-making and dental-care operations of Cooper Laboratories of Palo Alto, Cal., for $188.5 million. At the time, Gillette cited the fact that Cooper's Oral-B Laboratories subsidiary leads the U.S. toothbrush market with about a 27% share. During 1983, Oral-B had sales of about $120 million.

By and large, analysts have applauded Gillette's interest in Oral-B; toothbrushes, they said, would be a welcome addition to Gillette's traditional stable of cosmetics, grooming aids, writing instruments, lighters and small appliances. Oral-B also makes Zendium toothpaste and dental floss.

Analysts' optimism also was based on what Gillette can bring to Oral-B—most notably, its consumer marketing skill and ability to market huge volumes of low-priced, disposable plastic and metal products. In addition, about 40% of Oral-B's business is overseas, an area where Gillette is strong.

In August, 1984, Gillette acquired Elizabeth Grady Face First National Corp., which operates a chain of seven owned and four franchised skin-care salons, with sales of about $2 million in 1983. Gillette plans to expand the chain in the Boston and New England area.

Acquisitions are not the only way in which Gillette has made the news. In December, the company abruptly fired the agency Advertising to Women after seven years. The firing was the corporate reaction to the negative publicity surrounding ATW chairman John Ernst's guilty plea in August, 1983, to charges of tax evasion.

In a prepared statement, Gillette said the action "follows a review of tax proceedings in which Advertising to Women's former chairman was involved in federal court earlier this year . . . events surrounding that proceeding had led to a strain in the client/agency relationship."

Advertising to Women's share of Gillette's business amounted to some $20 million. The business was relocated to three agencies: Young & Rubicam, which gained Silkience and For Oily Hair Only (FOHO) skin and haircare lines ($14 million); N W Ayer, which added Body Flowers ($11.1 million), and Marschalk, which was awarded Toni ($4 million).

Goodyear Tire & Rubber Co.

	1983	1982
Sales	$9,735,000,000	$9,589,200,000
Earnings*	305,500,000	329,800,000
U.S. Advertising	57,831,700	44,905,400

*Worldwide

Goodyear Tire & Rubber Co., Akron, O., the world's largest manufacturer of tires and rubber products, was the 96th largest national advertiser in 1983 with $57.6 million in expenditures, an increase of 29% over 1982.

Goodyear reported net income of $305.5 million, down 7.4% from 1982, on sales of $9.736 billion, an increase of 1.5%. Revenues from U.S. operations accounted for $6.794 billion, or 70% of total sales.

Goodyear's principal business is the manufacture, distribution and sale of tires, but the company also manufactures metal, rubber and plastic and high-tech products in its 56 plants in the U.S. and 45 plants in 27 other countries.

During 1983, like the auto makers, Goodyear placed both product and advertising emphasis on performance. In the case of Goodyear, it was for Eagle radials. A series of magazine ads documented strong auto original equipment acceptance of Eagle radials and featured Camaro, Thunderbird, Mustang, GT, Shelby, Datsun 280ZX and Corvette. The campaign helped push measured magazine spending to $5 million, more than double the preceding year.

The ad featuring Corvette described how Goodyear's Eagle VR50—called the Gatorback radial because of its distinctive unidirectional tread—was adapted from Formula One racing rain tires to become an integral part of Corvette's tuned-suspension system.

Also in 1983, Goodyear geared up for the intensive multi-million-dollar announcement campaign that broke during the Winter Olympics telecasts from Sarajevo, Yugoslavia. The campaign, bearing the slogan, "Say Hello to Vector," will continue through 1984.

It was largely because of the buys during Olympic telecasts that advertising expenditures on network tv increased nearly 50%, to $22.63 million in 1983.

The company chose to emphasize its tires linked to the high-performance autos, which are playing a major role in Detroit's attempt to win back the loyalty of the American consumer. The campaign received the Gold Effie award from the New York chapter of the American Marketing Assn.

Goodyear earned good position in the competition for high-performance credibility when both the official pace car and the winning racer at the 1983 Indianapolis 500 were equipped with Goodyear Eagle race tires. It received further kudos when 1984 winner, Tom Sneva, drove on Eagles, and the Pontiac Fiero pace car was equipped with Eagle VR50 Gatorback radials.

The company's retail advertising now is integrating ads for company-owned stores and independent dealers. Advertising manager J.R. Houlette said this "one voice" approach helps "create a simpler buying decision" for the consumer and "internally, it draws all retail elements into a more unified marketing effort."

The measured media portion of Goodyear's total advertising budget rose in 1983 to $40.8 million, an increase of 36.5%. Major ad support of $24.3 million was provided for the broad category—Goodyear tires for car and truck—up from $12.6 million in 1982; Goodyear tires for cars, $4.8 million, up 14%; Goodyear tires for trucks, $2.9 million, up 71%; Kelly-Springfield products, $1.2 million, down 25%, and Goodyear automotive service stores, $6.7 million, down 26%.

In 1983, Goodyear arranged with Citibank to offer credit cards for customer use at both Goodyear owned stores and all independent participating dealers.

The company says its nontire sales are climbing worldwide with such predictable items as automobile belts and hoses and also with a running-shoe sole material named "Indy 500." Major shoe manufacturers—Converse, Tiger and Etonic—are using the new sole, which also is being advertised in *Runner* and *Runner's World*.

YOU LOOK GREAT IN OUTDOOR

IOA
INSTITUTE OF OUTDOOR ADVERTISING

In agency changes, J. Walter Thompson USA was selected from a list of five agencies to handle the Goodyear North America account, a virtual consolidation of major portions of business.

Goodyear also named McCann-Erickson to handle all Goodyear advertising in 33 countries. The agency has handled Goodyear business in South America and the Far East for the past 24 years.

In November, 1983, John P. Kelley, vp-advertising, retired after 24 years to be replaced by George S. Lenox, who had been director of advertising. James K. DeVoe, who earlier in the year moved from RCA in Indianapolis to Goodyear as assistant advertising director, moved up to director.

A diversified company, Goodyear also manufactures synthetic rubber, several lines of chemicals and numerous high-technology products for aerospace, defense and nuclear energy. Keenly aware of its roots in general consumer products, Goodyear nonetheless sees its high-tech aerospace and defense business as a key area for growth.

The company now makes wheels and brakes for the military ad flight simulators for testing pilots, all very classified. Goodyear also is involved in computer programing related to radar feedback.

The 1983 acquisition of Celeron Corp. of Lafayette, La., broadened Goodyear's holdings to include natural gas transmission systems, principally in Louisiana, and on-shore and offshore oil and gas exploration and production in the U.S. Celeron facilities also include about 2,700 miles of intrastate and interstate gas pipelines and three gas processing facilities. Houlette predicts Celeron will play a key role in Goodyear's projected 10-year effort to increase the nonautomotive base of its business.

Worldwide, Goodyear employed an average of 128,760 persons in 1983, including more than 65,600 in the U.S.

U.S. Advertising	55,566,200	54,000,000

*Worldwide **Operating income

GrandMet USA, Montvale, N.J., the nation's 97th largest advertiser, spent an estimated $55.6 million in advertising in 1983, a 3% increase over 1982.

GrandMet sales of $1.34 billion

were up 25% as was operating income of $148 million.

GrandMet, a subsidiary of Grand Metropolitan p.l.c., is divided into five main product groups: Cigarets and tobacco products, spirits and wines, pet foods, soft drink bottling and distribution, and sporting goods.

Cigarets account for the largest share of GrandMet's sales. Cigaret sales soared 49%, to $562 million in 1983. Much of the increase can be attributed to the doubling of the excise tax on cigarets that went into effect Jan. 1, 1983. (Excluding excise tax, cigaret sales rose from $306 million to $382 million.)

All the cigarets are produced and distributed by Liggett & Myers Tobacco Co., Durham, N.C. L&M is the nation's sixth largest cigaret company and produces many top brands including Eve, Chesterfield, Lark and L&M. However, it is the company's generic brands that accounted for a major part of the gain in unit sales in 1983.

Until 1984, Liggett & Myers had the generic market to itself. But no more. R.J. Reynolds Tobacco Co. has introduced its Doral cigaret unbranded at generic prices and Brown & Williamson Tobacco Corp. also has unveiled a generic. Industry analysts say growth of generics has leveled off at about 4.2% of the total market, so the competition in the market could erode Liggett's market share.

In fact, some say the flattening of the generic market was a reason plans were discontinued to sell the GrandMet cigaret business to management. Early in 1984, the company announced it was considering a leveraged buyout offer by members of Liggett management and an outside investment group.

In 1983, Liggett ran a national ad campaign stressing the value of generic cigarets in the face of the increased excise tax. The campaign consisted of $229,000 in outdoor and about $500,000 in newspapers.

Several of L&M's brands did well in 1983. The Eve brand, including the new Eve 100 box, was the strongest branded performer for the company. It received the bulk of Liggett & Myers' ad expenditures for cigarets. The Eve line attracted $7 million in measured ad spending, the largest outlays going to Eve Lights 100s and 200 filters, and Eve Slim Lights 100s filter and menthol.

The Eve brand that received the highest ad expenditures was Eve Slim Lights 100s filter and menthol. The company spent $4 million on those brands, including $3.8 million in magazines and $186,000 on outdoor media. Eve 100 and 120mm brands drew about $2 million in measured expenditures, all in magazines.

L&M also introduced two new brands in 1983: Dorado and L&M Superior. Both were introduced via outdoor boards in the Southwest for total spending of less than $100,000.

Operating income for the cigaret division increased 25%, to $60 million.

GrandMet made two acquisitions that gave it additional strength in the growing pet food category in 1983. In May, the company acquired rights to Tabby cat food, as well as all business related to the brand. Since the acquisition, the company has added the Alpo name to the Tabby label in an effort to capitalize on the strength of the Alpo brand. Alpo pulled a media budget of $12.8 million to maintain its position as the leading canned dog food in the U.S.

Among Alpo products, Alpo dry dog food, backed by $5.4 million, was the biggest expenditure among all the company's brands. It moved into the top five dry dog food brands in the U.S.

The largest share of the ad total, $2.9 million, went to network tv; spot tv garnered slightly more than $1 million; magazines drew $875,000, and newspapers $600,000.

An additional $166,000 was spent on spot tv for both the canned and dry dog foods.

Separately, the canned food got $4.7 million, including $3.4 million in network tv, $884,000 in spot tv and $227,000 in magazines.

The company also is developing its own pet snack brands. Both the Beef Bite Treats and Liv-A-Snaps lines increased their already strong market shares.

Liv-A-Snaps was supported by $362,000 in spot tv. The company apparently saw expansion of that market through acquisition when in August, 1983, GrandMet acquired the Reward Co., manufacturer of pet snack foods, including those under the Butcher Brand trademark.

The pet foods product area at GrandMet accounted for $23 million in operating income. The sales figure was a $1 million increase over 1982. Earnings for the division were flat.

On March 1, 1983, GrandMet sold its spirits and wines subsidiaries, the Paddington Corp., Carillon Importers Ltd. and Bombay Spirits Co., to its immediate parent, Grand Metropolitan (U.S.A. Holdings) Inc. for a $254 million interest bearing promissory note due on demand.

In its liquor advertising, measured expenditures for Absolut vodka rose slightly to $1.6 million from $1.2 million the previous year. In the three years in the American market, Absolut has moved into the No. 2 spot in imported vodka brands. As in previous years, most of the money, $1.4 million, was spent on magazines.

Measured expenditures for Baileys Irish Cream dipped from $6.4 million to $5.2 million. Nonetheless, sales of Baileys topped last year's levels.

Sales of the company's J&B Scotch dipped somewhat as part of the softening of scotch sales in the U.S.

Ad expenditures for J&B were down to $6.2 million from $7.4 million in the previous year. Expenditures on Bombay gin rose somewhat to $1.1 million from $950,000 in 1982. In the face of a declining market for imported gin in the U.S., Bombay increased sales.

DP Physical Fitness Equipment, GrandMet's sporting goods company, registered strong increases in its sales of home exercise equipment. Ad expenditures also rose sharply to more than $2 million. In 1982, expenditures were about $1.1 million. The 1983 campaign placed ads on network tv including National Football League football, as well as in several consumer magazines.

Greyhound Corp.

	1983	1982
Sales*	$2,625,000,000	$2,740,000,000
Earnings*	105,500,000	103,100,000
U.S. Advertising	**83,564,000	**85,252,000

*Worldwide **Restated to reflect sale of Armour Foods.

Greyhound Corp., the 75th largest national advertiser, cut its advertising expenditures 1.9% in 1983, to an estimated $83.6 million.

Sales for the Phoenix-based company dropped 4.2%, to $2.63 billion, in 1983. Net income increased 2.3%, to $105.5 million.

Last year was one of change aimed at bolstering profits. Focusing on its weaker segments, Greyhound continued its program to pare down operating costs and shed its less profitable divisions. Additionally, it continues its search for a major acquisition in 1984.

The company's Greyhound Lines division chalked up $25 million in losses, attributed to a 47-day strike of drivers occurring during the important holiday travel season in 1983.

Also affecting the balance sheets in 1983 was the poor performance of Greyhound Leasing & Financial Corp. Net income for the financial group fell sharply to $28.7 million, from $47.9 million in 1982. One factor was adverse worldwide economic conditions.

Another division that historically has been troubled by labor problems is the Armour Foods division, which the company sold in 1983. The sale of Armour Foods in December to Omaha-based ConAgra will bring Greyhound $166 million. Greyhound continues to be a major stockholder.

Greyhound's transportation division showed a loss of $8.8 million in 1983, compared with net income of $20.2 million in 1982. Primarily, this was due to the strike of the Amalgamated Transit Union. But the company acknowledges that even without the strike, Greyhound Lines would have had an "unsatisfactory" 1983.

The bus industry on the whole has been lackluster because of deregulation of both bus and air travel and because of soft bus ridership. New labor agreements, which have cut labor costs between 30% and 50%, should allow Greyhound to become increasingly competitive.

To further hone that competitive edge, Greyhound is strengthening its marketing efforts. The marketing staff has grown from five to 19 in the past year, headed by Terry Underwood, vp-marketing; passenger, and a former vp-marketing at Avis Rent-A-Car.

Additionally, this spring Greyhound fired off its biggest ad campaign, "New Lower Fares." Aimed at its Dallas-based competitor, Trailways Inc., the effort is intended to increase Greyhound's 80% market share in the scheduled service sector of the bus business. (Trailways currently has about 20% of the national market, according to analysts.)

Greyhound also introduced an aggressive $2.5 million Hispanic advertising campaign.

In the consumer products group, which had net income of $22.3 million in 1983, compared with $19.9 million the previous year, several significant marketing developments occurred.

Dial soap, the No. 1 brand in the $1.2 billion U.S. bar soap market, this spring introduced a reformulated Dial soap, said to double the soap's germ-killing abilities.

The new campaign received $4 million-plus in advertising in the second quarter, the company reported. Dial antiperspirant also was reformulated to include microstat.

The company reports that Tone soap held steady its share of market in 1983, despite more aggressive marketing activities from competitors Procter & Gamble, Andrew Jergens Co. and Lever Bros.

Beauty bars such as Tone comprise about 30% of the total soap market, and the category is dominated by Lever Bros.' Dove soap.

Additionally, the company entered test markets with Pure & Natural soap, pitting the brand against P&G's Ivory.

Other new products at the consumer division included a 24-oz. can of Armour Star chili and a 15-oz. size of roast beef hash. Armour's dried beef—available nationally in jars—moved into test markets in vacuum-sealed foil pouches.

GTE Corp.

	1983	1982
Sales*	12,943,918,000	11,766,658,000
Earnings*	955,604,000	835,626,000
U.S. Advertising	70,179,900	25,183,600

*Worldwide

GTE Corp., the 85th largest national advertiser, spent $70.18 million on advertising in 1983, a jump of 179% from 1982. GTE's commitment to becoming a major force in the long-distance telephone market, through its newly acquired Sprint system, accounts for a large part of its advertising increases.

Worldwide sales for the Stamford, Conn.-based company reached record-breaking levels as they climbed to $12.94 billion, up 10% from 1982, while earnings were $956 million, up 14.4%. U.S. sales contribution for 1983 amounted to $10.9 billion, representing 84% of total sales and a 12% increase from 1982.

In 1984, first-quarter results show another record year is in the making. Earnings were $257 million, up 17% from 1983's first quarter, and revenues climbed to $3.4 billion, an increase of 16%.

GTE's telecommunications operations were extended vastly by the $727.5 million purchase of the Sprint service. Sprint is now part of the newly formed diversified products and services division at GTE, which also includes Communications Products, Telenet Communications and Products Corp. The telephone operating group includes the operating companies Directories Corp. and Mobilnet Inc.

GTE's acquisition of the Sprint system, completed June 15, 1983, and the divestiture of American Telephone & Telegraph on Jan. 1, 1984, provided fertile ground for GTE's pursuit as a serious competitor in the telecommunications industry.

Toward that end, GTE put $20.5 million into advertising its GTE Sprint long-distance lines, up nearly 83% from 1982 levels when Sprint was under the ownership of Southern Pacific Corp. Advertising for Sprint represented 34% of GTE's total measured spending.

In comparison, MCI devoted $27.96 million to advertising its long-distance service in 1983, a 26% increase from year-earlier figures. The increase reflects an aggressive but necessary move to maintain its No. 2 position with a 3% share of the long-distance market, far behind AT&T. GTE Sprint is currently No. 3, with a 1.5% market share.

GTE's success in the $44 billion-a-year long-distance market is shown by solid growth in its customer base since acquiring Sprint. In June, 1983, the system had about 600,000 business and residential customers. Within nine months, the customer base grew to more than 1 million. During 1984, GTE plans to invest another $1 billion to expand its Sprint and satellite operations.

Among the crowded field of nearly 400 long-distance companies nationwide, the giant of them all, AT&T, is fighting to protect its 94% market share, from which all the new competitors are drawing to form a customer base. Its latest campaign, "The more you hear, the better we sound," attacks the tinny sound, poor connections and busy signals that a caller usually encounters while using other long-distance services.

That ad campaign, and the current issues of rates and quality in long-distance service, soon will be history, though, as alternative services such as GTE Sprint gained equal access rights, which started July 15 in some markets. The new structure will bring improvements to the long-distance system: narrowing the price gap between services, providing accessibility for rotary dial phones and improving connections.

Sprint campaigns use the money-saving angle to draw in new customers. Two separate GTE Sprint print campaigns were developed by J. Walter Thompson USA, targeting business and residential audiences. The "I compared, then I switched," campaign, with versions for both businessmen and businesswomen, run in the *Wall Street Journal, Business Week, Fortune, Inc* and other business journals. The "Price of Friendship" ads, directed at the residential audience, explain how customers can save every time they make calls. Ads run in publications with broad-based audience appeal, including *People, TV Guide* and *USA Today.*

Sprint also targets a very specific audience in its advertising. One tv commercial, "Straight Talk," is targeted toward the college market, where phone bills can consume a large portion of a limited budget. The spots feature a college coed who talks about calling home and telling her parents "almost" everything.

Almost all of Sprint's $20.5 million in measured spending went to spot tv, according to Leading National Advertisers. Spot tv took $20.1 million, while the remaining $407,000 went to magazines. Philip Stevens, corporate advertising director at GTE, said 1984 spending on Sprint continues to emphasize spot tv, but he declined to estimate this year's budget.

GTE stepped up Sprint's marketing challenge beginning in January when it dropped its $5 monthly service fee and replaced it with a minimum monthly charge of $5 for residential customers. Also, customers receive volume discounts on bills greater than $25, and the savings go up with higher bills. The "usage sensitive service," as GTE calls it, met the competition better than it expected. Sources say the company

INSTITUTE OF OUTDOOR ADVERTISING

oversold its service, and a temporary freeze prohibited new customer signup until September. In the meantime, MCI dropped all monthly service fees and offered large-volume discounts for new and existing customers starting July 15.

Phone Marts, the retail stores for GTE telephone products, expanded their product lines during 1983 to residential and small business customers. Measured ad spending for 1983 was $1.269 million, up 32% from 1982. Spot tv dominated the advertising, taking 96% of the total, network tv got 2.5% and magazines took 1.5%.

The GTE Mobilnet system is growing as a major force in another competitive field. Mobilnet, a cellular mobile telephone company, is the sole operator in 16 systems, with majority interest in six markets and minority interest in 19 markets. In July, 1984, the company applied for 17 additional systems.

Advertising tie-ins with the Indianapolis 500 auto race included race car driver Johnny Rutherford in ads, demonstrations and in-store appearances. Mobilnet phones were used exclusively by Indy 500 officials, medics and press personnel. Doyle Dane Bernbach, New York, was awarded the new account in December, 1983. A GTE spokesman said the emphasis is on doing followup ads in the new markets.

Sylvania lighting products division introduced the Energy Pincher lamp line in 1983. The line saves residents between 5% and 70% on electric bills, depending on usage. By the end of the year, the line was expanded to include three-way, flood and spot lights and reflector units.

Measured spending on Sylvania light bulbs for the home became a serious part of the ad budget as it grew from $900 in 1982 to $2.94 million in 1983. Nearly 95% was devoted to spot tv, with the remainder spent in magazines. Spending on industrial light bulbs reached $103,800, all in magazines.

A rapidly expanding area of growth for office services is electronic mail. GTE entered this market with its GTE Telemail, an electronic mail service, which sends about 600,000 messages a month. Projected 1984 revenues are estimated at $8.4 million.

The TeleMessager Service, a public voice messaging system began testing in the Dallas-Fort Worth area. The service can be accessed at any time and from anywhere in the world without special equipment, using only an identification number. These two advancements are among many that further emphasize GTE's commitment to become a complete telecommunications company.

The executive office witnessed an abrupt move when president-chief operating officer Thomas A. Vanderslice resigned in December, four years after joining the company. After restructuring the top ranks, Allan L. Rayfield and James L. Johnson were named senior vps, heading the diversified products and service group and the telephone operating group, respectively.

*Fiscal years ended July 31 **Earnings from continuing operations

Gulf & Western Industries, New York, the nation's 44th leading advertiser, spent an estimated $145.5 million on advertising in 1983, a decline of 6.1% from 1982.

For G&W, 1983 has been a period of intense transition. With the death of G&W founder-chairman Charles Bluhdorn and the ascension of his right-hand man, Marvin S. Davis, to chairman-chief executive officer, the company has embarked in a striking new direction. Like its new top officer, Mr. Davis, the company that has been emerging in the past year is lean and tough.

Mr. Davis' strategy has been to divest all G&W properties that fall outside of the company's profitable core group in entertainment and communications, financial services, and consumer and industrial products. The goal of the divestitures is to rid the company of cyclical, and risky, industrial businesses—operations that G&W execs say represent 20% of the company's sales and assets.

Gone by way of divestiture is the Gulf & Western building products operations, Arlington Park Racetrack, a number of domestic and foreign manufacturing units and the U.S. manufacturing operations of videogame company Sega Enterprises. Also gone is G&W's 24% interest in Amfac Inc., a Hawaiian sugar and real-estate company. In addition, the company has made extensive moves to trim its once-fat stock portfolio.

Because of the divestitures, the company wrote off $470 million for the 1983 fiscal year, which produced a loss of $212 million for the year. G&W's income from continuing operations for 1983 was $263.3 million, up substantially from 1982's $165 million. Sales for the year were $3.99 billion, up from $3.91 billion.

Revenues for the entertainment and communications group totaled $844 million for fiscal year 1983. About $432.2 million was accounted for by Simon & Schuster, the publisher; Sega Enterprises, and Madison Square Garden Corp.

The largest portion of G&W's advertising expenditures for 1983—about $19 million in measured media—went to its Paramount Pictures unit.

Paramount has been on a roll in the past two years, producing a string of hits under the supervision of chairman Barry Diller and president Michael Eisner. The studio, the only one in Hollywood to finish among the top three money makers in each of the past six years, is known for its policy of budget-conscious investment resulting in box-office hits.

Big money makers in 1983 and their measured media spending were "Terms of Endearment," $1.9 million; "Flashdance," $2.4 million; "Trading Places," $1.9 million; "Staying Alive," $1.7 million; "The Man Who Wasn't There," $1.3 million, and "Uncommon Valor," $2.2 million.

New releases, "Footloose" and "Indiana Jones and the Temple of Doom," continued the hit parade into 1984.

"Indiana Jones," sequel to the 1981 blockbuster "Raiders of the Lost Ark," was Paramount's summer 1984 biggie. It grossed more than $155 million in its first 10 weeks of release and ranked as the No. 1 summer theatrical until mid-August when Columbia's "Ghostbusters" pulled ahead. "Indiana Jones'" gross was more than double that of Paramount's second biggest summer hit, "Star Trek III: The Search for Spock," which originally was planned as a 3-D release.

"Raiders," "Terms of Endearment" and "Uncommon Valor" also have gone on to become major sales and rental hits for Paramount Home Video. "Terms" was the No. 1 title in August videocassette sales and rentals, while "Raiders" ranks as the all-time No. 1 videocassette seller (600,000 units). "An Officer & A Gentleman," "Star Trek II: The Wrath of Khan," "Trading Places," and "Staying Alive" are other Paramount films now among the all-time top 10 videocassette sellers.

After experiencing two straight box-office successes with movies starring Eddie Murphy—"48 HRS." and "Trading Places"—the studio signed the star to a much-publicized, five-year, $15 million contract. Although there was much talk at the time about the great amount of money paid to the comedian, the current consensus is that if he produces just one major hit, it will result in a sharp business deal by Paramount. His first film under the new contract, "Best Defense," which co-starred Dudley Moore, got off to a sluggish start in August, grossing $17 million after two weeks.

Paramount's tv group won 43 Emmy nominations and 12 Emmy awards last year, with the miniseries adaption of Herman Wouk's novel "The Winds of War" getting three awards. The 18-hour series was seen in 50 million households and received 13 Emmy nominations. A sequel, "War and Remembrance," is in development at ABC.

Also high on the awards list was "Cheers," which got 13 Emmy nominations and five Emmys, including outstanding comedy series. "Happy Days," a popular comedy series in its 12th season, ended its long network run this year.

Paramount also produces two non-network shows—"Entertainment Tonight" and "Solid Gold." "Entertainment Tonight" was carried by 135 stations, and "Solid Gold" by 207.

In June, 1984, the motion picture group made headlines of a different sort when it released a statement saying Gordon Weaver and Steve Rose—ostensibly quitting as president-marketing and senior vp-worldwide marketing, respectively, to form their own movie marketing company—actually were dismissed because of "unethical practices with respect to suppliers."

Messrs. Weaver and Rose, who had used record linkups with RSO Records and licensed merchandise to bolster the youth market appeal of the 1977 hits "Saturday Night Fever" and "Grease," last year capitalized on the growing availability of the MTV: Music Television cable service. They released music video clips to MTV shortly before "Flashdance" (and this year "Footloose") came out, thereby preselling the youth audience. Another part of what G&W called an "invisible" marketing technique was the release of the videos in videocassette form to hundreds of music and dance clubs.

Simon & Schuster had its third straight record-breaking year in 1983, generated by 37 titles appearing on the *New York Times* best-sellers list. The company formed two new publishing groups, Simon & Schuster Computer Books, which will focus on the industry's fastest-growing area, and Simon & Schuster Electronic Publishing, which will produce and market software for home computers. Eventually, Simon & Schuster expects 10% of its business to come from software sales. The publisher utilized nominal measured media spending of $320,700, compared with $907,700 a year earlier.

G&W's consumer and industrial products group manufactures and markets a wide variety of goods to domestic and international consumers. It includes Kayser-Roth Corp., a big manufacturer of men's and women's hosiery, which markets under leading brands such as Liz Claiborne, Oscar de la Renta, Cheryl Tiegs, Anne Cole, Catalina and John Newcombe. No Nonsense pantyhose, which is a decade old, is the nation's No. 2 brand in ladies' hosiery. The No Nonsense line was supported by a measured media advertising budget of more than $7 million last year, barely increasing measured spending of $6.9 million in 1982.

Simmons, the mattress company, posted a $33 million sales increase in fiscal 1983 and was profitable for the first time since the company bought it in 1979. Beautyrest, a pocketed-coil mattress, brought in almost 30% of total Simmons sales. G&W increased measured spending on mattresses 44%, to $4.6 million in 1983, the bulk of which went into network tv.

G&W's financial services group brought in $141.1 million in operating income on revenues of $1,072 billion, down 1.2%, a 51% increase over 1982 and the strongest performance ever by that G&W segment. The cornerstone of the group is Associates Corp. of North America, the principal operating subsidiary of Associates First Capital Corp.

This past year, Associates National Bank continued to push its Exec-Charge/Visa Card. It also is stressing its new MasterCard service, which was launched this past year in a joint program with American Telephone & Telegraph. The program gives consumers the ability to purchase telephones through credit at phone stores, and is supported by a credit-checking system that processes applications within a half-hour. Associates then follows up by mailing the customers a MasterCard within the next week.

Late in 1983, G&W agreed to acquire Esquire Inc., a publishing, video and film concern. The company paid $190 million for the 73% of Esquire's shares that it didn't already own. Esquire posted earnings of $10 million on revenues of $146 million in fiscal year 1982.

H.J. Heinz Co.

	1983	1982
Sales*	$3,950,000,000	3,738,445,000
Earnings*	237,500,000	214,250,000
U.S. Advertising	202,400,000	**175,090,000

*Worldwide **Revised

H.J. Heinz Co., the nation's 31st largest advertiser, spent $202.4 million in domestic advertising in 1983, a 15.6% increase over the previous year.

Sales for 1983 were $3.95 billion, up 5.8% over 1982. Net income reached $237.5 million, up 10.9%.

Anthony J.F. O'Reilly, president-ceo, said the year was "highly satisfactory," with its increase in operating income and a 16.2% increase in marketing spending.

Measured advertising of $75.4 million represented 37.1% of the total advertising figure. The largest outlays went for Heinz tomato ketchup, $16.1 million; Weight Watchers products, $17.5 million, which includes $5 million-plus each for frozen meals and frozen treats; $9.95 million for 9-Lives cat food; $6.4 million for Ore-Ida potato products, and $5.8 million each for Steak-umm frozen steaks and Heinz steak sauce, according to Leading National Advertisers.

Three major Heinz promotions involving Heinz, Ore-Ida and Crisco labels netted the company increased sales, with Heinz ketchup claiming a 47% market share by the end of 1983, the company said. Heinz chili sauce also increased sales with a 55% market share.

Hoping to benefit from a popular comic book character, Heinz introduced Superman hot cocoa mix with NutraSweet in the Northeast. Promotional support for the new product included direct mail samples to families with children between the ages of 6 and 12, Sunday newspaper coupons and an on-pack offer of free Superman mugs.

The cocoa mix is available in 10-envelope cartons and 18-serving canisters. Measured media spending was $341,200, according to LNA.

Among other new items introduced in the U.S. was Heinz' 28-oz. "Gamma" plastic squeeze-bottle for ketchup. The flexible container, named package of the year by the Packaging Institute USA, was developed for Heinz by American Can Co. The plastic squeeze bottle is lightweight and shatterproof and contains an "oxygen-barrier layer" that extends product shelf life.

Using the tag line, "Give Heinz a squeeze," Heinz USA introduced the new package in the West and Southwest with tv advertising and promotional support.

In response to consumer interest in reduced sodium and calorie intake, Heinz is test marketing a Lite ketchup in Portland, Ore., and Phoenix. The product, a reformulation of the Lite ketchup introduced in 1979, contains one-third less salt than regular Heinz ketchup and half the calories.

Heinz redesigned packaging for its five specialty vinegars to create a traditional wine bottle look. The new package was introduced with the heaviest advertising and promotion campaign in the category's history and included the largest couponing ever for a wine vinegar and a tie-in with Good Seasons dry salad seasonings, Heinz said. The marketing effort, however, included minuscule media buying.

In another variation on the low-calorie theme, the Alba '77 line of Fit'n Frosty shake turned to G.D. Searle & Co.'s NutraSweet for its sweetening agent and sought to improve the diet shake's flavors through consumer tests.

In other activity, the USA division introduced an industrial size 10-lb. can of Heinz seafood cocktail sauce for the product that won first place in the condiment category of the Seventh Annual Food Service New Product Contest. Four new premium-quality Great American label soups were introduced in the foodservice market to compete against frozen soups: Country cheddar cheese, garden vegetable, old fashioned chicken and New England-style clam chowder.

A new condensed New England-style clam chowder was added to the Heinz label line of soups.

Heinz has spurred efforts to tap the foodservice market and now ranks as the largest foodservice advertiser, the company said.

Weight Watchers International Inc., Manhasset, N.Y., which markets the famous diet program but whose food products are produced and marketed by licensees and sublicensees, experienced sagging membership in its program attendance in the U.S., blamed on the recession, Heinz said. Weight Watchers has a new program aimed at lifetime fitness and good eating habits in the works, which will be marketed heavily, expecting to firm up program attendance in the U.S. in 1984.

Weight Watchers brand foods continued to expand under several major licensing and sublicensing programs to include many foods or recipes traditionally viewed as no-no's for dieters. Primary licensees are Heinz's Foodways National division, which markets all frozen dinner products, and Heinz USA, which markets the brand's other specialty products, including bread, dairy products and desserts.

Recent new product introductions included Weight Watchers southern fried chicken, made skinless with a reduced-calorie coating, and deluxe pizza pie at 330 calories per pie. Distribution of three new fish meals into eight markets: Philadelphia, Baltimore-Washington, Boston, New York, Pittsburgh, Scranton, San Francisco and Los Angeles, ranging from 180 to 220 calories each, the dinners include an oven-fried fish with broccoli, cauliflower and carrots, Italian-style fillet in tomato sauce with cheese, broccoli and cauliflower, and fish au gratin with broccoli.

Actress Lynn Redgrave was tapped late in the year to become the face of dieting success for Weight Watchers food product advertising.

Weight Watchers Frozen Treat bars, in three flavors, moved into national distribution and became one of Heinz USA's fastest growing products and the top selling frozen novelty. Heinz USA also rolled out nationally a Weight Watchers Sandwich Bar dessert consisting of a 2.5-oz. portion of the brand's dietary dessert between two chocolate wafers.

Weight Watchers bread was reformulated to improve product quality and slice-thickness, and the line was expanded to include a Soft Light rye in addition to the white and cracked wheat.

After market studies indicated consumer support for diet entrees in the foodservice industry, Weight Watchers introduced a 16-item line of Italian-beef, poultry and fish entrees into test market in Austin, Tex. More than 200 restaurants have been targeted for possible distribution.

Having nothing to do with dieting, Ore-Ida Foods Inc., Boise, Ida., continued to hold a nearly 50% market share in its category. New products included Golden Patties, an oven-prepared hash brown potato product, which achieved distribution in 85% of the country, and Crispy Crowns!, a bite-size potato product in plain, bacon, and sour cream and chives flavors, which also was distributed nationally.

Ore-Ida is completing a $2.7 million expansion and modernization of its Burl, Ida., plant to increase the plant's production capacity by 30%, officials said.

Heinz's 1980 acquisition, Gagliardi Brothers, expanded its Steak-umm line with a Steak-umm sandwich kit and Steak-umm double portion sandwich steaks in a more lively package. The new entries were introduced first in the Northeast.

Star-Kist Foods, Terminal Island, Cal., remained the leading tuna brand, Heinz said, despite industrywide conditions of oversupply and competition from imports, which undercut sales. While sales were tough in the tuna category, Star-Kist enjoyed strong gains in the 9-Lives pet foods line.

Michael D. Kelly joined Heinz as vp-marketing, Weight Watchers. He formerly was vp-marketing for Stouffer Restaurants. William R. Johnson was named vp-marketing consumer products for Heinz USA.

Hershey Foods Corp., Hershey, Pa., the nation's 89th largest advertiser, increased advertising spending 13.7%, to about $68 million in 1983.

Although Hershey Foods includes numerous food products—from pasta to a fresh-brew coffee service—as well as the Friendly restaurant chain, chocolate, through the cornerstone Hershey Chocolate Co., contributed 71% of Hershey's total 1983 sales of $1.7 billion. The total reflected a 6% increase over 1982 sales.

Strengthened by the successful 1982 introduction of two new candy bars—Skor, a chocolate-covered toffee crunch bar, and Take Five, a chocolate-covered crispy wafer and peanut cream bar—Hershey Chocolate Co. sales of $1.2 billion were up 7% over 1982. Restaurant operations contributed $383.5 million, while other food products and services added $163.5 million to Hershey's total sales.

For the first quarter of 1984, ended April 1, Hershey reported total combined sales of $435 million, up 3.2% over the similar period in 1983. Net income declined, however, primarily because of increased marketing costs to support product introductions and continued growth of established products, said Richard A. Zimmerman, president-chief executive officer.

While established Hershey stars, including top-selling Reese's Peanut Butter Cups, the crispy Watchamacallit bar and the original milk chocolate bars and chocolate kisses, continue to maintain consumer loyalties in the estimated $7 billion candy-confectionery market, the company considers new products a vital component in continued growth in 1984, company officials said. Hershey derives more than 22% of its sales from products introduced within the past five years of aggressive competition between itself and archrival Mars Inc.

As the two candy giants continue their battle for first place, they are believed to command one-third of the market. Consumers appear to have accepted the general market price increase to the 35-cent candy bar in 1984 —led this time by Hershey—but manufacturers are sensitive to the fact that if pushed to pay too much for what they perceive to be too little, consumers will balk, said Tony Pingitore, director of new products for Hershey Chocolate Co.

New products from Hershey as well as its competition can be expected to reach for sales among adults and, ironically, the health-conscious consumer, Mr. Pingitore said.

Consumer taste trends indicate a preference among adults for lighter candy snacks such as Take Five, for more elegant specialty bars such as Skor, and for more strongly positioned nutritional snacks, a niche Hershey hopes to claim with its recent granola bar addition called the New Trail Bar, Mr. Pingitore said. The bar comes in four flavors: honey graham, chocolate chip, peanut butter and cinnamon.

"There is a melding going on," Mr. Pingitore said of the growing market support for candy with a nutritional bent. "More and more consumers are wanting products that are perceived as or are more wholesome and nutritional, but they are saying, 'Hey, I want my nutritious product to taste good, too.' "

Chocolate chip has become the leading flavor element in the $250 million granola bar market, Mr. Pingitore said. Skor and Take Five, both introduced late in 1983, have expanded sales territory dramatically and in 1984 are likely to reach full distribution goals, he said.

Hershey advertised the new additions generously, with measured media totaling $8.3 million for the candy bar line and an additional $2.9 million for New Trail granola bar and $2.4 million for Skor, while its rollout of Take

Five represented an undisclosed budget ranking as "one of the biggest" in the company's history, industry sources said.

Advertising themes for the new adult-oriented candy products can be expected to continue to reflect a shift away from product-configuration and instead toward consumer benefits, Mr. Pingitore said. Success lays in strong positioning of the products for the increasingly segmented candy market, he said.

Other more heavily advertised confectionery items and their 1983 measured media ad expenditures included Reese's Peanut Butter Cups, $5.3 million; Hershey's chocolate syrup, $3.6 million; Watchamacallit candy, $2.3 million; Mr. Goodbar, $1.8 million, and Hershey's cocoa, $1.5 million.

Elsewhere in the grocery store, Hershey enjoyed an enthusiastic reception for Hershey's chocolate milk, a standout on the dairy shelf in the company's traditional maroon-and-silver packaging. Hershey's has licensed its name to 75 regional dairies to produce the product under Hershey supervision. The chocolate milk is available now to about 90% of the population and is stocked in all major markets, Mr. Pingitore said.

The year was not one of all sweet success for the candy unit, however. Hershey's Frostin', a ready-to-spread cake frosting, was discontinued after an initially promising introduction that subsequently caved in under pressure of unexpected activity in the category, Mr. Pingitore said. Long dominated by General Mills and Pillsbury, the "low-visibility, small-volume" category nonetheless appeared to offer a "solid, profitable niche" for Hershey. "By the time we made it to market, it had all changed," Mr. Pingitore said, noting the simultaneous entry of Procter & Gamble's Duncan Hines with frosting that whipped the category into a competitive battle of cake mix giants.

"Suddenly, frosting became a tactical tool in the cake mix war," in which Hershey thought it could not realistically compete, Mr. Pingitore said.

The company also dropped distribution of After Eight dinner mints because of limited long-term profitability of the licensed candies from Roundtree of England.

In 1983, Hershey's Friendly restaurants opened 32 locations and closed seven units, bringing the total number in the family-style restaurant chain to 667 at the end of 1983. Fourteen openings are planned for 1984.

Hershey's Friendly Ice Cream Corp. had a slow spring because of adverse weather, but company officials said they expected the volume to recover during the summer and fall. Friendly ice cream pies, introduced in mid-1982, performed well and are now part of the standard prepackaged product line.

San Giorgio-Skinner Co., Hershey's pasta division, produced record sales for the fifth consecutive year and claims an estimated 10% of the pasta market behind the market leader, C.F. Mueller Co., with an estimated 16% market share. The line has profited from increased consumer interest in pasta, with especially strong showings in the Sunbelt and in New York, where San Giorgio was the only major domestic brand to gain market share amid the rush of imported products, Hershey said.

Cory Food Services, a vendor of coffee-break beverages and imported snacks, continued to decline in sales performance, and Hershey has revamped the management structure to maximize productivity while positioning itself to take better advantage of market conditions, the company said.

Major corporate personnel changes included the retirement of chairman of the board Harold S. Mohler on March 1, 1983, after 35 years with the company. Under Mr. Mohler's leadership, the company changed its name from Hershey Chocolate Corp. to Hershey Foods Corp., reflecting the significant move to diversify beyond chocolate products. Also under Mr. Mohler, the company abandoned its historic no-advertising policy and in 1970 joined its competitors in aggressively advertising its products.

William E. Dearden, former vice-chairman and ceo, was named chairman, and Mr. Zimmerman was promoted from his former position as president. C. Mickey Skinner was named president-ceo of San Giorgio-Skinner, replacing Joseph P. Viviano who was named senior vp of the corporation.

*Worldwide

IC Industries, Chicago, a diversified international corporation that includes Pet Inc., Pepsi-Cola General Bottlers Inc. and Midas International Corp., spent an estimated $112.1 million in advertising in 1983, up 41.7% from 1982, to rank as the 64th largest national advertiser.

Consumer products generated $2.19 billion in sales in 1983, or about 59% of the company's total revenues of $3.73 billion. Of that total, Pet generated 31%, Pepsi 10% and Midas 7%.

The remaining 45% of sales came from IC's Illinois Central Gulf Railroad, Hussmann Corp. (refrigeration equipment), Abex Corp. (commercial equipment and components), among other activities.

Total ad spending is expected to increase 10% in 1984, most of it earmarked for consumer products. Pet, for example, spent $85 million on advertising and promotion in 1983 and is expected to spend $96 million in 1984, the company says.

IC has been outspoken in its commitment to building its consumer products divisions, and it has announced plans to place in the consumer products area most of the $200 million in capital spending planned for companywide business in 1984. That figure represents a 21% increase over 1983.

Pet sales increased 11%, to $1.15 billion in 1983, marking the food product company's best year in a 75-year history. It was the third consecutive year for record sales and earnings and makes the company IC's largest and most profitable division.

Pet products span seven markets with Old El Paso brand Mexican foods, Underwood Red Devil meat spreads, Pet-Ritz frozen pie shells, Downyflake and Roman Meal frozen waffles, Orleans canned shrimp and Sego measured-calorie liquid meals.

Pet also represents the lion's share of IC's measured media spending in 1983, with $43 million, an increase of 45% from 1982.

Pet's first-quarter results in fiscal 1984 indicate the company recorded sales of $271 million, a 1% increase over the corresponding period a year earlier. New products should stimulate sales for the remaining three quarters as they take hold in the market.

In 1984, Pet plans to expand to 10 its line of frozen El Paso entrees, eight of which were introduced in St. Louis and Dallas test markets last year. The full line is being rolled out nationally in 1984. Other new El Paso brand products include picante salsas in mild, medium and hot spiced flavors. Pet also is expanding sales of Old El Paso hot nachos from the current three Major League Baseball parks to six. Pet spent $6.7 million in measured advertising in 1983 for El Paso brand products, up from $2.3 million the year before.

In response to continuing consumer interest in reduced-calorie versions of popular foods, in 1983 Pet's Whitman's chocolate line introduced a new Whitman's Lite with one-third fewer calories than regular chocolate. In recent years, Whitman's has expanded its line to include chocolate bars, dessert toppings, chocolate baking chips and two kinds of cookies. Whitman's has invaded the airline foodservice market with new butter cookies served now by two airlines.

A new Pet-Ritz "fancy crust" frozen pie is positioned as larger and filled with more fruit than the competition's. And to top off its frozen dessert product menu, Pet is introducing a new line of Great Ice Creams of the South, touted as richer than other American ice creams. The ice cream line is in distribution in 10 southeastern states where Pet Dairy operates.

Pet also will reposition its Pet-Ritz pie crust this fall, using tv to replace the pie crust's convenience-oriented message to a use-oriented theme. Pet currently has a 60% share of the total $160 million pie shell market, but it is experiencing strong pressure from Pillsbury's refrigerated All Ready unformed crust dough. Pet pulled out of test a product similar to Pillsbury's, but sources say Pet is preparing a similar product for introduction later this year.

With the acquisition of William Underwood Co. and its brand products, IC has begun a comprehensive plan to integrate product line.

Included in the plan are Red Devil canned meats, Ac'cent flavor enhancers and B&M and Friends baked beans. All the products achieved increased market share in 1983, the company said.

Pepsi-Cola General, a division of IC Industries, distributes Pepsi products through 700 routes in eight states in the Midwest. In 1983, it saw its seventh consecutive record year with sales of $388 million, an 8% increase over 1982. That increase carried into the first quarter of fiscal 1984 when the operation recorded $78 million in revenue, 3% higher than the year-earlier period.

In 1983, Pepsi-Cola General completed introduction of two new decaffeinated products, Pepsi Free and Diet Pepsi Free, throughout its markets and credits the strong new product sales with the division's significant sales increase.

Pepsi-Cola General's fountain business continued to grow in 1983 with the much-coveted Burger King and Wendy's restaurant accounts. Pepsi sells to about 300 Burger King and Wendy's outlets.

Midas sales from the manufacturer to franchisee increased 11%, to a record $272 million for 1983, and continued that pace into the first quarter of 1984 with sales of $60 million, up 10% from the corresponding quarter a year earlier.

At the close of 1983, Midas operated 1,744 shops in 10 countries, including 88 new shops in the U.S., 31 in France and 15 in Canada. The company plans to open 200 more shops in 1984. Midas shops in the U.S. had record sales of $545 million, a 16% increase. A measured media expenditure of $[illegible]5.9 million was spent for Midas muffler shops in 1983, up from $18.1 million the year earlier.

In 1984, the auto service company plans to launch nationally a new suspension service program featuring a line of gas-filled shock absorbers and MacPherson struts. Midas shops also are scheduled to expand capability to provide front-end alignment services and will revive promotion of its brake service.

Research indicates the average American automobile is now more than seven years old and the number of miles driven annually is on the rise. Coupled with the increase of imported front-wheel-drive cars, the market conditions suggest strong opportunities for expansion in the auto service field, the company said.

Charles Connolly was elected vp-corporate communications. Granger F. Kenly, vp-corporate relations, retired, concluding 12 years of service.

International Business Machines Corp., Armonk, N.Y., the nation's 58th largest advertiser, increased total advertising expenditures 58% in 1983, to an estimated $119.2 million.

Significant boosts in spending were made by IBM personal computer systems, which budgeted $24.7 million for 1983, compared with $5.3 million in 1982, followed by IBM business computer systems, which spent $18.7 million, compared with $2.2 million in 1982. Selectric typewriter advertising increased to $5.3 million, from $2 million.

Total measured media spending jumped 59% over 1982, to $102.3 million in 1983.

In the company's major advertising account move of 1983, IBM transferred $13 million to $19 million in corporate tv billings from Doyle Dane Bernbach to Lord, Geller, Federico, Einstein, giving the latter the entire corporate business. DDB kept its cut of the larger IBM Information Systems account, which it shares with Geer, DuBois.

IBM worldwide gross revenues increased 16.9%, to $40.2 billion in 1983, with U.S. operations up 21.5%, to $23.1 billion, and foreign operations rising 11.2%, to $17.1 billion. Domestic net earnings were ahead 20.3%, to $3.3 billion, and foreign net earnings climbed 31.2%, to $2.2 billion.

In the six months ended June 30 of the 1984 fiscal year, worldwide net income was $2.825 billion, up 21.8% from the similar period in fiscal year 1983. The company reported revenues of $20.784 billion,up 16.3%.

In 1983, 81%, or $32.5 billion, of IBM's revenues came from sales and rental of equipment. Product purchases increased markedly to $23.3 billion in 1983, up 38.4% over 1982. In contrast, rental income declined 17%, to $9.2 billion.

Revenues from services increased 20.3%, to $7.7 billion in 1983; maintenance grew 16.2%, and program product revenue increased 36%.

IBM's market share in the $7.5 billion personal/desktop computer industry reached an estimated 28% in 1983, up from 22% in 1982 and 5% in 1981.

IBM sold an estimated 370,000 personal computers in 1983, up from 200,000 in 1982, and it is predicted that this year the company will sell more than 540,000 personal computers. IBM's dealer base nearly doubled from 700 in the first quarter of 1983 to almost 1,300 in the first quarter of 1984.

Although sales to individuals—for business and professional as well as for home use—had been the mainstay of the personal computer business, massive corporate buying for middle managers began in 1983. Recognizing the trend, IBM in October announced refinements to the PC, such as the PC XT/370, that make the desktop machine compatible with IBM mainframe computers.

Late in 1983, IBM began supporting the PCjr, its long-awaited entry in the low-price home computer market, with heavy advertising featuring the "Little Tramp" character, who appeared in PC advertising. However, the PCjr failed to gain consumer acceptance after its introduction in January, 1984; the basic $669 model did not include many necessary accessories, and the $1,329 advanced model was overpriced, compared with competitive models from Commodore, Atari and others.

As a result, IBM in the 1984 second quarter cut the price and lowered its sales projections on the PCjr. And in an effort to reposition the machine as a more serious computer able to do more than play videogames, the company reportedly has considered dropping the "Little Tramp" from the $40 million PCjr campaign orchestrated by Lord, Geller.

Analysts have projected that unless IBM makes corrections and aggressively repositions the PCjr as a home computer, yearend sales could total as few as 100,000 units, down from original projections of 500,000.

The company joined other major personal computer marketers in beefing up its software offerings in 1983. Software sales are estimated to account for between 5% and 10% of personal computer revenues at IBM.

IBM shipped its first portable personal computer in March, 1984, with most sales coming through nonretail channels. Yearend sales are expected to total about 70,000 units.

In May, 1984, IBM introduced the first part of its long-awaited local area network, linking independent computer systems so they can exchange information at high speed. Full availability is not expected until 1986 at the earliest, which likely will blunt the company's efforts to capture an even larger share of the office automation market.

Measured advertising expenditures for the IBM Displaywriter system were boosted 171%, to $5.7 million in 1983. A new version of the Distributed Office Support System (DISOSS) software was introduced, allowing the Displaywriter, the scanning computer terminal and the IBM 5520 and data processing system to be connected to an IBM communications software system that is available on the IBM 8100 information system and the 5520 administrative system. The company also added new data processing and business graphics capabilities to the Displaywriter.

In electronic typewriters, the company introduced a linkage feature on its Electronic 95 and Electronic 85 models, providing hookup to a variety of display terminals, word processing systems and computers.

Measured media expenditures for electronic typewriters shot up to $2.5 million in 1983, from $821,500 in 1982. The combined budget for electronic and Selectric typewriters accounted for 9% of total IBM media expenditures in 1983, up from 3.6% of the 1982 total.

Advertising expenditures for paper copiers rebounded in 1983 to $1.8 million, up from $736,000 in 1982 and approaching the $1.9 million allocated in 1981. The company introduced the model 3268 serial printer featuring enhanced graphics, four-color capability and a maximum speed nearly three times the rate of the previous model. Printers and copiers contribute an estimated 25% of IBM revenues.

The power and range of large systems were extended with the 3380 disk file, which posted strong sales increases in 1983. During the year the company began deliveries of the 3084, IBM's most powerful processer. In the midrange and small processor arena, offerings were expanded with the new 4300, System/38 and Series/1 models, which offer more speed, capacity and flexibility.

In December, 1983, IBM introduced a new automatic teller machine that dispenses both coins and paper money, positioning the company for a major run against Diebold Inc., its principal competitor in that market.

Among acquisitions, IBM increased its holdings in giant Intel Corp., Santa Clara, Cal., supplier of computer parts, with a 1.84 million share purchase in August, 1983. IBM's share of Intel stood at about 17.5% by yearend. The link is thought to give IBM an advantage in mainframe computers while reducing the company's dependence on Japanese chip makers. In June, 1983, the company paid $228 million for a 15% share of Rolm, a Santa Clara-based producer of telecommunications equipment. By the end of the year, IBM owned about 20% of Rolm's stock.

In February, 1984, IBM formed a joint venture with CBS Inc. and Sears Roebuck & Co. to develop a commercial videotex service for people with home or personal computers. Introduction of the system, dubbed Trintex, is not likely for several years. In another joint venture announced with Merrill Lynch & Co., IBM will offer an information and office automation system for stockbrokers and other finance professionals. The service is to go into test in 1985.

In a 1983 court action, IBM settled a protracted civil lawsuit with Hitachi Ltd. and with National Semiconductor Corp. and its subsidiary, National Advanced Systems, over alleged theft of confidential IBM documents and materials. The agreements called for the companies to refrain from using or disclosing IBM proprietary information and gave IBM the right to inspect each company's new products for five years.

*Worldwide

ITT Corp., formerly known as the International Telephone & Telegraph Corp., spent $134.2 million on advertising in the U.S. last year, down 16% from 1982, to rank as the 49th largest advertiser.

Revenues for the New York-based conglomerate continued to drop in 1983, following a 6% decline in 1982. ITT had revenues of $20.2 billion, down 4.7%, and net income of $675 million, up 1.8%.

Worldwide advertising at ITT increased during the year, rising to $217 million from $200 million in 1982—a year in which advertising had decreased 5.2% from 1981. Continental Bakery the past three years has spent 19% of the total budget, according to ITT.

The year, 1983, marked the spectacular success of the company's System 12 switching system which received awards equaling 5 million lines in 16 countries, an increase from 1.8 million lines in 1982. The system was introduced in North America in 1983.

The System 12 technology and equipment are also being used as a foundation for the growing medium of cellular mobile systems. ITT is participating in several joint contracts to develop such mobile systems. ITT's first "Celltrex" system was brought on line in Waseca, Minn., in 1983, and operates as part of a multisite field trial network. The Federal Communications Commission just recently began to grant cellular mobile system operators the right to operate in the nation's 20 leading markets. Licenses covering the lesser markets will soon be awarded.

In a dramatic departure from ITT's typical business lines, the company announced its move into the personal computer market with the introduction of Xtra. Based on the design of the IBM PC, the $3,000 machine began being shipped in April, 1984. ITT will sell the system through ITT Courier Terminal Systems Inc., a fully-owned subsidiary, as well as independent dealers.

One of the year's strongest showings was turned in by the company's Continental Baking Co. subsidiary. Sales from continuing bakery operations reached record levels. The baking division is paced by the Hostess cake line and Wonder bread, the nation's leading bread in terms of sales. The company's Beefsteak Rye built on its lead as the No. 1 rye bread in the country.

Over-all, in measured spending, ITT recorded slight increases in newspapers and magazines. Spot tv spending dropped from $30.9 million to $25.8 million, as network tv expenditures showed an even steeper decline—from $16.6 million to $9.8 million.

Measured spending on Continental Baking's various brands was almost $20 million, down 20% from 1982 spending levels. Drawing the top media dollars were Home Pride bread, $4.1 million, up 5%; Wonder Bread, $5.9 million, down 38%; and the Hostess baked goods line, $8.8 million, down 25%. Virtually all this spending was concentrated in spot tv.

The insurance subsidiary, The Hartford Insurance Group, centered its advertising spending on network and spot tv. Its budget of $3.6 million in measured media was up 9% from 1982.

The insurance group performed "relatively well," according to ITT, in a generally gloomy industry climate. It won the endorsement of the American Assn. of Retired Persons (AARP) to offer homeowners insurance to nearly 15 million AARP members, and became one of the first companies to offer an extensive computerized automation system to its independent agents.

The subsidiary also launched a major drive in 1983 to compare traditional whole-life insurance policies and replace them wherever appropriate with universal life insurance. Of the life policies sold in 1983, the universal life policies accounted for more than 50%.

The Sheraton Corp. subsidiary's budget for measured media increased 7% to $9.02 million in 1983 with the major portion weighted to magazines and network and spot tv.

The subsidiary was characterized by expansion moves that brought 24 new hotels and inns into the system from Canada, England, Italy, Mexico, New Zealand and the U.S. At year-end there were 453 hotels, inns and resorts operating in 53 countries around the world.

In defense and space, ITT expanded order backlog to more than $1.6 billion in 1983. This included contracts to produce a new generation of tactical radios as well as a wide range of surveillance and navigational equipment.

While ITT's industrial technology division showed only modest gains, ITT natural resource division and its food products group recorded an increase of more than 20% in income with flat sales revenues.

In diversified services division, which includes insurance, finance, hotel management, communications operations, information transmission, educational services and publishing, ITT showed a general over-all increase in sales.

Among other ITT advertised products were its communication's services, ranging from long distance service to telephone equipment, which drew measured advertising spending of $5.4 million, most in spot tv for long distance service ($3.7 million, down 50% from 1982).

ITT also spent $6.1 million on general promotion, largely in magazines and network tv, down from $7.1 million in 1981, and the company's lawn and garden implements business bearing the Scott and Burpee labels accounted for $3.3 million in measured spending, down from $7.8 million in 1982. Burpee seeds and bulds got the most, with $740 million in spot tv. Scotts turf builders got $435.4 in newspaper supplements.

ADVERTISING EXPENDITURES

	1983	1982
Newspapers	$3,166,900	$3,038,100

U.S. Advertising	295,328,800	270,000,000*

*Worldwide

Johnson & Johnson, New Brunswick, N.J., the 17th largest national advertiser, increased its U.S. advertising spending in 1983 to an estimated $295.3 million, up 9.4% over 1982.

Domestic sales rose 9.4% in 1983, to $3.61 billion, with domestic net earnings of $281.8 million, up 19.5% over 1982. Some $38 million was charged against net earnings because of J&J's divestiture of its dialysis business during the fourth quarter.

Non-U.S. sales declined 4.1%, to $2.36 billion, in 1983 because of economic conditions in Latin American countries and a strong U.S. dollar worldwide. Worldwide J&J advertising, comprising tv, radio and print media, decreased 2%, to $301.7 million, from 1982.

New worldwide headquarters, designed by architect I.M. Pei, were opened last year in New Brunswick, N.J., and new plants in Taipei and Singapore were constructed.

More new consumer products were launched in 1983 than at any other time in J&J's history, boosting the consumer product division's contribution to 42.3% of the company's $5.97 billion in worldwide sales. Consumer products, however, provided only 13.9% of J&J's 1983 operating profit, an increase of 2.2% over 1982.

Professional sales contributed 34.2%, representing the second largest business segment, with a 5.8% gain over 1982. Pharmaceuticals contributed 19.6%, a 5.1% gain despite the negative impact of the withdrawal of Zomax brand zomepirac sodium, a prescription analgesic, from the worldwide market in the first quarter, reducing operating profit in that area by $37 million. Sales of Zomax in 1982 were $82 million. Industrial sales, which dropped 4.5% in dollar volume, contributed 3.8% to total revenues.

In the aftermath of the October, 1982, Tylenol capsule cyanide poisonings, McNeil Consumer Products introduced safety sealing procedures on all its products in 1983, and launched Tylenol Extra-Strength Caplets, capsule-shaped tablets coated for easier swallowing, and Junior Strength Tylenol for children.

Total advertising expenditures for Tylenol were $56.8 million in 1983 in the six media measured by Leading National Advertisers, up 16%. J&J beefed up its total Tylenol advertising about $20 million to help counter the scare. In the first quarter of 1983, J&J spent $16 million in measured media on Tylenol brand products, although Tylenol accounts for only 8% of J&J's total sales.

By February, 1984, Tylenol had recovered 95% of its market share before the poisonings in the fall of 1982, staving off increased competition from other acetaminophen products such as Datril and Panadol in recovering its 30% market share of the total $1.2 billion over-the-counter analgesic market.

As the leading nonaspirin pain-reliever, Tylenol is being challenged in 1984 by the recent introduction of Upjohn's Nuprin and American Home Products' Advil, both containing a former otc prescription analgesic, ibuprofen. J&J is prevented by patent restrictions from introducing its own ibuprofen product until May, 1985.

J & J filed a federal court suit against the Food & Drug Administration in May, 1984, challenging the FDA approval of ibuprofen on the condition that certain warnings on labels and advertisements alert consumers to possible side effects. Advertising claims, J&J contended, were the province of the Federal Trade Commission, not the FDA.

A budget of $2.4 million out of the total $9.5 million spent on children's Tylenol was devoted to the Junior Strength item, through Compton Advertising. The remainder in the children's line went to chewable tablets.

McNeil Pharmaceutical went nationwide this past March with a multimedia program urging parents to consult their neighborhood pharmacist for information about drug abuse. McNeil supplied brochures and materials to pharmacists, and a tv spot, created by Clarke & Co., Boston, featured actor Michael Landon in the public service announcement. McNeil had tested the program in New England in 1983.

J&J's Personal Products Co., in a move to protect its leadership of the $1 billion sanitary-napkin market, introduced Stayfree Silhouettes Body-Shape Maxishields and Assure! Breathable Pantyliners, with 1984 advertising budgets estimated at an unprecedented $20 million. Sure & Natural Super Maxishields, a line extension of the No. 1 selling Stayfree line, also was introduced.

Measured spending on feminine hygiene products included $16.6 million for Sure & Natural Maxishields, up 5.7%, Stayfree Maxi and Mini-Pads, $11.9 million, down from $19.2 million in 1982, and O B Tampons, $3.5 million, down 3%.

J&J Baby Products' division introduced in 1983 Affinity—its first new shampoo since Baby shampoo—aimed at the over-40 market with about $12 million spent on advertising and $12 million on sample distribution. Advertising for Affinity broke in February, 1984. J&J and advertising agency SSC&B revamped ad plans for Baby shampoo last summer, repositioning it for babies and not for adults looking for a gentle shampoo, in response to the overcrowded shampoo-conditioner market, where the shampoo had been losing shares for about seven years.

Measured spending on baby products (bar soap, bath, lotion, oil, powder, shampoo, wash cloths) was $17.2 million in 1983, down 29%. Baby shampoo, the big advertised item in the group, attracted $7.2 million in measured spending, compared with $7.9 million in 1982.

Band-Aids, one of the company's most recognized products, recorded measured spending in 1983 of $6.8 million, down from $9.1 million in 1982, with the difference primarily being $1 million less devoted each to magazines and network tv.

Thanks to an innovative direct marketing program, J&J's Child Development Toys, a subdivision of J&J Baby Products, now ranks No. 2 in the under-3 age market, behind Quaker Oats' Fisher-Price Toys. The toys, which are advertised in print and on tv, are marketed through retail outlets, including department stores and toy chains. J&J also markets its toys as a series through hospital nurseries, physicians and direct mail. Parents registering their babies at birth receive a new toy or gadget every six weeks or so, geared to the baby's stage of development, along with a booklet explaining the stimulation and education the child gains from the toy. Although profits and volume are not broken out, nine new toys were added to the line last year.

Chicopee's Consumer Products Group launched its first consumer product, Stretch 'n Dust, a disposable dusting cloth imbedded with lemon-scented powder activated by stretching the cloth before use. Measured spending was $384,100.

The Advanced Care Products division of Ortho Pharmaceuticals introduced through print and tv advertising in 1983 Dimensyn, a menstrual discomfort product, and Micatin, an antifungal product combating athlete's foot in spray liquid, spray powder and shaker powder form.

Professional product introductions included J&J Products' Nu Gauze general-use sponge, touted as superior to cotton gauze used in hospitals and Ethicon's disposable Proximate linear stapler for surgical use.

J&J Products Inc. launched Secure, a denture adhesive seal aimed at the consumer market, and J&J's Dental Products Co. introduced Cerestore Crown System, Aurafill and Unison spherical alloy to the professional dental market. Among other dental products, Reach toothbrush measured spending dropped 16% to $4.6 million in 1983, and Act Fluoride Dental Rinse measured spending leaped from $1.1 million to $5.7 million.

S.C. Johnson & Son

	1983	1982
Sales.........	$2,000,000,000	$2,000,000,000
Earnings.....	N/A	N/A
Advertising...	86,970,300	74,616,300

S.C. Johnson & Son, Racine, Wis., the 74th largest national advertiser, increased 1983 advertising expenditures 16.6%, to $87 million.

Privately held S.C. Johnson, which continued to feel the impact of the poor economic conditions worldwide, had estimated worldwide sales of $2 billion, the same as 1982, which represented an increase of 10% over 1981. U.S. sales also remained at the 1982 level of $880 million.

In 1886, Johnson entered the marketplace and built its reputation on floor and furniture care products. Though the company has branched into automotive and household products, insecticides and personal care, and in 1984, over-the-counter drugs, media spending on floor and furniture care products continues to demonstrate S.C. Johnson's commitment to its original market.

Johnson's largest media buy among categories was for floor care products. They represented $14.6 million in media expenditures, or 23% of total measured media advertising of $63.8 million as monitored by Leading National Advertisers.

The largest single share of measured media spending in this category, $6.85 million, went to Clean 'N Clear, an all purpose cleaner, introduced in January, 1983.

Other floor care products, such as Brite, doubled media spending to $3.4 million in 1983; Future liquid floor finish increased 8%, to $2.4 million, and Step Saver floor wax jumped 54%, to $1.9 million. Modest expenditures of $7,400 and $6,500 were spent on Klear and Glo Coat wax, respectively.

Dollar based market share for Johnson's total floor care category continued at the 1982 level of 53.5% of the U.S. market.

In an end-of-summer rollout from its personal care division, the largest single share of media spending went to Curel, Johnson's new therapeutic skin lotion. With a $10 million ad campaign Johnson expects Curel to continue its test market (conducted since October, 1983, in Portland, Me., and Tucson, Ariz.) performance where it became the No. 1 therapeutic lotion.

Spending for Soft Sense skin lotion dropped to $4.12 million, from $9.6 million in 1982.

Introduced in 1981, stressing a cosmetic position and later assuming therapeutic overtones in a "Sticky Fingers" ad campaign, Soft Sense garnered a 6.6% case market share in 1982 and has not been able to progress further than No. 3 in the category.

As further support for skincare activities developing worldwide, Johnson has signed a letter of intent to purchase the Palo Alto, Cal.-based dermatology division of Cooper Laboratories. This acquisition would add: Aveeno cleansing bars and bath products ($1.2 million in 1983 measured media spending), Pentrax medicated shampoo, Rhuli antiseptics and anti-itch products for treatment of skin irritation. Negotiations were still in progress at press time.

In December, 1983, Johnson introduced Edge Extra with a promotion handled by J. Walter Thompson USA. Targeted at the 18-to-25 market, the new shaving gel is a thicker, richer formula that is expected to appeal to those looking for a thicker foam.

Edge gel continues to hold a strong position in the men's shaving preparation category. As No. 1 in its category according to the company, it maintained that rank even while Gillette launched Foamy Gel.

With a slight increase from a mid-1983 dollar-based market share of 20.2% to a mid-1984 share of 22%, S.C. Johnson follows its pattern of strong support for successful products, raising 1983 media spending 48%, to $3.1 million. That makes Edge one of the eight products with an advertising budget of more than $3 million.

In March, Johnson subsidiary Rydelle Laboratories introduced Fiberall, a natural fiber laxative, Johnson's first otc product.

The straightforward campaign by Foote, Cone & Belding, Chicago, with a national promotion budget estimated at $7 million, places heavy emphasis on the sugar-free formula and natural and orange flavors. In June, the Fiberall account abruptly was transferred to Laurence, Charles & Free, New York. It is the agency's first account from Johnson. FCB continues to handle other Johnson products.

Among other introductions, Basic Black and Chrome Cleaner made their debuts in the J-Wax automotive aftermarket category. Johnson sees both automotive products answering the consumer's desire for a "finishing touch" on their automobile.

New product Colonial Gardens Foaming Milk Bath Collection, marketed by Johnson's Northern Laboratories, Manitowoc, Wis., came out in antique-reproduction bottles and was positioned as a high-quality, midprice alternative to the more expensive Vita Bath and Jean Nate. The milk bath introductory campaign by G.M. Feldman, Chicago, estimated at $200,000, is almost entirely point of purchase displays, which was considered most effective for communicating strong price and gift points.

Northern Laboratories also announced the restaging of Capri haircare products. The $500,000 national ad campaign by G.M. Feldman broke in late August. New packaging with a flip-top cap and reformulation are expected to compete more effectively in the price/value haircare category. Measured media spending in 1983 for Capri shampoo increased 10%, to $35,200.

While Johnson generally increased media spending on haircare, spending for Agree creme rinse conditioner decreased 27%, to $1.4 million, as spending for Agree shampoo increased 37%, to $2.7 million, and Agree shampoo and creme rinse conditioner rose 22%, to $2.4 million. Enhance shampoo and conditioner plummeted 97%, to $35,600.

This has been a brutal year for the shampoo and hair conditioner market, Salomon Brothers analyst Diana Temple says. Johnson's combined shampoo dollar market share has dropped steadily from 4.8% in 1982, to 3.6% in 1983, to 2.8% the first quarter of 1984. The combined hair conditioner dollar market share illustrates a similar decline from 11% in 1982, to 8.1% in 1983, to 5.9% the first quarter of 1984.

Johnson continues to have a combined case market share of 54% in the furniture care category. Pledge, holding a 40.4% case market share, increased media spending 14%, to $6.5 million; Favor, with a 7.1% case market share, increased ad expenditures 55% to $1.8 million, Complete, with only 2.5% case market share for the second year running, lost all measured media support.

Glade Spinfresh air freshener bathroom tissue holder received $3 million in measured media spending; Glade aerosol increased spending 57%, to $2.3 million; Glade Spinfresh, new in 1982, was supported with $836,000, and Glade solid dropped 89%, to $1,300. Johnson continues to domi-

December's Inc. 500 is for everyone who should've marketed to Federal Express before it delivered.

FEDERAL EXPRESS

December's fifth annual Inc. 500 issue reveals the five hundred fastest-growing, smaller private companies in America—the same kind of companies that bred today's big names like Federal Express, People Express, and Apple Computer.

Last year's Inc. 500 showed sales increases of 597%.* This year's should be even higher.

Don't miss your chance to get in on the ground floor. Reach the companies reaching for tomorrow's front page. Call your Inc. Regional Manager, or Joe Page at (212) 986-2161. December's Inc. 500. Closing October 15.

* over a five-year-period

Inc., The Magazine For Growing Companies, 38 Commercial Wharf, Boston, MA 02110

nate the aerosol air freshener market with Glade holding a 50% case share.

Shout laundry soil and stain remover, continuing to hold a 30.3% case market share, increased media expenditures 16%, to $3.2 million.

Off! insect repellent increased measured media spending 24%, to $2.5 million, and it continues to hold its strong 1982 79.6% case market share.

Increased spending for Raid products continued—except for the vegetable fogger, which dropped 16%, to $1.8 million. That was the third year of consecutive spending declines for the product. Ant and roach killer was up 58%, to $256,000; Flea killer up 84%, to $616,200; Indoor Fogger up 66%, to $2.3 million, and insecticides more than tripled expenditures, to $6 million. Johnson introduced outdoor flea killer and Fire Ant Killer in the South and Southwest. Case market share for Raid products remains at 1982's 48%.

In a surprise move from an often conservative prime-time advertiser, S.C. Johnson's Soft Sense skin lotion was one of several tv sponsors of "Something About Amelia," a story that dealt with the sensitive subject of incest. The made-for-tv film drew strong ratings and very little negative response from the public.

Johnson subsidiary Northern Laboratories consolidated advertising with G.M. Feldman, Chicago. Previously handling the J-Wax line, Feldman now has Capri personal care products; "Hot-Shots," a new hand warmer, and Goddard household cleaners.

In May, 1984, a number of personnel changes occurred, including the appointment of William D. George Jr. to exec vp-consumer products, Europe, Africa and Near East; Terence S. Malone replaced Mr. George as exec vp, Johnson Wax Associates; John D. Crabb, former vp-regional director consumer products, Europe, replaced Mr. Malone as vp-regional director consumer products, Pacific and Far East; Harold A. Suess, formerly vp-regional director, commercial products, Europe, Africa and Near East, was appointed vp-general manager, U.S. consumer products home care; Barry P. Harris, previously general manager-U.S. consumer products home care, replaced Mr. Suess and will report to Richard M. Carpenter, exec vp-Worldwide Innochem; Richard F. Chay, director-marketing research, is no longer with Johnson and the position remains open; Charles L. Colman, former manager insect control products, replaced Robert Groat, who was appointed corporate planning manager, as manager-crawling insect products.

*Worldwide

Kellogg Co., Battle Creek, Mich., increased its advertising 14.3% to an estimated $176.3 million in 1983, making Kellogg the 37th largest national advertiser.

In measured media, the company's spending increased about 15%, to $117 million during 1983.

Sluggish sales were a symptom of the nation's No. 1 cereal marketer's problems. Kellogg had 1983 net sales of $2.38 billion, a less than 1% increase over 1982. Net earnings for 1983 were $242 million, 7% higher than the previous year.

Kellogg went on a marketing offensive in 1983, using a "back-to-basics" advertising strategy to fend off growing competition from generics and private labels in the domestic ready-to-eat cereal category. In the past three years, Kellogg has seen its market share drop from 40.7% to 35.7% in 1983, with the major threat coming from General Mills, rising from 20.5% to 23.2% of market during the period.

In the spring of 1983, the company began its push with the introduction of Crispix cereal, backed by an $8.3 million campaign via J. Walter Thompson USA, Chicago.

Since then, Kellogg has launched a new cereal product each quarter. Strawberry Krispies, an extension of the company's successful Rice Krispies line, was introduced during the summer of 1983.

In the fall, Kellogg's Fruitful Bran was launched with a $17 million effort that included tv, couponing and promotion.

In the first half of 1984, backed by a $17 million effort, Kellogg introduced C-3PO's in the competitive children's cereal category. Also, Apple Raisin Crisp made its debut, backed by a $16 million to $20 million campaign themed, "Homemade taste in a new kind of cereal." This fall, the marketer will launch Raisin Squares, spoon-size squares of shredded wheat with raisin inside. Leo Burnett USA, Chicago, handles the account.

This string of new cereals is being introduced under Kellogg's revised marketing strategy, outlined at the company's annual meeting this spring.

To stem eroding market share, Kellogg is relying heavily on prime time tv advertising—network tv spending rose 20% to $73 million—more couponing, stronger selling messages, more focused brand identity and a more continuous presence in the media, says Gerald Robinson, president of its U.S. Food Products division.

The strategy appears to be working. Kellogg's market share has climbed steadily each month from a low of 35.7% in January, 1983, to 38.8% in January, 1984. Kellogg says those shares continued to show improvement in fiscal 1984, marked by net sales for the first six months of $1.287 billion, an 8.9% increase over the first half of fiscal 1983. Net earnings were $129.7 million, up 5.1%. Earnings were affected by a drop of 6.7% in second-quarter earnings, a drop reflecting heavy advertising and research spending.

Health-conscious adults are one of Kellogg's key markets, but it has not always been successful with product extentions into this market. The company dropped no-salt versions of both Corn Flakes and Rice Krispies after repeat sales in four test markets failed to meet expectations.

Despite that failure, it appears the company will continue to focus on nutritional-minded young adults. Advertising for Kellogg's Pop Tarts positions the product against granola products, comparing the iron and vitamin content of the two.

The company also plans to enter the granola category with a snack "a step above the regular granola bar." The product may be available late this year.

Kellogg's biggest disappointment in 1983 was the failure of its Mrs. Smith's line of frozen crepes, quiches and Italian entrees. Introduced early in 1982 —about the same time as Swift & Co.'s International Entrees, Campbell Soup Co.'s Le Menu and Armour Foods' Dinner Classics debuted—it garnered only a 0.5% tonnage market share in the 5.6 million-lb., single-dish frozen entree category over a 52-week period ended in August, 1983.

Industry sources say the line failed because of a combination of poor quality, high pricing and bad marketing. Kellogg spent $5.3 million in measured media to introduce the line in 1982, but spent only $540,000 advertising the products in 1983.

Kellogg's officials maintain that frozen food is an attractive category for the company and Mrs. Smith's lackluster performance in that market to date should not be perceived as a withdrawal from the market. Last summer, Kellogg introduced Eggo frozen pancake batter into 12 test markets. The product is still in test.

The company has stopped promoting its Le Shake drinkable yogurt, which had been distributed in the Northeast. However, Whitney's yogurt, another of subsidiary Whitney's Food's products, shows promise.

Whitney's, a super-premium yogurt, has been marketed in the New York and Washington/Baltimore markets and in Philadelphia since early summer. Because of product demand, however, it may be two years before Kellogg can produce enough of the product to roll it out nationally.

Kellogg sold its fresh food Desserts Services Group to Massachusetts-based M.L. Dessert Co., a division of Worcester, Mass.-based Table Talk Bakery. The desserts group had introduced Mrs. Smith's bagels in 1982 in a 10-state area.

The company discontinued its Make It Easy line of drink mixes that were marketed under Kellogg's Salada Foods division.

Also, Sandoz Canada, a unit of the Swiss pharmaceuticals company, bought Kellogg's Neo Citran line of cold remedies that are marketed in Canada. Kellogg Salada Canada will continue to manufacture Neo Citran products, however, under a "long-term co-pack agreement," according to the company.

Kellogg International, operating in 18 nations, represents about 34% of the company's net sales. Although its cereals' pound volume was on the rise in 1983, the reduced value of foreign dollars caused the division's sales to fall 4%, to $821.1 million.

The company made its strongest showings in Australia, Canada, West Germany and the U.K. The division opened its newest plant in Seoul, South Korea, in August, 1983. The plant manufactures Kellogg's Golden Flakes, Corn Frost, Krispies and Honey Pops.

AMERICAN AUTOMOBILE ASSOCIATION

On the road again. And again. And again.

The AAA TourBook just doesn't sit on the shelf or in the glove compartment. With a circulation of over 23 million and a readership of 87 million*, it travels from the family library to the front seat and back again with ease. Destinations north, south, east, and west are superbly covered in 23 regional editions.

The AAA TourBook readership is one savvy group. 72% have attended college or trade school, 17.7% have completed an advanced degree. And the AAA traveller can afford to stay on the move—with an average household income 76% higher than the national median, and over 30% earning over $35,000. You just can't beat this travel bargain. Only one buy offers you such a low cost per thousand: $4.81.

For advertising that doesn't sit still, go with the book that really gets around: The AAA TourBook. For more information, call Matt Lyle (703) 222-6172. Or write: AAA TourBook Advertising, 8111 Gatehouse Road, Falls Church, VA. 22047.

*Worldwide

Kimberly-Clark Corp., Neenah, Wis., the 77th largest advertiser in the U.S., spent an estimated $77.5 million in advertising, up 11.8% over 1982.

Sales increased 9%, to $3.274 billion, in 1983. However, net income fell 4%, to $189 million. This is the second straight year K-C posted lower earnings.

The company cited two major reasons for the decline in net income—the recession accompanied by the strength of U.S. currency in the past two years and a second year of depressed earnings from K-C de Mexico, S.A. de C.V.

Kimberly-Clark derived 29% of its sales and 19.7% of its net income from abroad in 1983 against $2.326 billion in sales, or 71% of total sales, and $135.9 million in net income, or 72% of worldwide net income from its U.S. operations. Earnings from the Mexican division declined to $12 million, or 6% of the company's net income. The Mexican unit recorded only $13 million in 1982, but $36 million, or 18% of the company's net income, in 1981.

Despite the declines, the company did end the year with a strong fourth quarter and continued to report gains into the first quarter of fiscal 1984.

Largely because of higher volume, sales in the first quarter of 1984 increased 11% from the 1983 level, to a record $902 million. Operating profit rose 9%, to $98 million, while net income was $61 million, up 16%.

K-C products are divided into three main groups: Consumer and service; newsprint, pulp and forest products, and paper specialties.

The largest group—consumer and service—accounted for 69% of the company's sales in 1983, up from 68% in 1982. The consumer and service group again had strong volume sales for most of its products, which include facial tissue, bathroom tissue, feminine pads and tampons, disposable diapers, paper towels and incontinence products sold worldwide under a variety of brand names. Operating profit rose 17%, to $315 million, with volume gains particularly strong for Kleenex Huggies disposable diapers and for tissue products.

The newsprint, pulp and forest products contributed 16% to K-C sales; the paper and specialties class, 13%. The paper and specialties class operating profit rose 31%, to a record $77 million in 1983. Operating profit for the newsprint, pulp and forest products sector declined 49%, to $27 million. Company officials said depressed prices for most of 1983 kept profits low.

In addition to the major product classes, K-C is engaged in other activities, such as aircraft maintenance, finishing and refurbishing, machinery design and truck transportation services.

In the consumer divison, K-C reached full national distribution in 1983 of its Depend incontinence garments.

In February, 1984, the company extended the Depend name by introducing an eight-product line of skincare products for incontinence sufferers. The line is currently in Wisconsin markets and available through specialized home healthcare stores. Ad support for Depend in 1983 totaled $3.2 million, most of it for network and spot tv. The brand's competition comes from Procter & Gamble's Attends.

In the $2.5 billion disposable diaper market, K-C's Huggies grabbed a 24% market share in 1983, surpassing P&G's Luvs as the No. 2 brand. P&G's Pampers held on to No. 1 with an all-time low 37% share, while Luvs slipped to 17%. These figures compare with 1982's 42% for Pampers, 19% for Luvs and 14% for Huggies.

Ad spending for Huggies rose again in 1983 to $19 million, an increase of 26% over 1982. In addition to tv and print, the brand received coupon and hospital sampling support.

Analysts predict K-C will lose some of its market share in 1984 because the company is already producing at factory capacity and the market is growing. It is believed by some industry watchers that P&G's new improved Pampers and Luvs should help P&G recover its market dominance.

For feminine hygiene products, K-C continued its ad support of the New Freedom line, spending $15.7 million. This is an increase of 8.2% over 1982's $14.5 million. K-C is considered to be the No. 2 pad marketer with an estimated 35% share.

Keeping up with the competition from P&G's new Always line, K-C introduced nationally a thin pad, New Freedom Thin, in late 1983. Analysts predict the thin pads, which offer the same protection as thick pads but also greater comfort and convenience, will be the next stage of development for external protection.

Ever since the linking of toxic shock syndrome and the use of tampons, the external protection market has shown healthy gains at the expense of tampons. Spending on K-C's Kotex Security tampons reflected this trend and declined considerably to $3,000, from $255,200, in measured ad spending in 1982.

Over-all, the Kotex brand line received $8.3 million in ad support, down 19% from 1982.

Ad spending on K-C's Kleenex facial tissues was $8.4 million last year, a slight increase of 1% over spending for the brand in 1982. Kleenex Softique, an extra-soft product introduced early in 1982, continued to receive heavy ad support of $4.3 million, up 98% over 1983 expenditures.

K-C's lower priced Hi-Dri brand facial tissues and paper towels received $66,000 in ad support in 1983.

It was a quiet year for K-C agencies. The company assigned its K-C nonwoven fabrics division in Roswell, Ga., to Oglivy & Mather, Atlanta, from Kocs & Wesson, Elm Grove, Wis. O&M will handle advertising, direct response and pr services for Evolution recreational fabrics and Accord furniture fabric.

The company also assigned Depend incontinence briefs to M.E.D. Communications, Hopelawn, N.J., for promotion to the medical market. Campbell-Mithun, Minneapolis, continues to handle consumer ads.

*Worldwide

K mart Corp., Troy, Mich., the nation's second largest retailer in sales volume and ninth largest national advertiser, spent $400 million on advertising in 1983, an increase of 9.3% over 1982.

Network tv spending hit $37 million in 1983 and is expected to top $50 million in 1984, much of it already spent on advertising during the Olympics, bearing K mart's exclusive Olympics campaign positioning line: "K mart. We've got it good."

K mart did have it good in 1983, with earnings of $492.3 million, up 88%, on sales of $18.6 billion, up 10.7%. K mart maintained that pace into the first half of fiscal 1984, ended July 25, posting earnings of $202.4 million, a 23.8% increase over the corresponding period in 1983, on sales of $9.23 billion, up 7.1%—results credited to new merchandising programs and remodeling efforts.

K mart would not release a breakdown of sales by division for fiscal 1983, but industry sources suggest the retailer's apparel division generated more than $4 billion in sales, up 11% from 1982. A company official anticipated an increase of 13% to 15% in 1984 apparel sales.

People weekly performs

"When we run in People, we get a double-edged-sword advantage... response from the trade *and* the consumer."

—Dick Conforti, Vice President of Marketing
Converse Inc.

Perhaps more impressive than advertising expenditures alone is the message K mart is striving to get across with those ad dollars and the massive store remodeling and expansion effort the giant discount retailer began three years ago. Now well into the systemwide makeover for a more upscale "store of the '90s," K mart is underscoring the snappier image with new advertising campaigns that speak more to service themes than price points.

"We still want them to think of us as the price leader—we are still a discount store—but we're going more for the generic commercials and highlighting the stores," said Gerald Habeck, K mart director-advertising.

This is the intent of a new tv spot with the theme "satisfaction always," airing in select regions and destined to serve as the prototype for the new K mart campaigns. In the spot aired nationally with Olympic coverage, a small boy with a new K mart catcher's mitt misses everything—fly balls and grounders. He returns the mitt ("it doesn't catch anything") and K mart takes it back.

"That's a strong change in advertising image, by not offering price items on tv but going more for the over-all image," Mr. Habeck says.

Perhaps in its strongest move to identify with a class act, K mart invested $40 million in 1984 Olympic advertising and promotional campaigns.

K mart was the exclusive retail sponsor of ABC's telecast of the winter games in Sarajevo, Yugoslavia. It was co-sponsor of the Summer Olympiad in Los Angeles, with 92 30-second spots. The majority of the retailer's Olympics budget went to tv, the remainder to magazine, radio, newspaper and point of purchase promotions.

Most visible during 1983 were changes in traditional K mart stores, as well as the addition of new name outlets offering a variety of brand-name and other discounted goods. Within existing K mart stores, display floors were remodeled for a more sophisticated look.

The company is attempting to keep its old customers while wooing new ones and encouraging all to consider K mart the place to find quality home and dress fashions at discount prices, in addition to the traditionally inexpensive deals on everyday items.

"Men and women have more spendable income and have upgraded their thoughts about purchasing to include more name brands and more fashion merchandise, so that's what we're trying to carry," Mr. Habeck said. "We wanted to cater to the original K mart customer, but when that customer comes in for an item, we want them to shop the store."

To that end, K mart now features national brand names on nearly 25% of its apparel, including popular draws such as Gloria Vanderbilt, Sassoon and Wrangler. The plan is to continue to add to its stable of popular brand names in 1984, Mr. Habeck said.

In infants wear, for instance, a large proportion of the stock carried this summer will be brand names that feature licensed characters, a popular Christmas item. Among its 2,160 traditional stores, K mart added 40 "Home Care Center" departments in 1983 and intends to introduce the new design to 125 additional stores in 1984. A total of 500 "Kitchen Korner" departments were added in 1983 and another 650 are slated for completion in K mart stores in 1984. And the 715 "Home Electronics Center" departments completed in 1983 will be matched by 750 more to be completed by the end of 1984.

Further, K mart ended the year with 29 Designer Depot off-price specialty apparel stores in operation in Michigan, Ohio, Pennsylvania, Kentucky, Delaware, California, Illinois and Indiana. An additional 30 stores are scheduled to be opened in 1984, featuring brand-name apparel at 20% to 70% off full retail prices found in most department stores.

Again pushing off-price, K mart last year opened Accents, an off-price home fashions and housewares store featuring top-name china, crystal and accessories and a broad assortment of middle-line housewares. Initial success at the prototype store in the Detroit area suggests "modest expansion" of the concept, K mart officials said.

In a focused effort at upgrading regional K mart stores, the company announced plans during 1984 to fully remodel stores in key markets, including Atlanta, Denver, Chicago, Detroit and Buffalo.

Although it has encountered legal snags in the field of financial services, K mart nonetheless plans to expand its activities in that area through its wholly owned subsidiary K mart Insurance Services. During 1983, 25 such centers were installed in K mart stores in Texas and Florida for a total of 27 centers systemwide. K mart intends to open at least 50 additional insurance centers in Texas and Florida in 1984.

K mart continued to open new stores in 1983, but at a slower rate than in previous years. A total of 71 K marts were opened in 1983, 63 of them in the U.S. Twenty-eight K mart stores were closed because of low profitability. K mart also closed 52 Kresge stores in 1983.

Major personnel changes included Mr. Habeck's promotion to advertising director from director of store operations, southern region. He replaced James Moser, who was since been promoted to the new position of senior vp, president of sales and general merchandise manager. Larry Parkin, former senior vp of K mart and vice-chairman of the apparel unit, was named chairman-ceo. Mr. Parkin replaced retiring Arnold Bachner.

Loews Corp., New York, the nation's 48th largest advertiser, raised its advertising budget an estimated 30.8% in 1983, to $135.1 million, as sales rose 10.8%, to $5.3 billion, and net income soared 58.1%, to $341.2 million.

Sales and net income were at record levels, resuming a trend that was interrupted in 1982 by the depressed economy and a competitive marketplace.

In the second quarter of 1984, the most recent period for which figures are available, Loews reported net income of $48.9 million, down 19.1% from $60.5 million in the year-ago quarter. Part of the decline was attributed to realized investment losses of $8.4 million. Revenues rose 5.6%, to $1.39 billion from $1.31 billion. That brought first-half net income to $114.8 million, down 16.6% from $137.7 in the year-ago period. Revenues in the first half rose 1.4%, to $2.668 billion from $2.632 billion.

Typifiying Loews' results for 1983 was the performance of its Lorillard division, which brought in record sales and earnings for an eighth consecutive year despite the dislocations of today's tobacco market. Revenues rose 27%, to $1.5 billion, while the division's contribution to corporate operating income rose 10.3%, to $252.6 million.

Lorillard volume sales increased, raising its share of the cigaret market 0.5%, to 9.1%. This ran counter to a drop in industrywide unit sales. In 1983, that drop was 4.5%. Lorillard climbed into fourth place among the major cigaret producers, moving ahead of American Tobacco Co., now No. 5 behind Philip Morris Inc., R.J. Reynolds Industries, Brown & Williamson and Lorillard, in that order.

A continuing success story for Lorillard has been Newport, which was the only one of the top 20 cigaret brands to show a gain in sales volume last year. It moved up one notch in the rankings to 11th, taking 2.8% of the market, up from 2.4%. Unit sales totaled 16.5 billion, up 10%. Newport would have made it into the top 10 had Lorillard not reattached the Kent designation to Golden Lights, which brought that brand's sales figures into the Kent totals. Ad spending for Newport in magazines and outdoor totaled $15.1 million, up 1.3%.

Lorillard earlier this year decided to focus its attention on Newport's menthol formulation, and it discontinued sales of Newport Red, a nonmenthol version of the brand.

The move to a Kent brand family—Kent, Kent Golden Lights, Kent III—has seemed to stabilize sales of the familiar filter line, which captured a 3.9% market share and took ninth place among major brands. In trade ads, Lorillard calls its marketing program for Kent "a hard-hitting advertising and promotion campaign that establishes the Kent family among the top advertising in the industry." Ad spending last year in magazines, newspaper supplements and outdoor was $19.2 million, down 10.3%.

True's market share continued to decline, as it hit 1.4%, remaining in 16th place among the top 20. To spark a sales revival for the brand, Lorillard has broken a campaign touting a "unique laser filter system [that] delivers taste you never had in ultra low tar before." It provides, according to the campaign, "ultra low tar taste you don't have to learn to like." Ads promoting this laser-cut filter, themed, "Taste new True," have appeared in magazines and outdoor. True ad spending in 1983 in magazines, newspaper supplements and outdoor was $14.5 million, up 29.5% from 1982.

Satin, Lorillard's 100mm cigaret for women, introduced in January, 1983, is estimated to have garnered less than 0.5% of the market, the prevailing benchmark for success for a new brand. This was despite what the company called "the most extensive advertising and promotional program in Lorillard's history."

Satin has received a face lift in the form of a new pack with embossed gold leaf printing, designed to emphasize the theme, "The Satin woman has great taste." Lorillard calls itself the first cigaret producer to utilize the technology to emboss soft packs. Ad spending in 1983 for Satin in magazines, newspaper supplements and outdoor totaled $22.5 million.

Among Lorillard's smaller brands, three received no ad support in measured media, but continue to be available for sale: Old Gold, Spring and Triumph. A fourth, Max, was the object of ad spending of $791,200 in magazines and outdoor, up 31.8%.

In addition to its cigaret brands, Lorillard markets a line of smokeless tobaccos under the names Beech-Nut, Big Red and Havana Blossom. Ad spending last year in spot tv and outdoor totaled $1.3 million, down 40.9%.

In other divisions at Loews, Loews Hotels enjoyed an increase in revenues of 34.4%, to $217 million. Its contribution to corporate operating income rose a whopping 179%, to $93.8 million. The sale of two hotels in London gave the division a $46 million after-tax gain. Domestic ad spending last year in magazines, newspaper supplements and outdoor totaled $334,000.

Various projects in which the hotel division is involved include a pair of Arizona resorts, Loews Ventura Canyon Resort, in Tucson, due to be completed in December, and Loews Paradise Valley Resort, in Paradise Valley, Arizona; nearing completion this year;

the opening of Loews La Napoule Hotel on the French Riviera, and Loews Glenpointe Hotel, a managed property in Teaneck, N.J. A $102 million expansion is under way at the Loews Anatole Hotel in Dallas, which was chosen to host President Reagan and his staff during the Republican National Convention.

Loews Theatres, for the fifth consecutive year, achieved record results, as revenues rose 9.2%, to $70.1 million, and its contribution to corporate income rose 8.3%, to $15.7 million. Outdoor ad spending in 1983 was $56,100.

The division's total number of screens hit 194, with the opening of three complexes—in Arlington, Tex.; suburban Rochester, N.Y., and the borough of Queens in New York—and the addition of theaters to already-existing complexes. That figure will rise by 48 by yearend, with the opening of more complexes in cities including New York, Indianapolis and Houston.

The CNA Financial division achieved what the company considered "favorable earnings and sales results," despite what it called "the continuing pressures on profitability within the insurance industry." Revenues rose 0.2%, to $3.3 billion, while income contribution rose 28.5%, to $79.2 million. Domestic ad spending last year in magazines and outdoor was $3 million.

In 1983, the CNA division launched what Loews noted was "the most extensive advertising campaign in the company's history," themed, "For all the commitments you make," via radio and such print vehicles as *Forbes, Newsweek* and *Sports Illustrated.*

General Finance Corp., which handles consumer finance, was sold by Loews last November to Credithrift-Financial Corp., a subsidiary of American General Corp. There was an after-tax gain on the sale of $60.7 million. Loews' outdoor ad spending on General Finance was a mere $26,400.

Bulova Watch Co. continued to lose money for Loews, albeit at a reduced rate. While revenues rose 0.7%, to $152.2 million, there was a loss of $8.4 million, compared with a loss of $17.4 million the year earlier.

Some of the steps taken to reverse the red ink included a repositioning and redesign of the Bulova line, as well as the lower-price Caravelle line, and the introduction of Dimension, a line of thin wall clocks. The division's advertising account was moved to Sherwood & Schneider, New York, from Doyle Dane Bernbach, New York. Ad spending in 1983, in magazines, newspaper supplements, outdoor, network tv and spot tv, totaled $2.7 million, down 15.6%.

In other corporate developments, Loews last May sold a block of stock in St. Regis Corp., amounting to 8.5% of St. Regis' total outstanding shares, to Georgia-Pacific, as part of a transaction by which Georgia-Pacific acquired St. Regis' domestic container division. Loews made a profit of almost $40 million on the deal. And last March, Loews lost the distinction of being the highest priced issue on the New York Stock Exchange, as a 2½-for-1 split brought its common stock down from the $200-a-share range.

Mars Inc.

	1983	1982
Sales*	$2,083,000,000	$1,490,000,000
Earnings	N/A	N/A
U.S. Advertising	120,350,500	120,007,600

*Worldwide

Mars Inc.'s red-hot ad program, which expanded 53% in 1982 alone, came to a grinding halt last year as a meltdown in advertising support for its M&M/Mars and Uncle Ben's Foods divisions kept spending about equal to 1982 levels. Led by a substantial increase in advertising for its Kal Kan pet food operations, Mars was able to keep companywide ad spending at $120.4 million, up 0.3% from last year, making it the nation's 55th largest advertiser.

Mars has administrative headquarters in McLean, Va.

Although ads linked to Mars' status as the "Official Snack Food of the 1984 Olympics Games" may be a catalyst for increased spending in 1984, ad support in 1983 fell dead in its tracks as the company's first and third largest units pulled back on the previous year's ad commitments.

Known as one of the nation's most secretive corporations, privately held Mars does not release sales figures, ad budgets or profit statements. The company, closely watched by the confections industry, took home 22% of the $6 billion total national candy sales in 1983, according to the *Confectioner*, a trade publication.

Within the candy segments, Mars is the leader in the nation's candy bar market with an estimated 45% share, producing annual sales of $1.3 billion. In the chocolate candy bar segment, Mars holds 41% of the market, a national share threatened only by Hershey Foods with its 28.5%.

Despite its powerhouse status, M&M/Mars may feel some anxiety this year, as experts say Hershey was able to chip away at Mars' segment of the business in 1983. Observers say that while Hershey's market share increased 2% in 1983, Mars's fell an estimated 2%. Meanwhile, measured expenditures for M&M/Mars fell 4.6%, to $60.4 million.

Even with a modest decline in market share, it is estimated that Mars controls five of the nation's ten-top selling candy bars, including M&M plain and peanut products and Snickers, estimated to be the country's most popular candy bar.

While measured ad spending for M&Ms and the Snickers bar rose 40% and 7%, respectively, in 1983, budgets for other big sellers such as the Mars and Milky Way bars fell substantially. Despite the decline, candy-related spending still accounted for an estimated 60% of Mars' entire ad budget.

Mars introduced no new candy products in the past year, but one item, its Applause caramel apple bar, was withdrawn from test after a short run in midwestern markets. Company officals gave no reason for pulling the product and said there are no announced plans to relaunch the item.

Measured ad spending for Mars' Uncle Ben's Foods fell to $9.2 million last year, although the $500,000 cutback did not threaten the company's place as the No. 2 rice marketer in the nation, behind Colgate-Palmolive's Riviana rice business. Uncle Ben's officials would not project any increases for this year's spending, but said there has been substantial ad support for the rollout of its first "premium mixed" rice product—Rice Florentine. The new product introduction was handled by Ted Bates Advertising/New York, now agency of record for the entire Uncle Ben's line.

It is believed Uncle Ben's holds about 20% of the over-all dried and prepared rice market, leading all producers in the sale of long-grain and wild rices. Sales increased to an estimated $161.7 million in 1983 and are expected to increase an estimated 2% to 3% in 1984.

Mars' line of snack products racked up substantial increases in ad support during 1983, up an estimated 211%. Its premier snack offering, Combos cheese-filled pretzels, now offered in four different flavors, is in half the U.S.

Another snack product, known as Corn-Quistos, still is being tested in southern markets. The company's Snack-Master division said the product is available in about 25% of the nation, but it would not comment on any expansion plans for either snack product.

Combos' measured ad support reached $5.2 million last year, while initial ad spending for Corn-Quistos was slightly more than $466,000.

Mars continues to beef up ad spending for its Kal Kan pet food line. The segment was the only major Mars offering to boost ad spending in 1983, up $5.3 million from the previous year's $24.3 million. With the increased ad support for its Kal Kan products, Mars' pet food division now accounts for a quarter of the company's total ad budget. Advertising this year and last included the promotion of a revamped version of Mealtime dry dog food and the introduction of two new flavors for Kal Kan canned cat food.

In a rare peek into Mars' sales performance, company officials now confirm that an estimated 17% increase in company pet food sales in 1983 pushed Kal Kan ahead of General Foods as the nation's third largest pet food marketer. John C. Maxwell, an analyst for A.G. Becker Paribas, New York, now estimates that Mars has 8.6% of the over-all pet food market with total sales of about $421.5 million.

In a rundown of Mars' performance in different pet food segments, Mr. Maxwell said Kal Kan products are now vying for the top slot in several different catagories.

Kal Kan canned dog food ranks as the No. 2 canned product behind GrandMet USA's Alpo; Kal Kan canned cat food trails only Heinz's 9-Lives in its respective segment; Mars' Mealtime was the sixth largest seller in the dry dog food market and its Crave dry cat food offering was the fifth biggest seller in its market segment.

Measured media spending for all other major Mars Inc. brands include:
- Candy: Snickers, $17.4 million, up 7%; M&Ms (peanut and plain), $13.3 million, up 40%; Twix, $6.1 million, down 9%; Mars Bar, $4.6 million, down 18%; Milky Way, $4.6 million, down 30%; Starburst, $4.4 million, up 22%; 3 Musketeers, $2.2 million, down 67%; Skittles, $1.3 million, up 18%; Lockets cough drops, $465,500, unmeasured in 1982; Summit, $326,000, down 89%.
- Snacks: Combos (in test), $5.2 million, up 93%; Corn-quistos (in test) $466,300, unmeasured in 1982.
- Pet foods: Mealtime dry dog food, $9 million, up 84%; Kal Kan canned dog food, $7.7 million, up 48%; Crave dry cat food, $6.6 million, down 30%; Kal Kan canned cat food $5.4 million, up 13%; MPS Chunks canned dog food, $853,900, unmeasured in 1982.
- Rice products: Uncle Ben's rice, $9.2 million, down 5%.

*Worldwide, fiscal years 1984 and 1983 ended Jan 30
†Includes discontinued operations.

Mattel Inc., Hawthorne, Cal., which cut ad spending to $179.9 million in 1983, a 17.5% reduction, was the nation's 36th largest advertiser.

Mattel, built on the success of the Barbie doll, once again is concentrated in the toy business after a sweeping divestiture precipitated by heavy losses in videogames.

The company posted a net loss of $394.1 million for the 1984 fiscal year ended Jan. 30. Discontinued operations resulted in losses of $420.7 million during the period. Out of the net loss from discontinued operations, Mattel Electronics was the biggest drain, alone accounting for a negative $361 million.

The electronics unit, which previously produced fat profits from sales of the Intellivision videogame, was sold in February, 1984, for $20 million to a group of investors headed by principals of Odd Lot Trading, a New York closeout merchandise retailer that subsequently was acquired by Revco D.S. Inc., the drugstore chain. To raise cash, Mattel also sold its publishing, hobby products and circus theme park operations as well.

Despite the divestitures to raise capital, Mattel's financial state was so precarious that 45% of the company was sold in July, 1984, to a group of investors in exchange for $231 million. A group led by E.M. Warburg, Pincus & Co., Drexel Bernham Lambert and Riordan & Joseph made the investment.

Mattel's bright spot is toy operations, now Mattel's only business, which is solidly profitable and making gains. Mattel sales in the fiscal year (excluding discontinued operations such as videogames) were up 24%, to $663.4 million. Operating profit advanced 36%, to $81.5 million. Domestic market share in toys increased from 7.5% to 12% in the past three years, the company says.

About $60 million of Mattel's estimated 1983 total ad spending, including unmeasured advertising, supported toys. The balance of its $179.9 million ad spending was devoted largely to videogames. Ad spending in 1984 is expected to be reduced sharply because only toy products remain under the corporate umbrella.

In measured spending, Mattel spent $13.8 million on dolls and accessories and $20.1 million on toys, such as He-Man, Masters of the Universe and Hot Wheels. Mattel spent $26 million more in unmeasured advertising (direct mail, co-op, promotion, tie-ins, sponsorships, etc.) on toys.

Pacing toy sales is He-Man and Masters of the Universe, the line of plastic action figures developed internally, which in its third year sold 23 million units worldwide. A syndicated animated tv series based on He-Man, co-produced with Group W Productions, is highly successful and has spawned imitators.

Super Heros Secret Wars, another line of male-oriented plastic action figures based on a license from Marvel Comics, was introduced in early calendar 1984.

The Rainbow Brite line of plush dolls, licensed from the Hallmark Cards characters, sold out in February, 1984, to the trade. A heavy newspaper ad campaign, with a coupon offer for a Rainbow Brite poster, kicked off the consumer introduction in late 1984.

Barbie dolls, celebrating their 25th anniversary, sold 23 million units worldwide.

Hot Wheels, the 16-year-old line of die-cast miniature cars, continues to sell well.

Mattel introduced a 169-product gift line aimed at children and adults under the Emotions brand name. Typically Mattel products have not been aimed at adult consumers.

Mattel says it wants to broaden its product lines and, to that end, has quadrupled market research spending in the past four years.

On the other hand, the Monchichi line of monkey-like dolls no longer is being manufactured.

Mattel's executive suite has experienced some turmoil. Mattel Toys president Raymond P. Wagner left abruptly in 1983. He is now a board member and consultant to Hasbro Industries, a Mattel competitor. Glenn A. Hastings succeeded him as Mattel Toy's U.S.A. president in November, 1983. In May, 1984, Mr. Hastings got the title of president-office of the chief executive.

Also departing at this writing is Robert E. Anderson, corporate president-ceo, who is becoming a consultant, but remains on Mattel's board.

In June, 1984, Mattel merged Mattel's corporate staff and toys organization into a single operating organization.

Ogilvy & Mather, Los Angeles, is the company's principal agency. Ed Libov Associates, the media buying agency, handles assignments on a project basis.

Advertising for toys has been stepped up dramatically outside of the industry's peak Christmas season. Mattel found by advertising at other times it moved more products in those time periods, but expects the major portion of its business will continue to be Christmas, says a spokesperson.

In 1983, Mattel products were used in promotions mounted by Procter & Gamble, Pepsi-Cola, McDonald's and M&M Mars.

Divestiture moves included the following:

- Western Publishing Co., the Racine, Wis.-based publishing arm, was sold in February, 1984, for $67 million. Mattel took a $48.3 million writedown on the sale, after buying Western Publishing for about $120 million in 1979.
- Monogram Models, the hobby products operation, was sold for $12 million in March, 1984.
- Circus World Inc., the Florida theme park, was sold for $10 million in May, 1984. Mattel sold the Ringling Bros. and Barnum & Bailey Combined shows (circus and ice show) in March, 1982.
- Mattel Electronics was sold in February, 1984, for $20 million.

Mattel lays claim to being the largest independent toy company in the world. The pending merger of Hasbro and Milton-Bradley will create an independent toy concern nearly as large. In over-all calendar 1983 sales, Mattel is second to General Mills, whose toy group—consisting of Kenner Products, Parker Bros. and Fundimensions—cumulatively sold about $100 million more.

Mazda Motors of America Inc.

	1983	1982
Sales*	$5,846,280,000	$4,248,050,000
Earnings*	109,890,000	91,410,000
U.S. Advertising	74,500,000	70,531,400

*Worldwide, fiscal years ended Oct. 31

Mazda Motors of America, the fourth largest Japanese auto importer in the U.S., was the 81st largest national advertiser in 1983 with advertising of $74.5 million, a 5.7% increase over the previous year.

Mazda, which markets both autos and trucks, had its best year ever in the U.S. in 1983 with worldwide earnings of $109.9 million on total sales of $5.8 million.

Those financial results translated into 249,538 unit sales—including 76,150 trucks and 173,388 cars—a 22% increase over 1982 and good enough to boost Mazda's share of the total U.S. market to 2.2%, up from 2.1%, and elevate its 7.5% U.S. market share for import registrations in 1982 to 8.3% in 1983.

Mazda in the U.S. is a combination of Mazda Motors of America Inc. (Central), Rancho Dominguez, Cal., and Mazda Motors of America (East), Jacksonville, Fla. The California unit is a joint venture of Mazda Motors Corp. and Sumitomo Corp. and handles car and truck imports to the Pacific, Northwest, Great Lakes and Gulf regions. The Florida operation is a subsidiary of the C. Itoh Co. and handles imports to an 18-state region.

Formerly known as Toyo Kogyo Co. Ltd., the parent company became Mazda Motor Corp. on May 1, a name change that was aimed at dispelling the confusion caused by differing corporate and product identities. The products manufactured by the Hiroshima, Japan-based company already were well-known as Mazda worldwide.

Worldwide unit sales recorded by the parent Mazda Motor Corp. were 1.3 million units, including 174,220 "knockdown sets" (not assembled), up 11.7% from fiscal 1982.

Mazda would like to broaden its model lineup in the U.S., but import restrictions limit the company to about 180,000 cars. Of those, only 30% are the subcompact GLC price-leader ($5,059) and 40% are the 626, a European sedan-look-alike ($8,295 to $10,895). The rest are the high-performance RX-7s ($10,395 to $15,295).

Mazda spent $44 million on measured media, according to figures monitored by Leading National Advertisers for six media. Its dealer franchises for both cars and trucks spent an additional $4.8 million.

Network and spot tv and continued use of auto enthusiast magazines and national newsweeklies were the media mainstays behind the introduction of Mazda's 1984 model line. Tv and print ads continued to keep up the price/value theme of previous years, as well as stressing the "outstanding total performance" of the entire Mazda line. Measured ad spending broke down to $14.6 million in magazines, $27.2 million in network tv and $2.3 million in spot tv.

In the fall, Mazda also continued its "weekend" promotion strategy on network tv, with the effort heavily weighted with sports programing, all aimed at reaching the upscale male audience, with annual incomes of more than $35,000. Mazda maintained its sponsorship of football and basketball events, taking part in the televised games of the NCAA, NBA, NFL and USFL. It also sponsored "Cable Sports World" on Entertainment & Sports Programming Network and for the seventh straight year was a sponsor of "NFL Week in Review" and "NFL Weekly Magazine," two barter-syndicated series from Pro Sports Entertainment.

The "Mazda SportsLook" series of sports journalism programs was shifted to ESPN early in 1984. The Mazda-sponsored show had been on the USA Cable Network. Mazda spent $664,592 on cable tv in 1983, up 21% from 1982, according to Broadcast Advertisers Reports, with 40% of the total going to its B2000 pickups.

The company also sponsored the $200,000 Deer Creek Tournament in Florida and the $200,000 Mazda Japan Classic, the final event in its 34-tournament LPGA series. In men's golf, Mazda was a major automotive sponsor of the Tournament Players Championship in Jacksonville, Fla., and the Tournament of Champions at La Costa, Cal.

Mazda continued its involvement in auto racing, with its RX-7 high-performance rotary engine sports passenger car winning its fourth consecutive GTU championship of the International Motor Sports Assn. With its emphasis on the racing program, the company is trying to erase the negative image of the rotary engine as a gas-guzzling power plant that breaks down.

This seems to be working. In 1983, the Mazda RX-7 was the top selling two-seat sports car in the U.S., selling 51,955 units, up from 48,567 units the previous year. Measured ad spending on the RX-7 was $6.2 million—$3.7 million in network and $183,400 in spot tv, and $2.3 million in magazines.

But unit sales of the RX-7 were behind sales of the popular 626, the company's best selling car with 67,679 units sold in 1983. The 626 was supported with $14.7 million, Mazda's largest advertising outlay. The company spent $8.3 million in network tv, $410,100 in spot tv and $6 million in magazines.

Sales of the GLC economy cars also totaled about 50,000 units. The lowest priced GLC was the four-speed, three-door hatchback, which listed for $5,095. Measured media spending was $9.1 million, again heavily concentrated in network tv ($5.3 million) and magazines ($3.5 million).

Going into the 1984 model year, Mazda continued its "Experience Mazda" theme, with print ads featuring full-body shots of the GLC, RX-7 and 626 cars. The "experience" theme also predominated in network spots that showed the cars on a track, stressing over-all performance and features.

More than one-third of the total annual budget went to promote the 1984 B2000 and SE-5 pickup trucks, which included $11.5 million in measured media, 78% ($9.1 million) in network tv. For the third year, "Sakes alive! Only Mazda has a truck for $5,995" was the theme. The SE-5 version of the B2000 is a sporty model that was priced to compete with other imports and U.S. pickups. It helped to lead Mazda to a record 75,751 units in truck sales in 1983, an 86.3% increase over the previous year. In 1981, the company sold just 16,798 trucks, but with its new orientation in the truck market, it projects sales of 100,000 units this year.

MCA Inc.

	1983	1982
Sales*	$1,584,539,000	$1,586,022,000
Earnings*	147,160,000	176,198,000
U.S. Advertising	74,543,600	80,100,000

*Worldwide

MCA Inc., Universal City, Cal., parent of Universal Studios, was the nation's 80th largest advertiser with advertising of $74.5 million, off 7% from the previous year.

The ad downturn parallels that of earnings, which slipped 16.5% to $147.2 after the Universal film studio arm lost the "E.T., the Extra-Terrestial" magic that sent 1982 sales and profits soaring.

Sales of $1.6 billion in 1983 were flat, a credit to the extraordinary infusion of revenues into the company in 1982 from the summer release of the movie, "E.T.", which grossed $360 million domestically and $250 million abroad as it surpassed "Star Wars" as the all-time movie box office champ.

MCA, whose measured media spending dropped 3.4% to $40.8 million in 1983, spent most of its media budget through Universal Pictures, its movie unit that is one of Hollywood's major film studios, to support new releases. Measured spending on movies was $31.2 million, up 5% from 1982.

Movies receiving more than $1 million in measured spending included "Scarface" $4.6 million, "DC Cab" $2.8 million, "Jaws 3-D" $2.7 million, and "Psycho II" $2.5 million.

"Bad Boys," received $1.3 million, "Doctor Detroit" $1.7 million, "Metalstorm" $1.3 million, "Private School for Girls" $1.6 million, "Sophie's Choice" $1.8 million, "Stroker Ace" $1.9 million, and "The Sting II" $1.8 million.

In November, 1983, Frank Price, the then Columbia Pictures' president who once headed Universal's tv production arm, rejoined MCA. He was named president of MCA Inc.'s motion picture group, a new unit, replacing Robert Rehme, theatrical motion picture group president, who left.

Mr. Price, whose reign at Columbia was marked by a string of comedy blockbusters such as "Tootsie" and "Stir Crazy," installed a new executive team, largely recruited from the studio he left, that dislodged Mr. Rehme's executive corps. Mr. Price is expected to beef up Universal's offerings of youth-oriented comedies, a genre the studio has not successfully tapped in the past.

Marvin Antonowsky, Columbia's top marketing executive, became president of Universal Pictures marketing division, succeeding Charles O. Glenn, executive vp-advertising, publicity and promotion, who moved to Orion Pictures.

Mr. Antonowsky, whose background includes top research and program posts at ABC and NBC tv networks, is recognized as a proponent of using large network tv ad campaigns to support films opening in wide release. Not surprisingly, "Scarface" and "DC Cab," the two films with the most measured spending in 1983, were among the first films released after his arrival in November, 1983.

Universal Television the studio's tv production arm, regained its status as the leading supplier of tv series to the three commercial tv networks, after slipping a few notches in recent years. Universal placed five of its 13 series pilots on the commercial networks' 1984-85 season premiere schedule, the best of any producer.

Tv operating profits are expected to be up sharply in the years ahead because of syndication sales of Universal Television's series, handled by the company's distribution arm, MCA TV.

"Magnum, P.I." will generate more than $200 million in sales to domestic tv stations by the time it becomes available for syndication telecast in fall, 1986, the studio said. MCA TV will begin sales of "Simon & Simon" in late 1984 and "Knight Rider" in 1985.

On top of that, MCA TV is collecting distribution fees for syndicating series made by other producers. "Gimmie a Break" from Alan Landsburg Productions is selling briskly in 1984 and "A-Team" from Cannell Productions will go on the block in syndication during 1985.

Syndication sales are lucrative because network license fees have covered much of a series' expenses in advance, allowing much of the syndication revenue to flow directly to the bottom line.

MCA TV sold an original series for syndication to start in fall, 1984, "Puttin' on the Hits," a weekly half hour in which participants lipsynch hit songs. "Hits" is supported by national advertising.

MCA Home Video, which primarily distributes videocassette versions of Universal Pictures releases, is trying to carve out a niche as a marketer of original programs for home video. To that end, it has released first-run programs in children's, fitness and adult areas.

The home video market was waiting with bated breath in 1984 for the release of "Love Skills," an instructional videocassette that reportedly includes full nudity and simulated intercourse. MCA Home Video wanted to stress the informational value of the hour-long video, and was peeved that publicity before the videocassette's release made it out to be a sexual exploitation venture.

MCA was co-plaintiff with Walt Disney Productions, in pressing the so-called "Betamax suit" seeking to be compensated by videocassette marketers for off-air taping by the public of copyrighted tv programs. In January, 1984, the U.S. Supreme Court in a 5-to-4 decision ruled that the recording of tv programs for private use does not violate federal copyright law. MCA and other Hollywood interests have been unable to get Congress to pass special legislation on their behalf.

MCA is a partner with Paramount Pictures, the Gulf & Western unit, and Home Box Office, the Time Inc. unit, in USA Network, the ad-supported basic cable tv program service. The partners did not bail out of USA Network, despite rumors that they might do so. "USA is very healthy," said Kay Koplovitz, president. Estimated ad sales of the network in 1983 were $31.6 million, up from $21.8 million in 1982, according to Broadcast Advertiser's Report.

To bolster USA Network's programing, MCA and the other partners are letting it cablecast some of their best tv programs before the same programs are available to the general syndication market.

MCA's Spencer Gifts, Atlantic City, drew measured media support of $7.3 million, the same as in 1982. Spencer is a retail and mail-order company with 435 retail stores.

MCA also operates music labels and book publishing units.

U.S. Advertising	311,378,000	265,541,400

*Worldwide

McDonald's Corp., Oak Brook, Ill., was the nation's 16th largest advertiser in 1983 with estimated domestic advertising/promotion spending of $311.4 million, a 17.3% increase over 1982.

According to company figures, the McDonald's system (including all franchisee and international expenditures) last year spent $423 million on advertising, a 15% increase over 1982 and nearly double the $215 million spent in 1978.

Systemwide sales for McDonald's were $8.687 billion in 1983, up 11.2%. The 1,949 company-operated restaurants accounted for $2.297 billion, or 26.4% of total sales. Remaining sales came from the 5,829 stores operated by franchisees and affiliates (the latter are largely overseas joint ventures). The 7,778 stores open systemwide at yearend represented a 7% increase (519 stores) over 1982.

McDonald's growth strategy calls for the opening of 500 new stores each year, and it has exceeded that goal in each of the past several years. All fast-food restaurant chains have experienced increasing difficulty in finding desirable sites as the number of chains grows, real estate prices escalate and markets become saturated. As the largest chain—and one of the first—McDonald's problems in this area are even greater than those of its competitors.

One solution has been to increase the chain's growth outside the U.S. Last year, McDonald's opened 186 foreign stores, 36% of the 519 opened systemwide. This compares with 156 opened in 1982, which represented 30% of those opened systemwide. The chain last year opened its first store in Norway, bringing to 31 the number of countries where McDonald's is represented. Thailand and Taiwan already have been added this year.

A second response to McDonald's dearth of sites has been to accelerate its program of opening restaurants in nontraditional locations. Stores have been opened in hospitals, on college campuses and military bases, and in airport and train terminals.

Additionally, the chain has experimented with the "McSnack" concept, which allows a limited-menu store to be placed in small locations. The first McSnack opened last year in Minneapolis. The second opened in 1984 in La Jolla, Cal.

While the number of stores and total system sales have shown uninterrupted growth, McDonald's average per-store sales have risen more slowly than those of its major, but smaller, competitors—Burger King and Wendy's. Average sales at McDonald's stores open for at least one year were $1.17 million in 1983. This was an increase of only 3.3%, below the 6.2% sales increase for the fast-food industry last year estimated by the National Restaurant Assn. It was, however, nearly double the 1.7% per-store sales increase McDonald's reported for 1982.

One of the industry's favored means of increasing per-store sales is the introduction of new menu items. After several recession-racked, slow-growth years during which few major new products were added in the fast-food industry, expansion accelerated last year. McDonald's traditionally has resisted menu expansion, a function of the size of its system and, analysts say, its management's conservative approach. But McDonald's tried a few new items last year, with mixed results.

Following the success other chains have had with croissants (notably Vie de France and Burger King), McDonald's tested the McCrescent sandwich in Rockford, Ill. It didn't wow Rockford residents, and the test was discontinued.

Hotcakes and scrambled eggs served with an English muffin were added to McDonald's breakfast menu in May, 1983. Two other breakfast products, Sausage McMuffins and Sausage McMuffins with egg, have been expanded to additional markets in 1984. Several Florida stores have tested Maple McCrisps—deep-fried french toast morsels with maple syrup centers. These reportedly have been well-received and will be expanded to more markets this year.

Breakfast has become a major daypart for McDonald's, accounting for about one-fifth of total sales. As such, breakfast and the various new products received network and local tv advertising support throughout the year.

Two other menu items—the McChicken and McRib sandwiches—failed their tests and were withdrawn. McDonald's has said it may reformulate and reintroduce the chicken sandwich.

McDonald's has an undisputed winner in Chicken McNuggets. Last summer, the chain added nine and 20-piece extensions of the original six-piece item and backed the McNugget line in the summer with a major network advertising campaign themed "McNugget mania." The products received tv support again between Thanksgiving and Christmas.

Between the two McNugget campaigns, McDonald's ran its "Leader of the pack" campaign. With 1950s music the advertising for the Big Mac was targeted to teen agers, the primary consumers of the double-decker sandwich.

Almost all of McDonald's advertising in 1983 carried the umbrella theme line, "Together, McDonald's & you," which was introduced in January of last year.

One campaign that did not use the theme was a short-lived set of tv spots featuring actor John Houseman as spokesman that aired in August. The two spots were intended to emphasize McDonald's food quality and value in response to Burger King's comparative advertising assaults.

But those issues were overshadowed by the attention paid to the presence of Mr. Houseman. Critics suggested the gruff Mr. Houseman, best known as a commercial spokesman for the Smith Barney brokerage company, was out of place in a fast-food restaurant. The ads were dropped, and McDonald's chairman Fred Turner later was quoted as calling the spots "overkill."

"Together, McDonald's & you" was replaced in June, 1984, as the chain's umbrella theme with "It's a good time for the great taste of McDonald's." Behind the theme, ad agency Leo Burnett USA put zippier music and faster editing to appeal to the rock-video crowd. But the new look still does not stray far from the "food, folks and fun" advertising message to which McDonald's has clung for a decade. Even though Wendy's joined Burger King in airing comparative advertising that takes potshots at McDonald's, the No. 1 chain has declined to employ the tactic.

McDonald's advertising has received scrutiny since it surprised the advertising industry by firing Needham, Harper & Steers, Chicago, in October, 1981. The account moved to Burnett, whose work for McDonald's has been compared and contrasted with NH&S creative efforts.

For that reason, it was national news in January, 1984, when NH&S launched what McDonald's execs called a "test campaign" for the McDonald's co-ops in Washington and Baltimore. Themed "I've got a taste for McDonald's," the stylish campaign was visually different from Burnett's national creative. Replacing the traditional in-store shots of happy customers were soft-focus, near-abstract vignettes in which only McDonald's familiar Golden Arches were seen—usually in the distance.

The local "test campaign" was discontinued when national pre-Olympics advertising began, but speculation continued that McDonald's national account might return to NH&S.

McDonald's reportedly put $35 million into network advertising during the Summer Olympics, a commitment made possible by a change in over-all advertising funding. In the fall of 1983, McDonald's operators voted to increase from 1.25% of sales to 2% their contribution to the Operators National Advertising Fund, which funds network tv advertising.

McDonald's spent $81 million on network advertising in 1983, but with the new funding structure, sources estimated that figure might be closer to $125 million in 1984.

By the summer of 1984, it appeared McDonald's real response to its competitors' advertising assaults would be one of size rather than substance. Network execs put McDonald's upfront network buy for the 1984 fall season at upward of $80 million. Whatever its competitors thought of the quality of McDonald's advertising, they had to prepare for the fact that Big Mac's messages will be everywhere.

McDonald's Corp.'s founder, Ray Kroc, died in January, 1984, at age 81. Asked to explain the chain's success, Mr. Kroc once said, "We take the hamburger business more seriously than anyone else."

McDonald's vp-marketing William Youngclaus left the chain in 1983 to join Tatham-Laird & Kudner, Chicago. That title has remained vacant.

Assistant vp-advertising Roy Bergold briefly left McDonald's to join Burnett, but returned to McDonald's as vp-advertising when Mr. Youngclaus departed.

*Worldwide

Miles Laboratories, Elkhart, Ind., a subsidiary of Bayer AG of Leverkusen, West Germany, was the 72nd largest national advertiser in 1983, spending an estimated $89 million, an increase of 21.6% from 1982.

Sales increased 4%, to $1.115 billion, in 1983 from 1982. U.S. sales contribution in 1983 was $784 million, up from $747.2 million in 1982.

Both net income and income from continuing operations increased to $35.5 million in 1983, up from a net loss of $841,000 and $29.2 million in income from continuing operations in 1982. The net loss the year earlier was due in part to discontinued operations. The past year was the first full calendar year to include the operations of Cutter Laboratories, which were merged into Miles in January, 1983.

The company operates five groups that manufacture its products: Cutter Laboratories, Miles Professional Products, Miles Biotechnology Group, Miles Pharmaceuticals and Miles Consumer Products.

The consumer products group is made up of consumer healthcare and household products divisions.

The healthcare division's markets children's and adults' vitamins under the brand names One-A-Day, Flintstones and Bugs Bunny. Alka-Seltzer, Alka-Seltzer Plus Cold Medicine, Bactine and Miles Nervine are the division's self-medication products. The household products division includes S.O.S cleaning products and Cutter insect repellents.

Last year, Alka-Seltzer advertising was moved to McCann-Erickson of New York from Wells, Rich, Greene, which had handled the account since the early 1970s. During the years WRG had the $15 million-a-year account, the agency created campaign slogans and themes that have become popular with the American public such as: "I can't believe I ate the whole thing," "Try it, you'll like it," and "Plop, plop, fizz, fizz, oh what a relief it is."

McCann-Erickson, however, has changed the image of the product from the traditional remedy for overindulgence and hangover to one of a remedy for handling upset stomach and headache cause by today's stress-oriented lifestyle. A new campaign has emerged billing the product as the aid for, "the symptoms of stress that come with success." Measured spending for Alka-Seltzer in 1983 was $12.8 million, down slightly from $13.1 million in 1982.

WRG, however, was retained as the ad agency for Alka-Seltzer Plus Cold Medicine, a product receiving $8.1 million in measured media, compared with $5.7 million the year earlier.

Alka-Seltzer is being studied for its potential as a preventative for heart attacks, but approval from the Food & Drug Administration has not been received for professional labeling. If approval is granted this year as hoped, Miles is expected to make an immediate advertising/marketing push to tout the use to the medical profession, the spokesperson said.

In Miles' vitamin products, One-A-Day Multiple vitamin advertising was shifted last year to Tatham-Laird & Kudner in Chicago, giving TLK responsibility for all vitamin advertising. Measured spending for One-A-Day products was $10.1 million, compared with $10.8 million in 1982.

The account was moved from J. Walter Thompson USA, which had held it since 1967. TLK has been handling Miles' children's vitamins, including Flintstone Children's vitamins and Bugs Bunny Extra C, since 1969. In 1983, measured spending for Bugs Bunny was $1.2 million and for the Flintstones chewables was $7.5 million, compared with no measured spending for Bugs Bunny in 1982 and $6.8 million for Flintstones.

New introductions in 1983 included Bugs Bunny chewables in Canada and the vitamin Viteen, introduced in Central America.

In the fall of 1983, Miles Household Products introduced S.O.S. oven cleaning pads, the first new product in the oven-cleaning category to be introduced in the past 10 years, the company says. Doyle Dane Bernbach, New York, handler of the regular S.O.S. account, prepared the campaign. Measured media for the product during its limited exposure in 1983 was $2.5 million.

Among other S.O.S. products, the soap pads registered a measured media increase of 8%, to $4.2 million.

In the professional products group, several new Ames products were introduced in 1983, most notably Visidex II Reagent Strips for the visual monitoring of blood glucose. The product hit the market last October.

In biotechnology products, Miles' enzyme business enlarged its share of the corn wet milling market. In March, 1983, it introduced an improved Taka-Sweet Glucose Isomerase, which is used widely in the production of high-fructose corn syrup. At the end of last year, Marschall Products, a Miles biotechnology unit, introduced new freeze-dried cheese cultures under the Star-Lite brand name.

At Cutter products, worldwide sales increased, especially in Japan, where the company has beefed up its sales force to support anticipated growth. Measured media spending remains small. During the year, Cutter insect repellent received $901,400 in measured spending, compared with $681,500 in 1982. Cutter Biomedical introduced Maxcast orthopedic casting tape into the market during 1983.

Miles Pharmaceuticals reported continued strides in the prescription drug market with the introduction of Mycelex Troche, an oral thrush treatment. The division also completed consolidation of Hollister-Stier, Spokane, Wash., manufacturer of allergan extracts, into its operations.

U.S. Advertising	294,932,500	320,000,000

*Worldwide

Mobil Corp., New York, the 18th largest national advertiser, decreased its ad spending 7.8% in 1983, to $294.9 million, as the nation's second largest oil company and fifth largest domestic gasoline retailer suffered a substantial decline in revenues.

Worldwide sales at Mobil decreased 8%, in 1983, to $58.99 billion, in 1983, largely because of a decrease in petroleum demand. However, earnings increased 24%, the result of restating earnings in 1982 to a lower figure, good returns from both the petroleum division and the refining and marketing division, and cost-containment measures in operation since 1981.

Mobil's biggest single ad expenditure is with subsidiary Montgomery Ward & Co., which makes up 11% of Mobil's corporate assets. In 1983, Montgomery Ward posted its first profitable year since 1979, with a 4.1% sales increase over the previous year. Montgomery Ward had 1983 net income of $54 million on $6.646 billion in sales from 327 conventional retail stores, 2,163 catalog facilities and 48 Jefferson Ward discount stores, as well as a large automobile club and a direct market insurance program.

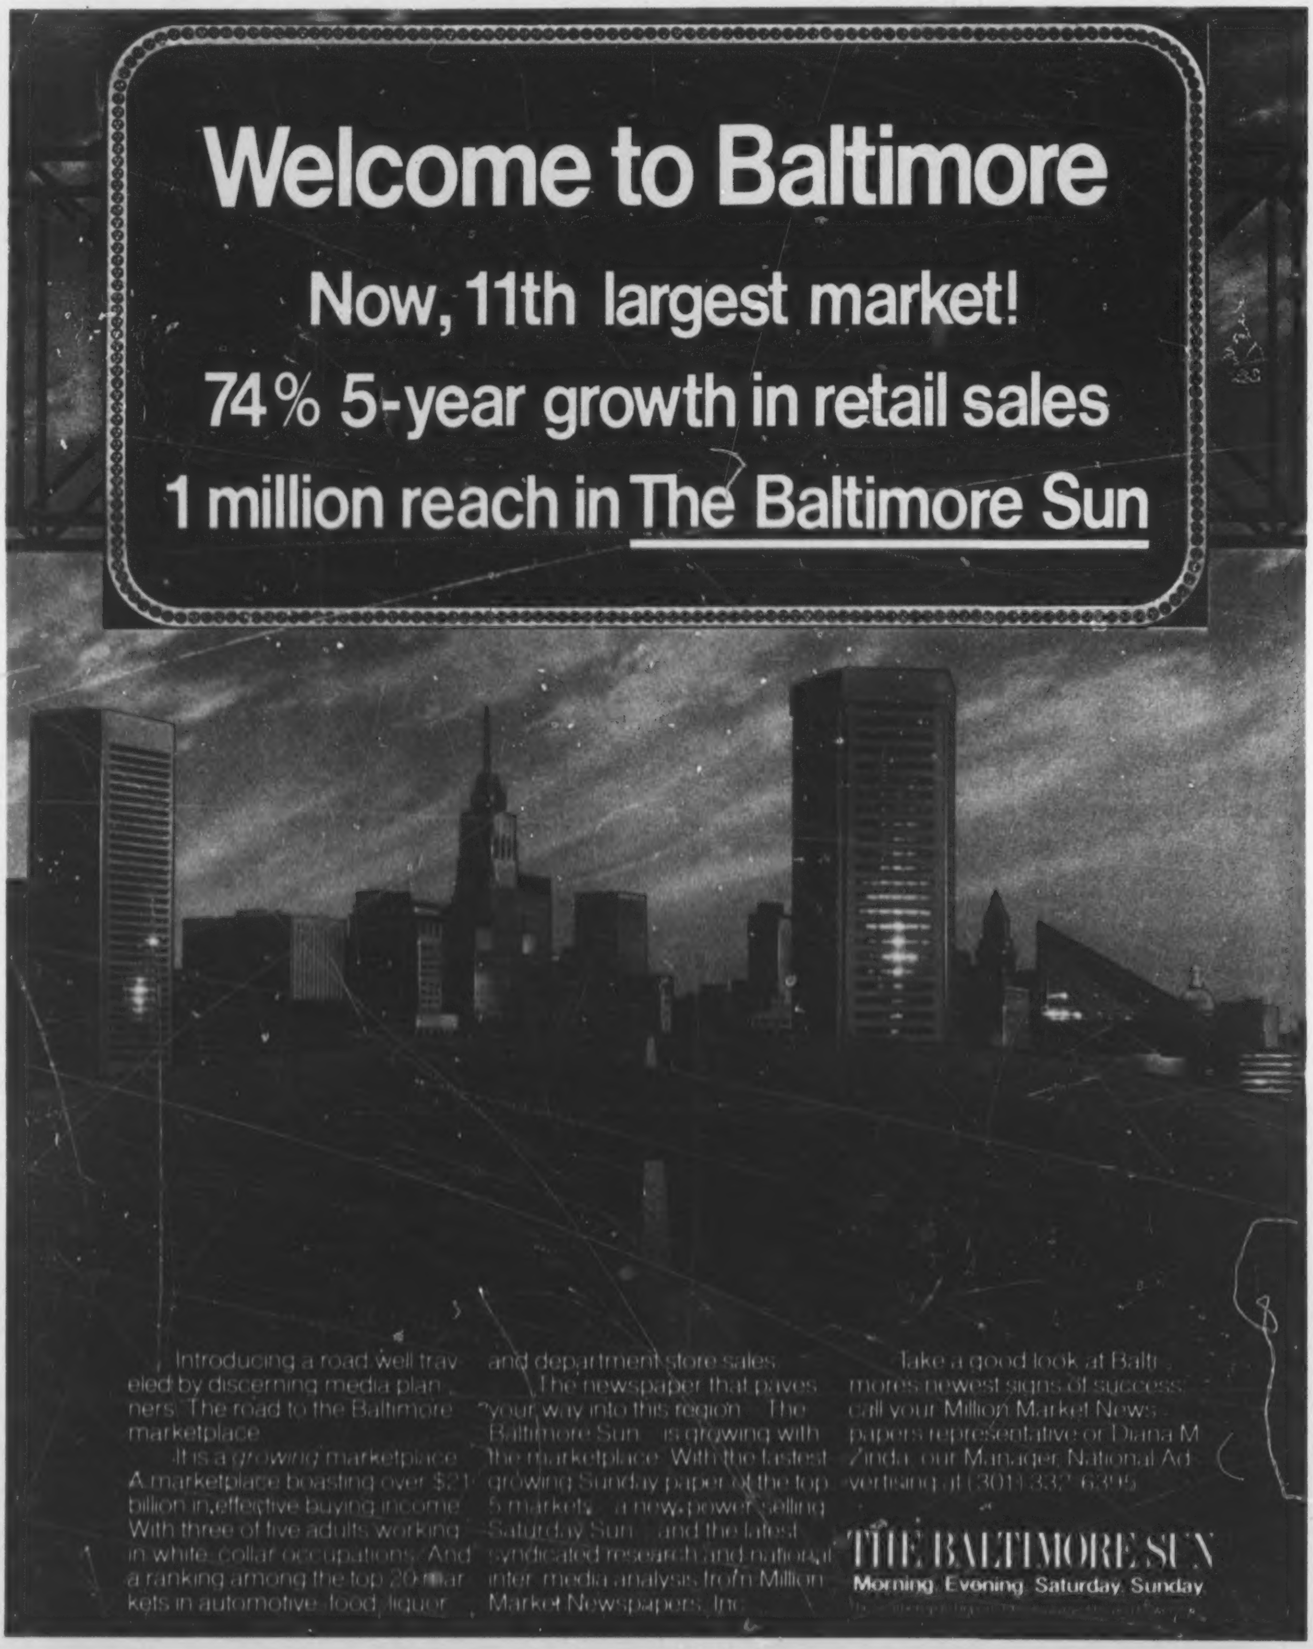
Montgomery Ward's total measured ad budget held steady at $9.57 million in 1983, with $9.29 million of that total in spot tv, and only $33,300 in regional network tv advertising. Montgomery Ward's discount subsidiary, Jefferson Ward, had measured media spending of $177,200 in 1983.

Ward's new merchandising plan, to be implemented this year in selected stores, is termed by Montgomery Ward president-ceo Stephen Pistner: "The seven worlds of Wards." Aimed at building a new market image, it creates seven specialty stores in one store: Apparel, automotive, home electronics, home furnishings, appliances, recreation and leisure, with well-known name brands to draw in younger customers.

All advertising and buying authority for Ward's is centered now in Chicago, under Mr. Pistner's direction.

Measured media ad spending for Mobil Chemical Corp.'s Hefty plastic trash bags was cut 7% in 1983, to $9.3 million. Baggies plastic bags were supported by $1.8 million in 1983 measured media spending.

Mobil oil and gas product advertising attracted sizable ad outlays, including $4.6 million for gas and $2 million for motor oil. At a regional meeting in September, 1983, Mobil dealers were told the company intends to turn many of its 12,000 full-service gas stations into self-service stations in combination with new "Snack Shop" convenience stores. In hopes of boosting



Welcome to Baltimore
Now, 11th largest market!
74% 5-year growth in retail sales
1 million reach in The Baltimore Sun

Introducing a road well traveled by discerning media planners. The road to the Baltimore marketplace.

It is a *growing* marketplace. A marketplace boasting over $21 billion in effective buying income. With three of five adults working in white collar occupations. And a ranking among the top 20 markets in automotive, food, liquor and department store sales.

The newspaper that paves your way into this region. The Baltimore Sun is growing with the marketplace. With the fastest growing Sunday paper of the top 5 markets, a new power selling Saturday Sun and the latest syndicated research and national inter-media analysis from Million Market Newspapers, Inc.

Take a good look at Baltimore's newest signs of success: call your Million Market Newspapers representative or Diana M. Zinda, our Manager, National Advertising at (301) 332-6395.

THE BALTIMORE SUN
Morning Evening Saturday Sunday

its sagging gasoline and diesel sales, Mobil already has converted several of its Arizona locations.

Other major gasoline retailers including Amoco, Arco, Tenneco and Texaco have introduced similar convenience stores at former full-service stations in selected markets, but none has indicated plans to compete on Mobil's scale. If Mobil follows through on its announced plans, it will increase the nation's total number of convenience stores by 24%.

By mid-1985, 2,400 service stations are slated to have electronic point-of-sale terminals that automatically will transfer funds from a customer's bank account, and give "discounts for cash" to cash buyers. In Maryland and Virginia, 192 stations are being outfitted with the electronic transfer terminals this year.

New products in 1983 included Mobil 1 Rally formula, a synthesized motor oil, introduced overseas, and new plastic oil cans with easy-to-pour funnel spouts, aimed at the U.S. do-it-yourself market.

In January, 1984, Mobil Corp. filed a plan with the Internal Revenue Service asking for a rule on whether Mobil could set up a royalty trust of oil and gas producing assets, about equal to $1.5 billion, and give shares in the trust to stockholders. The proposal would thereby save Mobil millions of dollars in taxes but deprive the U.S. government of several billion dollars in federal taxes.

Also in January, Mobil Oil Corp. signed a deal with the British Broadcasting Corp., ARTS & Entertainment Network, Lionheart Television International and WGBH, the Boston public tv station, allowing it to choose a minimum of 17 hours of BBC programing over the next three years. ARTS & Entertainment picked up BBC programing committed to The Entertainment Channel, which folded last year; Lionheart is the exclusive U.S. distributor of BBC material.

The deal does not affect or include previous agreements between Mobil and WGBH for three "Masterpiece Theatre" series from BBC, which Mobil underwrites in addition to "Mystery!" and Mobil Showcase Network.

Mobil also acquired a six-part miniseries from England's Brent Walker Television Productions, titled, "Mountbatten: the Last Victory," to be seen in the U.S. in 1986.

After losing in its acquisition bids for Belridge Oil, Cities Service, Marathon Oil and Conoco, Mobil finally slaked its thirst for major acquisitions in March of this year, buying Superior Oil Co., the nation's largest independent oil company, for $45 per share, or $5.7 billion.

The purchase makes Mobil the world's third largest oil company, although it still ranks second nationally to Exxon.

Advertising for Mobil's cultural activities campaigns and its controversial advertorial campaign, which began appearing regularly in 1970 on op-ed pages in nine daily newspapers, *The Economist*, *Time* and *Parade*, dropped from $5.6 million in 1982 to $4 million in 1983.

The advertorials are considered by many to be the combined opinions of president William P. Tavoulareas and Herbert Schmertz, Mobil's vp-corporate affairs.

Mr. Tavoulareas, a major force behind Mobil's commitment to Saudi Arabian oil, is scheduled for retirement in November, 1984. Mobil's directors, however, voted last September to keep him on after his retirement to affect policies on long-[illegible] planning, Mideast operations and acquisitions. Allen E. Murray, president of Mobil Oil Corp, generally is considered likely to succeed Mr. Tavoulareas.

Chairman-ceo Rawleigh Warner Jr. may step down in February, 1986, leaving management policies wide open to change and new direction. Possible successors for his job are Richard F. Tucker, president-Mobil Diversified Business, the nonoil businesses, and Mobil Corp. exec vp James Q. Riordan.

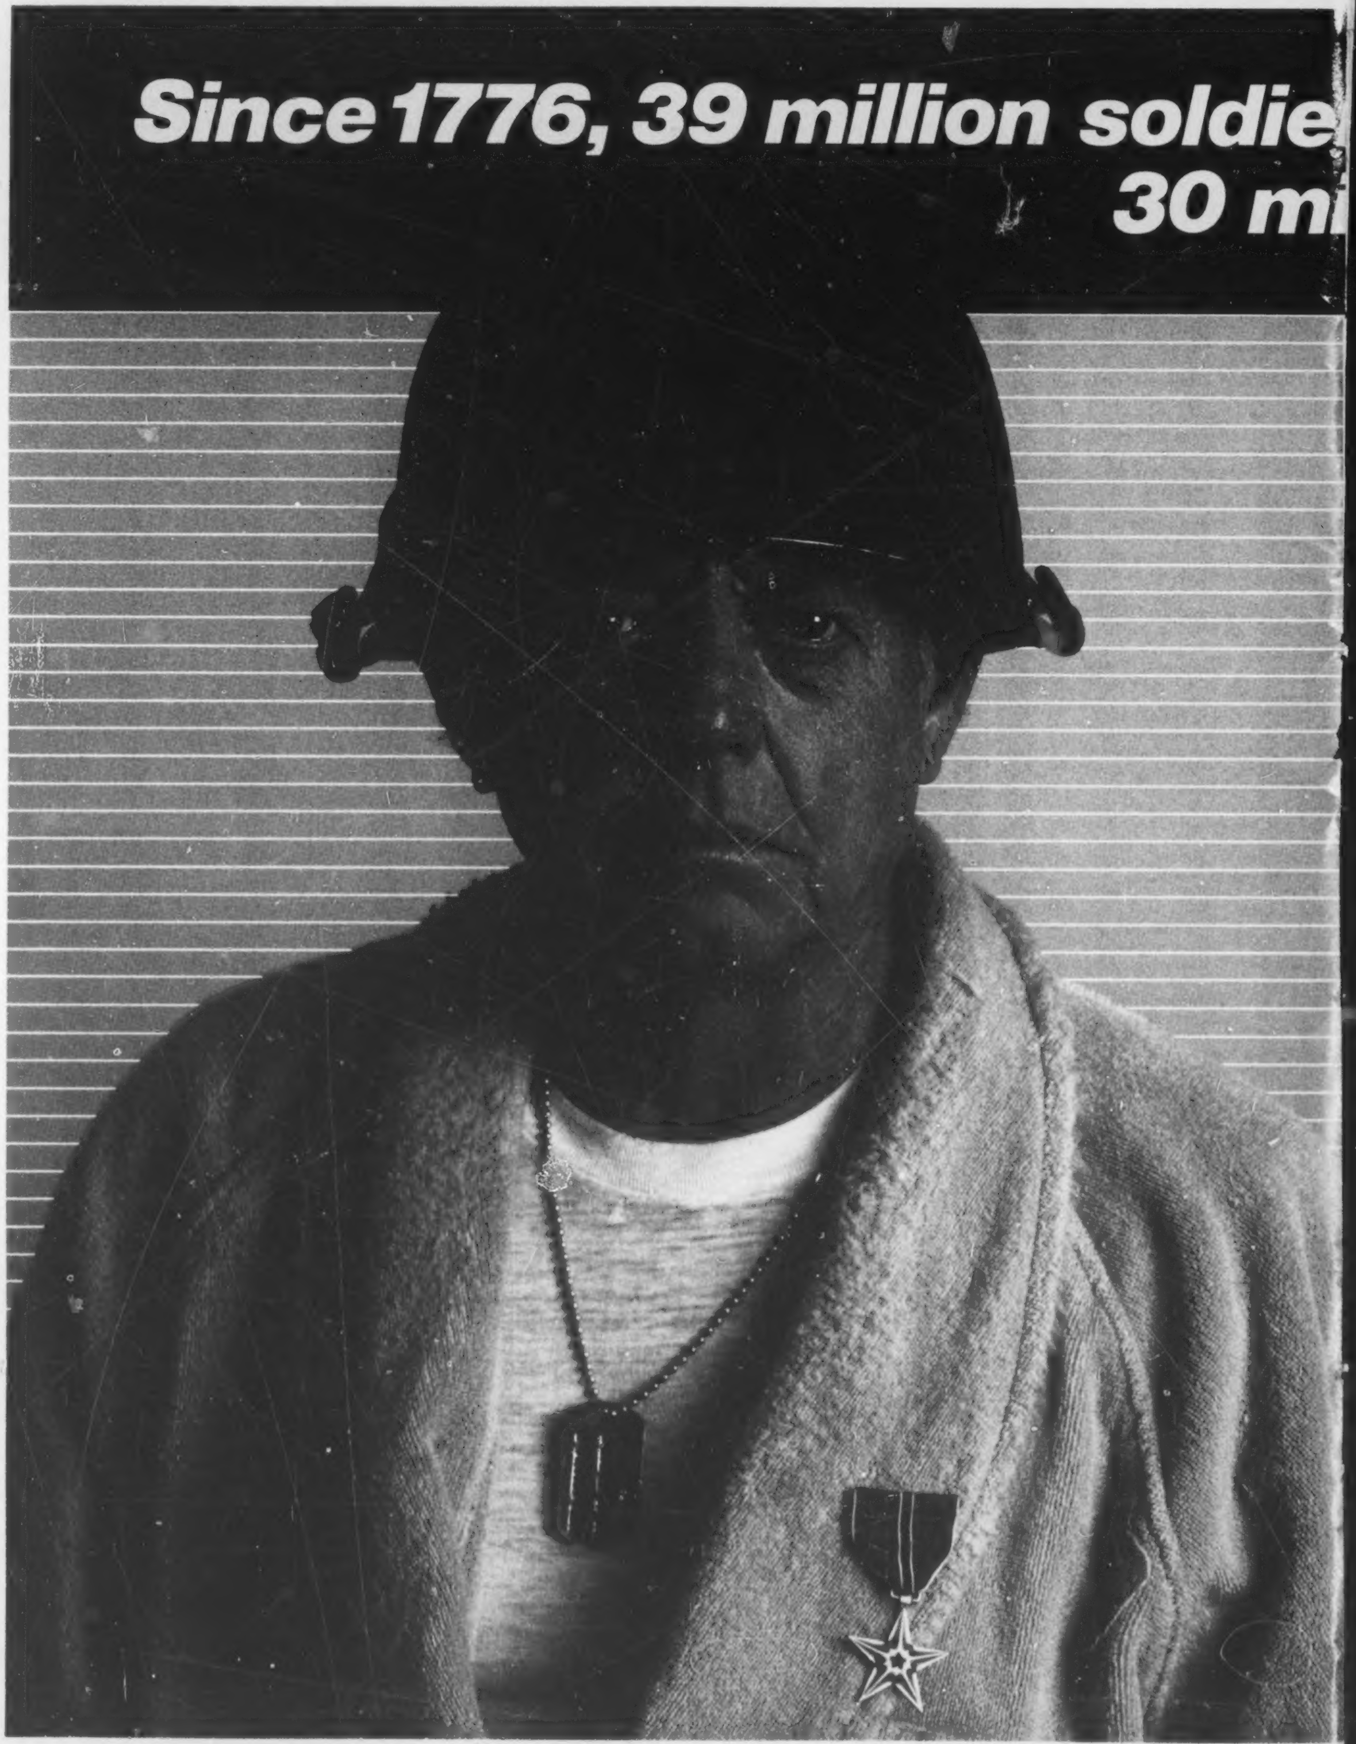
Philip Morris Inc., New York, the



sixth largest advertiser in the U.S., increased its advertising 5.3%, to an estimated $527.5 million in 1983. Consolidated sales of the tobacco, beer and soft drink marketer were $13 billion, up 12% from 1982. Earnings totaled $903.5 million during the year, up 15.6%.

Among its major business lines—cigarets and beer—unit sales for cigarets were up, increasing the company's share of the market, and sales volume for its Miller Brewing Co. unit was down.

In 1983, Miller Brewing Co., Milwaukee, experienced a 43.1% increase in operating income, to $227.3 million—25% of the company total—and sales were up slightly to $2.99 billion, from $2.93 billion. Miller's barrel shipments declined for the second consecutive year.

Using data supplied by Lehman Brothers Kuhn Loeb Research, *Beverage Industry* estimated Miller's overall market share in 1983 dropped to 20.9%, from 22% in 1982.

Miller brands, facing heavy competition in the beer market—a market that has undergone category erosion in premiums and superpremiums—have dropped in market share, particularly in those poorer performing categories.

Lowenbrau dropped from a 11.3% share in the superpremium category to 9.5% in 1983, Miller Life dropped from a 23.1% share among premium beers to 20.8%, and Miller Lite slipped from 53.1% in 1982 to 52.9%, according to a study by *Beverage Industry* and John Maxwell.

Miller, in an attempt to stop the slide of Miller Life—20.3 million bbls. to 17.5 million bbls. in 1983—handed out exploratory assignments to agencies to come up with a new campaign for the floundering brand.

The continued poor performance of High Life led to the resignation of two Miller execs. Both William Catlin, vp-brand management, and High Life brand manager Douglas Rogers left Miller in July.

Miller also pulled its Special Reserve brand from test, saying it did not meet expectations because of the declining superpremium category.

According to Leading National Advertisers, spending on High Life increased 5%, to $51 million. LNA charted Lite's increase at 12%, up to $50 million.

Although the U.S. cigaret market was disrupted by tax increases, Philip Morris USA increased its unit volume slightly while making a large gain in market share. Sales reached 204.7 billion units, compared with 204.4 billion in 1982. Its market share reached 34.4% in 1983, up from 32.8% in 1982. Operating revenues were at $5.5 billion, up from $4.3 billion, while operating income reached $1.3 billion, up from $1.1 billion.

Marlboro, the largest selling cigaret in the U.S. and the world, led the industry with 120 billion units in the U.S. while increasing market share to 20.1%, from 19.2% in 1982.

Ad spending on Marlboro was up slightly in 1983. According to LNA, spending on Marlboro filters was $14.6 million, up from $13.7 million in 1982. Spending on Marlboro filter king and 100s was $16.7 million, up from $15.6 million in 1982.

Philip Morris International increased total unit volume to 244.8 billion units. Excluding the U.S., PM International has a 6.2% share of the world market. Philip Morris was America's leading cigaret exporter. The volume of export sales dropped in 1983, but PM maintained a 58% share of the export market.

PM International's operating revenue was up 2.3%, to $3.6 billion in 1983. Operating income declined 25%, to $336 million. The decline was attributed to price competition, import restrictions, price controls combined with inflation and the strength of the U.S. dollar.

A price war broke out in the important West German market after a sharp increase in the excise tax, which lowered consumption in 1982.

PM successfully launched its L&M brand as a high-quality international brand to supplement Marlboro in the German market. At the end of 1983, PM had the best marketplace performance of the five major competitors. The general reduction in margins plus incremental marketing expenses sharply reduced PM International's operating income in the German market.

Seven-Up Co., PM's soft drink subsidiary, had an increase of 22.5% in operating revenues, to $649 million. However, the company reported an operating loss of $10.8 million. The loss was attributed to increased marketing expenditures. According to LNA, PM's advertising expenditure for 7UP was up to $20.9 million, from $19 million in 1982.

In 1983, 7UP and Diet 7UP increased volume. Like cola and Sugar Free Like are now in distribution in about 50% of the U.S. PM introduced NutraSweet into both Diet 7UP and Sugar Free Like. During 1983, 7UP expanded its no-caffeine advertising by introducing the "Freedom of Choice" campaign.

The Foods Group had a sizable increase in its operating revenues during 1983. Oregon Freeze Dry Foods gained a large private-label order for individually packaged diet entrees.

illion of them are alive today.

28.5 Million veterans are currently eligible for free VA medical care.

3.5 Million veterans are over the age of 65.

12.6 Million World War II veterans will be 60 or older by 1985—and statistically will require five times more medical care than those under 60.
For the great majority of these veterans, the VA will be the health care provider.

The VA is DRG exempt and can expect to assume the responsibility for an increasing patient population from cost-conscious private sector medical facilities and Medicare referrals.

The VA is currently treating more than 1.3 million veterans on an inpatient basis while annually providing for 17.8 million outpatient medical visits.

More than 39 million prescriptions for ambulatory patients and more than 7 million intravenous and parenteral nutrition solutions were dispensed by VA pharmacies in 1982.
The $500 million spent by the VA on pharmaceutical purchases in fiscal year 1984 is projected to double by 1987.

Gain access to this lucrative and expanding market through VA PRACTITIONER, the magazine devoted exclusively to the needs of the physicians and pharmacists of the Veterans Administration.

For media information, contact Michael Aster, Steve Goldstein or Jim Breuning at (201) 549-3000, 195 Main Street, Metuchen, NJ 08840.

*Worldwide

Nabisco Brands, Parsippany, N.J., the nation's 11th largest advertiser, spent an estimated $367.5 million on advertising last year, up 10% from 1982.

Worldwide sales in 1983 reached a record $5.985 billion, only about 2% more than the 1982 sales figure. Because of the strong dollar, sales were affected adversely in the international markets where Nabisco Brands does about $2.4 billion worth of business, or 39% of the total. Domestic sales exceeded $3.6 billion, a 4% gain over 1982. Net income tracked sales by rising 3% last year, to $322.6 million.

Of Nabisco's total advertising budget, 36% was spent in traditional media as monitored by Leading National Advertisers. The six-media figure for the company in 1983 was $120.7 million, according to LNA, up 10%. Most was in spot and network tv.

Products on which Nabisco spent $4 million or more in measured advertising were Breath Savers Sugarless mints ($6.2 million), Care-Free Sugarless gum ($8.3 million), Fleischmann's Light corn oil spread ($7.7 million), Life Savers Bubble Yum bubble gum ($5.7 million), Life Savers candy ($8.1 million), Nabisco cookies ($12.8 million), Nabisco Toasted Wheat & Raisins ($6.1 million), Planters nuts ($7.5 million), Planters snacks ($6.8 million).

Nabisco Brands operates three U.S. divisions: U.S. Bakery Products, U.S. Confectionery Products and U.S. Grocery Products, while Nabisco Brands Ltd. in Canada and International Nabisco Brands comprise the company's international front. U.S. operations accounted for 61% of net sales.

Over-all, the package foods producer made good on its resolution to be active in new product introductions and to support its products with aggressive marketing efforts. One key element in Nabisco's marketing strategy was to work to strengthen consumer recognition in equating Nabisco, the company, with Nabisco, the products.

A first step toward that goal was Nabisco's unveiling of a new, three-note musical signature. The melodic composition is from agency McCann-Erickson, which handles products included in Nabisco's Grocery Products division. The signature made its debut on the network telecast of the Tournament of Roses Parade in January, of which Nabisco was the exclusive sponsor. Nabisco says a recent study found that 85% of consumers polled identified the tv and radio three-note tune as belonging to Nabisco.

The U.S. Bakery Products division, chalking up $1.6 billion in sales in 1983, fought competition on the domestic front with new product introductions, including a number of line extensions, and with strong existing brands, which include the country's five top-selling cookies, according to Nabisco. The top cookies are Oreo, Chips Ahoy!, Fig Newtons, Nilla Wafers and Double-Stuff Oreo, which accompany a line of leading crackers, including Ritz, Premium, Wheat Thins and Triscuits. Nabisco reportedly holds a 32% share of the $4.5 billion cookie and cracker segment.

A licensing agreement was signed between Nabisco Brands and Englewood, N.J.-based Popsicle Industries, a subsidiary of Consolidated Foods, whereby Oreo cookies, which are said to hold a 10% share of the cookie market, are supplied to local ice cream manufacturers throughout the country for use in various ice cream products.

Popsicle Industries markets and distributes the line under the trade name, Oreo Cookies N' Cream ice cream. The cookie-festooned products include half-gallon containers in four flavors, an Oreo cookie ice cream sandwich, and a stick ice cream version. The $6 million advertising and promotional campaign is handled by William Esty Co.

But the big news in the prepackaged cookie category comes from the moist and chewy segment of cookie-dom. Nabisco's player in that new, growing and highly competitive market, Almost Home cookies, a 15-item line, appeared last year to compete with Frito-Lay's, Keebler and Procter & Gamble's (Duncan Hines) versions of soft and chewy cookies.

Within the first 10 months, the Almost Home cookies reportedly amassed $250 million in sales. It has been reported that Nabisco and its competitors spent an estimated $30 million apiece to support the cookies. The Dancer Fitzgerald Sample campaign pokes fun at the cookies' name, including an ad in which a taster concludes, "It deserves a name better than Almost Home."

Competition in the $1.4 billion cracker category heated up as Nabisco decided to roll nationally with its no-added salt and low-salt varieties of Triscuit and Wheat Thins crackers. Two new crackers, Sesame Thins and Herbs and Spice Twigs, appeared, while two existing cracker products, Better Cheddars Snack Thins and Waverly crackers, got a boost with new campaigns.

Nabisco's confectionery division rang up $530.2 million in sales in 1983, along with a 29% gain in earnings for its sweet product lines, which include such brands as Life Savers, Bubble Yum and Curtiss candy bars. The company also reported a Bonkers! fruit flavored chewy candy, Nabisco's entry into that confectionery growth category.

An existing brand, Life Savers candy, and one of its kindred products, Breath Savers sugarless mints, were No. 1 in their respective segments of the market, receiving $8 million and $6 million, respectively, in measured media advertising support.

Bubble Yum bubble gum enjoyed first place in national bubble gum sales, and also increased its volume during the past year. Two new flavors, Pink Lemonade and Orange Sugarless Bubble Yum were added. Baby Ruth and Butterfinger, the cousins in the Curtiss candy line, received their first consumer advertising support in two years.

In the past year, the company consolidated all Nabisco Brands USA divisions, with the exception of the Biscuit Group and All Brand Importers, into a common distribution system. The move reduced the number of distribution centers from 55 to 14. Within the confectionery division, the sale and distribution of Baby Ruth, Butterfinger, Planters Nuts vend packs and Planters Cheese sandwiches were incorporated into the Life Savers direct sales force.

The Life Savers plant in Port Chester, N.Y., closed its doors in a cost-saving move. At the same time, Nabisco announced plans for the construction of a $30 million food research and development facility that will occupy 370,000 sq. ft. in East Hanover, N.J.

The new facility will house not only research, but also the newly joined forces of Nabisco and CETUS Corp. Designated Nabisco/CETUS Food Biotechnology, the new company will develop genetically engineered enzymes for food processing.

The U.S. grocery products division, which include margarines, nuts, snacks, yeast, cereals, desserts and pet foods, boosted sales 3%, to $1.5 billion. Earnings climbed 10%, to $186 million. Besides extending existing franchises and brands, Nabisco's grocery products division is involved in new product introduction. Blue Bonnet Baker's Blend, a margarine product in liquid form, has gone national.

The Planters division presented a new product, Planter Lite Peanuts, which reduces the caloric content of peanuts by one-third, made possible by a technological innovation. "The fitness nut for fitness nuts" Benton & Bowles-inspired campaign theme promotes the new product primarily on tv and in magazines. The Planters division maintains its leadership position in the nut business.

The active yeast category grew in importance as market leader Fleischmann's entered the quick-rising yeast area with Fleischmann's RapidRise yeast. Universal Foods' Red Star brand, which holds an estimated 33% share to Nabisco's 66% in the $50 million category, basically a two-player market, introduced its quick-rise product first. By reducing rising time by 50%, it is hoped the new product will attract more home bread-bakers.

The Mr. Salty line of pretzels solidified its leadership position in that category by increasing its three-product line to 10.

The Canadian portion of Nabisco Brands reported a 15% increase in sales and a 12% gain in earnings in 1983. When it acquired Huntley & Palmer Foods of Britain last year, Nabisco also inherited Associated Biscuits of Canada Ltd., helping Nabisco Brands remain first in Canadian cookie and cracker sales. Earnings rose from $58 million to $65 million, when sales rose from $607 million in 1982 to $698 million last year.

The Huntley & Palmer acquisition reverberated throughout the international operation of Nabisco Brands also, while it gained 22% in sales and 12% in earnings in its U.K., continental Europe, Latin America and Asia/Pacific operations last year. In France, the Huntley-Palmer acquisition has gotten Nabisco closer to realizing its plans to expand in the frozen food business. In India, the company now plays a major role in the biscuit and bread business, thanks to the business enjoyed by the Huntley & Palmer subsidiary in that country.

A major reshuffling of corporate officials took place in June when Robert M. Schaeberle, chairman-ceo, Nabisco Brands, continued as chairman of both the corporation and the executive committee, but passed the ceo title to F. Ross Johnson, who is also now the company's vice-chairman. Mr. Johnson had been the president-chief operating officer. That dual title passed to former senior exec vp James O. Welch Jr. Robert J. Carbonell became president of Nabisco Brands USA and exec vp of Nabisco Brands Inc., after serving as the company's senior vp, Nabisco Brands Inc., and exec vp-corporate technology, Nabisco Brands USA.

The president of the Life Savers and Curtiss division, Peter N. Rogers, moved on to become president of Biscuit, and he was replaced by Lawrence Kleinberg at Life Savers Inc. It has been reported that the upper-level promotions are the reward of a job well done—specifically, the apparent success of Almost Home cookies.

Parkson Advertising, Nabisco's inhouse agency, became a part of Ohlmeyer Communications Co., New York, via a 50% partnership agreement with Nabisco.

Nestle Enterprises

	1983	1982
Sales*........	$2,508,000,000	$2,341,000,000
Earnings.....	N/A	N/A
U.S. Advertising	114,957,000	112,500,000

*U.S. only

Nestle U.S. Enterprises, White Plains, N.Y., a subsidiary of Nestle S.A., Vevey, Switzerland, logged an estimated $114.9 million in domestic advertising spending in 1983, up 1.8% from the previous year. That makes Nestle the 61st largest U.S. advertiser.

Worldwide sales rose 1%, to $13.4 billion, reversing a decline in sales in 1982. Profit before nontrading items and taxes rose 18.3%, to $1.4 billion. (Worldwide sales based on $0.4796=1 Swiss franc.)

Sales in the U.S rose 7%, to $2.508 billion in 1983. North American sales accounted for about 20% of 1983 sales worldwide, up from 19% in 1982.

Strengthening U.S. sales long has been a goal of Nestle S.A., in hopes that the U.S. market would help offset the seesaw activity in less stable international markets. In 1983, with a spate of new product formulations and company acquisitions, Nestle began shaking off its image of a sleepy, sluggish giant.

This new phase of aggressiveness coincides with the appointment of James M. Biggar as president of Nestle Enterprises, the umbrella group for the 10 Nestle companies in the U.S. Among these companies are Nestle Co., whose products make up a wide array of candies, teas and coffees; Stouffer Foods Corp., maker of the Lean Cuisine line and other frozen foods; Stouffer Restaurant Co.; Stouffer Hotel Co., and Wine World, a California winery.

Mr. Biggar, former president-ceo, Stouffer Corp., is employing some of the same strategies used to catapult Stouffer Foods into a major force in the frozen-food category, by upgrading product quality to appeal to the more sophisticated tastes of the affluent.

Nestle reformulated and repackaged the Crunch bar in 1983, which it supported with about $8 million in measured advertising.

Last year also saw the introduction of Nestle's own brand of chocolate-flavored milk, which reportedly is doing "extremely well." So far, it hasn't cannibalized any of Nestle's other related products.

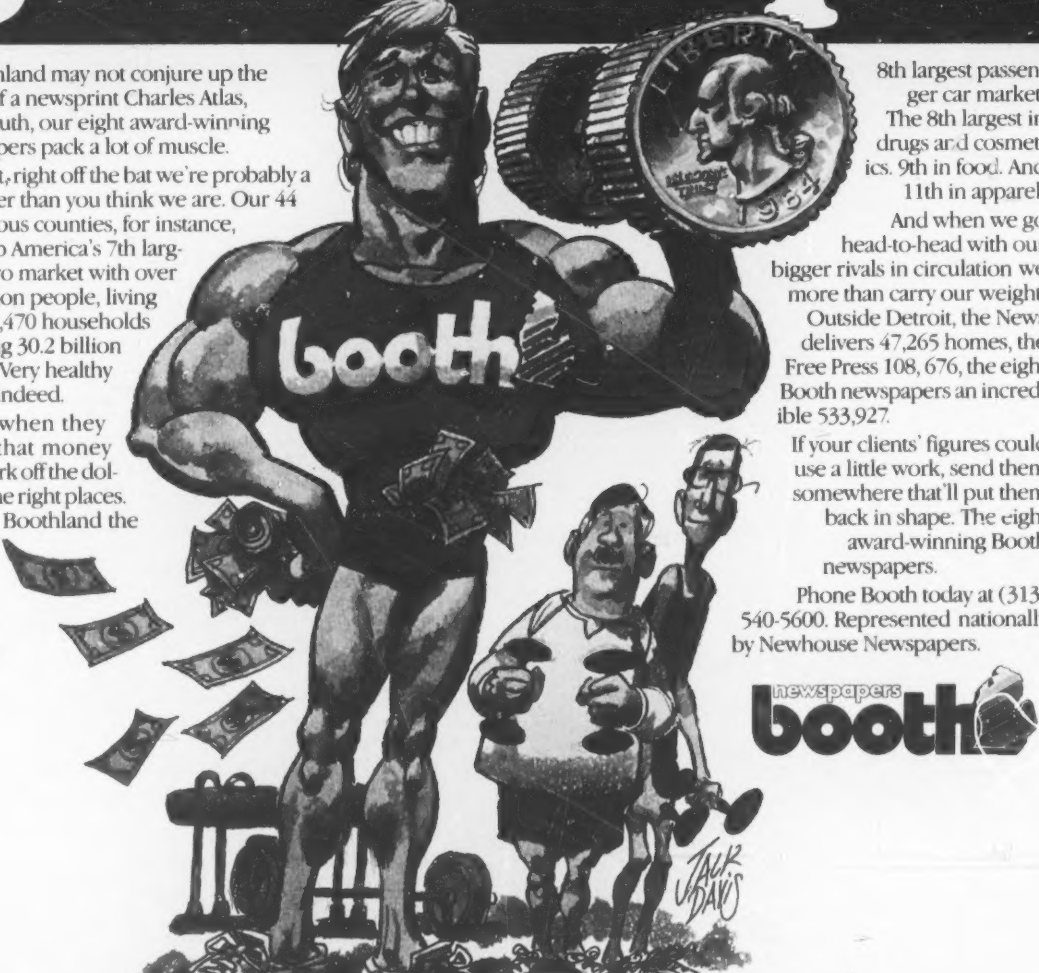
Beech-Nut Nutrition Corp. tested Stages, a new line of baby food that is being rolled out this year.

Nestea bags, another product tested in 1983, did not fare as well as some of the other new products and it reportedly still is being tested. About $94,500 was spent to advertise the product.

Acquisition of Terso's Ward-Johnston, a candy company, was announced late in 1983. Although a relatively small company, it boasts a number of well-known names—Raisinets, Bit-O-Honey and Chunky—and will help strengthen Nestle's 5% share of the candy market.

In 1984, the company announced plans to acquire CooperVision Inc. by Nestle's Alcon Laboratories, a maker of extended-wear contact lenses and other eyecare pharmaceuticals. But that move was challenged by the Federal Trade Commission.

Nestle also announced it had acquired an option to purchase all of the stock of Hills Bros. Coffee Inc., whose sales of roast and ground coffee reached $347 million in 1983. The company said it does not plan to exercise this option until 1985.



Our figures are in great shape.

Boothland may not conjure up the image of a newsprint Charles Atlas, but in truth, our eight award-winning newspapers pack a lot of muscle.

In fact, right off the bat we're probably a lot bigger than you think we are. Our 44 contiguous counties, for instance, make up America's 7th largest metro market with over 3.5 million people, living in 1,261,470 households spending 30.2 billion dollars. Very healthy figures indeed.

And when they spend that money they work off the dollars in the right places. Making Boothland the 8th largest passenger car market. The 8th largest in drugs and cosmetics. 9th in food. And 11th in apparel.

And when we go head-to-head with our bigger rivals in circulation we more than carry our weight. Outside Detroit, the News delivers 47,265 homes, the Free Press 108, 676, the eight Booth newspapers an incredible 533,927.

If your clients' figures could use a little work, send them somewhere that'll put them back in shape. The eight award-winning Booth newspapers.

Phone Booth today at (313) 540-5600. Represented nationally by Newhouse Newspapers.

Analysts indicate that these recent acquisitions demonstrate a determination to maintain a strong presence in these markets. Until this recent onslaught of aggressive product introductions and acquisitions, Nestle had been content to offer reformulations as a means of stimulating sales.

Not long after the announcement of the Hills Bros. acquisition, Nestle presented Nescafe's new line of custom blended coffees, marketed under the names Brava, Classic, Silka and Decaf.

Advertising for these products, initially available in the eastern regions of the U.S., will promote the distinctive formulations, based on an elaborate selection of beans and roasting processes. Advertising and promotion is estimated to be between $20 million and $30 million annually.

Figures on coffee consumption in the U.S. show that the average American is drinking fewer cups. To help combat that, Nestle spent $19.5 million to promote Taster's Choice Freeze Dried and Decaffeinated, mostly via tv. This is up from $18 million in 1982.

The company says Taster's Choice is now the No. 1 brand in the instant market, with about 20% of the market in dollar sales.

Chocolate morsels gained advertising dollars, from $13.2 million in 1982 to $15 million 1983. Nestle Co. was unsuccessful in its suit against Toll House Restaurants charging trademark infringement. That decision is being appealed.

Another important move in the morsel market was the introduction of Nestle's peanut butter morsels. Nestle officials say it became the best selling brand in the category after three months on the market.

Improved performance in 1983 is also attributable to the continuing success of Stouffer Foods Co., particularly its Lean Cuisine line, which was introduced in 1981. In 1983, the first full year of national distribution, sales rose 31.9% over 1982.

However, Lean Cuisine saw increased competition in this category, coming from Campbell's Le Menu and Weight Watchers, both of which also are advertising vigorously. Accordingly, measured advertising spending for Lean Cuisine climbed to $8 million, up from $7.3 million in 1982.

Stouffer's regular line of frozen entrees got $1.4 million in 1983 measured spending. Together, Stouffer entrees and Lean Cuisine account for more than 50% of the frozen entree market.

Stouffer raised slightly the amount spent on frozen pizza, from $3.5 million in 1982 to $3.9 million in 1983. Stouffer is spending $75 million to build a frozen food processing plant in Utah. The plant will begin operation early in 1986.

The Stouffer Hotels division continued to purge itself of properties that "did not fit our image," including the cancellation of all franchise operations under the Stouffer banner but not operated by Stouffer Hotels. Stouffer Hotels expects to grow from 7,500 rooms to 20,000 in the next six years. The new advertising slogan, "New cities, new excitement. The new Stouffer Hotels!" projects this new direction.

Dairy products, which account for 20.4% of total sales, were down slightly from last year's 21.4%. The big news on this front was the recent end of the boycott imposed in 10 nations for Nestle's failure to comply with infant formula marketing codes adopted by the World Health Organization and UNICEF in 1981. Compliance with the code cost Nestle an estimated $10 million to $20 million. The boycott formally ended in February, 1984.

Nissan Motor Corp. in U.S.A.

	1983	1982**
Sales*	$14,417,183,000	$13,282,175,000
Earnings*	393,883,000	397,821,000
U.S. Advertising	122,848,000	117,566,700

*Fiscal years 1984 and 1983 ended March 31
**Fiscal 1983 restated

Nissan Motor Corp. U.S.A., Carson, Cal., a subsidiary of Nissan Motor Co. Ltd., Tokyo, was the 54th largest national advertiser in 1983, with an estimated expenditure of $122.8 million, up about 4.5% from 1982.

In the 1984 fiscal year ended March 31, Nissan Motor Co. Ltd. reported earnings lower than year earlier figures, with net income down 26%, to $293.8 million, on sales of $14.4 billion, up 8.3%.

The Japanese manufacturer of Nissan cars and trucks produced 2.7 million units for the fiscal year (including 210,697 "knockdown sets" for overseas assembly), up slightly from year earlier figures.

Total worldwide vehicle sales for Nissan rose 1.5%, even though sales in the Japanese homeland dropped 0.4%, to 1.1 million units.

Nissan's U.S. sales, representing 46% of worldwide unit sales, rose from 567,480 cars and trucks in March, 1983, to a 670,282 total in March, 1984. Cars were up 7.6% to 465,662 and truck unit sales increased 52.5% to 110,818. The best selling Sentra, known as the "Sunny" in other world markets, accounted for 209,889 units, up from 130,161 in 1982. In addition to being the most popular imported car in the U.S., the Sentra was also the highest volume production car in the world. Nissan spent $14.6 million, down 18%, on the Sentra in measured media.

Of total ad expenditure of $122.8 million, $85.8 million in six measured media included $37.7 million in spot tv, $33.6 million in network tv, and $13.4 million in magazines, according to Leading National Advertisers. Not included in the $85.8 million was an additional $24.1 million in national advertising spent by Nissan Motor Co. local dealers and franchises.

U.S. truck sales for Nissan also showed a significant improvement, up 27.3%, thanks largely to the startup of truck production at the company's assembly plant in Smyrna, Tenn.

The company's share of the over-all U.S. market was down slightly to 5.5%, from 5.6% in 1982. Nissan still ranks fourth in worldwide production, behind General Motors, Ford and Toyota.

The first half of the 1984 model year at Nissan saw a continuation of the creative umbrella, "We are Driven," and sustaining support behind most product lines. The Pulsar line was expanded to include a turbo option, and the new truck line was introduced under the Nissan nameplate, replacing the Datsun brand name.

About 40% of the total advertising budget was devoted to the Nissan truck introduction. Of that amount, the truck grabbed $23.6 million in measured media support virtually split between network and spot tv. The Nissan label is a major step toward the change in corporate identity from Datsun to Nissan.

A new ad theme, "Come Alive, Come and Drive, Major Motion from Nissan," was introduced in October, 1983. The campaign, developed by William Esty Co., is based on Nissan's commitment to quality and technologically advanced products. It underscores the fact that starting in October, 1984, all products will be marketed under the Nissan name.

The new theme was launched with a combination of 60-second spots, some devoted to corporate image and others to "Name in Motion," and the product-sell commercials, which were designed around the new campaign.

Nissan trucks were positioned as a full line of quality-built compact vehicles featuring toughness, durability, power and economy in terms of purchase price and operation. Print ads used such headlines as "Nissan handles the Rough Stuff" with extensive listings of product features. Tv spots established the tough truck value-oriented positioning with action-packed commercials using the new "Major Motion" theme.

The 1984 model year saw heavier weight placed behind the 4x4 pickup truck segment to capitalize on its tough macho image. Special emphasis also was placed on the S/T (Sport Truck) top-of-the-line trim level, the exclusive King Cab, the heavy duty long bed as well as the regular bed truck priced at $5,999. In February, 1984, the 8.8% "subvention" interest rate program, which first was offered in the spring of 1983, was reinstated. It was supported by tv, radio and newspapers.

The car product lines also had the introduction of a new 300ZX sports car in two-seater, 2 plus 2 and Turbo models designed to extend the heritage of the "Z" into a new era of performance and technology, with prices beginning at $15,799 for the five-speed coupe.

In addition to the new "Z," a sporty new 200SX was introduced in both notchback and hatchback versions. The hatchback also was introduced with a turbo option, a car that Nissan marketers aimed to appeal to the younger, upwardly mobile male and female car buyers.

The economy Sentra, priced at $5,199 for the two-door sedan model, continued to represent the bulk of Nissan sales. The advertising behind this low-price offering was designed to maintain Sentra's position as the No. 1 import car with print and tv ads that stressed its advanced technology and value under the "Major Motion" theme.

The Stanza continued to sell well as a roomy family car with plenty of power and high-technology advancements. Measured ad spending for the Stanza was $6.9 million. In the Pulsar line, the sedans were dropped and advertising support—$2.8 million—shifted to the Pulsar NX. The Maxima, attracting $1.5 million in measured spending, continued to be positioned as a luxury sedan and wagon. These three product lines were supported primarily in magazines, with the bulk of the car media dollars being devoted to the introduction of the new 300ZX, 200SX and maintenance of the Sentra line.

The 1984 models had the support of the largest single ad budget in the company's history. The media mix of tv, radio, newspapers and magazines followed the basic pattern set in 1983, but with greater support in local markets.

Network tv exposure was provided by "Monday Night Football," the sixth consecutive year Nissan has appeared as sponsor. Nissan also bought a major sponsorship with import automotive exclusivity on ABC-TV's telecasts of the 1984 Summer Olympics. To capitalize on this investment, Nissan became the car and truck sponsor of the U.S. Gymnastic Federation. A Nissan gymnastic demonstration team was developed for appearances at the Nissan exhibit at auto shows in major markets and dealership openings.

Early in 1984, Nissan announced it would begin assembling cars at its Smyrna, Tenn., plant, beginning next spring. The company plans to build as many as 100,000 subcompact Sentras a year and boost production of the small trucks it now makes at Smyrna to 140,000 units annually from 120,000.

Nissan also reported it will begin assembling cars in the U.K. in 1986 in what would be the first such entry by a Japanese auto maker into the European Common Market.

Noxell Corp.

	1983	1982
Sales*	$304,300,000	$261,897,000
Earnings*	23,205,000	18,584,000
U.S. Advertising	58,364,400	49,594,400

*Worldwide

Noxell Corp., Baltimore, the 94th largest national advertiser, increased its advertising spending 17.5%, to an estimated $58.3 million in 1983.

The company, which markets cosmetics, skincare products, household products and specialty foods, had a 16% sales increase from 1982, to $304.3 million. Net income was up 25.4%, to $23.2 million.

Noxell said unit volume increases caused both sales and profits for the domestic and international operations to reach new highs. Domestic price increases during the year averaged 5%.

The company said Cover Girl cosmetics division sales, which accounted for 57% of the company's net sales, were up 25% as earlier new entries continue to do well and Cover Girl Luminesse lipsticks were introduced.

The company said Cover Girl products continue to be the fastest growing business, growing faster than the market, further strengthening the leadership of Cover Girl in several major market segments.

Cover Girl makeup, in its 22nd year on the market, had a 1983 ad spending increase of 5.5%, to $9 million.

Cover Girl eye makeup was backed by $1.7 million in advertising. Cover Girl mascara got $10.3 million in ad backing, an 8.9% increase from the previous year, with $10.1 million going to network tv.

In the eye makeup category, the company's mascara holds a 26% share, eyeliner has 52% and shadows 19% in grocery store sales, according to analyst Diana Temple at Salomon Brothers. She said the Cover Girl line is "really the heart of the company," and exceeded sales of $170 million for 1983, a 25% growth over 1982. She added that the line is growing in excess of 20% in 1984.

Cover Girl nail polish spent $5.9 million in advertising in 1983, an increase of 225% from 1982. Cover Girl nail polish had a 34% share of grocery store sales in 1983, with the continued success of Cover Girl NailSlicks fueling line growth.

Cover Girl lipstick, with a 37% market share in supermarkets, grew substantially from 1982's 14.4%. This growth was due in part to the introduction of Cover Girl Luminesse lipstick, with a campaign promoting the "soft satin look for lips." The lipstick group was backed by $2.7 million in ad spending, down 35% from the previous year.

Tv accounts for 81%, or $45.7 million, of total measured spending for the company, with Cover Girls Jennifer O'Neill and Carol Alt joining models Cheryl Tiegs, Christie Brinkley and Kelly Emberg and actress Stefanie Powers in promoting "That Cover Girl Face."

The toiletries business reversed its 1982 sales slump and had both unit and dollar increases contributing 22% of consolidated sales, the company said.

Noxzema skin cream, which suffered a sales decline in 1982, grew by about 1% in 1983, to a market share of 20% in grocery outlets. Ad spending in 1983 for the facial cream, which has been marketed for 69 years, was $6.8 million, up 68% from the previous year.

Noxzema 12 Hour acne medicine and skin cream received a major increase in ad spending. Total 1983 ad support was $3.6 million, up 350% from 1982. Network tv spending accounted for $2.7 million of the 1983 ad support.

Noxzema antiseptic skin cleanser also received an increase in ad support. The company spent $1.1 million to back the cleanser, an increase of 125% over the previous year.

Raintree hand & body lotion, fighting stiff competition in that segment, declined in market share to 2% in 1983, from 3% in 1982. Ad support for the line also decreased to $1.8 million, down 61% from the previous year. Deepak Raj, an analyst at Merrill Lynch, said the heavy competition from other lotions and creams may discourage Noxell from spending any more money on Raintree until the line's position is established.

Noxzema shaving cream grew by 20% in dollar sales as a result of the continued success of the "Share the Softness" advertising campaign, which began in late 1982. Market share for the product was 11%, supported by $2.5 million in ad spending, up 82% from 1982.

New emphasis is being placed on the household products category. Lestoil shares were marginally lower, the company said. Ad spending in 1983 was $1.1 million, down 10.3% from 1982. William Esty Co. now is handling the advertising.

Noxell has a new plant under construction in Baltimore. Analysts say the plant will help Noxell maintain the efficient performance the company has shown in the past. The facility, expected to be in full production by the end of the year, will manufacture pressed powder for Noxell, eliminating the need for an outside supplier.

Noxell also is expanding into a specialty foods line developed by its Caliente Chili subsidiary, which the company acquired in 1983. While analysts say the area is experimental, some predicted the company would reach further into the specialty foods market, either through product development internally or with acquisitions. Sales for Caliente Chili were $3 million in 1983, and are estimated to be $3 million to $4 million in 1984.

J.C. Penney Co.

	1983	1982
Sales*	$12,078,000,000	$11,414,000,000
Earnings*	467,000,000	430,000,000
U.S. Advertising	292,451,000	230,000,000

*Worldwide

J.C. Penney Co., New York, the nation's third largest retailer, spent an estimated $292.5 million on advertising in 1983, up 27% from the year earlier, in becoming the 19th largest U.S. advertiser.

Sales were $12.078 billion in 1983, a 5.8% increase over 1982 and considerable improvement over the 0.4% increase of the year before. Earnings were $467 million, up 8.6% from 1982. The stronger showing reflected both the turnaround in the retailing industry nationwide and changes in store format and product alignment under way at Penney's.

Penney's continued to show improvement through the first half of fiscal 1984 in which earnings were $118 million, up 4.4%, on sales of $5.81 billion, up 16.3%. However, included in the six-month's earnings figure was an 11% decline to $49 million in second quarter profits which the company attributed to "early markdowns in summer and spring merchandise and higher spending for promotional activities."

Like its big brothers in the industry—Sears, Roebuck & Co. and K mart Corp.—Penney's continued to work toward modernization of its stores in 1983, hoping through updated merchandise and floor arrangements to develop a more high-fashion image and expand its customer base.

In the alchemy of the modernized merchandise mix, Penney's has dropped auto services, major appliances, personal computers, paint and hardware, and lawn and garden products to expand its stock and presentation of apparel and soft home furnishings.

"We're not trying to get rid of the customers we've had. We're just trying to get more of them," said Penney's public relations manager Duncan Muir.

Forty larger Penney's stores in regional malls were modernized in 1983, and Penney's reported that, in those stores, sales increased about 15% over the previous year. Less dramatic interim modifications at 150 stores were completed in 1983, and similar face lifts were scheduled for 200 more stores this year.

The modernization plan for 1984 includes complete remodeling and merchandise upgrading at 34 more large Penney's stores at a cost of $3 million to $4 million each.

The retailer also plans to open 12 department stores in regional shopping centers, 35 smaller stores in geographic markets, 20 drugstores and 90 catalog centers in 1984 for the start of a four-year capital expenditures program estimated to top $2.5 billion. Of that total, about $1.5 billion is earmarked for modernization of existing metropolitan department stores at the rate of between 40 and 60 stores a year.

Long associated with a rather generic, middle-class America image, Penney's is attempting to nurture a more cosmopolitan image with more high-fashion brand names and an especially strong Italian accent on fashion apparel in promotions this fall.

Halston III, a lower-price fashion line under the *haute couture* designer name, is touted by Penney's as an example of its upscale efforts at merchandise mixing. In 1984, the retailer expects to offer select items in men's wear and soft home furnishings under the Halston III label. Penney's also expects to expand the Lee Wright men's line now available in 500 stores.

The retailer plans a "Salute to Italy" promotion Sept. 16 through October in an estimated 450 stores. The Italian promotion—an added budget item to the chain's standard advertising and promotion budget—is to be supported by advertising designed to reach 32 million households. The campaign includes network tv commercials, preprints, newspaper advertising, a 48-page direct mail booklet to be mailed to 15 million credit customers, and publication of an Italian cookbook featuring recipes from well-known Italian-Americans and Italians.

Other "Salute to Italy" promotions include teams of Italian artisans demonstrating their crafts—from goldsmithing to glass blowing—in the stores, an exhibit of Italian photographs from *People* magazine, and personal appearances by Sophia Loren and Misses USA and Italy.

Penney's chose to highlight the Italian accent in merchandising to reflect the strong consumer interest in the styles and products in 1983, Mr. Muir said. "We had been having a lot of success with Italian merchandise and saw this as an opportunity we ought to seize on."

A major part of Penney's unmeasured media advertising total of $222.3 million is in catalogs. In measured media in 1983, Penney's spent $70 million as monitored by Leading National Advertisers. Among individual media, the mass merchandiser increased network tv expenditures by 34%, to $31.9 million; magazines by 75%, to $19.8 million, and increased spot tv by 9%, to $18.1million.

The retailer spent most heavily on advertising for sportswear, including $10.8 million for family sportswear, up 2%; men's sportswear, $6 million, up 43%, and women's sportswear, $4.3 million, up from $1.2 million.

Other leading ad expenditures for merchandise included women's shoes, $2.8 million, up from $124,000, and shoes for the family, $1.1 million, up

At Henschel-Steinau, breakthroughs in space are part of our everyday world.

At Henschel-Steinau, discovering new horizons in space is commonplace. Finding new and effective ways to maximize product visibility in a world of minimum display space is our specialty. We go far beyond the obvious capability of merely creating point of purchase displays. We probe. Analyze. Evaluate. And solve. We welcome each marketing challenge as pioneers in a galaxy of uncharted dimensions and bring new levels of consumer motivation to every breakthrough we make.

Discover how household words like Hershey, Philip Morris, Vicks, Clairol, Procter and Gamble and others have solved their display needs and attained new levels of sales success with Henschel-Steinau's help. Whatever your product or your space availability, we have the capability to break through the clutter.

The space innovators.

[illegible]

from $354,500.

The retailer opened 35 stores and closed 69 in 1983. In 1984, in the course of its image makeover, Penney's severed its 14-year relationship with McCaffrey & McCall and took its $50 million-plus account to N W Ayer.

Operating profits of J.C. Penney stores reached record levels, and sales in metropolitan stores increased 8.1%, to $8.2 billion. Sales at soft-line stores dropped 6.3%, to $800 million, primarily because 34 fewer stores are in operation.

Reflecting similar moves by its aggressive competitors both in the department and specialty retail business, Penney's moved to promote catalog sales more heavily. The company reported that 1983 catalog sales increased 7.6% over the previous year, to $1.8 billion, and has become a targeted growth area for 1984.

Donald Seibert, chairman of the board-ceo for nine years and a Penney's employe for 36 years, retired in September, 1983, and was replaced as chairman by William R. Howell. John Lucas, ad manager, retired and was succeeded by Edward Haywood.

*Worldwide

PepsiCo Inc., Purchase, N.Y., the nation's 12th largest advertiser, increased ad expenditures 16.9% in 1983 to an ADVERTISING AGE estimated $356.4 million.

Worldwide, the company spent an estimated $472 million, a 15% increase from 1982.

The company's revenues of $7.9 billion in 1983 were up 5% from the previous year. Net income leaped 27%, to $284 million, a reflection not so much of growing strength as of the fact that last year's balance sheet included the cutting loose of $79.4 million in assets of foreign bottling operations. Disregarding this unusual charge, net income actually dropped 6%.

Performance in the domestic food and beverage divisions was solid, with aggressive marketing securing PepsiCo's niche in the increasingly competitive soft-drink, snack and fast-food categories. Disappointing results from international operations—hampered by poor productivity, strong dollar and economic stagnation in much of the world—accounted for PepsiCo's continuing inability to turn around its over-all financial picture.

Recovery in the international operations, however, was the key to the recovery PepsiCo enjoyed in the first quarter of 1984 when net income rose 27% from the first quarter of 1983, to $47.2 million.

The company's marketing strategies are summed up by the phrase "expand and segment." The idea is to achieve growth by expanding the total number of consumers in a given category—soft drinks or snack foods, for example—with intensive advertising, while stressing the unusualness of each product to avoid cannibalization. The strategy is exemplified by the successful extension of the Pepsi name to five different soft drinks.

A brilliant glare of publicity surrounds Pepsi's current Michael Jackson campaign, which includes tv and radio spots as well as sponsorship of the Jacksons' Victory Tour. That glare obscures the fact that in 1983 the company de-emphasized its flagship brand, spending more ad dollars and scoring more creative success in campaigns for other products. Some $23 million in measured spending in network and spot tv and outdoor went to promote Pepsi Free and Diet Pepsi Free, the company's entries in the caffeine-free category, introduced in 1982 to the tune of $4.2 million.

Those two products beat Coca-Cola Co.'s caffeine-free Coke and Diet Coke entries to the marketplace, and together accounted for more than 50% of all caffeine-free colas sold, PepsiCo said. Coca-Cola disputed this claim, pulling out slightly different statistics to establish its own preeminence among caffeine-free colas.

The war of words reflected the importance to both companies of this growing category. It also reflected the difficulty of keeping score in a marketplace where lemon-lime, ginger ale, orange and other sodas all are heralding caffeine-free claims in their ads.

PepsiCo also put new money and creative energies into promotions for Diet Pepsi, spending $20.6 million on tv spots as opposed to $13 million in 1982. The new campaign featured quiet, low-key, slice-of-life situations, focusing on intriguing conversations where Diet Pepsi was a secondary subject. Tag line was "Taste. Improved by Diet Pepsi," a reference to the new NutraSweet formula introduced last year.

Measured spending on Pepsi itself dropped 13%, to $22.8 million in 1983, according to Leading National Advertisers, as the company struggled to find a definitive creative image for the brand. Ads combining the "Pepsi Challenge" and "Pepsi Now" themes were perceived as ineffective, especially in the face of the "Coke is it" blitzkrieg. The result was the late-1983 signing of the Jacksons and the emergence in early 1984 of "Pepsi. The choice of a new generation."

The slogan tapped into older consumers' memories of the legendary "Pepsi generation" ads while appealing to younger consumers with the audio-visual excitement of the Jacksons. Pepsi also has signed a multi-million-dollar deal with Lionel Ritchie.

The Jackson spots drew so much attention, partly because of the incident where Michael's hair caught fire during filming, that the company went so far as to advertise the broadcast times of the spots in certain local newspapers. Cable tv's MTV:Music Television ran a heavily promoted preview of the spots the night before their debut on the Grammy Awards telecast.

The real Pepsi success story of 1983 was in fountain syrup sales. In June, Burger King decided to replace Coke with Pepsi at its 3,200 fountains, citing better service, better prices and the marketing compatibility of wedding the No. 2 cola with the No. 2 fast-food chain. Wendy's International also replaced Coke with Pepsi at 150 of its company-owned stores, meaning Pepsi now serves almost 75% of all Wendy's outlets. These gains were particularly important in light of Burger King's and Wendy's strong push for a bigger share of the fast-food market.

All told, Coke brands are believed to hold slightly less than 30% of the market and Pepsi brands about 29%.

Pepsi introduced a new high-fructose corn syrup formula in 1983, a cost-cutting measure.

The company's two restaurant chains, Pizza Hut and Taco Bell, were bright spots in 1983. Average sales per restaurant grew 18%, with total revenue for the food service division topping $1.5 billion and profits topping $140 million. The continued success of the personal pan pizza, which brought the lunchtime crowd into Pizza Hut for the first time, combined with a growing carryout trade to lead the way.

The company also placed a stronger emphasis on physical improvements to Pizza Hut restaurants and on quality control. Measured spending climbed 25%, to $47.3 million, with total marketing expenditures estimated at about $60 million.

Taco Bell also recorded solid gains, adding 174 restaurants and introducing new products such as Taco Light. Mexican food is the fastest growing category in the fast-food industry; Taco Bell holds a 53% market share, with sales topping $600 million in 1983. Measured media spending grew almost 40%, to $18.7 million, in 1983, according to LNA, with total marketing expenditures expected to hit $30 million in 1984.

Tracy/Locke-BBDO, Dallas, took over the Taco Bell account from Grey Advertising in January, 1983. Its first campaign, tag lined "Just made for you," marked the most intensive use of tv ever by a Mexican chain. The company expects to add 150 new stores this year, and up to 600 more by the end of 1986.

The food products division was a source of both profit and concern in 1983. Frito-Lay remained No. 1 among snack food companies, but slack performance abroad and the slow rate of growth at home were causes for worry, despite the profits of $340 million on sales of $2.4 billion.

Spending remained fairly constant, with most brands receiving moderate increases in support. Cheetos received a boost to $8.3 million, from $6.2 million, in support of an expanded line, while Lay's potato chips took a cut to $2.7 million, from $7.3 million, as the company readied its big gun for 1984: O'Grady's, a new potato chip entry heralded as the most important product introduction for Frito-Lay this decade.

O'Grady's, a "thicker, heartier chip" now moving into national distribution, is expecting to hit $100 million in sales this year. Frito-Lay is counting on the new chip to help it catch up to the growth rate of the rest of the snack-food industry.

Grandma's cookies, a soft and chewy brand, is expected to help in the snack-food industry. LNA reported $3.8 million in 1983 ad support for Grandma's, up 345% from 1982. The cookies were No. 2 in test markets in 1982, and the company expects the introduction to be completed by the end of the year.

PepsiCo slowly is expanding its line of La Petite Boulangerie bakeries, with 33 open in late 1983, 10 under construction, and 100 more expected to be built in 1984. By 1990, PepsiCo hopes to have 2,500 bakeries, all running on fat profit margins.

Wilson Sporting Goods did poorly in 1983, with revenues dropping to the $250 million range after topping $300 million in 1982 and 1982's $20 million profit followed by 1983's $10 million loss. The company has been slow to move out of wooden tennis rackets and into the growth areas of composites and large-head rackets, but now is doing so.

Golf equipment remained the most heavily advertised Wilson products, drawing $4.6 million of the $7.8 million expended on all Wilson products, according to LNA. New see-through packaging is expected to perk up sales of Wilson tennis balls, and growing consumer familiarity is expected to do the same for Sting and Ultra tennis rackets.

The company attributed Wilson's poor performance to increased competition, the implication being that younger companies are outhustling Wilson in dealer service and product introduction.

PepsiCo sold North American Van Lines this past April for $315 million to Norfolk Southern Corp., a Virginia-based railway company. North American earned $25 million in 1983 on revenue of $560 million, slight increases from 1982. The trucking company is considered sound and a good bet for growth; PepsiCo sold North American because transportation does not fit with the conglomerate's existing strengths or growth strategies.

Major changes in the PepsiCo executive suite marked 1983. John Sculley, president of Pepsi-Cola USA, left to head Apple Computer, and Roger Enrico took over. Terrance Collins became president of the food service division, replacing Donald Smith, who quit to assume the leadership of Chart House—a rival company that owns Godfather's Pizza and many Burger King franchises. Mr. Collins has been the leader of the bakery expansion at PepsiCo. Michael Jordan, former head of the international snack division, became president of Frito-Lay, succeeding Wayne Calloway, who became chief financial officer of the parent company.

Pfizer Inc.

	1983	1982
Sales*........	$3,750,000,000	$3,496,000,000
Earnings*.....	447,100,000	332,800,000
U.S. Advertising	72,048,300	65,687,500

*Worldwide totals

Pfizer Inc., New York, the 83rd largest U.S. advertiser, increased its domestic advertising expenditures 9.6%, to an estimated $72 million in 1983.

Worldwide earnings of $447.1 million, up 35%, came on sales of $3.75 billion, up 7.3% from the previous year. U.S. sales contributed $1.95 billion, or 52% of the total.

The pattern of modest sales increases and escalating earnings continued into the new fiscal year. In the first quarter of 1984, worldwide sales were $920 million, a 1% increase over 1983's opening quarter, and net earnings were $127.7 million, up 15%.

Pfizer's businesses are grouped into five segments. The healthcare segment, which includes hospital products and pharmaceuticals, is the largest and most profitable one. It has outpaced the company's other lines of business in each of the past several years. Sales for the segment in 1983 were up 11%, and it now makes up 62% of Pfizer's consolidated sales. It also accounted for 88% of the total 1983 operating profit.

The other segments (and the percentage of total sales they comprised in 1983) are: Agriculture (12%), specialty chemicals (11%), consumer (8%) and materials science (7%).

Pfizer's materials science segment scored an 8% sales gain; the specialty chemicals segment, a 1% gain; agriculture segment, a 2% decline. The consumer segment, which receives the bulk of the company's measured media support, posted a 6% sales gain, correcting the 3% drop it suffered in 1982.

The consumer business line has been restructured in recent years, and sales now are concentrated in the U.S. The two principal divisions are Leeming/Pacquin and Coty. The domestic sales of the two constitute 85% of Pfizer's total consumer sales.

Leeming/Pacquin products include Ben-Gay analgesics, Unisom nighttime sleep aid, Visine eye drops, and Desitin skincare and baby care products, and Pacquin and Barbasol toiletry items. The Barbasol line was extended in midyear with the introduction of Barbasol glide stick deodorant.

Women's fragrances are Coty's largest product category. They include Emeraude, Sophia, Nuance, Wild Musk, L'Aimant and L'Origan. In the men's fragrance department, the Stetson line of men's fragrances were joined by a new Stetson stick deodorant and Musk for Men cologne spray. Sales of men's fragrances were up 21% last year.

New products for women last year included a new line of Airspun powders and Stop It! lip-line sealer.

Measured media spending for Pfizer's consumer products increased 10%, to $42.8 million last year. The increase meant gains for network tv (up $1.5 million, to $34 million), spot tv (which doubled, going to $2.8 million), magazines (up $3.4 million, to $10.8 million), newspaper supplements (which tripled, going to $1.3 million), and network radio (to $500,000).

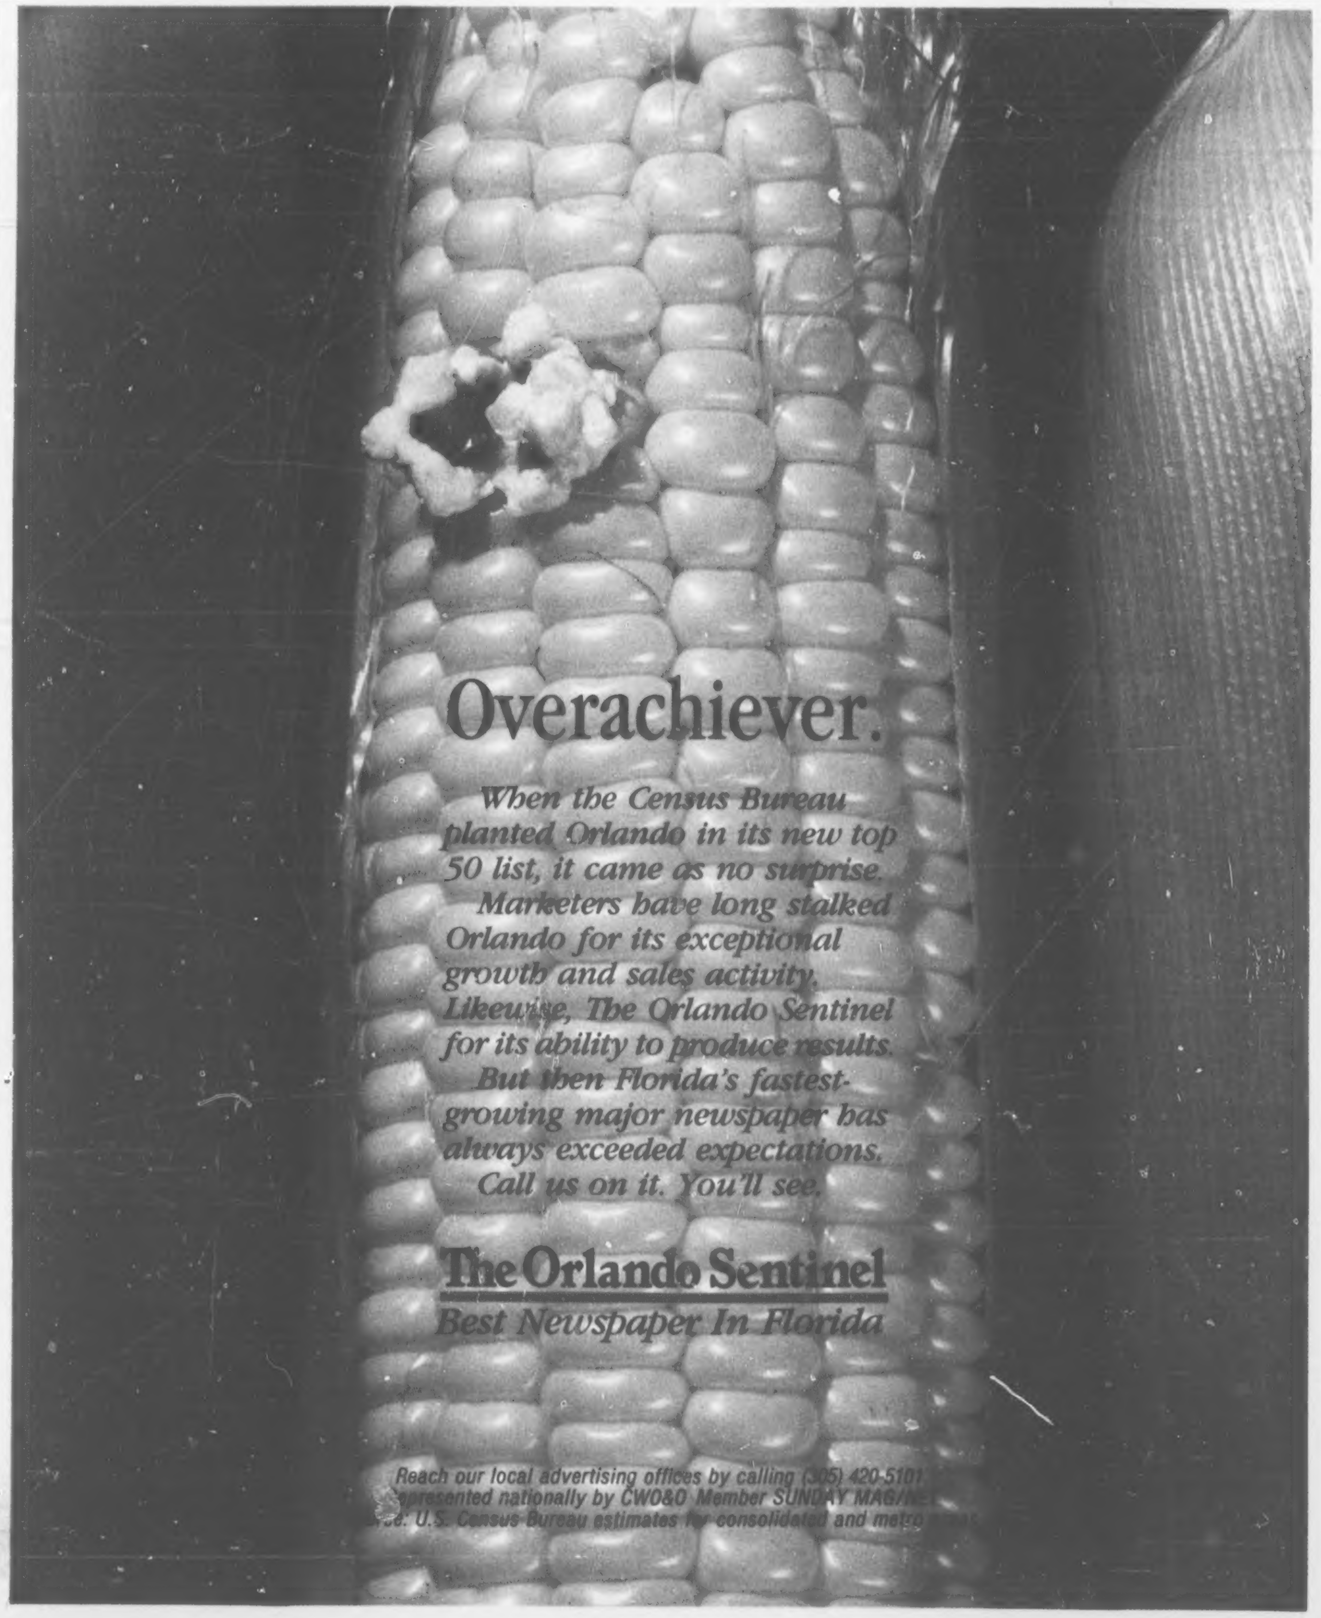
Ad spending for Ben-Gay, which got a $1 million boost in measured spending, rose to $7.3 million.

Visine spending was $10.1 million, a 25% boost. This broke down to regular Visine, $6.7 million, and Visine A.C., $3.4 million.

Coty lipstick spending doubled to $1.5 million, and Unisom's measured media budget increased to $5.2 million. Coty Overnight Success facial cream was backed with $1.5 million, and Pacquin body cream stayed steady at $1 million.

Suffering big measured media budget cuts were: Emeraude, whose budget was cut in half, to $3.7 million; Sophia, which received $3.7 million, down from $5.4 million; Nuance, whose 1983 total was $1.3 million, a third of what it received the year earlier.

Sales were up for the Stetson men's



Overachiever.

When the Census Bureau planted Orlando in its new top 50 list, it came as no surprise.

Marketers have long stalked Orlando for its exceptional growth and sales activity. Likewise, The Orlando Sentinel for its ability to produce results.

But then Florida's fastest-growing major newspaper has always exceeded expectations.

Call us on it. You'll see.

The Orlando Sentinel
Best Newspaper In Florida

Reach our local advertising offices by calling (305) 420-5101
Represented nationally by CWO&O Member SUNDAY MAG/
[illegible]: U.S. Census Bureau estimates for consolidated and metro

fragrance line, but the ad spending was down. The line received $4.1 million in ad spending, down from $4.6 million the previous year. It continues, however, to be the second most advertised men's fragrance behind American Cyanamid's Old Spice.

Barbasol continues as a nonadvertised brand.

In the healthcare business segment, Pfizer markets pharmaceuticals in several broad therapeutic categories. The major ones are antibiotics, which accounted for $586 million in sales last year; anti-inflammatories, which accounted for $415 million, and cardiovascular drugs, which accounted for $325 million. The two largest pharmaceutical product divisions are Pfizer Laboratories and Roerig.

In the anti-inflammatories category, Feldene, an antiarthritic drug is the star. Of the category's total sales of $415 million, Feldene accounted for $386 million. It is Pfizer's single largest product and the world's top nonsteroidal, anti-inflammatory drug.

Procardia, a cardiovascular drug, increased its U.S. sales 53% and totaled $123 million in 1983, about one-third of Pfizer's total sales in its respective category.

Cefobid, an antibiotic launched in 1982, had sales of $118 million last year.

All three—Feldene, Procardia and Cefobid—were introduced in the U.S. during the past two years and have been backed with trade and consumer ads.

Yet another new market entry is Glucotrol, an antidiabetic drug.

As part of a "Healthcare Series," Pfizer Pharmaceuticals has been running newspaper, magazine, tv and radio ads emphasizing how individuals can become partners with medical professionals in maintaining healthy life styles.

Looking ahead, Pfizer expects its hospital products group to be one of the big contributors to growth. Since entering the field when it acquired Howmedica about a decade ago, the group's sales have been growing at three times the rate of the company's consolidated sales. The group had sales of $459 million in 1983 and was strengthened by the acquisition of Valleylab Inc., a manufacturer of electronic medical devices.

Pillsbury Co.

	1983	1982
Sales*	$4,172,000,000	$3,686,000,000
Earnings*	169,800,000	138,900,000
U.S. Advertising	190,994,300	170,427,700

*Worldwide, fiscal years 1984 and 1983 ended May 31.

Pillsbury Co., the nation's 34th leading advertiser in 1983, increased its ad spending 12%, to $190.99 million.

Pillsbury recorded sales for its fiscal 1984, ended May 31, of $4.17 billion, up 13.2% from fiscal 1983. Earnings were $169.8 million, up 22.2%.

Pillsbury, like other flour and mix marketers, was hit late last year by the consumer scare concerning ethylene dibromide. The company said sales—particularly of Pillsbury Plus cake mix—"were hurt substantially" by the scare and have not yet recovered to their earlier volumes.

Measured ad spending for the Pillsbury Plus cake mix line during calendar 1983 dropped 60%, to about $1 million, as Pillsbury maintained third place in a listless cake mix market, behind Procter & Gamble's Duncan Hines line and General Mills' Betty Crocker brand.

In response to the national rollout of a new competitor, P&G's Duncan Hines frosting, Pillsbury reformulated its ready-to-spread Frosting Supreme line to an all-vegetable fat formula. The company increased ad spending by 30%, to $4.3 million, to communicate the new formulation, advertised as creamier. The company's share of the $220 million frosting market declined to 28%, from the 31% it had before the Duncan Hines introduction.

The company introduced a three-item line of dry mixes for yeast bread, under the Poppin' Fresh yeast bread mix label, early this year. Pillsbury pledged $13 million in support of the line—the first dry product to carry the Poppin' Fresh name.

The company entered the wholesome snacks fray this spring by introducing a four-item line of Milk Break milk bars, advertised as having "a half a glass of milk in every bar." Pillsbury pledged $16 million to the introduction. The company indicated Milk Break is only the first of several entries into the cereal-meal-bar category.

Last September, Pillsbury began a new ad campaign for its refrigerated products, featuring the signoff "mm ... ah ... oh ... that poppin' fresh dough." Pillsbury put increased support behind its refrigerated biscuits and rolls as it introduced Pipin' Hot Loaf white bread dough nationally and then rolled out a wheat bread version during fiscal 1984.

Several other new products emerged from the refrigerated group during the year, as well. Last fall, the company introduced refrigerated Spread 'n Bake fudge brownies dough; this fall it plans to introduce Soft Bread Sticks, refrigerated yeast dough that makes bread sticks.

Pillsbury, which helped increase the pie crust category from $101 million to about $160 million now, cut back measured spending for All Ready pie crusts to about $2.9 million in 1983, following its 1982 introductory spending of about $4 million in measured advertising. The company said it lowered measured ad spending because it had achieved the desired consumer awareness level.

Measured ad spending for the Totino's pizza line more than doubled during 1983, from about $1.5 million to $3.1 million, as the company pushed its My Classic pizza, introduced in mid-1983.

Pillsbury this summer introduced its second nationally marketed product intended for microwave cooking—frozen microwave pizza—which joins microwave popcorn. The four-item pizza line is expected to be one of several new product lines under the Pillsbury microwave name.

Pillsbury lowered measured ad spending on its Green Giant entrees to less than $250,000 in 1983, from $1.7 million in 1982, as it prepared the fall introduction of its six-item line of StirFry entrees. Ad levels for 1984 are expected to increase as a result of heavy spending for StirFry entrees and for a new line of frozen entrees, New American Cuisine, now rolling out. The new entrees, each with less than 400 calories, are targeted to young, upscale, convenience-oriented consumers.

Green Giant introduced Nibblets corn and Early June peas with an improved butter sauce last September, and this summer entered nationally a six-item line of vegetables with a reformulated butter sauce. Pillsbury said the new vegetables in butter sauce line was prompted by the success of the two initial products, but it also came soon after General Foods' Birds Eye unit introduced its own six-item line of vegetables in real butter sauce.

Toaster strudel, a frozen breakfast pastry targeted to adults, finally was introduced this summer, after two years in test market.

Pillsbury's Haagen-Dazs unit this summer began an ad agency review. Haagen-Dazs also licensed its name to Hiram Walker Inc. for use in a cream liqueur. Incumbent is Advertising Management, Brooklyn, N.Y. The ice cream maker spent less than $200,000 in measured media in 1983.

In keeping with its previously announced plans, Pillsbury Co. purchased three small companies for its consumer foods unit during the past year. This spring, the company purchased Azteca, a Chicago-based marketer of refrigerated corn and flour tortillas. The Apollo filo dough business the company acquired earlier this year will expand Pillsbury's dough line, while the purchase of Sedutto Ice Cream Corp., a New York marketer of specialty ice creams primarily in mid-Atlantic states, was intended to enhance Pillsbury's presence in the food service segment.

Several management changes occurred in the consumer foods group this year, as George McCarthy, formerly vp-general manager of entrees, was named exec vp at Haagen-Dazs Ice Cream Co., and L. Thomas Gartner, formerly vp-business unit manager for basic foods, succeeded him. James T. Peterson, formerly director-operations analysis, succeeded Mr. Gartner.

Pillsbury's Burger King Corp. continued its solid growth pattern, with the $3.43 billion in systemwide sales in fiscal 1984, up from $2.8 billion in 1983 and $2.5 billion in 1982. Pillsbury-controlled outlets generate about 25% of those sales. There were more than 3,700 units at the beginning of 1984.

Management changes at Burger King in April set the stage for the company to develop alternative restaurant concepts. The acquisition of other fast-food restaurant chains, probably involving fish, chicken or pizza concepts, was among the possibilities mentioned.

Kyle Craig, Burger King's former exec vp-director of marketing, who orchestrated the company's Battle of the Burgers ad campaign, left his post to become vp of the company's New York region. Industry observers speculated that Mr. Craig's new post was a steppingstone to a top executive post, possibly the presidency of whatever new restaurant venture Pillsbury inaugurates.

Don Dempsey, formerly marketing director for McDonald's Corp.'s Far East operations, succeeded Mr. Craig as director of Burger King's marketing department.

Burger King maintained its position as the second largest fast-food advertiser, trailing only perennial big spender McDonald's, while trying to close the gap. BK increased its tv spending 29%, to $82.5 million in 1983. McDonald's, meanwhile, spent $186 million on tv in 1983, a 22% increase.

In contrast to McDonald's, which has been shifting tv budgets in favor of network buys, Burger King has been increasing its local tv spending, which was 63% greater in 1983. Its network spending last year rose less than 1%, to $35.6 million.

Burger King's advertising messages have continued the comparative positioning first introduced in late 1982 with the "broiling vs. frying" campaign. That approach has changed the nature of fast-food marketing, making specific points-of-difference advertising not only acceptable but necessary.

In a bit of serendipity, BK's aggressive advertising style led Wendy's to answer with its "Where's the beef?" campaign, which proved a bonanza for BK's closest competitor.

But that style also continued to work well for Burger King. According to market researcher GDR/CREST Enterprises, BK's customer traffic in 1983 was up 18.1%. That increase was second only to Hardee's, whose customer counts rose 21.7%, and better than Wendy's (up 9%). McDonald's counts actually dropped 1% in 1983, according to the CREST data.

To keep that growth pattern steady, Burger King launched a new flight of "broiling vs. frying" ads in the summer of 1984, backed with a $40 million budget. One spot that parodied the children's show, "Mr. Rogers' Neighborhood," was withdrawn when show host Fred Rogers registered a mild protest with Burger King.

In mid-1984, BK began using that comparative message in Europe, where it also is battling McDonald's for market share.

Like many other fast-food chains, Burger King has pursued nontraditional site alternatives for new-unit construction. But it was BK that landed the plum assignment. In June, it signed a franchising agreement with the U.S. Defense Department's Army and Air Force Exchange Service that could mean the opening of 185 lucrative restaurants in the next several years on Army and Air Force bases worldwide.

Also like its fast-food competitors, BK expanded its menu during the past year. In 1983 it introduced salad bars systemwide and promoted pita (pocket) bread as a salad holder.

Its other major addition was a full-scale move into the breakfast daypart, a market McDonald's and Hardee's have mined for years. Most Burger King stores introduced a croissant-based breakfast sandwich called the Croissanwich (intended to top McDonald's Egg and Sausage McMuffins).

A test of one-third-pound hamburger with fancy toppings was begun in Miami in 1984. The product can compete not only with McDonald's popular Quarter Pounder but also with the "gourmet hamburger" chains that began popping up in 1983. Tacos joined the BK menu in several Southwest markets. The company says it has no immediate plans for expanding availability of either tacos or the one-third pounder.

Pillsbury also worked to reposition its two major dinnerhouse chains, Bennigan's and Steak & Ale. An $8 million campaign for Bennigan's, themed, "Always among friends," broke in July, 1984. It replaced the "C'mon get happy" themed-campaign as the chain moved to present itself more as a restaurant than as a bar.

Steak & Ale, meanwhile, has changed its menu mix to include more chicken and seafood dishes as consumer interest in red meat has declined.

Procter & Gamble Co.

	1983	1982
Sales*........	$12,946,000,000	$12,452,000,000
Earnings*.....	890,000,000	866,000,000
U.S. Advertising	773,618,360	726,189,700

*Worldwide, fiscal years 1984 and 1983 ended June 30

Procter & Gamble Co., the 22nd largest U.S. industrial corporation in total sales in 1983, ranked No. 1 among leading national advertisers in 1983 with total advertising expenditures of $773.6 million, an increase of 6.5%.

The Cincinnati-based household goods marketer had 1983 sales of $12.946 billion, up 4% from the previous year. Worldwide earnings were $890 million, an increase of 3%; The U.S. contribution to earnings was $707 million.

U.S. earnings, a 7% decrease from the previous year, largely were depressed from heavy spending involved in the expansion of four new consumer products into national distribution.

Procter & Gamble reported worldwide advertising and promotional spending of $915 million in fiscal 1983. At that rate, P&G will become history's first billion-dollar-plus worldwide advertiser at the end of fiscal 1984. In fact, analyst Hugh Zurkuhlen of Salomon Bros. expects P&G to notch worldwide ad and promotion spending of $1.085 billion in 1985 (P&G's fiscal 1984 ends June 30, 1985).

Measured P&G advertising for 1983 in five print and electronic media plus outdoor totaled $650.4 million in the U.S., up 6.7% from 1982. The remainder, or $123.2 million, was in unmeasured advertising such as coupons, samples, point-of-purchase, in-store advertising, direct mail and cable. Cable spending, for example, was $15.2 million (up 123.8% from 1982), ranking P&G a notch behind the No. 1 cable advertiser, Anheuser-Busch, according to BAR Cable TV Network Report.

U.S. net sales for P&G in 1984 fiscal year were $9.554 billion, 73.8% of the worldwide total, and up from 72.9% of the worldwide total in 1983. U.S. advertising to sales percentge was 8.1%.

Going into fiscal 1984, P&G admitted the year would be a tough one on earnings because of dramatically increased spending for new products, particularly Always feminine-protection line, Liquid Tide, Duncan Hines cookies and Citrus Hill orange juice.

Entering the $1.3 billion feminine protection market (napkins are two-thirds of the market), the Always line of feminine hygiene products is backed by an estimated $100 million ad-promotional campaign.

Citrus Hill, P&G's entry in the orange juice market (frozen, $1.5 billion as a category; chilled, $980 million), has a new version called Citrus Hill Select with improved flavor, backed by a $75 million to $100 million campaign. Both Always and Citrus Hill break the record for the most ever spent on a brand introduction.

Advertising expenditures for the six-variety Duncan Hines ready-baked cookies are not known, but are expected to fall short of the amount spent on Citrus Hill Select or Always, because P&G has low bakery capacity and it must go slower than it usually does in entering an already mature $4.2 billion market now dominated by Nabisco Brands (40%), United Biscuits/Keebler (12%), American Brands/Sunshine Biscuits (8%) and Frito-Lay/Grandma's (7% to 9%).

As in Duncan Hines cookies, ad expenditures for new Liquid Tide are not known, but are expected to be generous if one takes the six-media 1983 spending of $25.5 million for Tide (up 41.2%) as a measure. Tide is the biggest seller in the general laundry detergent category with a 22% market share, down three percentage points from 1981.

The new product expenditures at P&G have led the company to predict that such expenditures possibly would cause lowered earnings through the first half of the current fiscal year.

"The trend in new product development is here to stay," a P&G spokesman said. "The double-digit earnings rate increases of earlier years are gone for the present. P&G is working for solid performance and growth, but it cannnot be concerned that the rate or total percentage of growth may be lower for the immediate future because P&G must work in 5-10-year increments." Most analysts expect the earnings rise to be in the 5% to 8% range.

In the $700 million liquid laundry detergent category, Lever Bros.' Wisk is first with a 33% share; P&G's Era Plus liquid is second with 4.5%; Colgate-Palmolive's Dynamo is third with about 2.5%. Era Plus was backed by nearly $19 million in measured advertising in 1983. (Era regular and Plus spending combined was up 46.2% over 1981.) Era is P&G's No. 3 leading advertised brand.

Among P&G's 69 product lines, Pampers disposable diapers, with a $23.62 million media spend, ran second to Tide ($25.54 million) as P&G's top media advertiser in 1983.

Disposable diapers is a marketing area reflecting the type of market building and competitive pressures that are forcing P&G to funnel additional ad expenditures into many products, increase the product line in whatever category and boost research and development.

P&G via Pampers held a 77% share of the disposable diaper market until the mid-1970s, largely on the strength of its early arrival in the category (1961) and sizable ad outlays, but its share of market has eroded to 58% (40% for Pampers, 18% for its upscale Luvs) compared with 17% for Kimberly-Clark's Huggies brand and 25% for the private label and store brands.

P&G counts on disposables for 17% of its worldwide sales and 22% of its profits. This loss of share in the $1.2 billion market means an estimated annual loss of between $20 million and $30 million in pretax profits. For 1984 and beyond, it is expected to regain share because of its near-$24 million ad budget for the category's products, new design and resealable tapes and Kimberly-Clark's limited production capacity.

Such ad increases are elements of what Hercules Segalas of Drexel Burnham Lambert calls the flip side to the

U.S. SAVINGS BONDS GUARANTEE GROWTH.

"New Variable Rate U.S. Savings Bonds represent one of the best all-around investments ever offered." . . . Roger B. Smith, Chairman of General Motors.

Roger B. Smith
1984 National Chairman
U.S. Savings Bonds
Volunteer Committee

"Your company's Payroll Savings Plan"

"Your company's Payroll Savings Plan provides extraordinary financial benefits for your employees with New Variable Rate United States Savings Bonds.

"Savings Bonds are convenient and easily available through the Payroll Savings Plan. It makes good sense to offer your employees a proven way to save . . . and it affords all participants the opportunity to help their country. (Bonds saved U.S. taxpayers over two billion dollars last year.)"

"It's a crop that is bound to double . . . or better in just 10 years!"

"U.S. Savings Bonds are a unique investment. They're guaranteed to earn at least 85% of the average yield on 5-year Treasury securities. They're a way to build savings, thrift, and a stable future. They're easy to buy through Payroll Savings; just a few dollars a paycheck. And they're completely free of investment risk."

"Guaranteed to earn no less than 7.5% . . . without going out on a limb."

"Series EE Bonds are directly related to Money Market rates of return. Important to all is the fact that they are backed by the United States Government. Savers who hold their U.S. Bonds for five years or more are protected by a guaranteed 7.5% minimum return. Finally, the interest on bonds is federal tax deferred and free from state and local taxes, an unbeatable advantage.

"Start your company's campaign today and encourage your people to use the Payroll Savings Plan to buy U.S. Savings Bonds. Your local Savings Bond Representative will be happy to help you."

offensive spending supporting P&G's marketing strategy and advertising—defensive spending "to catch up."

He said that during the 1978-83 period, P&G had poorer earnings in some major product categories, including soaps, detergents, diapers and paper products. During those same years of over-all increased P&G earnings, market share in some of the basic product lines fell to five-year lows. Increased ad spending was necessary to stop further erosion in market share.

The reasons for the erosion are varied:

- There has been stiffer competition from tried-and-true rivals such as Colgate-Palmolive, Lever Bros., Purex and Hunt-Wesson Foods, but also from newer competitors including Nabisco Brands, Coca-Cola Co. and Kimberly-Clark.
- Competitors have made inroads into P&G territory by improving their products, by aiming at single P&G products instead of making a full frontal attack on a whole P&G line, and by vigorously using sampling, coupons, price and other incentives.
- Competition is greater in some of P&G's international markets such as diapers in Japan, detergents and personal care products in Latin America.
- P&G has spent time and money on a number of products that didn't make it, including Rejoice liquid hand soap, Pace gel toothpaste and Rely tampons.

Although most P&G lines are up in market share, there still are a few market problems in some lines, including cleaning products. The bar soap market is down from the high levels of 1978-79, and it's not expected to show improvement in 1984. Lever Bros.' Dove has replaced P&G's Ivory as No. 1 in U.S. dollar sales. Ad dollars fell in 1983 for Camay, Coast, Ivory and Safeguard, but were up for Lava, Zest and Monchel, the new face and body bar. For the over-all category at P&G, ad expenditures for its bar soaps were down 1.8%, to $55 million.

Other products in the laundry/washing/cleaning area are a mixed picture. Tide is still the largest selling laundry detergent, but its share is down from the 27% of 1975 to 22% now. Lever Bros.' Wisk liquid has replaced P&G's Cheer as No. 2 in the general laundry detergent category, and P&G's liquid Era Plus, with 4.5% of the liquid laundry category, is a distant second to Wisk's 33%. Total media advertising spending for P&G detergents was up 9%, to $95.7 million in 1983.

P&G Cascade dishwasher detergent has 53% of the $400 million powder market, but competition from Lever's newer Sunlight product is stiff. In the $900 million dishwashing liquid market, P&G's Ivory is down from 17% of market in 1981 to 15% now, sharing first place with sister product Dawn. Lever Bros.' Sunlight liquid is in second place, dropping former second place holder P&G's Joy, with 12%, to third place, which it shares with Palmolive. Measured ad spending for P&G's dishwashing detergent category in 1983 is up 4.7%, to $52.4 million.

Among P&G personal care products, toothpaste lines received reduced measured spending. Crest gel and regular was off 6%, dropping to $37 million. Gleem spending was down 4.4% to $8.2 million. In another area, the nearly $600 million deodorant/antiperspirant market, the company saw its Secret line drop from a 12.5% market share in 1982 to 11.3%, and its Sure line from 13.6% to 11.9%. P&G countered with $31.7 million, an increase of 6% in measured spending.

Although the consumer paper products market is slowing and P&G's 1983 measured spending in the category was down 4%, Banner compact-roll toilet paper and Merit towels, both in the generic mode, got larger 1983 ad budgets to beef up their 1982 intro spending level. Banner jumped 248.5%, to $5.5 million, and Merit rose 76.4%, to $1.04 million.

The $4.5 billion coffee market, though low in growth, still stimulates the competitive juices, and P&G's Folger's still plays No. 2 to General Foods' leading Maxwell House. High Point instant decaffeinated has 4.7% of its market. There is a new High Point ground regular coffee and a launch of instant High Point at the food-service level to compete directly with GF's instant Sanka.

P&G's use of new products and acquisitions to assure market hegemony are direct outgrowths of a strategy that has been developing for many years. Since mid-1982, P&G has introduced 11 products, and midway in fiscal 1983 there were 23 products at various stages of testing, including: Always feminine protection products, Banner toilet paper, Cascade lemon-scented dishwashing detergent, Certain lotion-moisturized toilet paper, Cinch dishwashing liquid, Citrus Hill orange juice, Duncan Hines ready-to-eat cookies, Encaprin coated aspirin analgesic, High Point ground decaffeinated coffee, liquid Ivory soap, Ivory conditioner, Ivory shampoo, liquid Lava soap, Merit paper towels, Monchel face and body bar soap, Oasis deodorant/antiperspirant, Pringles Cheez'ums potato chips, Solo liquid detergent/fabric softener, liquid Tide, Aroma-Free Tide, Vibrant heavy-duty bleach, and Pine Spic and Span.

Folger's decaffeinated instant coffee was introduced nationally last month without test marketing. The campaign, expected to attract $15 million to $20 million in spending, is being handled by Cunningham & Walsh. The introduction follows the rollout earlier in the year of several other products that skipped or sped through traditional product development marketing steps.

A major change in the P&G approach now is its telescoping of research and test-marketing time. A new product is likely to be out of the preliminary stages within six months to a year—hardly the nine-year test marketing trial that Pampers went through. The reason is electronics—the speed at which merchandising information can be incorporated into product design changes.

The so-called "profit locomotive" that will drive the company in the future is expected to be pharmaceuticals, according to one analyst who believes they eventually will account for 20% of P&G profits. P&G took a major step in this direction in 1982 when it acquired Norwich Eaton Co.

The first fruit of that $371 million acquisition was the introduction this year of the arthritis analgesic product Encaprin, which has coated aspirin particles for controlled release. Estimates of its advertising budget range from $20 million to $30 million, with expectation that it may send shock waves through the analgesics market.

The Encaprin introduction follows the P&G methodology of using acquisitions as springboards to growth that may take three to five years to be realized, says analyst Jack Salzman of Smith Barney Harris Upham & Co. New products either have or will be coming from P&G's 1981 acquisitions that included the citrus processing business of Florida's Ben Hill Griffin Inc., Crush International, Tender Leaf Tea and Norwich Eaton.

As in product development, P&G is pushing creativity in advertising to get the fastest and most cost-efficient response. Network tv is not the only game in town anymore where until recently up to 80% of P&G's total advertising budget was spent.

Other media forms include participation in broadly syndicated tv programing and production of its programing for airing on cable.

Over-all. P&G spending for the six measured media dropped 14% for network tv in 1983 but increased 28% for spot tv, 15% for magazines, 10% for newspapers, 900% for network radio and 600% for outdoor.

U.S. Advertising	148,441,650	106,071,500

*Worldwide, fiscal years 1984 and 1983 ended June 30.

Quaker Oats Co., Chicago, the 42nd largest U.S. advertiser in 1983, backed a strong financial performance for the year with estimated total advertising of $148.4 million, up 40% from the previous year.

During much of this calendar period, Quaker was amassing total sales of $3.34 billion in fiscal 1984, up 28%, and earnings rocketed to $138.7 million, from $56.8 million the previous fiscal year.

The lower fiscal 1983 figure reflects a writeoff of $62.5 million caused by Quaker's divesting of its chemical and Mexican toy business and the closing of its small videogame cartridge business.

In November, Quaker chairman-ceo William Smithburg predicted an increase in worldwide advertising/merchandising support for all products of about 20%, to $520 million for fiscal 1984. Quaker, by tradition, has been allocating a line amount of more than 16.5% of world sales to advertising and related promotional costs.

Quaker is structured into four major segments: U.S. grocery products, which produces nearly half of Quaker's total sales and almost two-thirds of its operating income; international grocery products, about one-third of sales and a fifth of operating income; Fisher-Price toy division, good for about 13% of sales and 10% of operating income, and specialty retailing group, about 5% each of sales and operating income.

Advertising support in 1983 was never more apparent than with new and revised products alone. Expenditures for new and revised products, most in Quaker's U.S. grocery products group, rose 28%, to $66 million for fiscal 1983, the company said.

This year, Quaker came to the nation's retailers with perhaps the largest number of new products it ever has introduced in a single year. Some are new, such as Raisin Life; some are restaged and reformulated, such as Ken-L Ration Kibbles 'n Bits 'n Bits 'n Bits.

The list includes a new flavor of Quaker instant Oatmeal, peaches and cream; Choco Crunch cereal, chocolate cousin to Cap 'n Crunch; Granola Dipps, chocolate-covered chewy granola bars; three new flavors of Quaker Chewy granola bars, chunky nut and raisin, peanut butter and chocolate chip, and a s'mores-like bar, chocolate, graham cracker and marshmallow; Mr. T cereal, a presweetened, T-shaped ready-to-eat cereal for children.

The company offered new dog foods, Ken-L Ration Puppy Kibbles 'n Bits 'n Bits 'n Bits, Ken-L Ration Snausages, a sausage-like snack in beef and liver flavors, and Ken-L Ration 100 Percent Natural Treats dog biscuits. Other restaged and reformulated products were two pet foods, Ken-L Ration Love Me Tender Chunks for dogs and Puss 'n Boots Pounce for cats.

Also during the year, Quaker went into two test markets, Pittsfield, Mass., and Eau Claire, Wis., with three types of Aunt Jemima toaster/microwave pancakes—plain, buttermilk and blueberry. An earlier version was tested during 1981.

Quaker's Dallas-based subsidiary, Wolf Brand Products, introduced two new products in June 1984—Extra

Spicy Chili with and without beans—its first introductions in 16 years. Wolf Brand commands a 42.2% market share in its area of concentration—a six-state southwestern region (Louisiana to Arizona). In that market, Geo. A. Hormel & Co., the nation's over-all market leader, has a 19.9% share of market, and Beatrice Cos. subsidiary Gebhardt Mexican Foods has 10.4%.

From the Fisher-Price toy subsidiary, East Aurora, N.Y., came three new product lines in 1983, children's furniture, clothing and computer software.

Securities analysts looking at Quaker see a steady and calculated move toward new-product development and growth. John Bierbusse, assistant vp at Duff & Phelps, Chicago, expects total advertising expenditures for the U.S. grocery products group to increase $70 million a year—about the same as this year, largely because of new product support. Ronald Morrow, vp at Smith Barney Harris Upham & Co., New York, said he believes that Quaker will continue ad spending increases, especially for food and the Fisher-Price subsidiary, but the increases will be closer to 15% a year than this year's 28% leap.

Quaker had good income and volume increases from its food service division, which supplies the food-serving industry with Quaker products and includes four groups: Bakery group (biscuits, crackers, etc.); Quaker base business (cereals, mixes, chili, frozen foods); specialty products distribution group (for products such as Knott's Berry Farm spreads), and Ardmore Farms, maker of portion-sized fruit juices.

The Stokely-Van Camp acquisition, in its first year of operation as part of Quaker, gave a good account of itself. Total sales for fiscal 1984 were $467.3 million, and operating income was $40 million. Both of the principal Stokely products, Gatorade thirst quencher and Van Camp's pork and beans, exceeded expectations for their sales volumes. Quaker purchased the Indianapolis food processor in July, 1983, for $238 million.

In measured media advertising for 1983, Quaker spent more than $4.7 million combined on the Stokely-Van Camp line, including $836,600 for Van Camp's pork and beans and Van Camp's Beanee Weenee. Another $3.87 million went for the four types of Gatorade, noncarbonated, carbonated, punch and instant.

Van Camp's pork and beans has about 33% of the $465 million market for the category, the largest share of any canner. Although canned pork and beans is regarded as a mature if not static field, Quaker is expected to pursue a strategy of expanding distribution geographically—into the Northeast, for example—and switching from the short-term product management typical of that industry toward consistent volume and income.

For Gatorade, the trick will be to get the concentration out of just the Southeast and Southwest U.S. and get the product into the hands of women and children countrywide.

Sixty per cent of the thirst quencher now is sold in the Sunbelt states and 85% to "heavy users," mostly men. To get a bigger franchise in this $1.03 billion single-strength juice drink category, Quaker will increase market support up to 50%, building in Gatorade's present strong markets while reintroducing it to other markets.

The Fisher-Price toy division, which accounts for about 13% of Quaker's sales, had a good year last year largely because of cost-cutting programs and a hot Christmas buying season for next Christmas by merchants. Sales in fiscal 1983 were up 14%, to a record $383.4 million; operating income jumped 46%, to $43.6 million.

Up to now, Fisher-Price has been serving a $550 million toy market, but now is moving into other areas of merchandise for its young clients. Ad budget for toys and dolls was up 25% in 1983, to $12.4 million.

Fisher-Price's first venture beyond toys is 10 new items in a line of juvenile furniture to be backed by heavy promotion, including in-store displays, co-op advertising and programs for retailers. Also, the toy maker this year signed licensing agreements with the Activity Center Inc., New York, to design and market children's clothing. It inked a pact with Spinnaker Software, Cambridge, Mass., to market children's computer educational software under the Fisher-Price name.

In the clothing program, the Activity Center will make and distribute an innovative line of play clothes for children wearing 12 months to size 7. Fisher-Price is to get royalties based on estimated sales of $15 million the first year. The Fisher-Price Learning Software will be available in 11 programs for two age groups, 3 to 8 years and 6 to 12 years.

Included in Quaker's direct-to-consumer division (also called specialty retailing group) are four companies, Jos. A. Bank Clothiers, Brookstone, Herrschner's and Eyelab Inc.

While Quaker has stated that the sales goal for the direct-to-consumer division was to be 20% of total Quaker sales, some analysts have been skeptical about the possibility of reaching that goal. The division now is producing about 5% of Quaker's sales and 5.5% of the operating income, results that have been considered good. Sales are up 22%, to $157 million, and operating income jumped 7%, to $16.8 million. There is a belief among observers that if Quaker found a good mail-order company, it would be open to further expansion.

During the year, Jos. A. Bank, Baltimore-based and also strong in mail order, opened four new stores for a total of 19 on the Atlantic seaboard, in the Midwest and in Texas. Brookstone, a Peterborough, N.H., housewares and specialty-tool seller, also is in mail order as well as retailing, and this year opened five new stores for a total of 20 in the East, South and Midwest. The two companies had slight operating income declines in 1983, but they were offset by record results from Herrschner's mail order needlecraft business and the effect of including Quaker's newest acquisition, Eyelab Inc., in the totals for the retailing group.

Quaker bought the Paramus, N.J., eyewear company in November, 1983, for about $10 million. It liked the company's department store approach to selling optical goods. Eyelab's sales last year were $10 million in four stores, and while there now are four U.S. optical chains, only 20% of all eyewear is sold through them. Eyelab since has opened three new stores for a total of seven.

For fiscal 1983, the total expenditures for Quaker advertising in six measured media is $84.8 million, up 30% from 1982. Unmeasured spending is estimated at 75% of measured for Quaker.

Quaker's measured spending was down 28% for newspapers, to $1.3 million; up 67% for magazines, to $11.4 million; a dramatic 745% increase for outdoor, to $387,800 and a 38.9% increase for network tv, to $48 million.

Technically known as a flour and meal processor, Quaker has its strongest profit center in the foods division of U.S. grocery products. Within that group are the Quaker hot cereals, which together lead the category in the U.S.

It is on this hot cereal foundation that the company is building various flanker products, such as the flavors of Instant Oatmeal, whose measured-media advertising is funded this year by a 17% increase, to $6.6 million. Total for all the hot cereals is $10.1 million, up 1% from 1982.

Far from such dominance but still impressive are Quaker's ready-to-eat cereals, which have a market share of about 9% to 10%. Measured total here is $23.7 million for 1983, up 7% from 1982.

To counter its heavyweight competition in cold cereals, Quaker offers the Cap'n Crunch family and Halfsies with its half sugar/half NutraSweet formula, its "natural" granolas, and the Life series. After successfully marketing regular Life since 1961 and Cinnamon Life since 1980, Quaker went to a raisin addition to create another flanker because, in the past four years, the market share for fruit cereals has climbed

IN A WORLD OF
ONE TIME PROJECTS
CONSTANT
REPEAT BUSINESS
MEANS WE'RE DOING
SOMETHING RIGHT.

A whopping 81% of the companies that entrusted their sweepstakes, game, and other promotions to us this past year have done it before. We've represented many of our clients for 10 years or more, and several go back to our earliest days (when we didn't have more than several), 23 years ago!

That so many of our client colleagues rely on our promotion development and implementation expertise time after time is, we think, the greatest testament to the professionalism of Don Jagoda Associates. More meaningful than any claim to creativity, it's the indisputable proof that our programs work extraordinarily well.

The Innovation Factor

The same innovative qualities that often make our programs successful in the first place are applied to every repeat performance. Promotions are alive here. They grow, they adapt to changing needs, they take on new dimensions that enhance their value. Because our staff is expert at every phase of distribution and retailing, we're able to intelligently work with, rather than for our clients, carefully custom tailoring promotions to their very specific current requirements.

Keeping clients and growing with them is good business, for all parties. It's more rewarding in many ways to apply creativity to repeat programs for satisfied clients than to developing apologies, excuses, and elaborate new business solicitations.

It's also much more professional.

45%, but for regular cereals it is up just 2%.

Similar reasoning created Granola Dipps backed by a $24 million ad budget—more than for either Quaker's own Chewy Granola bars or General Mills' Nature Valley Chewy. The market segment for cereal meal bars has jumped 110% since 1980 and now stands at about $385 million. Ad spending for Quaker Snack foods shot up 367% from 1982 and now totals $13.4 million.

Quaker's business with the oatmeal, the Aunt Jemima mixes and Flake pie crust mix, the grits and corn meals is solid and cash-producing. Advertising for these products is down 16% from 1982, now standing at $5.14 million.

Also good for growth is the pet food category, where a 37% ad spending increase for 1983 brought the total to $10.6 million. Here, Quaker faces the near-$5 billion market for pet foods and is bringing about a half-dozen new or revised dog and cat foods to the market in a single year. One approach Quaker is following is the value-added product for those pet owners who will pay a little more to pamper their pet. The Ken-L Ration pet food line was established in 1923 and acquired by Quaker in 1946. Quaker's share of the pet food market has dropped from 7.7% in 1982 to 5.6% in 1983.

Major changes in Quaker personnel for 1983 include the elevation of Frank J. Morgan from exec vp-marketing, U.S. grocery products group, to president-chief operating officer—the immediate associate of Quaker chairman-ceo William D. Smithburg; the naming of Charles E. Decker as vp-advertising, and the resignation of Dudley M. Ruch as vp-marketing research and his replacement by John Blair, already a Quaker staff member.

During fiscal 1983, Quaker made several changes in product advertising assignments and in ad agencies. Corn Bran cereal was moved from BBDO, New York, to Quaker's in-house agency, AdCom, Chicago, where Gatorade also was assigned, and Celeste pizza was shifted out of AdCom to a new agency for Quaker, Backer & Spielvogel, New York, which also was assigned responsibility for a new-product category.

Granola Dipps went to J. Walter Thompson USA, Chicago. Another new agency for Quaker ad work this year is Tatham-Laird & Kudner, Chicago, which also has new product advertising. And the association with Zylke & Associates, Chicago, which handled chemical advertising, was ended when Quaker left that field by divestiture in 1983.

In February, Quaker announced it would build a new corporate headquarters in Chicago called Quaker-Riverfront Park, located two blocks east along the same north bank of the Chicago River where it currently is headquartered in the Merchandise Mart.

Ralston Purina Co.

	1983	1982
Sales*	$4,900,000,000	$4,800,000,000
Earnings*	256,000,000	69,100,000
U.S. Advertising	285,667,400	220,000,000

*Worldwide, fiscal years ended Sept. 30

Ralston Purina Co., St. Louis, the 21st largest national advertiser, increased domestic advertising spending in 1983 to an estimated $285.7 million, up 30% from 1982.

While 1983 net sales increased 2%, to nearly $4.9 billion in 1983, net earnings soared to $256 million, up from $69.1 million in 1982, which includes writeoffs related to the divestiture of unprofitable businesses. Excluding those items, earnings were up 30%.

The country's top marketer of pet foods, Ralston Purina's operations comprise four main units: Grocery products, agricultural products, restaurants and diversified businesses.

Operating profit from grocery products, which include pet and human food, reached record levels during the year, at $327 million, up from $84.2 million in 1982. Sales were down slightly because of the company's divestment of pet foods in several major markets overseas and reduced tuna sales prices of the company's leading Chicken of the Sea brand.

Several new products were introduced during 1983 and this year, including Alley Cat dry cat food in October and Donkey Kong Jr. cereal at the end of the year following the introduction of Donkey Kong Cereal in April. Only the latter, with measured spending of $5.8 million, had enough time during the year to generate strong media support.

"We're concentrating our advertising on our major brands," said William Claggett, division vp-director advertising and marketing services.

That translates into the Purina dog and cat food lines and the company's Chex cereals, and it meant a more focused media mix that puts more emphasis on spot tv and magazines. Spot tv as a percentage of national media advertising rose from 20% ($23.5 million) in 1982 to 25% in 1983 ($35.8 million) as total buying in the media mix increased 25.4%, to $146.5 million. Magazine buying was up 75%, to $14.6 million. Network tv was up 14%, to $94.4 million, according to Leading National Advertisers. Continuing the trend, Ralston Purina increased its spot tv spending 211% in the first quarter of the year.

"Our basic strategy is to manage our existing brands to optimize profitability," said William Lacey, president, grocery products division. "At the same time, we will continue to develop and introduce unique new consumer products, driven by a strong research and development effort."

New products introduced in the first nine months of fiscal 1984 promise to raise sales and earnings in the company's grocery products division even higher.

The products include S'mores chewy granola bar, which was distributed to a "substantial portion" of the country in July. MCA Advertising, New York, handles a multimedia campaign, estimated at between $19 million and $24 million.

Gremlins ready-to-eat presweetened cereal, introduced in July, is being promoted via Don Tennant Co., Chicago. Ralston licensed the name from Warner Communications' summer film. Advertising includes tv, newspapers and couponed Sunday inserts.

Among the Ralston product main line in the grocery group, dog and cat foods heavily influenced advertising spending. Leaders among cat products were Cat Chow with media spending of $10.3 million, down 21%; Happy Cat Moist cat food $12.9 million, unmeasured in 1982; Meow Mix brands $8.2 million, down 5%, and Tender Vittles, $8.5 million, up 4%.

Dog food brand leaders included Praise dry dog food $10.7 million, up from $2,400; Puppy Chow dry dog food $8.1 million, down 7%; Purina Dog Chow $7.4 million, down 30%; Chuck Wagon dog food $6.7 million, down 19%; Hi-Pro dry dog foods $4.6 million, down 2%, and Fit & Trim dry dog food $3.6 million, up 227%.

Cereals attracted $22.8 million in media advertising, up 70%, with emphasis on the Chex cereal line—$15.7 million, up from $7.3 million—and the Donkey Kong new product launch.

The company licensed the Cracker Jack name from Borden Inc. in the beginning of 1984 and introduced Cracker Jack cereal to 40% of the country. Advertising, handled by TBWA, St. Louis, includes tv and print.

Operating profit from agricultural products increased significantly for the year, to $105.6 million, up 9.3%, with a less than 1% increase in sales, to $2.1 billion. Several new feed products and related services were introduced during the year, which contributed to the increases.

Although the company sold its 72-unit Continental Restaurant Systems division to Denver-based VICORP Restaurants in 1983, sales and operating profit from the restaurants reached record levels during the year, with sales of $669.3 million, up 7.2%. Operating profit was $58.5 million, up 25.6%.

The company's Jack-in-the-Box restaurants posted a sales increase per unit from $613,000 in 1982 to $700,000. A company spokesman said the increase was largely because of the introduction of new menu items such as Dinner-in-the-Box, nachos and shrimp salad. The chain consists of 780 units, and the company is planning to open "several" new locations by the end of 1984.

Jack-in-the-Box media advertising also registered a sizable jump from $8.8 million in 1982 to $15.2 million in 1983.

Higher sales and operating profit from Ralston's protein technologies division were the major contributing factors to improved performance in the diversified businesses division of the company, which reported $236.9 million in sales, up 9.2%, and $33.6 million in operating profit, up 24%.

Earnings*.....	240,800,000	222,600,000
U.S. Advertising	212,300,000	160,102,200

*Worldwide

RCA Corp., the 29th largest national advertiser, boosted its total ad spending 33%, to $212.3 million in 1983.

On a global scale, RCA's 1983 revenues hit a record $8.98 billion, up 12%, with sales in the U.S. accounting for $8.01 billion, up 13%. Earnings in 1983 grew 8.2%, to $240.8 million.

Advertising was up about $25 million in measured expenditures—magazines, spot and network tv, newspapers and network radio—and about $28 million in unmeasured media—direct mail, point of purchase, promotion and co-op advertising.

Several of RCA's leading products accounted for about $15 million of the increase in measured media as monitored by Leading National Advertisers. LNA, which tracks six media, showed Hertz Rent-A-Car system spending $12.2 million in 1983, up 27%; NBC Television Network, $19.1 million, up 24%; RCA color tv sets, $7.1 million, up 26%; RCA music service, $6.6 million, up 214%; RCA Selectavision tv videotape system, $3.9 million, up 584%. Another big advertised item, RCA videodisc system, spent $9.6 million in measured media, down 3% from 1982.

RCA pointed out that it has improved its financial picture since 1981 by turning away from previous "overexpansion and overdiversification" efforts and returning to its roots, namely electronics, communications and entertainment.

During 1983, the consumer electronics, government systems, service company, records and broadcasting operations posted healthy sales and earnings results. The performance of those operations continued to gain steam into the new fiscal year. Net income for the second quarter, ended June 30, soared 75%, to a record $109.9 million, on revenues of $2.48 billion, up 13%. For the 1984 first half, net income climbed by 75%, to $160.2 million, as sales rose 15%, to $4.85 billion. Broadcasting (NBC) and electronics operations (the latter paced by tv sets and videocassette sales) posted record sales and earnings results in the second quarter.

In 1983, consumer electronics and broadcasting continued to represent the two largest sources of RCA's revenues and profits (about 27% and 23%, respectively).

Other major slices of the RCA sales pie are transportation services and government electronics (each about 15%), commercial electronics (13%) and communications (4%). During the year, electronics sales totaled $4.8 billion, up 11%, broadcasting approached $2.1 billion, up 17%, and transportation services rose 3%, to nearly $1.4 billion. Within electronics, RCA said its video products (meaning tv and vcr sets, cameras, disc players and disc programs) topped $1.6 billion, up from nearly $1.4 billion in 1982.

The chief sour note of recent years has been RCA's SelectaVision videodisc venture, which suffered a "significant" loss in 1983 and was shut down earlier this year. That was the second disaster RCA suffered in the past year in the new video technology sector, the first having occurred early in 1983 with the folding of Entertainment Channel, a pay tv service in which RCA was a partner with Rockefeller Center TV. However, its videocassette operations and music video category are performing well. RCA also is among the eight companies approved by the FCC for entry into the potentially lucrative direct broadcast satellite business.

Even two noncore RCA businesses, Hertz Corp. and Coronet Industries, enjoyed record sales levels and healthy income gains; RCA recently sold C.I.T. Financial Corp. to Manufacturers Hanover Trust Co. for $1.5 billion in its ongoing effort to concentrate its focus; C.I.T. was not a heavy ad spender, having spent only $700,000 or so in measured media during its last full year under RCA.

Lately, RCA has been saying Hertz, while not a core business, is No. 1 in its market and profitable, and thus transportation qualifies as a "dynamic" market, and one that "does not create a drain on RCA's management or finances."

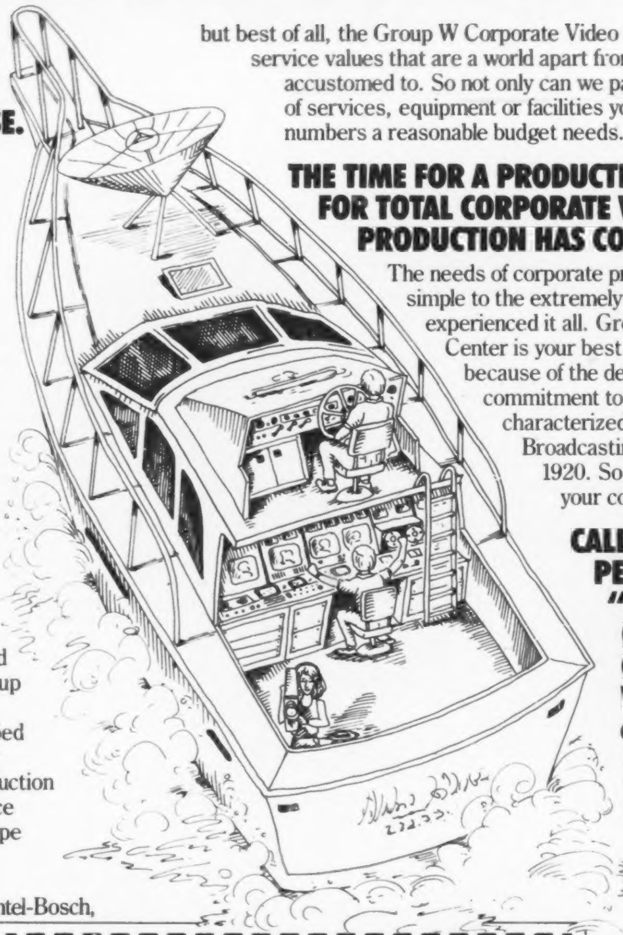
Although RCA has pulled out of the videodisc market, it remains a major factor in home video, through both its SelectaVision vcr line and its joint global programing distribution venture, the Burbank-based RCA/Columbia Pictures Home Video (the latter listed by LNA as having spent just $100,000 in measured media).

The latter's latest releases included the film "The Big Chill" and "Pat Benatar Hit Videos." Meanwhile, RCA, one of the first record companies to use video clips as a promotional tool at the retail point of sale, has formed RCA Video Productions, one of whose ambitious projects will be "the first rock video cliffhanger action-adventure serial." Aimed at the cable, home video and possibly theatrical markets, this serial will be called "The Phantom Empire," starring a rock group of that name.

RCA, which was the videodisc market leader, estimated that consumers in the U.S. had bought 500,000 units of the hardware and 10 million program discs between the introduction of the discs in early 1981 through the end of 1983; 250,000 of those players were sold in 1983 alone.

As recently as May, 1983, Thornton Bradshaw—who will relinquish his RCA chairmanship within a year to Robert Frederick, president-chief operating officer—had predicted that RCA's disc operations could turn a profit in 1985.

Other industry sources, however, long had warned that the playback-only disc could not compete with the record-and-playback vcr industry. Indeed, RCA's vcr is among the beneficiaries of the bullish home video marketplace, where about 7 million vcrs



SAIL TO THE STATE-OF-THE-ART VIDEO PRODUCTION CENTER WHERE YOU SET YOUR OWN COURSE.

GROUP W CORPORATE VIDEO CENTER, A PRODUCER'S PARADISE.

Located alongside the Stamford, CT. Yacht Basin just fifty minutes from Manhattan there's the production center you've been waiting for. Convenient by car, or train (our limo will pick you up) or even helicopter, Group W's total production facility is now available to all video producers.

SATELLITE LINKED TO THE WORLD.

Our earth station is designed to receive and transmit broadcast quality video worldwide, for programming distribution, teleconferencing and dedicated satellite networking. The Group W Corporate Video Center production studios are equipped and staffed to produce to your specifications; including Production Planning & Management Office Services, Viewing Rooms, Tape Duplication and Distribution, Studio & Field Production, Computer Graphics-DVE-Quantel-Bosch, Engineering Services, Video Conferencing, Post Production and Editing Suites.

YACHT LIKE SERVICES FOR A ROWBOAT BUDGET.

Based in Stamford, CT., we're easy to get to, but best of all, the Group W Corporate Video Center can offer great service values that are a world apart from what you're accustomed to. So not only can we package any configuration of services, equipment or facilities you want, but give you the numbers a reasonable budget needs.

THE TIME FOR A PRODUCTION CENTER BUILT FOR TOTAL CORPORATE VIDEO PRODUCTION HAS COME.

The needs of corporate producers range from the simple to the extremely complex; and we've experienced it all. Group W Corporate Video Center is your best choice for video support because of the depth of resources and commitment to excellence that has characterized Westinghouse Broadcasting and Cable Inc. since 1920. So you'll want to find out how your company can benefit in 1984.

CALL FOR YOUR PERSONAL "CAPTAIN'S TOUR" OF THE GROUP W CORPORATE VIDEO CENTER.

Call or write Licia Murphy at Group W Corporate Video Center. She'll arrange for your transportation and a tour of the facility that looks like a yacht club but works purely state-of-the-art video.

☐ YES, I'd like to sail over to the Corporate Video Center, please call to set up a tour for me.
☐ I'm interested, but would rather receive more detailed information by ___phone or ____mail.
☐ Attention please . . . I've got a production looking for a home. Let's talk budget and scheduling.

were sold last year, well ahead of projections.

Looking ahead, Mr. Bradshaw indicated RCA may try the home computer and small-business computer markets. RCA first entered the computer field in the 1960s, via mainframe computers, but wrote that effort off in 1971.

The SelectaVision vcr's $5.6 million in measured ad backing in 1983 included sizable outlays for the deluxe VKP900, with a budget described as well beyond the $4 million spent to launch SelectaVision in 1977 and included not only the usual print but also tv.

Hertz, which ordered a record 154,000 new cars for its domestic fleet in the 1984 model year, spent $12 million in the six media measured by LNA last year. It ended an admittedly costly gift giveaway program in mid-1983, one which was begun "to counter the effect of ongoing competitors' programs and to protect market share." Airline trips and videogames were among the gifts offered in the rental car companies' multi-million-dollar advertising; Hertz used O.J. Simpson and Arnold Palmer as spokesmen for the gift effort as well as other advertising run on tv and in in-flight airline programing.

Since then, Hertz has focused on service, value and product. Hertz, whose market share is estimated at about 38% of the rental car business, last year moved its Yellow Pages account ($3 million in billings) to Doyle Dane Bernbach from Richard Bandler Co.

NBC tallied its highest profit ever with the tv network alone scoring record ad sales for the 11th consecutive year. For the 1984-85 season, the Big 3 tv networks all enjoyed unusually brisk upfront ad sales (advance, long-term sponsorship commitments made by advertisers for the upcoming season) in all major dayparts. In prime time alone, NBC booked $800 million in upfront sales, which the network claimed topped its rivals' volumes.

The tv network allocated $19.1 million in ad spending to magazines last year (primarily *TV Guide*); the radio network spent $338,000 in measured media; the owned tv stations about $99,000, and the owned radio stations nearly $3.3 million (of which WYNY-FM, New York, received slightly more than $1 million and WNBC-AM almost $800,000). RCA Records spent $2.4 million on its records and tapes, while RCA Music Service backed its record/tape club with $6.6 million in advertising. RCA Direct Marketing spent $1.4 million, with the book club operation allocating $1.2 million. Direct Marketing was reorganized in May, 1984, to encompass the record/tape and book club operations.

RCA Records' major coup in the past year was the signing of singer Kenny Rogers to a recording pact. The best-selling artist recently scored with fellow RCA performer Dolly Parton on a hit single and album. RCA, a major factor in country music with those acts and others such as Ronnie Milsap and the group Alabama, also did well on the rock charts last year with Eurythmics and Hall & Oates, the latter getting an unusually hefty $2 million-plus in ad and promo support for its greatest-hits album late last year.

RCA Records also has a major tie-in promotion, which began in June and will run through September, with Pepsi-Cola Co.'s Mountain Dew, whereby consumers can get discounts on specific albums. In June, RCA reached a preliminary agreement whereby its global record, music publishing and music video operations would be merged with those of West Germany's Bertelsmann AG.

Revlon Inc., New York, the 53rd largest national advertiser, increased domestic advertising by 16.2% in 1983 to an estimated $124 million.

Sales increased slightly to $2.379 billion, up less than 1% from 1982, while earnings inched upward to $111.2 million, from $111.14 million.

This improvement, slight as it was, allowed Revlon chairman Michel Bergerac to tell shareholders, that Revlon began to "bounce back" in 1983. Slim proof of the turnaround were first-quarter 1984 results in which sales rose 2%, to $564 million, from the first quarter of 1983, and earnings rose to $24.5 million, up 3.4%.

The company's economic stagnation prompted numerous takeover rumors throughout the first half and into the second half of 1984, a pot further stirred by the addition of so-called golden parachute clauses to contracts for Mr. Bergerac and several of his key executives. A golden parachute is an extremely generous severance and compensation package for top managers should the company be merged or acquired and they are fired.

Revlon, segmented into beauty products and healthcare, budgets most of its advertising for beauty products. However, its healthcare segment, marketing such items as soft contact lenses, lens solutions, NoSalt salt substitute, Oxy acne remedy and Tums brands, generated $1.26 billion in sales (53% of the total) and split company-wide net income with beauty products.

The U.S. cosmetics division accounted for about 35% of earnings, while international cosmetics contributed 3%, U.S. ethicals 11%, international ethicals 13%, diagnostics 17%, optical 13% and other about 8%.

Worldwide ad expenditures were $238.9 million, a 6.9% increase over the previous year.

Revlon, which recorded national measured media spending of $80.5 million, up 22% from 1982, as monitored by Leading National Advertisers, concentrated $28.2 million on cosmetics (makeup, eye makeup, lipstick, nail polish). The lion's share of that portion—$19 million—went for the almost generic Revlon brand lines for makeup, mascara and nail polish, and $4.2 million credited to the Ultima II cosmetic products line. Revlon spent $18.1 million in measured media on cosmetics in 1982, which included $2.5 million on Ultima II cosmetic products and $2.5 million on the Natural Wonder line.

Measured spending for colognes and perfumes (Charlie, Chaz for Men, Bill Blass, Intimate, Ivoire de Balmain, Jontue, Scoundrel) totaled $14.3 million. Jontue, Charlie and Scoundrel each received more than $3 million in ad support. In 1982, colognes and perfumes attracted $15.3 million in media. In department stores, Revlon sales give it a total fragrance share of 10% with such mainline brands as Blass and Balmain. Its share in mass merchandise outlets is 15%, down from 18-19% a year ago.

Revlon spent $10.8 million on haircare products (shampoos, rinses, conditioners and hair sprays), with the biggest outlays assigned to Flex Balsam & Protein Conditioner ($4.9 million) and Flex shampoo ($1.9 million). In 1982, $8.7 million was spent on haircare products.

The company spent $4.5 million on skincare products (creams and lotions, facial treatments), placing almost $3 million of that on its European Collagen cream and lotion products, compared with $3.9 million spent on collagen products in 1982.

In 1983, the beauty product category in the U.S. and abroad had sales of $1.12 billion, down 3.5%. Operating profit dropped 10.2% to $111.8 million. Beauty products, which have been steadily declining as a percentage of total company sales, accounted for 47% of worldwide sales; healthcare products contributed the remainder.

Healthcare products percentage of total sales have advanced from 47% in 1981 and 51% in 1982. Beauty product sales in the U.S. in 1983 were $790.6, or 47.6% of total U.S. sales of $1.66 billion.

Revlon's Group I, which sells mass market cosmetics and fragrances, saw sales of its European Collagen Complex skincare line and Pure Radiance makeup reach about $20 million each in 1983. Revlon's three color cosmetics lines together had U.S. sales of more than $135 million. But all three—Revlon, Moon Drops and Natural Wonder—continued to be under market share pressure in their respective cosmetics segments.

To strengthen its cosmetics business, Revlon, which still has the largest over-all cosmetics share in the U.S.—20% of makeup sales among the nation's drug, food and mass merchandisers— began paring back items in its lines, built a new 106,000-sq.-ft. cosmetics research center and began a new advertising campaign called, "We've got your color." Revlon also named model Kim Alexis as spokeswoman for Ultima II, part of Group III, in print advertising.

In Group I, Revlon introduced several new products, including Flex Appeal Lash Loving mascara, Custom Eyes eyeshadows, a personalized refillable eyeshadow product that allows consumers to select their colors, Skin Balancing makeup and European Collagen Complex Lip Repair cream.

Group I fragrance sales dropped during 1983, with Charlie now at about $41 million, and Jontue at $33 million. Only Scoundrel advanced at all, from about $16 million in 1982 to $21 million in 1983 with the help of new spokeswoman Joan Collins. However, Revlon began rolling national a sampling program designed to increase Jontue's sales and market share. In a Los Angeles test, it boosted Jontue's local market share to more than 9.5% in that market, according to Revlon execs. In 1983, Revlon spent $5.6 million on Charlie, $3.7 million on Jontue and $3.9 million on Scoundrel nationally.

In early 1984, the company also introduced a new line of fragrances called Fleurs de Jontue, after first testing the scents in 1983. Group III sales rose over-all but weak sales of fragrances held the group's volume down.

Also in 1984, Revlon introduced Hair's Daily Requirement, a higher price shampoo and conditioner line than Revlon's Flex brand, whose shampoo has dropped from a 6%-plus share of market to less than 6% and whose conditioner has dropped from more than 8% to about 7.8%. Still, Revlon maintains that Flex shampoo is the leading cosmetic shampoo.

Overseas, Revlon introduced Ebene de Balmain, a new high-price men's fragrance.

About 74% of total earnings came from the U.S. and Canada, 15% from Europe, the Mideast and Africa and 10% from other parts of the world.

Worldwide net sales of Revlon's healthcare businesses rose to $1.26 billion, up 6% over 1982. Operating profit reached $188.4 million, 17% more than 1982.

In the healthcare group, the big ad dollars supported such products as Tums antacid tablets ($8.9 million, up from $5 million), Esoterica face cream ($1.3 million, down from $1.7 million), Oxy-10 acne remedy ($2.3 million, up from $1.9 million), and NoSalt salt substitute ($1.8 million, down from $6.2 million).

NoSalt, a salt alternative introduced in 1981, had improved sales but has been a disappointment, according to retail sources who think it is possible Revlon may drop the brand.

Tums is being distributed in 1984 through Nabisco's Life Savers division, which should help boost its sales.

Vision care sales in the healthcare group rose 21%, to $211.3 million, while operating income increased 34%, to $40 million. The division's Hydrocurve lens products have maintained a 31% market unit share, according to Salomon Brothers analyst Diana Temple, compared with CopperVision's Permalens, which has built a 40% share since its entry in 1981, and Bausch & Lomb, which has built a share of 23% since its entry into the market in late 1983.

In dollars, Ms. Temple said, Hydrocurve has a 50% share due to higher prices. According to Revlon, Hydrocurve II 55 remains the most prescribed extended-wear soft contact lens in the U.S., and during 1983 the company increased over-all share as the No. 2 U.S. contact lens company. Revlon spent $7.1 million in measured media to boost Hydrocurve in 1983, up from $3.1 million in 1982.

Ms. Temple cited Barnes-Hind as the most disappointing segment of Revlon's optical group. The division's hard lens solution has a 35% market share, but the soft lens solution has only a 5% share, yielding for Revlon a 15% share in the total market for lens solutions. Barnes-Hind also provided only minimum ad support for its lens solutions.

In 1983, Barnes-Hind introduced a new extended-wear soft contact lens for astigmatism and a complete line of soft lens products for sensitive eyes.

In the Coburn Professional Products division, manufacturing techniques were developed that allowed Coburn to produce new and innovative implants (intraocular lenses). Coburn's Lens division introduced hard coated plastic lenses to reduce scratches and provide a more durable plastic lens.

USV/Armour, the ethical products division of the healthcare group, expects sizable sales from its newly launched Lozol, the first of a new class of drugs competing as a Step-1 antihypertensive. Sales of Lozol reached $5 million in 1983 but are expected to hit $20 million by 1985. Armour strengthened its position as a leading company in the treatment of hemophilia with the introduction of Stimate, the first nonblood derivative product available for the treatment of mild to moderate forms of hemophilia.

Other developments include the launch of Calcimax, a calcium vitamin supplement.

R.J. Reynolds Industries, Winston-Salem, N.C., the nation's fifth largest advertiser, flashed its consumer-marketing power by increasing ad spending to $593.4 million in 1983, up 11.9% from 1982.

Since the beginning of the decade, the tobacco company has proved to be an acquisition-hungry conglomerate with an appetite for consumer package goods. Merger partners have sated the hunger by feeding RJR a diet of food and beverage units until today the company counts more than 110 brands and lines in its corporate roster.

Those brands—from the familiar Winston cigarets and Kentucky Fried Chicken to the more obscure T.J. Swann wines—produced sales of $13.53 billion in 1983, an increase of 17.8% from 1982. Net earnings, however, rose more slowly, gaining 5.6%, to $835 million.

For the first six months of 1984, the company had earnings of $406 million, up 10.3% from the year-earlier period, on sales of $6.88 billion, up 3%.

Although the company has been diversifying its lineup for decades, it is becoming clearer that it wants to put its resources in consumer-product marketing. During the past year, RJR spun off its Sea-Land shipping unit into a separate company and considered selling Aminoil Inc., an energy subsidiary.

On the other side of the ledger, the company acquired Bear Creek Corp., the direct marketer known for its Harry & David fruit-of-the-month club, and Canada Dry, the beverage marketer. They join Del Monte Corp. and Heublein Inc. as acquisitions RJR has made since 1979. Speculation holds that another company, Buckingham Corp., a distilled spirits subsidiary of Beatrice Cos., is the next target.

The company's executives like to portray their purchases as a strategy of filling in the spots necessary to power an increasingly marketing-driven company. The Canada Dry purchase from Dr Pepper Co., for instance, puts RJR into the soft-drink business to go along with the fresh and prepared foods and beverages brought by the Del Monte and Heublein acquisitions.

The Canada Dry move, which came in March, is significant for another reason, however. It brings to the RJR family a business that the company's chief competitor, Philip Morris Inc., has been in for years with Seven-Up Co.

Put the two companies side by side now, and there are striking marketing similarities, with each having tobacco, wine or beer and soft drinks as primary products.

But it is only in tobacco that the two companies match move for move. And here, 1983 marked the first time in decades that RJR, through its R.J. Reynolds Tobacco Co. domestic marketing arm, fell from the No. 1 slot. Philip Morris, slowly gaining market share in recent years, managed to wrestle top honor by increasing its share to 34.4% of the market in 1983, compared with RJR's 31.9%.

The coup, however, came in a context that could not have cheered any cigaret marketers, which already are dealing with a slow-growth industry. Rising prices that were spurred by increased federal excise taxes and continued health concerns over cigaret smoking contributed to a slide in industry sales. John C. Maxwell, managing partner with A.G. Becker Paribas, New York, estimated that total domestic sales dropped about 4% from 1982, to 595 billion units.

That may be a reason the biggest advertising splash RJR made during the year came not for any brand, but in a $7 million corporate campaign addressing the smoking issue. Controversial ads, created by Leber Katz Partners, New York, called for "an open debate about smoking," presenting RJR's views on scientific studies, youth smoking, health hazards and other issues.

The ads touched of a flurry of angry responses, especially from the American Cancer Society, American Lung Assn. and American Heart Assn. They charged that cigaret companies were spending more than a billion dollars a year for advertising that "cons" adults and "brainwashes" children "before they can read. We don't need a debate on smoking."

Another nonbrand advertising issue of significance was the company's move this year to bring much of its media-buying operations in-house. Because RJR is one of the nation's largest advertisers, this strategy, which involves RJR's other subsidiaries and affords cost savings, could have far-reaching implications in the ad agency business.

More conventional advertising news, of course, came for the cigaret brands themselves. In 1983 and into this year, these ads and pr helped support new products RJR introduced in what have become the hot segments of the industry: 25-per-pack cigarets, premium-image smokes, and generics or

private-label brands.

Century, the 25-smokes-per-pack rolled out in July, 1983, is moving toward national availability, although state laws prohibiting unit sales in multiples of other than 10 have hampered expansion. RJR early in August began running national ads for the brand, available in 46 states. The company said that at the end of 1983, the brand had achieved a 0.8% share in the 34 states in which it was available. (A 0.5% share is considered a success by industry standards.)

Other marketers have introduced 25-per-pack brands. Brown & Williamson, Louisville, Ky., has been marketing Richland for about as long as Century has been on the market, and Philip Morris is coming out with a version for its flagship brand, Marlboro. The brands are positioned as "value" items because they sell for about the same price as conventional packs.

By its own standards, RJR has not supported Century with the kind of heavy advertising traditionally handed to a new product. In 1983, the company laid out $13.2 million in measured media spending, divided among newspapers, newspaper supplements and outdoor.

By contrast, Bright mint-flavored cigarets received $40.3 million in measured media support. Introduced in 1982, the brand has had trouble making headway, mustering only a 0.3% share in the second quarter of this year, according to Mr. Maxwell.

RJR's new entry in the premium end of the market came in April this year with the national rollout of Sterling, a direct competitor to PM's Players. Advertising for the product, which registered a 0.5% share of market in the second quarter, seeks to give it a classy, elegant image.

In the generic-private label market, dominated by Liggett & Myers Tobacco Co., RJR is rolling out Doral as a branded smoke at a generic price. Though there are indications that the market is peaking, analyst Mr. Maxwell said he believes it could reach as much as 10% of all sales, compared with the 4.1% it now brings in. RJR expects it to peak at between 7% and 9%.

Doral was a brand given up for dead after it failed to succeed in its first incarnation and in a later reformulation as Doral II. The latest move with the brand is another attempt at taking advantage of the market segmentation that has colored the tobacco industry in recent years.

This new product activity is designed to bolster RJR's other brands, four of which are among the top 10 in the U.S. Each continued to receive relatively the same support in measured media ad spending from 1982.

Winston, No. 2 to PM's Marlboro, registered a declining 12.0% share, compared with Marlboro's nearly one-fifth of the market. As the company's biggest tobacco product, Winston received $36.9 million in measured media ad support, the most among established brands.

Salem, No. 3 over-all and the best-selling menthol domestically, came in with an 8.2% share and $34.6 million in support.

Camel, the long-established brand that has been the subject of renewed corporate attention in recent years, saw its share decline just slightly, to 4.4%. Ad support for the line amounted to $25.8 million.

And Vantage, the low-tar entry, also witnessed a slight share decline, to 3.7%, with support reaching $31.5 million. RJR also maintained about the same level of support for its other two brands—More and ultralow-tar Now—as it allocated last year. The More family, which includes the beige (soon to turn darker) More Lights, received $27.7 million in ads. Now checked in at $17.6 million.

These sizable outlays for cigarets often overshadow RJR's activities in its other businesses, but the company is devoting considerable time to give them a distinctive RJR stamp. Foods and beverages accounted for 33% of the company's sales, compared with only 23% just four years ago. Over the same period, tobacco's share declined from 62% to 54%.

Hence, the attention paid to such units as Del Monte Corp. In a continuing effort to streamline the Del Monte operation and give it marketing sustenance, RJR this year reorganized the specialty grocery products division. With products coming with the acquisition of Heublein, RJR sought to rationalize this business, not the least of which was to move headquarters from Farmington, Conn. (Heublein's headquarters), to San Francisco, combining it with the Del Monte frozen food group. The resulting combination was named Del Monte specialty and frozen food group.

The Del Monte brand continued to receive more marketing life, with RJR pumping $12.3 million in support for the various lines. Almost half went to advertising for Lite canned fruit. Since being acquired by RJR in 1980, Del Monte's ad budgets have increased steadily.

The brand is attempting to enter the active frozen food category by gradually testing and expanding a midprice line. In addition, Del Monte is embarking on what it says is its largest vegetable advertising campaign in history, saying Del Monte vegetables are as nutritious as fresh cooked.

Among other specialty brands, RJR gave the most advertising support to A.1 steak sauce ($9.3 million) and Hawaiian Punch ($9.9 million), which became available nationally in aseptic packaging.

At Heublein, the continuing decline in distilled spirits sales has dulled prospects for the kind of growth the company would like to see, with Heublein spirits capturing a 2.1% share of the market in U.S. case volume.

The slow growth, exacerbated by intensive public concern about alcohol and moderation, prompted the introduction of lighter cocktails, including Smirnoff vodka and tonic, gin and tonic, Bloody Mary and others. The company professes to be pleased with their progress.

The best performing single brand—the one that showed the most growth, 20% from 1982, among all spirits with more than 1 million cases in volume—was Jose Cuervo tequila. The country's best-selling tequila, Jose Cuervo received $2.1 million in measured support in 1983.

Smirnoff vodka, which experienced flat sales at 7.3 million cases, continued to be the company's top seller and No. 2 to Bacardi rum over-all. It also received the most support among Heublein spirits, $9.5 million.

Black Velvet whisky, which received $3.8 million in support, had 2 million in case sales, a slight increase of 1.1% in a category that declined 5.3% in domestic brands.

Heublein's wine operation also was hit hard by slow growth. In fact, Heublein divested its low-price wines and concentrated on its premium brands, primarily Inglenook.

Partly as a result, the nation's No. 3 vintner—behind E&J Gallo Winery and Seagram Wines—saw its market share decline from 8.7% in 1982 to 7% in 1983, according to Mr. Maxwell, who also tracks the wine industry.

Inglenook, the most heavily advertised wine in the company's lineup, received $6.9 million in measured support in 1983, while Harvey's Bristol Cream sherry and Lancers were bolstered by $3.4 million and $3.2 million, respectively.

Heublein also is making a foray into the growing wine cooler categories by testing a brand called Citronet. It is this segment of the market that has helped save the entire wine market from declining.

The final consumer behemoth in the RJR family is Kentucky Fried Chicken Corp., which in 1983 had systemwide sales of $2.6 billion, making it the third largest fast-food operation in the nation, next to McDonald's and Burger King.

KFC, with 50% of the chicken segment, has sales five times larger than its closest chicken competitor, Church's Fried Chicken. McDonald's is the second largest seller of chicken, with its Chicken McNuggets.

KFC opened 322 new stores worldwide in 1983. KFC-USA itself opened 196 company-owned and franchised units, bringing the total to 4,471, of which 998 are company-owned.

The "do things right" company, after a period of top-to-bottom remaking, is on a solid growth curve. Sales rose 18% in 1983 from the previous year, compared with the 11% growth registered by the industry as a whole.

The one new product KFC introduced over the past year—with apparent success—is made-from-scratch biscuits. The company said it bakes more than 2 million biscuits daily.

Richardson-Vicks

	1983	1982
Sales*	$1,280,500,000	1,115,700,000
Earnings*	71,900,000	51,400,000
U.S. Advertising	150,813,900	129,289,400

*Worldwide, fiscal years 1984 and 1983 ended June 30

Richardson-Vicks, Wilton, Conn., the 41st largest national advertiser, increased its domestic advertising to an estimated $150.8 million in 1983, up 16.6% from 1982.

The acquisition of the Vidal Sassoon line of haircare products in May, 1983, and the accompanying ad expenditures, which included $14.1 million in measured media spending for the year, accounted for most of the increase. Excluding Sassoon spending of $14.2 million in measured media, the company is estimated to have increased its ad expenditures about 5%.

In 1984, ad spending continues on the upswing, thanks mostly to recent new product launches. The gains have restored it to the 1981 level ($149 million), following the 1982 cut that dropped it 13%, to $129.3 million.

During fiscal 1984, which ended June 30, 1984, worldwide sales were up nearly 15%, to $1.28 billion, and net income rose sharply to $71.9 million, up 40%, reversing two years of successive declines.

Fiscal 1984's gains—like the ad hike—came largely as a result of the acquisition of Sassoon and its annual sales of $110 million. Also, because 80% of Sassoon's sales are domestic, the move has helped accomplish a Richardson-Vicks strategic objective of tipping the balance of over-all sales in favor of the domestic side. Domestic sales for fiscal 1984 constituted 60% of the total. In 1983, domestic sales reached $570 million; 1984 sales are estimated at $740 million.

The Sassoon acquisition was preceded by the January, 1983, purchase of the Pantene products line. Those back-to-back acquisitions, together with the July, 1982, purchase of the Mill Creek brand, established Richardson-Vicks as a major force in the $3 billion a year domestic haircare market.

It's a presence that also covers each segment of the haircare market: The Sassoon line aimed at the mass market, the Pantene line aimed at the upscale market, and Mill Creek for those who prefer natural products.

Its U.S. entry in the haircare field is news, but in European markets, the company's Hegor, Clearasil, and Petrole Hahn hair care products are established lines. More significantly, its entry in the domestic haircare market makes personal care the company's largest business segment. It now accounts for almost half of the company's annual sales.

At this point, Richardson-Vicks is well-seasoned in developing acquired product lines. With the exception of its original Vicks cold-care product line, it has entered all its other business segments via acquisitions. Historically, its most noteworthy acquisition is Oil of Olay (1970), which entered it in the moisterizers market. Before that, there were the acquisitions of Clearasil (1960), entry to the teen skincare business, and Fasteeth and Fixodent (1969), entering it in the denture care market.

More recently, there have been the acquisitions of Formby's line of homecare products (1978), launching it in the do-it-yourself market, and the Percogesic line (1982), dipping Richardson-Vicks into the analgesic market.

Along with acquiring product lines, Richardson-Vicks also has been busy home-growing them as it continues to broaden its product base. Its original cough and cold remedy base now accounts for about one-third of the company's total sales volume.

Since the start of 1983, Richardson-Vicks has entered the men's skincare market by introducing Saxon aftershave, the facial cleansing market with the introduction of Olay beauty bar, and the mass-market vitamin field with Lifestage multivitamins. It also went national with Tempo, its first entry in the antacid market, and strengthened its cough products line with Cremacoat cough medicines.

Ad spending for new entries has been substantial and includes expenditures in 1983 of between $6 million and $7 million for the "Saxon reaction" introductory campaign, $11.5 million for the introductory push for Lifestage vitamins, $4 million for its opening ad splash for the Oil of Olay beauty bar, $8 million in measured media support for Tempo and $4.6 million in measured support for Cremacoat.

The campaign introducing the four-formula Cremacoat line says it soothes and relieves coughs better than conventional syrups and that "four years of development and clinical testing proved it." The campaign got a big boost when its claims were substantiated by the National Advertising Division of the Council of Better Business Bureaus' monitoring program.

Richardson-Vicks' most heavily advertised product continues to be Oil of Olay, which received $22 million in measured media spending last year, down from $26.1 million, according to Leading National Advertisers. It remains the market's top seller in its category but dropped another percentage point in market share last year. Three years ago it had a 34% share of market. That went to 31% in 1982 and now 30%. Night of Olay cream was backed with $2 million in measured spending, up from $1.5 million.

In the skin medication sector, Clearasil was backed with $3.1 million in measured spending, down from $3.9 million.

Cold-care product sales for fiscal 1983 were flat for a second straight year because of the low level of flu incidence but for the just-ended fiscal 1984, sales are up. Nyquil, backed by $7.8 million in measured media spending last year, down from $8 million, held onto its market share. Formula 44D, backed with nearly $6 million in measured spending, up from $5.7 million, however, lost some ground. The Sinex nasal sprays line, meanwhile, was backed with $3 million in measured spending, down from $4.4 million.

Headway tablets, introduced two years ago with a big ad splash, had no measured spending in 1983. Also getting no measured support last year was a 1982 entry, Denquel, a toothpaste for sensitive teeth.

In the Homecare Products Division, ad spending for the Formby's line of woodcare and refinishing products received $5 million in measured spending, down from $5.5 million. New lines of interior finishes also were introduced under the Formby's and Thompson's brand names.

Fixodent and Fasteeth sales were up. Together, they capture more than one-third of the denture adhesives market. Fasteeth was backed with $1.5 million in measured spending and Fixodent with $2.4 million.

*Worldwide

Schering-Plough Corp., Madison, N.J., which entered a divestiture phase in 1983 that continues into 1984 in order to concentrate on its core businesses—pharmaceuticals and consumer products—is the nation's 59th largest advertiser with estimated total advertising expenditures of $117.9 million in 1983, down 4.8% from 1982.

Over-all, sales were $1.808 billion, an increase of 4.6% from 1982, while net income was $190.1 million, up 3.6%.

Of the total advertising expenditures, measured media in 1983 was $69.36 million, down 4.5%. Most of that was spent on consumer products in the U.S., a product group accounting for $514 million in sales out of worldwide consumer product sales of $812 million.

Consumer product sales trail those of Schering-Plough's pharmaceutical business, which recorded worldwide sales of $995.9 million, or 55% of the company total in 1983. The U.S. accounts for 41% of the pharmaceutical group sales.

The divestiture of businesses no longer fitting into Schering-Plough's long-term plans began with the sale in 1983 of DAP home products, netting

ARCADE ACTION
MILLER DISPLAYS

*When You've Got More Birds
In The Bush
Than In Your Hand,*

there really isn't much to warble about.

You've orchestrated the promotional blitz.
Fine-tuned the media. The creative is looking great.
But what if you come on-stage to an audience
that isn't there?

All because you missed the time and place
where the critical elements of the sale come together.
In-store. At the point-of-sale. Where you
win or lose. Quick.

We'd like to send you a free Harvard study
called, "Better Marketing At The Point Of Purchase."
It reveals some compelling facts about the
important role of point-of-purchase in
your promotional mix.

We'll also include our free brochure
in the belief you'll find equally compelling reasons to
let Miller Displays help make your next in-store
merchandising program *your* big success story!

Which all goes to say, as you well know,
a bird in the hand is worth two warblers in the bush.
Any day.

A Division of Miller Manfuacturing Co., Inc.

the company $70 million. In 1984, the company has sold two Plough Broadcasting radio stations and has reached an agreement to sell the remaining 10.

Within the consumer product sector, Maybelline cosmetics line, which had sales of $202.8 million, up 12%, snared the biggest ad expenditure, $29.95 million, an increase of 7%. Actress Lynda Carter, best known for her role as the super heroine Wonder Woman, was spokeswoman. The 1983 media mix for Maybelline advertising was 39.4% magazines, 49.9% network tv, and 10.7% spot tv.

According to company claims, during 1983, the Maybelline line became the U.S. leader in retail dollar sales of mass-distributed decorative cosmetics. Mascara takes up the lion's share of the Maybelline ad budget, accounting for $10.6 million—most of that for tv time.

Ad spending on Maybelline's Moisture Whip line declined slightly to $6.4 million, a drop of 8% from 1982, and that comes hard on the heels of a 24% decline from the 1981 level. Spending actually increased for lipstick and makeup, up 21% and 4.7%, respectively, but the company seems to have lost all confidence in creams and lotions, which saw ad expenditures plummet from $2.9 million in 1981 to $1.8 million in 1982 and $334,800 in 1983.

Schering-Plough, however, continued its strategy of exploiting the highly recognizable Maybelline name by adding new products to that line. One such new product in 1983 was Shine Free makeup, a line aimed at women with oily skin. Leading National Advertisers counted $661,800 in magazine advertising for the products, powder blush, pressed powder and Cover Stick products.

Other new products introduced in 1983 were the Long Wearing line of lipsticks and foundation makeup, and Expert Eyes shadow kit and liner pencil.

The company attempted to salvage its Daydreams entry in the perfume market by repackaging it. Introduced in mid-1982, the perfume was able to muster only a dismal 1% share. The company also increased advertising on the product by 10.3%, to $4.6 million.

Hoping to snare yet an even larger portion of the $240 million-a-year suncare market, Schering-Plough, which already markets the leading Coppertone line and the Tropical Blend tanning products line, launched the la Solaire suncare line in 1983, a more lavishly packaged and expensively priced line to be competitive with Charles of the Ritz Group's Bain Du Soleil. It remains to be seen how successful the la Solaire marketing strategy will be.

Many of Schering-Plough's competitors, while conceding that the company's lines remain the undisputed top sellers, say its total share has dropped slightly, citing price resistance to the Tropical Blend line as a problem.

However, that price resistance has not deterred Schering-Plough from adding a new fragrance, Tequila Sunrise, to the Tropical line.

Schering-Plough says it spent more than $19 million on advertising and promotion for its suncare products in 1983. But the portion that went into measured media declined considerably from 1982 levels, according to Leading National Advertisers. Coppertone's ad spending was $4.7 million, down 11.2%, while Solarcaine products ad spending was down 60%, to $514,800; Tropical Blend Tanning Products was down 49%, to $1.04 million, and For Faces Only products was down 49%, to $935,700.

Schering-Plough's strategy of associating new products with highly popular ones carried over into the footcare market as the company added Pro Comfort, a specialty line of protective and sports-injury prevention products, to the Dr. Scholl's line.

Aimed at active, younger people, the company promoted the line by sponsoring a nationwide series of 10-kilometer races that featured many of the country's top-ranked runners.

Meanwhile, the Dr. Scholl's line, which has a vise-like grip on the footcare market, had sales of $107.8 million in 1983, up 4% over the previous year.

Also, Dr. Scholl's Odor Attackers was introduced in 1983, and in 1984, the division expects to introduce a foot-grooming line and a comfort insole for women's open-toed shoes.

The company says Duration, a nasal spray that had $2.8 million spent on advertising in 1983, maintained its leading position among advertised products in its category.

Spending on the St. Joseph's children's aspirin line increased 81%, to $2.8 million in 1983. The company also spent an additional $3.4 million advertising St. Joseph's maximum strength aspirin-free tablets. The product was introduced at the end of 1982 to take advantage of the Tylenol scare, but thus far it has been unable to achieve any significant market share.

In the pharmaceutical field, the company specializes in anti-infectives, cardiovasculars, anti-imflammatories and anti-allergenics.

Probably the most publicized aspect of Schering-Plough's pharmaceutical operations is interferon, a drug still in the research stage. At one time, interferon was hailed as a wonder drug that would cure everything from cancer to the common cold, but it has hit so many snags during research that some wonder if it ever will reach the market. Still, more than 20 companies are involved in the race to find commercial applications for it.

But the two with the most riding on it are F. Hoffmann-LaRoche & Co. and Schering-Plough. The latter especially had been vociferous in extolling its virtues and may have forced itself into a position of putting up or shutting up. In late 1983, the company filed for two anticancer indications with the Food & Drug Administration and said it expects to file for use in combatting the common cold sometime in 1984.

Schering Plough got a step closer to marketing interferon in mid-August, 1984, when Geneva, Switzerland-based Biogen Inc., with whom Schering Plough has a worldwide exchange license (SP does the scale up and process development), received a generic patent for alpha interferon from the European Patent Office. Approval to release the product, however, has yet to be received from drug regulatory bodies in developed countries in which SP has applied to market interferon. "It is very positive that the Europeans granted the generic patent," says a SP spokesman, who did not think the patent would necessarily set a precedent for other countries to follow. The "generic" patent designation, however, is expected to precipitate a long legal battle with Hoffmann-LaRoche, which contends the Biogen patent covers only a "precursor" of the alpha interferon product, not the mature form.

As a cold medicine, there is a major obstacle Schering-Plough must overcome to get FDA approval: The elimination of side effects such as nose bleeds that most people complain about after using the drug. Once it attains approval, the company has to figure out how to market interferon, because it is a preventive medicine that must be administered before a cold is contracted.

In 1983, Drixoral adult cold tablets, the largest selling prescription medicine of its kind in 1982, were converted to an over-the-counter product. The company claims it has become the No. 1 seller in pharmacies and is increasing its share in the large nonprescription adult cold market.

During the year, the company changed the ad agencies handling prescription products, dropping Pro-Clinics and adding both Robert A. Becker and William Douglas McAdams. All three agencies are in New York.

*Worldwide, fiscal years 1984 and 1983 ended Jan. 31

Jos. E. Seagram & Sons, New York, a subsidiary of Seagram Co. Ltd., Montreal, was the 57th largest national advertiser in 1983 with estimated advertising of $119.6 million, a decrease of 21.8% from the previous year.

Worldwide sales for fiscal 1984 were $2.65 billion, a 6.4% drop from 1983, while net income advanced 2%, to $117.5 million. U.S. sales of $1.639 billion in 1983 remained flat.

Sales at Seagram began to rebound in fiscal 1984 with first quarter sales ended April 30 up 9% to $625.6 million, and net income up 64% to $89.3 million, a figure that includes dividends from Seagram's 22% ownership in Du Pont. Operating income, void of those dividends, was $48.3 million, up 7%. Fiscal totals for the comparable period in 1983 are difficult to make because Seagram has just switched to a new fiscal year ending Jan. 31.

Seagram blamed its sluggish performance in 1983 on the lingering impact of the recession and intense competition within the spirits industry.

For the year, Seagram pursued a dual marketing strategy. It sought to maintain the market share of its top-selling Scotch whiskys, long the backbone of the company, while moving more aggressively into the new categories likely to dominate the market in the years ahead: Creams, rums, liqueurs and wines.

Generally sluggish sales led to major ad cutbacks except in wines and new

products.

Seagram slashed ad spending in all measured media. Media expenditures of $80.8 million in 1983 were 26.7% below expenditures of $102.4 million as measured by Leading National Advertisers (LNA). Magazines continued to garner a majority of the company's media budget, despite a 26% drop in magazine spending, to $45.6 million. Magazines accounted for 56% of all measured spending by Seagram, equal to its share last year, but down from 60% in 1981 and 75% in 1980. Tv, newspapers and outdoor all have gained proportionally over the past few years.

Industrywide liquor sales dropped 1.6% in 1983, compared with a 3.2% decline in 1982. Experts see sales flattening in 1984 as the recovery continues, although higher drinking ages and anti-alcohol publicity could cut into sales.

Seagram's top five brands showed little or no growth during the year. Sales of 7 Crown whisky, the third best selling liquor in the country, were down 6.8% from 1982. V.O. whisky dropped to No. 7 among all liquors from No. 5 the year earlier, with sales down 8.2%. Seagram's gin checked in at No. 10 on the best-seller list as it did in 1982, with sales up 0.5% (after an 11.6% drop in 1982) and rose from the No. 35 ranking in 1982. Crown Royal whisky, No. 34 among all liquors, gained 4.5% in sales (after a 5.6% drop in 1982). Wolfschmidt vodka, No. 35, gained 0.4% in sales but couldn't hang on to its No. 33 slot of the previous year. (Rankings by sales are from Lehman Brothers research.)

Seagram spent $6.7 million in measured media for 7 Crown, down 27% from 1982; $7.4 million for V.O., down 29.5%; $3.6 million on Seagram's gin, down 10%; $5.9 million for Crown Royal, down 33%; and $2.2 million for Wolfschmidt, down 29%, according to LNA.

New activity for Seagram in 1983 focused on wines, liqueurs and rums. Late in 1983, Seagram bought the Wine Spectrum, including its flagship Taylor California Cellars brand, from Coca-Cola for $237.8 million.

The move established the company as the second largest domestic wine producer in the United States. Paul Masson wines received $7 million, down 16%, in ad support, while Taylor received $3.2 million, down from $13.5 million in 1982. E&J Gallo Winery maintained a strong dominance (27% share) of the U.S. market. Seagram continued to put more dollars behind Taylor in early 1984, pushing spending toward the $13.5 million levels maintained by Coca-Cola in 1982). Competitor Gallo spent $34.7 million in 1983.

Paul Masson light wines, backed by $1.5 million in tv spots after a $6.3 million introduction in 1982, retained the top market share in the light wine category, but the category as a whole has not developed as fast as expected. Ads for Masson Light play up its reduced caloric and alcoholic content. Taylor Light holds the No. 2 niche in the market.

Other 1983 ad expenditures on Seagram wines included: $3.2 million for Black Tower; $2.4 million for Partager, down 11%, billed as "the country wine from France" in tv spots showing fun-loving French peasants, and $1.1 million for B&G french wines, the same as in 1982.

Seagram began regional testing of Belle Bonne cream liqueur in 1983, pushing the new chocolate almond creme in the hope of gaining a foothold in the burgeoning market for creams—expected to be a major area of growth in the 1980s and beyond. The company spent $3.2 million advertising Myers's Original rum cream, another entry in this category, introduced in 1982 and now rated by Seagram as "one of the most successful new product introductions in recent spirits history." Measured spending for the Myers's rum brand dropped from $5.4 million in 1982 to $2.4 million, although spending for a line extension, Myers's Jamaican rum, rose from $5,700 to $1.3 million.

Big product news in 1983 for Seagram, though, was the introduction of Captain Morgan spiced rum, backed by almost $4 million in ad spending. Magazine spending of $1.6 million and $2.3 million in outdoor helped make the swashbuckling figure of the Captain himself—a pirate with a partying soul—familiar to consumers across the country.

The drink is targeted chiefly at younger people—presumably the 21-to-34-year-olds who are leading the movement away from heavier, darker, traditional liquors. Early sales results were promising. *Impact*, the industry newsletter, forecasts eventual sales of 1 million cases a year. Sales for 1983 were estimated by industry sources at 150,000 cases, or $12.6 million.

Another new product introduced regionally late in 1983 was Seagram's Imported Vodka—"without the imported price," as ads declared. The new vodka aims to go against Stolichnaya, Absolut and other imports with its $6.50 to $7 retail price tag. It will go national this year behind a "significant" marketing budget, the company said.

Success for Seagram depends heavily on these new drinks. A survey by SRI Research found that among all liquor advertisers in 1982, Seagram brands ranked cumulatively highest in brand awareness, but this awareness was highest among older consumers. The new drinks represent Seagram's attempt to capture a younger generation of drinkers.

Despite these new-product trends, the bulk of Seagram ad dollars still went to support existing brands in more traditional categories. Some of the big-ticket items were: Chivas Regal scotch, $4.3 million, down 12%; Lord Calvert whisky, $2.6 million, down 19%; Kessler blended whisky, $2 million, down 17%, and Glenlivet scotch, $1.7 million, down 23%.

Two other major developments made headlines for Seagram in 1983. One was the sale in the spring of Fromm & Sichel, the Seagram subsidiary that marketed Christian Brothers brandy and wine. The Napa Valley-based company was sold to a group of private investors.

Seagram had spent $4.3 million to advertise Christian Brothers' products in 1982. The sale leaves Seagram with two brands left in that category, Paul Masson and Leroux.

Another development was the successful national rollout of Seagram mixers. Seagram licensed its name to Coca-Cola Bottling Co. of New York, the bottler, distributor and marketer of the mixers, in return for royalties on sales.

The success of the mixers has been a mixed blessing, cutting into Seagram's ability to sponsor co-op advertising with makers of other mixers. Schweppes canceled its longtime co-op campaign with Seagram's gin ($1.5 million in 1982) as soon as Seagram's mixers made their debut in the East.

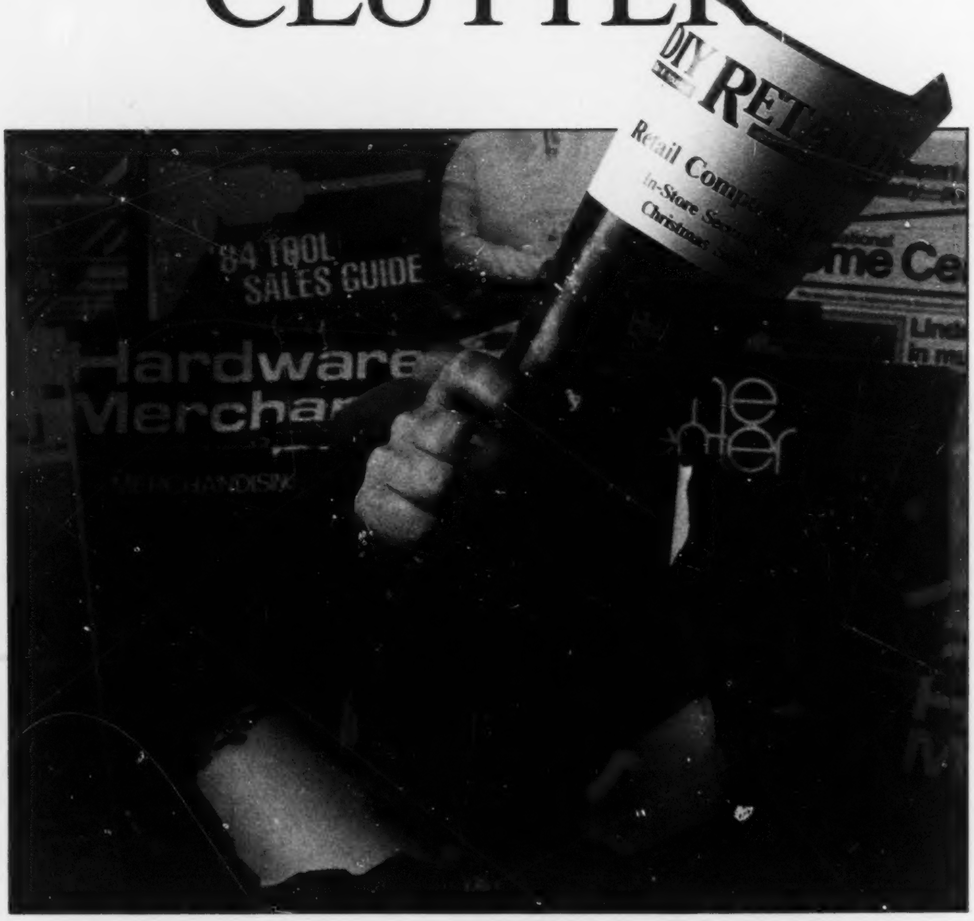
Coca-Cola Bottling Co. of New York is advertising the ginger ale (regular and sugar-free), club soda, tonic (regular and sugar-free), seltzer, bitter lemon, collins and grapefruit-lemon drink as "the first mixers good enough to be called Seagram's." The mixers were backed last year by $1.6 million in measured spending by Coca-Cola Bottling.

In the corporate offices, the departure of Mary Cunningham, vp-strategic planning, received considerable press attention. She left to work full-time with husband, Bill Agee, on their venture-capital business, Semper Corp. Ms. Cunningham claims responsibility for plotting Seagram's expansionary moves in the wine business.

Seagram continued to be an industry leader in advertising for drinking with moderation, a role that may serve the company well in a time of widespread anti-alcohol sentiment in Washington and elsewhere.

One Seagram print ad that drew wide attention, featured a picture of four jiggers of whisky, four glasses of beer, and four of wine, joined by an equal sign. The headline says "Surprised?" The copy informed readers that the alcohol content of the three groups was equal, and concluded: "Even if it looks light, it shouldn't be taken lightly."

BREAKING THROUGH THE CLUTTER



When you want to get your message through to decision makers in the *Hardware, Home Center* and *Lumber/Building Materials* markets, choose the magazine that covers them all - *DIY Retailing* (formerly *Hardware Retailing.*)

DIY Retailing goes to more people and locations in Hardware, Home Centers and Lumber/Building Materials than any other publication.

*Worldwide

Sears, Roebuck & Co., Chicago, the nation's largest retailer and second largest advertiser, increased national ad spending about 16% in 1983, to $732.5 million, as it continued its merchandising focus on the "Store of the Future" concept.

Known by an estimated 36 million customers for its department stores and catalogs, the company also is a holding corporation for several retailing and financial service and trading entities: Sears Merchandise Group, which manages the department stores; Allstate Insurance Group, a prominent personal and commercial insurance underwriter; Coldwell Banker Real Estate Group, a nationwide realtor; Dean Witter Financial Services Group, a nationwide stock brokerage, and Sears World Trade Inc., an international goods and services trading company.

Several of the financial services operate together as Sears Financial Network based in Sears department stores. Operating revenue for the retailing and financial services company increased 19.5%, to nearly $35.9 billion in 1983. Net income also grew, up 44.2%, to more than $1.3 billion.

By far the largest and most important of the subsidiaries, Sears Merchandising Group led the company in revenues, generating $25.1 billion, an increase of about 21.4% over 1982, and produced net income of $781 million, up 80.8% over 1982. The group also dominated national media ad spending, accounting for most of the $219.33 million monitored by Leading National Advertisers.

Last month, the merchandising-group also provided leadership to the parent company. On August 15, Edward A. Brennan, former chairman of the merchandising group, was named president and chief operating officer of the conglomerate. William I. Bass was then named chairman and ceo of the merchandise group to replace Mr. Brennan.

Other groupings and corresponding media expenditures include the Allstate Insurance Group, which produced revenues of $8.1 billion, up 8.9% from 1982, and net income of $555 million, up 16.8% from 1982. Allstate spent $25.7 million in national media, up 35%.

Dean Witter Financial Service Group produced $2.1 billion in 1983 revenues, up about 32%. Net income grew to $100 million from $27 million in 1982. Dean Witter spent $7.5 million in national media, up from $3.2 million.

Coldwell Banker Real Estate generated $704 million in revenues, a 49.7% increase over 1982. Net income dropped 8.7%, to $48 million. The real estate firm spent $2.2 million, up from $809,000.

In its first full year of operation, Sears World Trade Inc. generated $79 million in revenues.

The Merchandise Group's national media spending of $219.33 million was an increase of 19% over 1982. That heavy media activity included 66% in network tv, 13.4% in spot tv, 15.3% in magazines, 4.9% in network radio and the remainder in outdoor and newspaper supplements, according to LNA.

The Sears Merchandising Group continued to establish "Stores of the Future," the retailing and marketing concept that eventually will dominate the group, according to G. Joseph Reddington, who was named vp-marketing for the merchandising group this spring. Mr. Reddington had been general manager of the Washington, D.C., Sears stores since 1982.

The new retail concept involves a store within a store by establishing "boutiques" for soft and hard-line goods within the major body of the store. Since the first of the stores was opened last year in King of Prussia, Pa., Sears announced an unprecedented $1.7 billion capital expansion plan that will be used for the remodeling of 600 stores and the constructing of 62 new stores, including more of the stores of the future.

In 1983, the group added six new stores of the future and remodeled five others to bring the total to 12 for the year. In 1984, Mr. Reddington said Sears will remodel 85 more stores.

"The 'Store of the Future' is really where the marketing of the merchandise group is at right now," Mr. Reddington said. "We are moving steadily forward with the project and expect it will be a highlight of the group's 100th anniversary in 1986."

The group, however, also is introducing a couple of other new retailing operations in 1984. So far this year, Sears has opened 100 business system computer stores around the country and will open another 50 in 1985, Mr. Reddington said. The group also opened five paint and hardware specialty stores so far this year.

Product line expansion continues to be a major marketing concern for the group, which continues to add non-Sears products in both apparel and electronics specialties such as telephones.

Though hardware sales continue to dominate, providing nearly 70% of a store's yield, the group continued its promotion of new lines of men's and women's sportswear under the Arnold Palmer, Cheryl Tiegs and Evonne Goolagong names, lines that generated more than $200 million in sales over each of the past two years.

The merchandise groups split its advertising into two major areas, with "hard goods," handled by Ogilvy & Mather, and "soft goods," managed by Chicago-based Needham, Harper & Steers.

Though tv advertising continues the theme of "There's more for your life, at Sears," the company began a slow move to modernize its image, according to Mr. Reddington, with the introduction of a new, more modern logo, beginning July 1. More will be coming, as part of a multi-million-dollar image campaign coordinated by NHS/USA.

Sears Financial Network, the combined financial service operations based in Sears stores, was the company's other major electronic media project. Tv commercials for the corporate umbrella project, featuring Hal Holbrook as spokesman, broke in mid-1983. They were produced by Foote, Cone & Belding, Chicago. The company would not disclose the advertising budget for the project, but expenditures previously were estimated at up to $40 million.

Allstate Insurance Co. also revamped its marketing by establishing a new corporate market development and planning division with its personal property and casualty division.

The reorganization had no effect on the assignment of advertising to All-

*Indicates a 100 Leading National Advertiser

state's consumer advertising agency, Leo Burnett USA, and its direct marketing agency Stone & Adler, Chicago.

The department's stated purpose, according to Allstate officials, is to coordinate Allstate corporate advertising, Allstate Motor Club, direct response, research, environmental analysis, strategic planning and market development.

Allstate also added another entry to its publishing operations. Already the publisher of *Discovery*, a publication for members of the Allstate Motor club, Allstate Enterprises Holdings, a Glenview-based subsidiary holding company, also began publishing *Mature Outlook*, a magazine for consumers 55 years and older.

The new quarterly magazine and supplementary newsletters offer readers auto safety checks at Sears Automotive Centers, discount memberships in the Allstate Motor Club and information on Allstate Insurance discounts. Leo Burnett USA will handle the direct marketing tv campaign, which will begin later this year, and Foote, Cone & Belding, Chicago will handle a direct marketing magazine campaign.

Allstate also changed the name of its California-based savings and loan affiliate from Allstate Savings & Loan Assn. to Sears Savings Bank to capitalize on enhanced name recognition.

U.S.Advertising	97,283,200	57,158,200

*Worldwide

Sony Corp. of America, New York, the nation's 70th largest advertiser, increased advertising expenditures to an estimated $97.3 million, a 70.2% increase over 1982.

Worldwide, earnings in 1983 dropped 35%, to $127.3 million, as sales fell about 0.25%, to $4.748 billion. Domestic sales for fiscal 1983, which ended Oct. 31, slipped to $1.36 billion, a 1.1% decrease from 1982.

Advertising expenditures increased largely from additional support supplied colored tv sets, recording tapes, the Walkman stereo and Watchman tv, with the greatest increases and outlays going to newspapers and spot tv.

Sony spent $11.6 million on newspapers, more than twice the amount spent in 1982, according to Media Records Inc. Spot tv jumped from $1.6 million in 1982 to $9.8 million, reports Leading National Advertisers.

Video equipment sales, down 3.6% in dollars, accounted for 41.1% of total sales in 1983; audio equipment sales declined 2.9% in dollars, accounted for 22.1% of over-all sales.

Reginold Duquesnoy, an analyst at New York-based Arnhold & S. Bleichroeder, said, "1983 was an absolute disaster for the company—it was the year Betamax fell apart."

Consumer products, he said, account for about 85% of the company's revenues, and the legal battle between Sony and Universal City Studios/Walt Disney Productions over fair use of the Betamax taping devices has decreased Sony's worldwide market share in the videocassette recorder market to 25% in 1983, adding to the market pressure Sony felt from vcr competitors like Zenith.

Betamax has been losing sales in Japan and overseas to the rival VHS-format system, which has a different tape size and format than Betamax. VHS systems moved to longer recording times faster than Sony.

In early April, 1984, Backer & Spielvogel lost tne Betamax account to Marschalk Co., New York, which is preparing a campaign to air this month on tv and spot radio and in magazines and newspapers. New machine features will be addressed in the ads, according to Sony.

In 1983, Sony backed its Betamax tv videotape system with $6.2 million in measured spending, about 50% in spot tv, compared with a media buy of $6.34 million in 1982, 66% of which was in network tv.

In the domestic market, the Beta format, pioneered by Sony, is holding its own against competitors such as Zenith in the VHS line. The espousers of Beta—since Zenith's move to VHS, which is only Sony and Sears, Roebuck & Co.—are said to be losing sales.

The Beta format accounts for about 35% of the world's vcr business, and last year, 42% of Sony's total sales were from its vcrs, as were about 60% of the company's profits.

The tv segment of Sony was the only one to see over-all growth, with sales accounting for 24.1% of worldwide sales, up 1.5%. Color tv sales in particular increased, accounting for 21.6% of the tv segment's net sales.

In 1983, Sony continued to push its color tv sets on network tv, allotting $4.7 million of the product's $5.9 million measured ad budget to network tv promotion. Sony spent $3.8 million in measured media on color tvs in 1982.

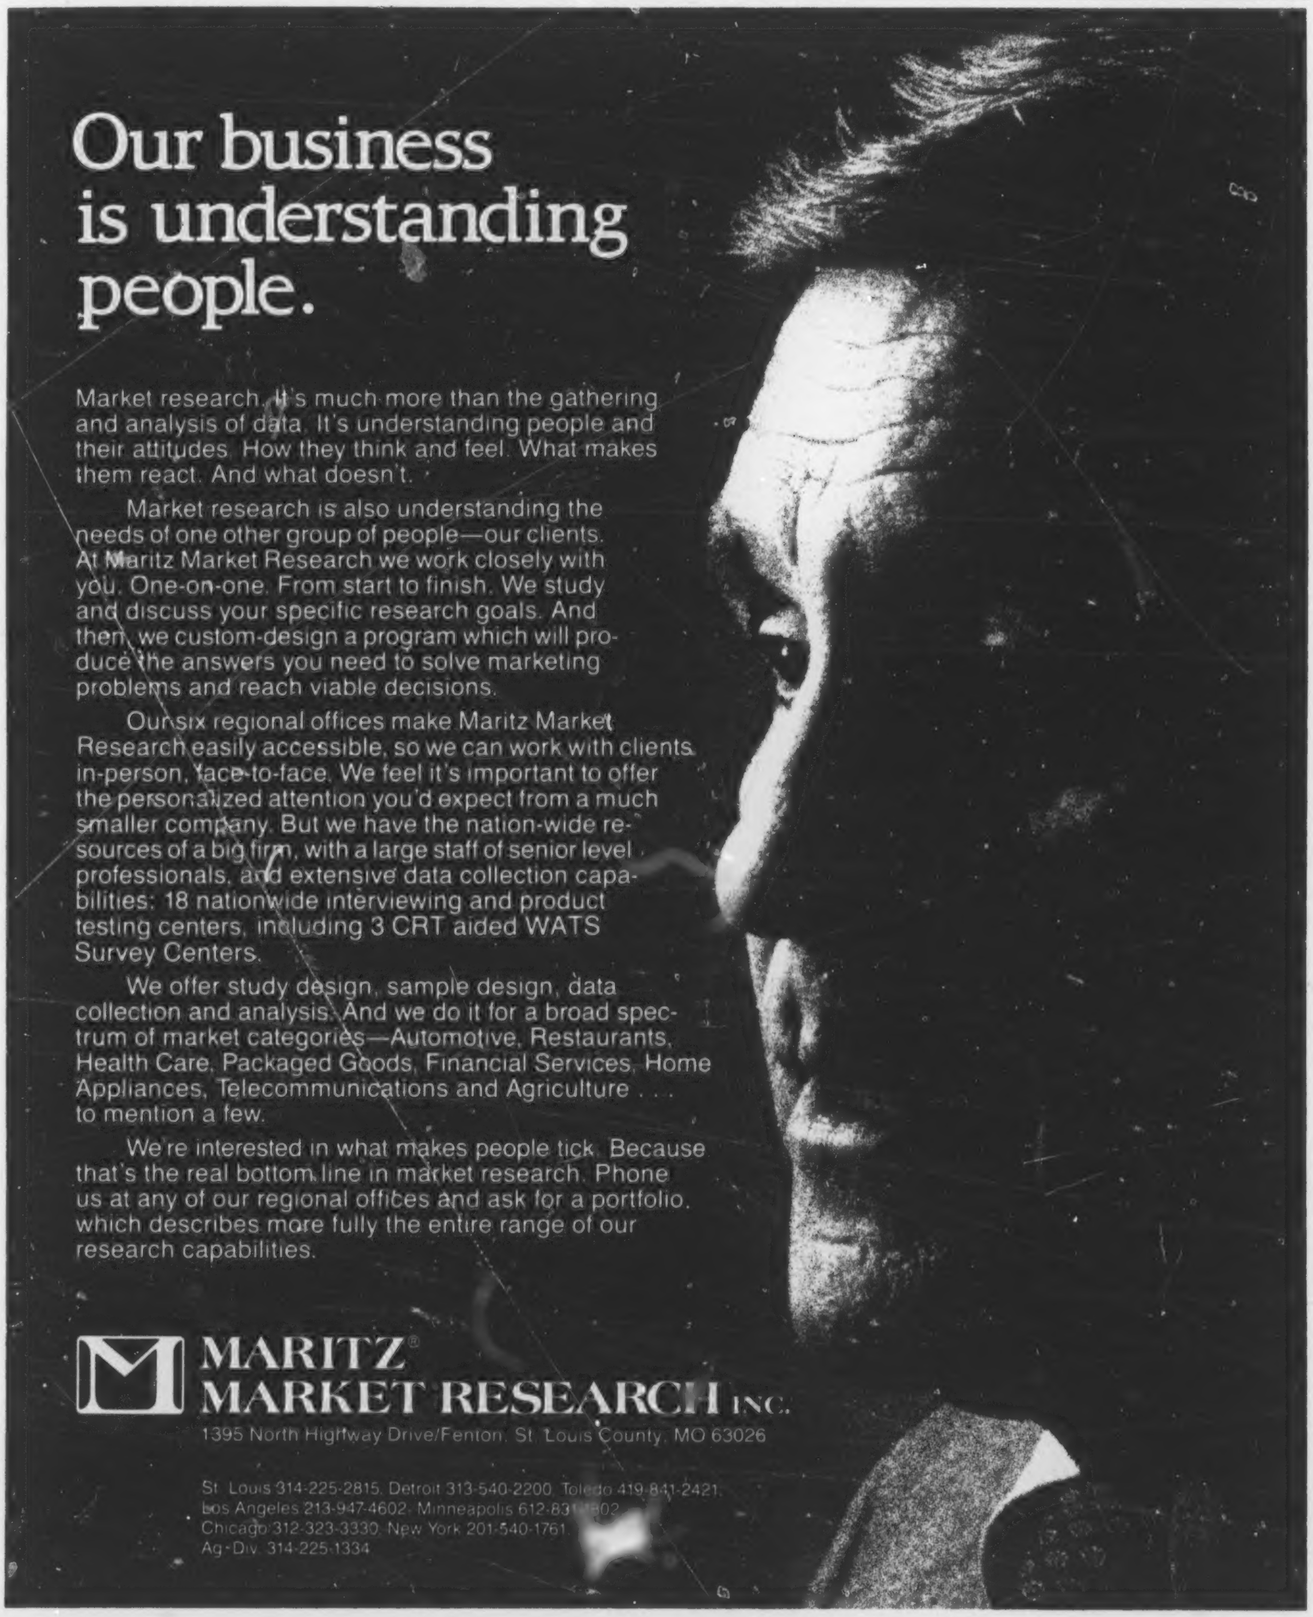
The new Sony Walkman cassette tape player and am/fm radio stereo received $4.6 million, up from $914,000 in spending in 1982. Virtually all was spent on spot tv.

Sony representatives and industry observers seem to agree that Sony is bouncing back from the turbulent 1983. Jeff Brooks, national advertising manager for Sony's consumer line, said the development of new products and the introduction of an intensive "Sony, the one and only" ad campaign will lead to a prosperous 1984.

"We covered up some past erosion [in sales of consumer products] by introducing the Beta Hi-Fi and the Betamovie and we've given people a reason to come back to the Beta format," Mr. Brooks said.

The Betamovie is a compact color video camera and tape recorder in a single unit. The Beta Hi-Fi is a vcr using high-speed rotating heads. Sony put almost all of its Betamovie camera spending of $986,200 in measured media into spot tv ads in 1983.

According to Mr. Brooks, the budget for consumer advertising was about $22 million in 1983. Of that total, 70% was poured into broadcast ads, 25% into consumer print and the remaining 5% was budgeted for promotional



Our business is understanding people.

Market research. It's much more than the gathering and analysis of data. It's understanding people and their attitudes. How they think and feel. What makes them react. And what doesn't.

Market research is also understanding the needs of one other group of people—our clients. At Maritz Market Research we work closely with you. One-on-one. From start to finish. We study and discuss your specific research goals. And then, we custom-design a program which will produce the answers you need to solve marketing problems and reach viable decisions.

Our six regional offices make Maritz Market Research easily accessible, so we can work with clients in-person, face-to-face. We feel it's important to offer the personalized attention you'd expect from a much smaller company. But we have the nation-wide resources of a big firm, with a large staff of senior level professionals, and extensive data collection capabilities: 18 nationwide interviewing and product testing centers, including 3 CRT aided WATS Survey Centers.

We offer study design, sample design, data collection and analysis. And we do it for a broad spectrum of market categories—Automotive, Restaurants, Health Care, Packaged Goods, Financial Services, Home Appliances, Telecommunications and Agriculture . . . to mention a few.

We're interested in what makes people tick. Because that's the real bottom line in market research. Phone us at any of our regional offices and ask for a portfolio, which describes more fully the entire range of our research capabilities.

trade and radio advertising. Consumer products account for 85% of Sony's sales, according to Mr. Duquesnoy.

Sony's almost nonstop introduction of new recording products has led it to delve more heavily into tapes.

In 1983, the Sony tape division concentrated on promoting an ultra-high quality tape, which maintains recorded material longer than lower quality tape, according to Robert Basso, national advertising manager for the tapes.

Sony recording tapes, which were allotted only $655,700 in advertising in 1982, garnered a $2.4 million advertising budget in 1983, which Sony invested in a magazine campaign.

Mr. Basso said that, despite the trend toward the high-quality tape, lower quality tape is still a big seller for Sony. He said lower quality tape now is "almost an impulse buy, so what we're trying to do is use more point-of-sale materials and less consumer print."

However, he said most of the tape advertising dollars still are poured into consumer print. Tape sales are on a steady climb, Mr. Basso said, with the sales volume up as much as 157% over 1983.

Sony's industrial trade division is another steadily growing area, in keeping with the trend toward more automated offices, said Barbara Ela, advertising manager for Sony's video and professional audio division.

The industrial products have been successful sellers, Mr. Duquesnoy said, and the corporation is looking to increase its involvement in industrial products.

The 3.5-in. floppy disc was one of 1983's main developments in the industrial line, and Sony got a big break when the product was adopted by the American National Standards Institute as its standard. Sony also has a two-year contract with Hewlett-Packard, and by Nov. 1, 1983, Sony had shipped about 50,000 disc drives for Hewlett-Packard's personal computers.

Other new products introduced in 1983 include a digital tv receiving system that, with the help of Sony's semiconductors and digital processing equipment, displays a high-quality picture.

In November of last year, Sony introduced its Cable Digital Audio Data Transmission system, which will expand the applications of existing cable tv.

Sony will promote the new system to cable tv companies, hotels, schools and hospitals.

The company is increasing its industrial business, and Noria Ohga, president of the company, has been quoted as saying he hopes Sony eventually will collect 50% of its sales from non-consumer business.

Sales*	$1,901,171,000	$1,796,153,000
Earnings*	136,844,000	129,511,000
U.S. Advertising	171,828,100	140,149,500

*Worldwide

The nation's 38th largest advertiser, Sterling Drug, New York, spent an estimated $171.8 million on U.S. advertising during 1983, a 22.5% increase over 1982.

Worldwide sales increased 6%, to $1.9 billion, up for the first time in two years. Net income in 1982 was $137 million, a 4% increase.

Continued weakness of foreign currencies in relation to the U.S. dollar unfavorably affected Sterling financial results. The percentage of sales derived from abroad has declined steadily since 1980, sliding from 47% then to 37% in 1983.

U.S. sales rose 11% in 1983, to $1.2 billion, an increase attributed to aggressive marketing. U.S. operating profits increased 9.6%, to $171 million. Sterling reported it spent $347.7 million in advertising worldwide, an increase of 31% over the previous year.

The company reported earnings increased 9% for the first quarter of fiscal 1984 on sales that squeezed out a 1% improvement, a performance influenced by price increases during the comparative period for 1983.

Sterling's U.S. operations are divided into five business areas: Pharmaceutical specialties, proprietary products, household and personal products, chemicals and other products, and environmental control.

In the proprietary products area, sales shot up 30%, to $300 million in 1983. Operating profits for the area increased 8.7% to $41 million in 1983.

During the year, Sterling's Glenbrook Laboratories division added to its three pain-reliever product lines. The Panadol line, which was introduced in 1982 in the U.S. after 25 years in markets abroad, added aspirin-free products for children. It is now in liquid and tablet form for children and tablet and capsule form for adults. Measured spending for the adult line reached an estimated $12.2 million in its first full-year of monitoring by LNA. Industry sources estimate that during the introductory period in 1982, Sterling may have budgeted as much as $100 million for Panadol products, largely in unmeasured support. The company started advertising the children's Panadol line in early 1984. In the first quarter of this year, the company claimed a 12% share of the $1.36 billion analgesics market.

Advertising began on two other products in 1983: Cosperin, an enteric-release aspirin (it passes through the stomach and dissolves in the intestines), and Majoral, a line of aspirin and nonaspirin products long known in Latin America.

Glenbrook continued to build on its Bayer line, promoting the micro-thin coated tablet, which had rolled national in 1982, and repositioning its arthritis-strength aspirin. Maximum Strength Bayer aspirin was introduced in 1983, with $9.9 million spent on advertising—74% on network tv, 18% on spot tv. Total advertising for Bayer products increased 20%, to $19.2 million in 1983. In July, 1983, the Federal Trade Commission lifted a 10-year-old consent order that had barred the company from making comparative claims on Vanquish and other over-the-counter products.

Other Glenbrook products showing improvement during 1983 include Diaperene baby powder and Phillips Milk of Magnesia products. The company spent $5.3 million on advertising the four Phillips products, the bulk of which was spent on network tv. In the first year under the Glenbrook division, after being transferred from the Lehn & Fink group, Stri-Dex medicated pads retained the same spending level of $2 million for measured media after expenditures doubled from 1981 to 1982.

Winthrop Labs' consumer division showed good sales gains over 1982 with sales for the Neo-Synephrine brand line of nasal decongestants up substantially over the past year. A maximum strength nasal spray in that line was introduced. Ad spending declined from $5.1 million during the mild winter year of 1982 to $2.6 million in 1983.

In the household and personal products area, the Lehn & Fink group, which accounts for almost all of the area's domestic business, showed a 13.2% increase in sales, to $479 million in 1983. Operating profits in this area rose 5.4%, to $78 million in 1983. Increased advertising and marketing expenditures were offset by internal cost containment programs.

All five established Lysol-brand products were up in sales during 1983. In its first full year of national distribution, Lysol Pine Action held its own. The product's ad money went from $114,000 in 1982 to $8.3 million, with most spent on network tv. Lysol spray disinfectant ad spending reached $11 million in 1983, up 9% over 1982. Total ad spending on the Lysol line reached $33.3 million in 1983.

In the Love My Carpet rug and room deodorant line, a fifth scent was added and the company reported improved sales. Ad spending exceeded $2 million, including $1.5 million in network tv and $596,000 in spot tv.

An aggressive advertising campaign, for Perk floor care products, for which Lehn & Fink spent $10.4 million, debuted in 1983.

In Lehn & Fink's d-Con line, a steady stream of new products were introduced, including d-Con flea and tick killer and d-Con Exact roach and ant killer. The pet flea and tick spray ad money for 1983 totaled $649,300, all spent on spot tv. D-Con Fogger 1983 ad spending came to $3.5 million, including $3 million in spot tv. Spot tv was also big for the d-Con Flea Kill Fogger, hitting $783,000 in 1983. While the total ad spending for d-Con products came to $7.5 million, 59% was concentrated on spot tv.

Other new Lehn & Fink products included the Minwax Co.'s two additions to its wood finishes and preservatives products. Advertising hit $2.2 million for the product line, which showed sales growth attributed to continued U.S. economic recovery. In the personal products area, Ogilvie haircare products and Tussy deodorant and antiperspirants contributed to the area's all-time high sales. Ad spending on Ogilvie home permanents came to $3.7 million. Tussy spending hit $2.1 million. Spending for both products was concentrated in network tv.

In the pharmaceutical specialties area, in which medicines prescribed by doctors as well as those used in hospitals and dentistry are included, sales increased 12.3%, to $260 million in 1983. The area's operating profits rose to $44 million in 1983—a 16% gain.

Two major laboratories in the division were merged to serve as a strong marketing unit in early 1984. Winthrop Laboratories and Breon Laboratories became Winthrop-Breon Laboratories. The pharmaceuticals specialties division showed a 3% gain in sales during the first quarter of 1984.

Stroh Brewery Co.

	1983*	1982*
Sales*	$1,646,000,000	$1,318,000,000
Earnings*	N/A	N/A
U.S. Advertising	73,532,400	55,548,800

*Worldwide fiscal years ended March 31, 1984 and 1983

Stroh Brewery Co., Detroit, the 82nd largest national advertiser, boosted its advertising 32.4% in 1983, to an estimated $73.5 million, a bigger per-barrel ad expenditure than that of any of its major competitors.

Sales at the privately held brewer rose 24.9%, to $1.65 billion, enabling Stroh to leap from its usual seventh place ranking among national brewers to third in 1982. Stroh does not release earnings.

Following the May, 1982, acquisition of Jos. Schlitz Brewing Co., Stroh became a leader of second-tier brewers, behind the two national giants, Anheuser-Busch (No. 1) and Miller Brewing Co. (No. 2).

Market share rose from 13% in 1982 to 13.6% in 1983. Over-all barrelage kept pace with other gains, rising 6.1% in 1983. Stroh sold 24.3 million bbls. during the 1983 fiscal year, up from 22.9 million bbls. in 1982.

The brewer's largest advertising increase was in network tv, where the company spent $37.8 million in 1983, quadrupling the 1982 total of $9.4 million. Stroh's second biggest medium was spot tv, despite a cut to $14.3 million, from $20.7 million in 1982.

"The addition of Schlitz, Schlitz malt liquor and Old Milwaukee brands, coupled with Stroh and Schaefer products, gives us excellent representation with quality beers in all segments of the market," chairman Peter W. Stroh said. Stroh Brewery was able to reduce its $330 million debt from the Schlitz acquisition by $120 million in the last six months of 1982. It since has paid off about two-thirds of the total.

Expansion of Stroh's new superpremium beer, Signature, and further penetration of Stroh's and Stroh Light into the Northeast and Southwest also helped.

Expansion into Louisiana began in January for Stroh's and Stroh's Light. That was followed by entry into Texas and New England. It was the first major step west of the Mississippi in Stroh's trek toward national distribution. Stroh competed directly with Adolph Coors Co. in Texas for the first time.

Old Milwaukee, Stroh Brewery's strongest and best-selling brand, got national advertising for the first time. Smaller regional beers, including Schaefer, Piels and Goebels, were sold as low-price beers east of the Mississippi to keep plants at capacity and to fend off attacks from price-cutting brewers such as G. Heileman Brewing, according to Tom Schwalm, group marketing director at Stroh.

Stroh began to market Stroh's and Stroh Light in California and New York City in the spring of 1984. California distribution required adding fire-brewing to the Los Angeles plant purchased in the Schlitz deal.

Signature, in the meantime, exceeded sales expectations in Michigan and was tested in Washington, D.C., and Chicago in mid-1983.

In early 1984, Adolph Coors Co. and Stroh Brewery expanded into Minnesota with their premium flagship brews, dueling with other second-tier brewers, including G. Heileman Brewing and Pabst Brewing Co.

Stroh began distributing cents-off coupons in the Southeast in early February. It broke a coupon ad in January in Sunday supplements throughout the country on behalf of Old Milwaukee and its light counterpart. Couponing was confined to the Milwaukee brands, although the idea was tested for Stroh Light. The company feared that a premium brand would be tarnished by coupons. Anheuser-Busch and Miller kept out of the couponing fray with the stated belief that couponing was for smaller brewers with a wider stable of popular-price and regional brands.

Reasons for the plunge into beer couponing were attributed to the shift in beer drinking habits, as people were scaling down and becoming more price-sensitive, and women, an increasingly important target to the beer industry, because most coupons were serviced at food stores where women historically do the shopping.

In May, Pabst Brewing, hoping to gain exposure in the Southeast, signed an agreement to exchange its brewing facility in St. Paul for Stroh's plant in Tampa, Fla. The plan did not involve any financial outlay.

In June, Stroh threatened to sue ABC Television Network and NBC Television Network for restraint of trade over the practice of selling product category exclusivities in sports programing, specifically United States Football League games and professional basketball. In July, the brewery hired David C. Martin, the top broadcast media exec at Campbell-Ewald, to head its media operation and to play a leading role in its battle with the networks. Stroh also sent its emissaries to meet with Justice Department officials in Washington to complain that exclusivities are anticompetitive.

In August, 1983, Stroh signed deals to sponsor on a nonexclusive basis "Monday Night Baseball" on ABC in 1984, two heavyweight championship boxing matches on NBC, and the "International Race of Champions" auto race series on CBS for the spring of 1984. Stroh also participated in NFL games in the fall of 1983 and purchased a sponsorship of the National Collegiate Athletic Assn. football games, both on CBS.

Stroh was able to buy sponsorships because both Miller and A-B were Olympic tv sponsors and had fewer remaining sports dollars. Peter Stroh said the brewer's advertising buys did not change his belief that the selling of product exclusivities in live-action sports violated antitrust laws. The FCC still is investigating.

In November, foes of beer, wine and liquor advertising pressed the Federal Trade Commission to consider bans on ads "targeted" to youths and heavy drinkers. They wanted the commission to adopt rules for alcoholic beverage advertising similar to restrictions placed on cigaret advertising.

The rules proposed by the 29 consumer and health groups in the Center for Science in the Public Interest coalition would ban broadcast and print ads reaching a large number of young people and heavy drinkers; force ads to carry health hazard warnings; ban youth-oriented marketing tactics; bar life-style ads, and ban use of celebrities in alcoholic beverage ads that encourage "excessive" consumption.

Stroh was concerned about the proposed rules because 80% of its ad dollars were spent on tv commercials.

Stroh began to look at more new products in late 1983, eyeing such potentials as an import, plus low-alcohol and flavored beers. The brewer wanted to compensate for unfavorable demographic trends (aging baby boomers). Stroh also considered flavored and low-alcohol beers for the nation's nonbeer lovers.

In the spring of 1984, Stroh introduced its low-alcohol beer, Schaefer LA, with the theme: "The one beer to have when you're having more than one." The Stroh LA label opened the door to legal disputes with Anheuser-Busch, which had introduced its LA brand (Low-Alcohol) beer earlier in the year. A-B maintained that LA is its trademark. Stroh as well as Heileman, which also introduced an LA beer, maintained that LA was a generic or designative term that could not be trademarked. The two lost in court, however. Other brands continue to use the L.A. designation while litigation continues.

In the meantime, Stroh marketed its brands to various growth segments to reach a higher market share. Signature was aimed upscale, leaving room below it for Erlanger, a narrow-distribution superpremium. Stroh's first priority was in strengthening existing brands, including the nameplate Stroh's and Schlitz. John Bissell, group vp-marketing, saw no conflict between the two regular beer brands.

"Stroh tends to have a younger, more upscale kind of consumer, and Schlitz tends to attract blue-collar and ethnic kinds of customers," Mr. Bissell said.

Stroh aimed Schlitz at blue-collar youth through such youth-oriented promotions as rock bands. Old Milwaukee, an intermediate-price brand, which Stroh has positioned against Budweiser and Miller in the marketplace and on the race track, "has terrific opportunity" since it was still a minor brand in the Central and Northeast states, according to Mr. Bissell.

Another acquisition, F&M Schaefer Brewing Co., plugged a hole at the low end. "In New York and Philadelphia, where advertising has been heavy, it's an intermediate brand," Mr. Bissell said. In Puerto Rico, Schaefer was a premium beer and the sponsor of the Olympic team. For the rest of the nation, it remained an unadvertised price brand, much like Goebel from Stroh and Piels from Schaefer.

In early 1983, Stroh put a hold on its Schlitz marketing effort. The brewer allowed the troubled premium beer, Stroh's weakest national brand, to continue it sales slide, estimated at 30% a year. MCA Advertising won the Schlitz account on the theme: "America, your gusto is coming back." The account was resigned in the fall of 1982 by J. Walter Thompson USA.

Stroh named a new group marketing director to head its renewed efforts for Schlitz, Charles M. Hardin, who came from S.C. Johnson & Son. Until spring, the only marketing effort for Schlitz was through sponsorship of touring rock groups, such as The Who.

The first major marketing attack for the Schlitz brand began in April, with a strategy targeting the beer toward young, blue-collar drinkers.

The new campaign resurrected the "gusto" magic by incorporating it within the theme line: "Go for it, America, you've got the gusto now." Stroh continued to concentrate sales efforts in the Southeast, Southwest and "heartland" regions, where the brand suffered some erosion but remained relatively strong.

Packaging for Schlitz was changed with the relaunch. A brighter red was used on the label, and 12-pack and case cartons carried "beauty shots" of mugs of beer. Bottle shapes also changed. The Schlitz aim at blue-collar workers was meant to keep it somewhat away from the Stroh's brand market so the two did not compete directly.

"Bert and Harry Piel"—Bob Elliott and Ray Goulding-created characters—returned in a spot radio and outdoor drive in March. The theme was the 100th anniversary of both the Brooklyn Bridge and Piels beer. Wyse Advertising's effort for Piels carried the salute, "To the Bridge!" and "This calls for a small celebration!"

In April, Stroh increased Schlitz malt liquor ad spending more than 35%. In another move, Stroh tested tv versions of radio spots with the theme, "I can count on my friends and my Strohs." Stroh's brand got about $20 million of the ad budget.

Nonhumorous ads were tested in Cleveland, Birmingham, Ala., and part of West Virginia, all born from radio spots. The humorous "beer lover" campaign couldn't be translated from tv into radio. The brewer said it had to be careful the ads didn't become too witty. "There is some danger there and we have been working hard to shape the campaign in such a way as to present what we think are its greatest strengths," Mr. Bissell said.

Meanwhile, Stroh continued to use a humorous approach in its national tv advertising, including the spot where poker-playing beer drinkers send the dog to fetch a beer from the refrigerator. The ads were discontinued in July, 1984, however, because "we never intended for him to be a long-term spokesdog," Mr. Bissell said. Another

UPWARDLY
MOBILE.

When you're the richest million people in Northern California, you don't spend it all in one place.

They may board a plane or ship in San Francisco. But the place-of-residence of Northern California's richest, most travelled million people is the San Jose PMSA (Santa Clara County), 50 miles to the south of San Francisco.

Santa Clara County is the Bay Area leader in generating air travel—28% of all resident business and over 28% of resident non-business air travel in the entire 9-county San Francisco Bay Area.*

In the past year, 48% of Santa Clara County men and the same percentage of women have taken a commercial flight[2] Living and working amid the world's greatest concentration of high technology companies, they travel to earn—and enjoy—an impressive $33,050 average household EBI[3]

The only way to effectively reach this high-flying travel market is with the Mercury News. The complete Travel Section in an average Sunday edition reaches 63% of Santa Clara County adults. Weekdays, the Mercury News enjoys a 5-issue reach of 66%[2]

The San Francisco Sunday Chronicle/Examiner's meager 12% reach will hardly get you off the ground.

If you want travel volume, you have to reach for the people who are going places in this world. That's why so many travel advertisers choose the Mercury News as their carrier.

THE SAN JOSE MERCURY NEWS
Reaching Northern California's richest million people!

*MTC, 1980. [1]Based on average household EBI, California Metro Markets. [2]San Jose "Continuing Market Study," 1983, Belden. [3]Sales and Marketing Management Survey of Buying Power, 1983. Represented by KNIGHT-RIDDER NEWSPAPER SALES.

worry was that Alex might come to overshadow the Stroh brand in the same way that Morris the Cat was believed by some to outshine 9-Lives catfood. A "non-Alex" supplementary spot then used Vincent Price as the voice of the devil.

In mid-December, Stroh ran newspaper ads to counterattack rumors that it supported presidential candidate Jesse Jackson. "Stroh offers $25,000 to stop rumors," was the headline in ads that broke in Chicago, downstate Illinois and northwest Indiana. The ads, done in-house, said the rumors were "attempts to discredit Stroh and to hurt sales of Stroh products." A $25,000 reward was offered for the identification of those who started circulating the allegations. Similar ads appeared in newspapers nationwide.

Sales*	$2,780,000,000	$2,510,000,000
Earnings*	281,900,000	278,521,000
U.S. Advertising	156,728,000	126,985,000

*Worldwide, fiscal years 1984 and 1983 ended June 30.

Tandy Corp., Fort Worth, the 40th leading advertiser, increased its advertising expenditures 23.4% in 1983, to $156.7 million.

Sales of the world's largest consumer electronics retailer continued to improve for fiscal 1984, increasing 11% to $2.78 billion, but net income squeezed out only a 1.2% gain to $281.9 million.

Sales and income were heavily influenced by a poor 1984 fourth quarter in which net income dropped 21.6%, due in particular to poor sales of personal computers, especially the TRS-80 Model 4, which accounts for a quarter of Tandy's computer sales. Sharp cuts in Apple Computer Inc.'s competing Apple IIe unit (from $1,999 to $1,299) and in several of IBM's models cut into the TRS-80 market.

During 1983, Tandy Corp. registered national media advertising of $43.8 million, an increase of 29%. Retail advertising, which is not monitored for this issue, gets Tandy's top ad dollar of $42.4 million in 1983. This largely local retail advertising expenditure was up 25.1% over the previous year. It was not included in the Tandy total. Network tv is Tandy's No. 2 medium, monitored at $27.7 million, up from $22.2 million in 1982, according to LNA.

Despite its gains, Tandy continues to face erosion of market share in the area that propelled it to its giant status: Computers. Although sales remain strong in that arena—contributing more than $1 billion in sales in 1983—increased competition from better known brand names has pushed Tandy to further product innovation and a more aggressive marketing stance.

Competitors in the personal computer market, such as IBM, Compaq and Apple Computers, have made great strides in increasing share of market. Tandy, on the other hand, says it continues to be profitable in segments of the market where competitors—most notably Atari and Texas Instruments—have posted considerable losses. Further, Tandy continues to have a formidable advantage in distribution, through its nearly 1,000 Radio Shack stores.

Its Computer Centers—including stand-alones and expanded departments in Radio Shacks, known as Plus Computer Centers—now total more than 1,400.

This year, Tandy introduced its TRS-80 2000 business computer in a headlong attack against IBM. The introduction signals two major changes in Tandy's marketing philosophy. First, it bears the name Tandy, rather than Radio Shack, and secondly, the machine is to a degree IBM compatible, reflecting a trend in the marketplace toward standardization among computer users.

Ads for the Model 2000 tout its superiority to the IBM PC.

Additionally, in 1983 the company launched the TRS-80 Model 100, a portable computer, with a measured media buy of $1.5 million. Preprogramed and able to use standard phone equipment, the computer is acknowledged to be superior to many previous briefcase models. But Tandy officials are not apt to sit still in other product development areas.

Although computers have been the growth product for Tandy, the company is still powerful in other areas of the $20 billion consumer electronics market.

Computer related sales contributed 34.6% of 1983 worldwide warehouse shipments (compared with 9.5% in 1979), followed by audio equipment and related accessories, with 18.2%. Shipments in the electronic parts category, including batteries and test equipment, were 13.2%, and toys, antennas, security devices, timers and calculators accounted for 12.5% of shipments.

The balance of shipments was in radios, phonographs, tv sets and other electronics, such as telephones and intercoms.

Telephones are emerging as a new growth area. The company, which tested four Radio Shack Telephone Centers, specializing in key systems for small businesses, expects to introduce 21 more—either individually or paired with its Computer Center outlets—in 1984.

Additionally, it is testing such equipment as a $999 computer unit that links ordinary phones with switching systems, transferring calls, call forwarding and conference calls. It expects such phone systems to become popular for home use.

Recently, Tandy entered an agreement with Mobira Corp., a leader in Scandinavian mobile phone technology. Jointly, the two will manufacture and market cellular telephones, to be distributed in Radio Shack stores.

Other developments included an agreement with United States Communications Inc., New York, by which Radio Shack became the retail agent for direct satellite-to-home broadcast.

Texas Instruments, Dallas, is the 51st largest national advertiser, with $129 million in total advertising in 1983 for a dramatic year-to-year increase of 82.5%.

The cause of the spurt in advertising—home computers—also was cause for the company's sizable decline in earnings for the year in which TI suffered a loss of $145.4 million, compared with a gain of $144 million the previous year, on sales of $4.58 billion, up 5.8%.

TI spent an estimated $23.4 million through most of 1983 promoting its extremely low-priced 99/4A home computer, but on Oct. 31, it ceased production of the computer, citing heavy losses as reason for the pullout.

The company continues to advertise the 99/4A, albeit nominally, and has slashed its prices to clear inventory.

Industry estimates show that during the life span of the 99/4A, between 1 million and 1.5 million of the home computers were sold, making the machine the second most widely owned machine after the Commodore VIC-20 and slightly ahead of the Apple II line.

TI entered the home computer business in 1979 with a machine selling for more than $1,000. That was a failure. When the price wars on home computers began to escalate in late 1982, TI was an eager participant. When the prices dropped to $200, sales started to soar, and so did expenses.

TI began selling its 99/4A at $99 to $149 retail and a $50 rebate. It soon became evident that the prices were too low and TI was losing money. Meanwhile, Commodore International, its chief rival, could continue to produce its VIC-20 at a relatively comparable price and at a profit. It was estimated that the machine TI was selling at a $150 retail price was costing $200 to $250 to make.

For the future, TI's computer division is emphasizing its professional computer. The TI entry in that category was introduced in early 1983 with a $10 million advertising campaign directed by McCann-Erickson, Dallas. More than 25,000 units were sold in 1983, and it is competing successfully in the IBM-dominated marketplace.

"There is no question that the basis for the increase in advertising was due to the heavy effort in marketing the 99/4A," said Peter A. Field, vp-corporate marketing, TI.

There were a number of campaigns—all under the direction of McCann-Erickson—that were aimed at marketing the 99/4A. The last series stressed the educational aspects that could be derived from the computer.

Now that it is out of the mass market for computers, TI is going back to its origins as a more industrial oriented company, concentrating on its semiconductors, data systems, metallurgical materials and electrical controls as well as government electronics and geophysical services.

In marketing TI's professional computer, Mr. Field said, the company late last spring launched a "Dare to Compare" ad campaign in which TI's professional computer is positioned next to IBM's for a side-by-side comparison of features.

Mr. Field says the campaign evolved from a series of articles done in a computer trade publication that concluded TI's computer is the one IBM should have built.

The comparison does not mention price—for a good reason, he said. "Price is a tricky thing to handle because we can't control the price at the retail level. So we expect the consumer to do his own price comparison."

Mr. Field said TI had a heavy advertising schedule in a combination of computer enthusiast, trade and business publications.

While the company will not release figures on how many units have been sold, Mr. Field said officials expect a "significant increase in sales in year two vs. year one."

The company also is placing considerable emphasis on its 26 calculators, the largest line in its consumer products group, despite its small share of over-all sales.

The company spent slightly more than $1.5 million in advertising the calculators, ranging in price from $5.95 to more than $100.

TI appears to be intent on revamping its marketing approach—a sign many industry leaders consider healthy in that they believe TI's major flaw was in consumer marketing.

In personnel changes, TI hired Mr. Field, a top marketing official at Procter & Gamble, to develop and coordinate its marketing strategies in September, 1983.

Early in 1984, Fred Bucy was named ceo, taking over the position held by Mark Shepherd Jr., who remained chairman of the company.

A move in 1980 to consolidate TI's marketing and advertising efforts from the jurisdiction of 27 agencies into McCann-Erickson, Dallas, still is paying off in terms of the company gaining a cohesive image and campaign strategy, Mr. Field said.

Time Inc., New York, the 56th largest national advertiser, decreased its advertising expenditures in 1983 to $119.8 million, a drop of 8% from 1982.

The company had income from continuing operations of $143.2 million, an increase of 17%, on sales of $2.7 billion, a 13% increase over restated revenues of $2.4 billion in 1982.

The 1983 earnings reflect a $47 million loss from *TV-Cable Week*, which the company discontinued after only six months of publication, and a gain of $24 million achieved through the sale of WOTV in Grand Rapids, Mich.

Time Inc. continued its fast-paced growth in fiscal 1984 with first quarter earnings from continuing operations of $43.5 million, more than double the $21.9 million from the corresponding period a year earlier. Revenues were $693.8 million, an increase of 15%.

The year was marked by the company's concentration on its bread-and-butter business—media and communications. A major step toward this goal was the spinning off of its forest products operations, which accounted for 32% of the company's 1982 sales.

Time Inc.'s new goal is to achieve profitable growth in its two remaining businesses, publishing and video, as well as develop and acquire compatible new business that will yield high returns.

As Time Inc. celebrated its 60th year in the magazine business during 1984, the various magazines posted increases in rate base totaling 905,000. At the same time its share of the magazine advertising market rose to 21.4%. Revenues from the magazine group were $1.13 billion, up from $941 million in 1982.

Income from the magazine group of $106 million, however, was docked the $47 million in losses attributed to the defunct *TV-Cable Week*.

The largest advertisers in the magazine group included *People*, with a measured media spending of $13.8 million, up 7%, and *Time*, which spent $12.9 million, down 16%. For both publications, ad spending was concentrated in spot tv.

Time Inc. publications were once again among the industry leaders in attracting advertising. *Time*, with worldwide advertising revenues of $397 million, ranked ahead of all other magazines for the 14th consecutive year. At the same time, it raised its rate base from 4.4 million to 4.6 million copies a week in 1983.

Sports Illustrated had advertising revenues of $183 million, placing it fourth among all magazines. It also raised its rate base to a new high of 2,425,000 from 2,325,000.

Other magazines, including *Money, Discover* and *Life*, raised their rate bases as well. Nearly all of them recorded sizable gains in advertising pages and revenues.

By contrast, Time-Life Books had a disappointing year. The division sustained heavy losses, much of it attributed to the costs of overhauling its operations in Japan. The Books division had revenues of $485 million, down 21% from 1982 revenues. As one of the company's major ad spenders, the division budgeted $12.9 million in measured media spending to Time-Life Books, up 13%. Book-of-the-Month Club products got $5 million, down 13.8%; $3.2 million for Little Brown & Co., down 33%, and $1.1 million for The Quality Paperback Book Club, down 15%.

In many ways, the company's most spectacular and profitable area continues to be video. The Video group had earnings of $215 million on total revenues of $1.09 billion. The video group operates American Television and Communications (ATC)—the nation's largest cable television company—and Home Box Office (HBO), the largest pay cable service in the industry.

ATC, which serves subscribers in 464 municipalities in 31 states, raised its total subscriber count to 2.4 million in 1983, up 14% from the previous year. Significantly, ATC refrained from joining the franchise scramble during the past year, primarily on the determination that municipal government demands preclude a fair return from new systems.

However, the company did not stay away from new opportunities. In partnership with several British companies, it won approval for cable franchises in Aberdeen, Scotland, and the Westminister section of London.

Time Inc.'s HBO operation continued to dominate the pay cable landscape, with its signals being beamed to over 13.5 million subscribers in 5,400 cable systems located in every state. However, the company continued to be concerned by the high "churn" factor, the rate at which subscribers left the system.

One reason for the high churn may be disaffection with HBO programing. HBO's own productions, such as "The Far Pavilions," received little critical praise. In fact, many of them found limited viewership as well. At the same time, viewer complaints about the repetition of HBO programs and the poor quality of many of these programs may have contributed to the churn.

HBO spent $9.7 million in measured media in pushing its programs, down 15.5%. HBO's poorer cousin, Cinemax—third in the pay-cable universe—spent $3.8 million in measured media, compared to about $1 million in media in 1982. Cinemax added 700,000 subscribers in 1983 to boost its total subscriber count to 2.7 million.

Amid all this, the company also pulled back from a number of video-related ventures. It concluded its experiment with teletext—a service providing data and entertainment on demand to home tv screens. It also ended its involvement with on-air television.

*Worldwide

Toyota Motor Sales U.S.A., Torrance, Cal., which holds a 23.4% share of the U.S. import market and 6.1% of the total market, is the 62nd leading national advertiser with advertising of $113.6 million, up 2% from the previous year.

The company is a subsidiary of Toyota Motor Corp., a new corporate entity formed in 1982 with the merger of Toyota Motor Co. and Toyota Motor Sales Ltd. of Japan. The parent reported 1983 worldwide sales of $20.3 billion, the highest in Toyota's history, up more than $5.2 billion from 1982.

Sales in Japan account for 54% of net sales; exports the remainder. The company currently ranks third in worldwide production behind General Motors and Ford and is followed by Nissan in fourth place.

Total worldwide unit sales were 3,182,614, an increase of 0.9% over the previous year. But exports declined 1.1%, reflecting the global recession, the slump in demand in worldwide markets and import limits imposed by various countries, including the U.S.

Toyota set a U.S. total vehicle sales record in 1983 for the sixth consecutive year, with 726,818 units—555,766 cars and 171,052 trucks—up 7.7% over 1982 and topping the previous record of 714,020 set in 1981.

U.S. truck sales also set a record high for the ninth consecutive year, an 18.5% increase over 1982. The company wound up the year with a 2% decline in its share of the U.S. import market share, to 23.4%, and a 9% erosion in its share of the total market, to 6.1%.

Despite the market share drop, Toyota increased its measured advertising spending in 1983, although only slightly. The company spent $80.1 million in six media monitored by Leading National Advertisers, up marginally from $79.3 million in 1982. Toyota spent $42.5 million on spot tv, $22.9 million on network tv, $12.4 million in magazines, $2.3 million in outdoor and modest amounts in network radio and newspaper supplements. The tv expenditure was a flip-flop of the spending pattern set by competitor Mazda, which spent $27.2 million in network and $2.3 million in spot.

The Corolla once again was Toyota's U.S. sales leader, accounting for 143,430 units. Introduced in 1966, the Corolla has gained wide acceptance among drivers both in Japan and overseas. In March, 1983, cumulative production of the Corolla reached 10 million units, making it the first Japanese auto series to attain this level of production, a mark reached only by Ford's Model T, Chevrolet's Chevrolet and Volkswagon's Beetle. Measured spending for the Corolla was $18 million, down from $19.4 million in 1982. Spot and network tv grabbed 83% of the measured spending.

Toyota advertising for the 1984 model line was built around the idea that Toyota owners get special satisfaction from their vehicles. To convey this message, the company continued its use of the "Oh, what a feeling" theme. The redesigned Corolla model, which now includes front-wheel-drive family sedans and rear-wheel-drive models, was introduced with a series of tv spots set to the theme "Corolla, Reborn."

Toyota's fuel-efficient small truck line, also redesigned for 1984, received strong measured advertising support of $28.5 million, some 66% of which was in spot tv and much of the remainder in network tv. This was up from $23 million in 1982, an increase reflecting the continuing battle with Nissan, Mazda, Isuzu and its U.S. competitors for a bigger share of the small-truck market. Both LNA expenditure figures were just for trucks. An additional $13.1 million was laid out for joint promotions of cars and trucks.

The campaign theme for trucks was "Toyota is turning the truck world upside down," a slogan that emphasized major changes in the truck product, including the addition of a larger Xtracab model.

Current truck ads continue that theme with the slogan, "Toyota is standing the truck world on its rear."

Two new products also received strong advertising support in the 1984 model year. The Toyota van was introduced with a "Wonderwagon" campaign ($500,000 in measured media for the year) that stressed its handling and maneuverability.

Toyota's new sport-utility vehicle, the 4Runner, was introduced in midyear with magazine ads illustrating its off-road versatility, recreational applications and five-passenger capacity.

Measured spending support of $8 million also was provided for the Celica line, down from $15.9 million in 1982.

An attention-grabbing device that appeared consistently throughout all of Toyota's tv advertising during the 1984 model year was the intermingling of consumer-oriented stories with product information. One such story showed Casey and the Mudville nine using their Tercel liftback to get them to the ballpark on time.

Highlights of Toyota's tv advertising schedule included spots on some of network tv's top series, including "Dallas," "60 Minutes," "Trapper John, M.D." and "The A Team." Toyota had exclusive automotive sponsorship of individual quarters of NFL games on CBS-TV during the regular football season, as well as on the Super Bowl.

Nearly $5 million in the Toyota budget went to cable tv. Toyota, for example, bought packages on the sports-oriented USA Cable Network and super station WTBS. These figures make Toyota one of cable's most bullish sponsors.

In print advertising, Toyota ran gatefold spectaculars introducing new models in some of the nation's leading magazines. These included *Life, Motor Trend, Newsweek, People, Playboy, Sports Illustrated* and *Time*. Toyota advertises in some 40 national magazines.

Going into 1984, "Campaign buttons," a new syndicated package of 230 tv inserts, was acquired to obtain high visibility through the election year. Scheduled to air through January, the series of vignettes bearing Toyota advertising is sold to local tv stations and focuses on U.S. presidents and their races through historical news footage and rare footage from home movies of presidents.

Among the featured vignettes are Jimmy Carter's upset victory at the New Hampshire primary, Lyndon Johnson's decision not to seek reelection and Warren G. Harding's front porch campaign.

Early this year, the FTC gave final approval to a consent decree that cleared the way for Toyota and General Motors Corp. to jointly produce cars in the U.S. The project calls for annual production of 250,000 subcompacts for sale by GM, as well as an unspecified number of units by Toyota. The joint venture is expected to produce cars for 12 years, starting early in the 1985 model year, at a former GM plant in Fremont, Cal.

*Worldwide: TWC and TWA combined.

Trans World Corp., New York, the nation's 68th leading advertiser, spent $101.5 million on advertising in 1983, an 11% increase over 1982. Advertising spending figures for 1983 include advertising for Trans World Airlines.

At the end of 1983, Trans World Corp. spun off TWA, resulting in the creation of two financially independent entities. The two companies issued separate annual reports for 1983.

Separately, TWC reported a 5.6% increase in revenues, to $1.89 billion. Net income was $144 million—a 17% increase over 1982. When new income from the airline is factored in, however, net income actually becomes a loss of $7.7 million.

TWA, in its first report as an independent corporation, reported revenues of $3.35 billion, with a net loss for the year of $12.4 million. The results marked a 60% improvement over the 1982 loss of $30.8 million.

The airline's results were also somewhat deceptive, because for all intents and purposes TWA ran two different airlines in 1983: A cash-draining domestic system and a profitable international system.

TWA's domestic pretax loss was $191 million, 29% worse than in 1982. Economic recovery boosted the popularity of air travel, the company said, but also prompted extensive discount pricing to lure consumers returning to the market. As a result, increased travel did not result in increased revenues.

Internationally, however, U.S. tourists capitalized on the strong dollar to create what TWA called "a banner year in the trans-Atlantic market." Pretax profits from international flights totaled a record $155 million.

The airline in mid-August, 1984, underwent a major senior management realignment. Richard D. Pearson, earlier appointed exec vp and chief operating officer, in effect picked his management team, which involved moving some European-based executives to domestic positions and vice versa. Neil Effman, senior vp-marketing, who arrived at the airline in 1981 and implemented some of its major strategies such as making St. Louis its hub, lost out in the shakeup and resigned. Mr. Pearson reports to C.E. Meyer Jr., president and ceo, who will concentrate on longer-term concerns including the exploration of broader business strategies.

In 1983, TWA was the only unprofitable subsidiary of TWC, which retained other subsidiaries—Century 21 Real Estate, Hilton International Hotels, Canteen Corp. and Spartan Food Services.

The spinoff was somewhat ironic because TWC had been formed in 1979 as a holding company for the airline and its subsidiaries, such as Hilton. By 1983, the airline itself had become a major drain on the holding company.

In efforts to restore the airline to profitability, TWA has laid off more than 3,500 employes—including 1,250 flight attendants—and asked many of the remaining 26,000 employes to take pay cuts. It also considered selling its Kansas City, Mo., maintenance base, to be replaced by the use of independent contractors who would service TWA planes.

Other moves include a shift away from discount pricing in the direction of standard per-mile pricing, and a corresponding shift in ad emphasis. Early 1984 campaigns have stressed service rather than price, playing up the airline's business class seats and wide-body aircraft.

Perhaps most important of all is a route expansion initiated in April, 1984. In an attempt to lure domestic passengers into more profitable international travel, TWA added 12 cities to its network, so more passengers now can make international connections through TWA's Kennedy Airport hub.

The airline's domestic hub in St. Louis remains a site of concern to some analysts. Comparatively speaking, St. Louis is an isolated market lacking the air traffic of a number of Midwest cities used as hubs for other airlines.

Total ad spending for TWA was in the range of $65 million to $70 million, about a 25% increase from 1982. Company executives expected a slight increase in 1984.

Media strategy continued to emphasize spot tv and newspapers in 1983, with an increased emphasis on network tv in 1984, to attract premium travelers likely to respond to the airline's pitch. TWA spent $8.4 million on spot tv in 1983, down 17%. It accounted for most of TWC's $21.9 million in national newspaper advertising monitored by Media Records Inc.

Spartan Food Systems was the leading profit maker for TWC in 1983, reporting a pretax net of $48.7 million on $354.8 million in sales—a 24.4% gain in profits achieved by rapid expansion in the growing southern U.S. marketplace. Spartan operates 430 Hardee's franchises in the South, as well as the Quincy Family Steak House chain.

Spartan expects major growth from both chains, leading to a doubling of profitability within a few years. Spartan spent very little in national advertising for Hardee's, most spending being local. National spending in 1983 was about $400,000.

Canteen Corp., a provider of restaurant, cafeteria and vending food services, increased profitability by 22%, to $27.6 million, despite an increase of only 2% in revenues, to $750 million. The explanation lay largely with Canteen's continuing shift away from industrial cafeteria outlets and toward recreational and executive dining facilities, areas that promise more growth and deliver higher profits.

Hilton International, operator of some 90 hotels worldwide, delivered $43.1 million in profits on $710 million in sales. Profit dropped 23%.

Slack overseas economies contributed to a 1% decline in occupancy rates, and exchange rate translations into the strong dollar skewed the actual performance.

The company hopes that increasing foreign travel will help bring profits back up, as will continuing expansion into the continental U.S.

Hilton International owns and operates the Vista International chain, with existing hotels in New York and Washington and three soon-to-open facilities in the Midwest. Hilton had only minimal measured ad spending of $515,100.

Century 21 Real Estate had an excellent year, as home sales took off. Profits were $20 million, compared with $6 million in 1982, on sales of $55.2 million, up 64%. Century 21 claims an 11% market share in the home buying market.

Century 21 should continue to thrive as long as the economy does. Ad spending totaled $14.4 million, according to Leading National Advertisers, with network tv accounting for the majority of dollars. Spending was up from $11.4 million in 1982, a 21% increase.

Earnings*.....	142,045,000	30,762,000
U.S. Advertising	77,200,000	78,749,700

*Worldwide

UAL Inc., Elk Grove Township, Ill., the 78th largest national advertiser in 1983, spent an estimated $77.2 million, down 2% from 1982's expenditure.

UAL is a holding company with four principal subsidiaries: United Airlines, Westin Hotels, Mauna Kea Properties (including the Mauna Kea Beach resort hotel and real estate holdings) and GAB Business Services (an insurance services and claims adjusting company).

The holding company reported $6.02 billion in consolidated revenues in 1983, up 13% from 1982, reflecting revenue gains in all four lines of business, but dominated by United Airlines.

The airline division improved its average revenue per passenger mile and increased its air traffic.

Revenue per passenger mile increased to 10.7 cents, from 10.4 cents in 1982. The revenue per passenger mile, however, still falls behind the industry at large, which generated 11.6 cents per passenger mile in 1983, but was comparable to other large carriers, according to airline executives.

Consolidated net earnings more than quadrupled in 1983 to $142 million, from $30.8 million in 1982.

That pace has been maintained the first half of fiscal 1984, ended June 30, in which net income increased to $148 million, from $22.8 million a year earlier, and revenues increased 28%, to $3.5 billion.

The airline's portion of that net income was $137.5 million. Airline officials, however, note the pace likely will slacken during the second half as U.S. travelers with their strong dollars seek European vacation spots and the economic recovery begins to slow.

Despite continuing air travel industry competition, United Airlines was the company's main reason for its strong rebound in 1983. Air travel traffic improved along with the nation's economic recovery, boosting revenues 14%, to $5.37 billion. Net earnings from airline operations after taxes jumped to $120.7 million, from only $2.2 million.

Part of the reason for the dramatic revenue gains, the company said, was the development of a strong hub-and-spoke schedule pattern at Denver, Chicago and San Francisco. The new schedule pattern designed to maximize United's revenue potential and take advantage of expanded flight connections.

In 1983, these airports alone accounted for 40% of United's total revenue passenger miles, up from 34% five years ago.

United also improved its economy by adding new "spokes," nonstop flights from its hub airports adding frequency on busy routes such as Chicago to New York, and by adding one-stop service to new cities at minimum cost by extending existing flights.

Fuel expenses declined 2% in 1983, even though United's capacity increased 10%, thanks to fuel price decreases, and productivity measures increased 5% per employe.

UAL's hotels businesses, including Westin and Mauna Kea, for the first time in several years did not provide the bulk of the holding company's earnings.

The hotel operations generated a 5% increase in revenues, to $485.3 million in 1983. Net earnings, lagging about six months behind economic recovery, according to company officials, dropped 34.3% in 1983, to $19.8 million.

GAB Business Services also posted revenue gains, but barely. The subsidiary reported operating revenue of $163.8 million in 1983, up only 1%, but reported net earnings of $1.5 million, compared with a net loss of about $1.7 million the year earlier.

During the year, United Airlines grew faster than the rest of the highly competitive air travel industry. United began service at 18 domestic and six foreign airports in 1983 including several new routes from the airline's three main hubs in Chicago, Denver and San Francisco, the new West Coast base.

The route expansion and increased traffic also allowed the airline to begin recalling employes laid off since the 1979 peak year.

The airline active employe head count increased 8% since 1982, to 44,800. The total is 18% less than the 1979 peak.

United's industry share of the 36-carrier market also increased by 0.4%, to 18.8%, according to the company.

Though UAL total measured advertising dropped about 10%, to $57.6 million, the company increased unmeasured marketing efforts, particularly in the airline subsidiary.

"One thing that has certainly improved at United is its more aggressive over-all marketing posture," said Al Norling, vp at the securities firm of Kidder Peabody where he monitors airline activity.

Much of the improvement, he said, was various nonmeasured areas such as air terminal and travel agent displays and computer improvements that improved travel agent efficiency.

United also initiated three new advertising campaigns in 1983, spotlighting the Summer Olympics in Los Angeles, winter travel to Florida and its national "You're not just flying, you're flying the friendly skies" tv campaign.

The Olympic campaign, which was initiated in October, 1983, used former Olympic runners to offer the "5 million-mile challenge" to fliers.

The promotion promised that the airline would contribute one mile of air travel to the U.S. Olympics for every passenger flying United to the Olympics.

The airline calculated it fell just short of 5 million passengers but boosted traffic more than 15%, said United advertising and promotion director William F. Alenson.

The scheme generated 5 million travel miles, which United donated to the U.S. Olympic team at a corporate cost of about $500,000.

Olympic-linked tv spots featured "Parents," a salute to the parents of Olympic contenders; "Starting Blocks," featuring a business traveler, and "Big Shot," featuring a struggling weight lifter.

This summer the company introduced "Fever," featuring middle-aged people fantasizing about competing in the Olympics.

The "United shines to Florida" advertising, also introduced in late 1983 and continued in early 1984, was successful, Mr. Alenson said. The campaign, devised by Leo Burnett USA, as was the Olympic promotion, was meant to be a more aggressive replacement for its Al E. Gator animated campaign that had been used in previous winter vacation periods.

"We positioned ourselves as the leading carrier to Florida and added new flights and departure times accordingly," Mr. Alenson said.

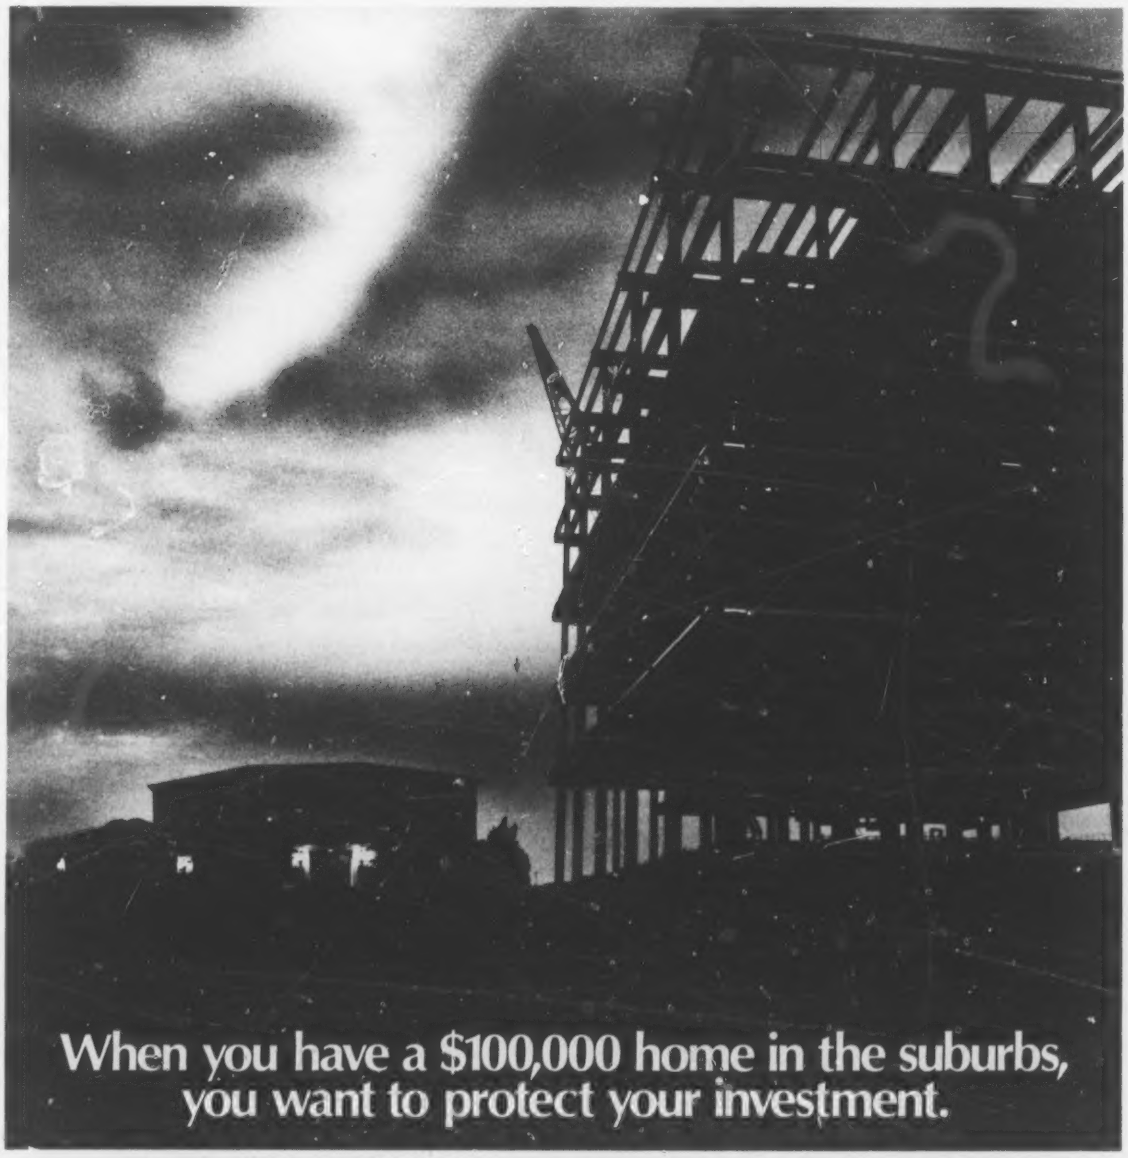
United is pleased with results so far, he said, and the campaign did generate more passengers, though he would not reveal how much traffic increased.

United's new national tv campaign probably will be the airline's main identifier for several years, according to Mr. Alenson, and the format by which it will introduce further promotions, such as the $119 transcontinental fare introduced in July, 1984.

UAL's Westin hotel operation in 1983 opened hotels in Copley Place, Boston, the Galleria Dallas and in Ottawa, Canada. Hoteles Camino Real, S.A., Westin's Mexican affiliate, also assumed management for the world-famous Las Hadas resort in Manzanillo last year.

The Westin Hotel O'Hare, just outside of Chicago, opened in January, 1984, and the company plans a new hotel this year in Denver and an addition to the Century Plaza, in Los Angeles.

The Westin Man-Westin Woman print campaign run by Westin in 1983 to emphasize the new company name has evolved into a more traditional



When you have a $100,000 home in the suburbs,
you want to protect your investment.

After all, a home is probably the largest investment a person makes in their lifetime. To protect its value, you'd have to know the circumstances that could hurt its worth, and prevent them from happening. You'd have to know about zoning board meetings, tax proposals, proposed school closings, and countless other proceedings. You can't find out about local issues and events from the network news.

If you live in the suburbs, the only place to get the news, issues and information that affect your everyday lives is from Suburban Newspapers.

USSPI makes it simple for you to reach this suburban audience, where nearly 70% of all metropolitan sales are made. USSPI is a nationwide network of over 1000 quality newspapers covering 45 major metro areas, with an audience of 31,000,000 readers.

USSPI papers have won over 500 local and national editorial awards. All are audited, and subscribe to the new SAU standard advertising units, so your ad can run unaltered from coast to coast.

We can give you demographics and CPMs by market. And you can buy as many as you like with just one insertion order. One rate. One invoice. One check. To reach the suburban market, buy what the suburban market reads. USSPI.

Unilever U.S., New York, which includes Lever Bros., Thomas J. Lipton Inc. and National Starch & Chemical Corp., is the nation's 15th largest advertiser, spending an estimated $324.9 million in advertising in 1983, up 6.7% from 1982.

Combined sales of the three companies totaled $3.33 billion, up 13% over 1982. Net income rose 37%, to $125.8 million.

Earlier this year, Kenneth Durham. chairman, Unilever PLC, highlighted the results produced in 1983 by the multinational's U.S. businesses. He said Lever became profitable after five years of losses; National Starch recovered from difficulties a year earlier, and Lipton showed continued good progress.

National Starch net income rose 26%, to $46.7 million. Sales totaled $757 million, up 10%.

Lever, the largest Unilever U.S. operation, showed a net profit of $14.6 million, an improvement of nearly $19 million over 1982 and the first profitable year since 1977. Sales rose 16%, to $1.565 billion.

Lever's household products division, the largest of the company's businesses exceeding $1 billion in sales for the first time, made gains in both established and new products. In laundry detergents, Wisk, the No. 1 liquid, continued to make gains, rising to 8% at yearend in the $3 billion laundry detergent market. Concentrated All, the company's leading powder detergent, held at about 5% market share.

Wisk received $14.5 million in measured media and Concentrated All $12 million. Investing $2.1 million in measured media for Liquid All, the company resumed some tv advertising for the product, although it remains positioned as a "value brand." The company also revived the Surf name to launch a high-suds deodorizing detergent in Houston.

In dishwashing liquids, Lever capitalized on the successful Sunlight name by rolling out a companion automatic dishwasher detergent. The liquid has moved into fifth place in that $950 million category, with an estimated 9% market share. Dove and Lux liquids, which together add another 5% to Lever's share, are unadvertised brands. Spending for Sunlight liquid was $13.6 million.

The lemon-scented dishwasher detergent, which by yearend was in only 25% of the country, is positioned as especially effective for dishes that have been sitting. In some markets the brand has captured more than 20% of the category, cutting heavily into Procter & Gamble's Cascade. Nationally, the brand appears to be headed for a share in the high teens. Measured media spending last year totaled $1.6 million.

Lever bar soaps also performed well, with Dove growing to 8.5% (in cases), a unit measure of market shares, and Caress to just more than 4% of the bar soap market. In keeping with the declining trend in deodorant soaps, Shield fell slightly to about 3.5%. Heaviest spending went into supporting Dove with $13.4 million, followed by Shield at $10.1 million and Caress at $6.9 million. In an effort to put new life into Shield, Lever shifted the brand from J. Walter Thompson USA to SSC&B.

Lever continued its string of new product successes with Snuggle fabric softener, a brand positioned as offering softness comparable to the leading brand but at a lower price. The product has outperformed all of Lever's earlier projections, and there are plans to extend the line with a fabric softener sheet used in the dryer.

Snuggle has captured about 20% of the market. Spending last year totaled less than $1 million as the brand began its rollout. Lever's Final Touch fabric softener, an established brand, rose to more than 15% of the category. Some $9 million was invested in measured media for that brand.

Lever struggled to maintain a 20% toothpaste share as rivals P&G and Colgate-Palmolive finally introduced gel line extensions. The company also trailed those two competitors in adding a pump to its line. Aim gel in a pump dispenser is being rolled out.

As Lever's single largest advertised brand, Aim received $16.5 million in measured media spending. Close-Up received $10.8 million, but Pepsodent, the company's oldest brand, did not appear on the measured spending list.

Among other personal products, the company captured 6% of the highly fragmented shampoo market with Dimension and began testing a conditioner under the same name. Spending totaled $6.1 million. Lever also continued heavy support for Impulse body spray, the first to be sold in the U.S. Advertising in measured media was $7.6 million.

Spending for Signal mouthwash continued to decline to $3.2 million in 1983 as the brand's share dropped to less than 10%.

In the foods division, Mrs. Butterworth's pancake mix was expanded into new markets and Imperial Light margarine rolled out nationally. The company this year also bought Shedd's margarine from Beatrice Cos., adding about $200 million in sales.

The biggest spending went into Imperial ($2 million) and Mrs. Butterworth's syrup ($2.7 million).

Unilever's major food entries in the U.S. come from Lipton, which reported sales of $1.01 billion and net income of $64.5 million.

The leading marketer of dry soups and teas, Lipton is expanding into a number of segments in the beverage business and is the exclusive distributor of G.D. Searle & Co.'s low-calorie sweetener Equal in food stores.

Lipton continued to pour heavy media dollars, $15 million, into teas, with tea bags receiving $7.2 million; iced tea mix, $3.3 million; herbal teas, $2.3 million, and $1.1 million for flavored teas and bags.

Lipton was the first major tea marketer to introduce a low-caffeine tea product into several areas of the country. Tv spots show a husband and wife who "have found the newest way to be a Lipton tea lover" with 97% caffeine-free "100% real" tea. Lipton also markets English Blend tea and instant tea.

The company described Lipton iced tea mix with G.D. Searle's NutraSweet as its "pride and joy in the beverage division." Sales were 2.5 times greater than expected.

Lipton spent $15.4 million to support its line of soups, including $8.3 million for regular dry soups, $6.1 million for Cup-a-Soup and $1.1 million for Trim low-calorie soups.

The company introduced its first tomato-based dry soup, Tomato-Onion recipe soup mix this year and continued to phase in its no artificial ingredient formula throughout its line. In the Cup-a-Soup line, Lipton added two new Lots-a-Noodles varieties, tomato vegetable and cream of chicken.

Lipton repackaged and repositioned Wish-Bone salad dressing to regain momentum in a hotly contested category. The company invested $4.9 million in measured media to support the brand, which was shifted to Foote, Cone & Belding, New York, from Bozell & Jacobs, Chicago.

Other brands receiving measured media support included Knox gelatin ($1.4 million), the Lawry's line ($2.5 million), mostly for seasonings, and Sunkist items ($3.5 million).

Lipton introduced 17 different chilled and frozen juice beverages under the Sunkist name, related to a licensing agreement with Sunkist Growers. The company also tested a line of fruit rolls under the Sunkist name as well as Flavor Tree and Sahadi.

Late last year, Lipton began testing a three-item line of refrigerated sour cream dips.

Although the Good Humor line of ice cream products received minimal measured media support, the company is aiming to rejuvenate the business with new products, packaging and graphics.

*Worldwide

Union Carbide Corp., Danbury, Conn., which recorded $9 billion in worldwide revenues, off 0.7% from the previous year, was the nation's 73rd largest advertiser with $88 million in estimated advertising expenditures, up 5.1% from the previous year.

The largely industrial company concentrates its ad spending on consumer product lines for Eveready batteries, Glad bags, Prestone and Simoniz. Revenues from this product area were nearly $1.9 billion, or 21% of total revenues, a decline of 2% from 1982.

The U.S. contribution to sales was $6.189 billion, up 2.3% from 1982. The U.S. also represents 70% of worldwide advertising expenditures of $126 million.

Union Carbide's 1983 net income did not reflect the year's recovering economy. Net income worldwide in 1983 was $79 million, although it includes a non-recurring facilities closing charge. Otherwise, net income would have been $219 million. Still, that represents the fourth straight year that net income has dropped since 1980's earnings fo $673 million.

Union Carbide, however, in the first half of fiscal 1984 seems to be gaining momentum. It reported net income of $233 million on sales of $4.8 billion, compared with net income of $110 million on sales of $4.3 billion the first half of fiscal 1983.

Last year, measured ad expenditures in the U.S. totaled $51.8 million, down slightly from 1982's $52.4 million.

Seventy-seven per cent of ad expenditures went to tv. However, Union Carbide's use of the medium continued to level after jumping a whopping $10.6 million in 1981, to $42.4 million. Last year, tv ad spending was slightly less than $40 million. A little more than half was for battery products.

According to Leading National Advertisers, Eveready's six-media total registered almost $22.4 million, an increase of 3.8% over 1982.

The Energizer battery received most of the line's ad outlay. Its tv campaign features slice-of-life situations in which the battery is required. In the last quarter of the year, the company supplemented support for the battery with a series of testimonials from satisfied users.

Eastman Kodak Co.'s new line of batteries, due in 1985, may increase competition between the battery market leaders, Duracell and Energizer. Kodak's introductory advertising is budgeted for about $20 million.

Measured media support for the Glad bag line declined 21.7%, to $14 million, according to LNA. The Glad line includes bags for food storage, sandwiches, trash and garbage. Union Carbide claims it is the No. 1 brand in food stores.

Last year was a busy one as Glad introduced six products, including bags that smell good, Snap Lock-brand bags, and bags that tie with their own handles.

"Happy Days" tv star Tom Bosley is spokesman and was featured prominently in the campaign to introduce the new Handle-Tie products.

During the year, Glad added coupon inserts in Sunday newspapers to its media mix. Glad also uses direct mail and other forms of couponing to stimulate consumer purchase.

Prestone antifreeze, the leading seller in its market, received $7.5 million in measured media, an increase of 21.3% from 1982.

Tv sports programs figure prominently in the company's campaign to reach that product's user group. The focus of the campaign begins in late summer, stretching through the baseball playoffs and World Series, and crossing to "Monday Night Football."

For promoting its Simoniz car wax line, Union Carbide combines tv time during the spring and a racing sponsorship program, which included sponsoring a car in the Indianapolis 500.

Union Carbide increased its six-media total for Simoniz by 364%, to $2.3 million. Almost $1.8 million of

that increase was in promoting the new Simoniz Bodygard car wax on network tv.

Union Carbide's industrial businesses generated the remaining 79% of total sales for the company last year. Petrochemicals contributed the largest chunk, $2.55 billion.

In recent years, Union Carbide has been emphasizing its service and engineering capabilities. Last year, the company formed an engineering and technology services division to act as the spearhead for its aggressive thrust in that direction.

In addition to marketing the company's products, the new division will license Union Carbide's technologies and engineering skills. It also will provide project management for licensees.

Initially, Union Carbide has faced widespread criticism for licensing its technology, but the company says such a strategy allows it to enlarge its international presence in processing industries through technology and marketing capabilities rather than by spending vast amounts of capital.

Probably the company's technology in most demand is the Unipol process to produce polyethylene and polypropylene plastics. Among its commercial applications, the process is used in making products for the Glad line.

Union Carbide also entered the electronic market in 1983, with the opening of a plant that produces polycrystalline silicon, which is used for the production of semiconductors.

During the year, Union Carbide moved $3 million worth of Simoniz and Prestone carcare spending to Ally & Gargano, New York, from Leo Burnett USA, Chicago. Burnett retains the $5.5 million Prestone antifreeze account.

Union Carbide also added Mintz & Hoke, Avon, Conn., to handle molecular sieves, catalysts and process systems division, and Ogilvy & Mather, Atlanta, to oversee agricultural products.

U.S. Government

	1983	1982
Sales	N/A	N/A
Earnings	N/A	N/A
U.S. Advertising	228,857,200	205,453,100

Robust spending by the U.S. Postal Service and Amtrak set the pace for an 11.4% increase in U.S. government ad expenditures during 1983, pushing the total federal ad budget to $228.9 million. Even with an unexpected decline in military ad spending, a strong showing in other government sectors broke a two-year pattern of single-digit government ad growth and established Uncle Sam as the nation's 28th largest advertiser.

Although military spending remains the centerpiece of government ad expenditures—it comprised about 67 cents of every federal ad dollar spent in 1983—it was the government's entrepreneurial operations that scored the largest advertising increases last year. Quasi-private sector enterprises such as the U.S. Postal Service and Amtrak notched ad budget increases of 47% and 21%, respectively, while military ad spending dropped by about 1%.

Pentagon ad personnel note the Reagan administration's support for over-all military spending remains steady, but say the President's budget experts are putting the squeeze on the military's spiraling ad contracts. For example, three of the seven armed forces ad programs had budgets trimmed in 1983.

Despite the decline in military ad spending, the Pentagon continues to outspend all other government advertisers by a margin of 2 to 1. In 1983, the military ad budget totaled $153.8 million, down slightly from 1982.

A breakdown of Pentagon ad spending highlights the winners and losers in fiscal 1983 ad spending:

- The Army (N W Ayer, New York), led all government advertisers with an $85.1 million budget, up 4.3% from 1982. Over-all spending was divided between the active Army, $62.5 million; Army ROTC, $6.4 million, and the Army Reserve, $16.2 million.
- Navy (Ted Bates Advertising/New York), $16.5 million, down 4.2% from 1982. Next year's budget is expected to dip to an estimated $12.9 million.
- Marine Corps (J. Walter Thompson USA, Washington) $11.9 million, down 16% from 1982.
- Air Force (D'Arcy MacManus Masius, New York) $15.3 million, up 5.5% from 1982.
- Army National Guard, $3.5 million, and Air Force National Guard, $1.2 million (both Needham, Harper & Steers, Washington). The Guard witnessed the largest ad decline in 1983, down 53% from 1982. A slight increase is expected for the 1984 fiscal year.
- The joint military recruitment campaign (Grey Advertising, New York) notched a 6% increase over 1982, to $19.3 million.
- The Coast Guard (Thomas Buffington & Associates, Washington) up 53% to $1 million.

Compensating for the decline in military spending were paid campaigns by nonmilitary government advertisers and a slew of smaller public service ad campaigns produced by federal agencies.

The USPS continued to deliver strong ad spending during 1983. Its $29.6 million ad budget was a substantial increase over its $20 million allocation in 1982. Although the Postal Service refuses to elaborate where its ad dollars are spent, some estimates say that about two-thirds of all advertising went to promote its Express Mail overnight service.

The Postal Service ad campaign also centered on its E-COM electronic mail system and other business and consumer services using both paid and public service advertising. This year's ad budget will be about $38 million, USPS officials said.

Amtrak ad spending steamed ahead in 1983 with the help of higher passenger volume and an estimated revenue increase between 15% and 20%. Officials for the government-subsidized passenger rail system said advertising expenditures increased 21%, to $20.8 million in 1983. A comparable increase is expected this year.

Officials for the rail system said its Needham, Harper & Steers-produced "All Aboard Amtrak" campaign has been successful in luring long-distance travelers who would otherwise take air transportation. Although Amtrak notes the number of passengers is up only slightly, the average price per ticket sale is higher than in previous years.

The U.S. Mint's Olympic Coin program, which began in 1983 with a modest ad budget of $5.5 million, peaked this year. Using the theme "Support the Home Team," the $22 million national tv campaign ran throughout the summer. In addition, the Mint expects to resume a national ad campaign for its dormant U.S. Gold campaign, which spent about $2 million in 1983.

Also expected to break this year is an estimated $1 million overseas campaign sponsored by the U.S. Travel & Tourism Administration. The tourism campaign will mark the first time in more than five years the government has embarked on an international campaign of this nature.

Additional paid government ad activity centered on other business-oriented agencies. The Federal Crop Insurance program spent $4.8 million through Burson-Marsteller, Chicago, but Crop Insurance officials note its ad budget will be trimmed in 1984 to $1.6 million. Another paid advertiser, the Public Broadcasting Service, saw its 1983 ad allocation from the Corporation for Public Broadcasting cut in half to $600,000.

The Overseas Private Investment Corp., which provides insurance and financing for U.S. companies investing abroad, launched an $800,000 campaign in 1982, but reduced its total to $450,000 in 1983. Print ads geared toward small business are placed in general business magazines and trade journals and are backed up by an OPIC direct mail effort.

Another agency established to boost U.S. investments abroad also is weighing a possible ad campaign. The U.S. Export-Import Bank sealed a deal with Needham Porter Novelli, Washington, in April to initiate a new marketing program. Eximbank officials say it is too early to determine whether the marketing plan will have a sizable advertising component.

Aside from the government's massive paid advertising roster, Uncle Sam continued support for an array of public service ad campaigns.

Spending for product costs for public service campaigns through The Advertising Council—a private sector coalition of ad agencies that donates creative services to government public service advertisers—tripled in 1983, to $3.8 million.

Although the Ad Council lost its single largest client in April when the Treasury Department's U.S. Savings Bond division said it would contract its own agency to handle the $1 million account, support for the council's 11 government clients scored substantial increases last year.

New Ad Council campaigns included a $550,000 anti-drunken driving effort for the Department of Transportation (Leber Katz) and a $219,000 drug awareness campaign for the Department of Health & Human Services (Needham, Harper & Steers). The new Ad Council entries are in addition to other hallmark accounts such as the Forest Service's Smokey Bear campaign (Foote, Cone & Belding) efforts for the Peace Corps and ACTION, (Ted Bates), the Treasury Department's direct deposit campaign for Social Security recipients (McCann-Erickson) and Employer Support of Guard and Reserves (D'Arcy MacManus Masius).

Other large public service campaigns, not sponsored by the Ad Council, included a $200,000 campaign for the Department of Transportation, urging drivers to wear seat belts; a $528,000 antismoking campaign produced for the Office of Smoking & Health, and a $535,000 effort by the National Cancer Institute warning viewers about heart and lung disease.

The Selective Service, using a rock video ad theme, launched a $130,000 radio and tv effort urging 18-year-olds to register for the draft, and the Internal Revenue Service reminded taxpayers to file their annual returns with a $284,000 package of 40 radio and 14 tv psas cut in both English and Spanish.

The Forest Service again sponsored its "Woodsie Owl" conservation campaign with a 1983 production budget of $87,500. The new Woodsie spots, which in the past have been geared exclusively to children, now target adult audiences as well. The new breed of conservation spots are equipped with new adult-oriented copy and will be placed in prime time tv slots.

The Federal Trade Commission maintained its series of consumer awareness campaigns with three new public service ads during 1983. Spots informing consumers about new regulations for morticians, care labeling instructions on clothing and a series of travel tips were produced at a cost of $176,000.

Two new smaller psa campaigns also broke last year—a $38,000 effort by the Government Printing Office highlighting the Federal Depository System and a $54,000 campaign for the U.S. Consumer Information Center.

U.S. Advertising	112,500,000	**103,000,000

*Worldwide, Volkswagenwerk AG **Restated

Volkswagen of America, Troy, Mich., a subsidiary of Volkswagenwerk AG, Wolfsburg, West Germany, increased its U.S. advertising spending in 1983 by 9.2%, to an estimated $112.5 million, making it the 63rd largest national advertiser.

In 1983, the Volkswagen Group delivered 2,110,672 vehicles worldwide, showing a 0.3% decline. VW unit sales of 230,928 in the U.S. in 1983, a 14.3% increase over the previous year, represented 2.5% of the over-all U.S. market.

Although VW AG reported a worldwide loss for 1983, the company's U.S. division (VOA) came back from a $140 million loss in 1982 to report $41.5 million in earnings for 1983. Company execs attribute the dramatic turnaround to "internal efficiencies [staff reduction] and public acceptance of both Audis and the new Jetta," as well as the effectiveness of positioning and advertising.

(VW figures for both 1983 and 1982 were translated from the West German DM to U.S. dollars at the rate of 2.5 DM equals $1.)

Throughout 1984 and 1985 VW advertising will follow trends begun in 1983, emphasizing German engineering. "Volkswagens are designed with a Germanic passion for driving performance and technical excellence," VOA ad manager Michael Kaptuch said.

"This year's campaign is more a fine tuning of last year's than a complete rethinking," said Mr. Kaptuch. The headline "It's not a car, it's a Volkswagen" will continue to be used. Copy will capitalize on VW's image of durability that began with the Beetle.

In mid-November, VOA will introduce the new Golf and Jetta lines in the U.S. with what Mr. Kaptuch called "the largest introduction ever by VOA with the most media behind it." It is expected to spend upward of $20 million on the campaign.

The campaign will consist of "very extensive magazine advertising" including gatefolds in newsweeklies and large magazine spreads, according to Michael Howe, manager-VW advertising. VOA also has purchased a major sponsorship of the CBS miniseries "Ellis Island" in November, co-starring the late Richard Burton among others. Mr. Howe said VW will be the major automotive sponsor.

VOA plans to continue the launch campaign in January, in addition to advertising for carryover products and revamped lines.

The Rabbit GTI sports car has been renamed the Volkswagen GTI to distinguish its market from the traditional Rabbit market. "When we analyzed the buyers we found that those buyers interested in the Rabbit GTI were not considering the Rabbit at all," Mr. Howe said. VOA is planning heavy ad spending on its new GTI in addition to spending on the promotion of the new Jetta GLI, a sportier version of Jetta that will be introduced next April.

Also in 1985, the Rabbit convertible will be renamed the Cabriolet. The car will continue in its present styling and will receive heavy ad support. "We're trying to make that into a cult vehicle," Mr. Howe said.

To capitalize on dramatic sales increases of some other European station wagons, VOA also is planning more promotion for its Quantum. The station wagon will have revised equipment and styling.

VOA's 2.5% share of the U.S. auto market in 1983 dropped from 2.86% in 1982. But through the first seven months of 1984, VOA's market share is back up (2.68%) and VW execs explain the 1983 drop as a delayed effect of the recession and not a reflection of actual sales.

According to Mr. Kaptuch, VOA had a large supply of small and diesel cars when the worst of the recession hit. When the market began to recover, VOA started to sell more cars, but the market turned around so fast as a whole that even though vehicle sales were rising, VOA's market share dropped.

Heaviest ad dollars—nearly $20 million and about the same spent in 1982—were spent on the Rabbit. The ads effectively pushed the sporty Rabbit GTI in 1983, showing sales nearly equal to 1982, which VOA execs consider especially good because this is the phaseout year before the car becomes the Volkswagon GTI. As of Aug. 10, unit sales for the Rabbit were up 2.8% over the similar period a year earlier.

But the sport car's Rabbit styling is now out of production for good, being replaced by the new Golf models with a new designation as a compact car. (The Rabbit is a subcompact.)

VW marketers say the hatchback Golf is doing well, but the "notchback [Jetta] is where the market seems to be heading," Mr. Kaptuch said. "We see that as being the volume market." The auto maker spent nearly $9 million in measured spending promoting the Jetta in 1983, virtually the same as in 1982. In VOA parlance, notchback means a car with a trunk instead of a hatchback. The Jetta also has 12% more interior space.

Unit sales of the Jetta are up 112% from 1983, and VW is having trouble meeting the demand for the car, part of the problem, other than demand, being the July, 1984, metal workers strike in West Germany that shut down plants for six weeks, company execs said. Audis also are scarce.

The Porsche-Audi division of VOA lost Porsche as of Aug. 31, ending the 15-year partnership that in 1983 sold 70,000 units, of which 47,934 were Audis and 22,066 were Porsches. Until now, VOA was the sole importer of Porsches into the U.S. and VOA execs hope Audi—with unit sales up 60.8% for the first seven months of 1984—will make up the difference. Audi executives are hoping to sell 80,000 units in 1984.

The "Audi: The Art of engineering" campaign is aimed at a highly educated upscale market. "It very clearly has a leadership oriented copy line," said James Lawler, manager-Porsche/Audi advertising. "We have the innovations to back it up."

According to Leading National Advertisers, VOA spent more than $15 million advertising Audis, up 30% from 1982. LNA totals for some VW models include $6 million for the Quantum, down 33%; $5 million for the Scirocco, an increase of 19%; $3 million for the Vanagon, an increase of 15%, and $5.5 million for the Wolfsburg Limited Edition.

How they got more mileage out of their ad budget.

Virtually every auto manufacturer pulls into the Herald.

Sure, they may buy the other major Los Angeles newspaper first. But then they turbocharge their metropolitan penetration with the Herald as a 2nd buy.

(Much smarter than chugging along through L.A. County, picking up one suburban paper at a time.)

Almost 200 individual dealers also use the Herald, along with a who's-who of other blue chip advertisers. From fast cars to fast food. That's why our ad sales are more than double the two leading suburban dailies—combined.

In Los Angeles, there's just one first choice for a 2nd buy.

And that's the point we want to drive home.

LOS ANGELES HERALD EXAMINER

*Worldwide

Warner Communications, New York, the 25th largest national advertiser, spent an estimated $251.0 million on advertising, an increase of 8% over 1982.

However, advertising from this entertainment and media conglomerate no doubt will decline significantly next year, as the company recently sold two of its major divisions, Atari and Warner Cosmetics. Together these two subsidiaries comprised more than half of the company's total advertising expenditures. The company sunk about $66.3 million into advertising Atari products alone, far more than it has spent on any other subsidiary.

After an 18-month rebuilding effort, in early July, Warner gave up on Atari and sold it to a new company headed by Jack Tramiel, former chief executive of rival Commodore International Ltd. As a result of the sale and writedowns, Warner reported a second-quarter loss in fiscal 1984 of $437.6 million on sales of $475.5 million, the latter an increase of 28%.

In 1983, Warner lost $417 million on operating revenues of $3.4 billion. Losses chiefly were attributed to Atari and Warner Amex Cable Communications, a joint venture between Warner Communications and American Express.

Warner Amex operates cable systems and two cable programing services: MTV:Music Television and Nickelodeon. Warner Communications also has equity in Showtime/The Movie Channel, two pay tv channels run by a consortium with Viacom and American Express.

Under terms of the Atari deal with Mr. Tramiel, Warner will receive no cash for the company, but $240 million in long-term notes and warrants for a 32% interest in Mr. Tramiel's new venture.

In return, Mr. Tramiel will receive warrants giving him the right to purchase 1 million shares of Warner common stock at $22 a share. Warner is retaining two parts of Atari, which make up about 20% of the company: The coin-operated games division and Ataritel, the division addressing on telecommunications.

Last year, Atari had an operating loss of $539 million on reported revenues of $1.1 billion. Many of Atari's problems were caused by increased competition in the videogame market as well as a decline in the market's over-all growth.

In addition, late last year the company raised the prices of its complete line of home computer and videogame hardware. This move was aimed unsuccessfully at reversing the downward spiral that affected the industry during the year.

In other areas of the company, Warner announced in January, 1984, the sale of Warner Cosmetics to Cosmair for $146 million. Warner expects a pretax profit of $100 million from the sale to appear in its 1984 returns.

During 1983, Warner Cosmetics had spent about $25.5 million advertising such products as its Vanderbilt perfume ($7.2 million) and Chaps cologne for men ($4.1 million). Spending was divided primarily between magazines and tv.

There also have been plenty of changes at Warner Amex. The company decided to take its MTV and Nickelodeon cable services public. Under the new name, MTV Networks Inc., the company is looking to sell 5.13 million shares at $16 to $18 each. The offering is designed to raise at least $75 million. Warner Communications and American Express will retain 66.1% of MTV Networks Inc.

According to the prospectus, MTV and Nickelodeon have lost $79 million since January, 1980, but both services became profitable for the first time this year.

For the first quarter of 1984, MTV showed an operating profit of $3.4 million. Nickelodeon had an operating profit of $498,000.

In September, 1983, Warner Amex's other cable service, The Movie Channel, merged with Viacom's Showtime in an effort to seek economies of scale. However, the two channels continue to operate as two separate 24-hour movie services.

The cable systems side of Warner Amex continues to be plagued with problems. In 1983, mounting losses reached $99 million in pretax deficit. Attempts to improve productivity were implemented throughout the year, including laying off more than 200 employes.

Warner also is trying to renegotiate its lofty franchise promises made in such cities as Milwaukee and Dallas.

In addition, the company folded its regional sports service in Pittsburgh and has agreed to sell its system there to Denver-based Tele-Communications Inc.

On the positive side, 1983 was a good year for Warner's film subsidiary, which spent about $35 million advertising 21 films. Among its biggest hits were: "Sudden Impact" ($3.2 million in measured national advertising), "Never Say Never Again," ($4.2 million) "Risky Business" ($2.6 million) and "Superman III" ($3.6 million).

*Worldwide

Warner Lambert, Morris Plains, N.J., the 13th largest national advertiser, increased its domestic advertising nearly 16.6% to an estimated $343.6 million in 1983.

The company's worldwide sales fell for the second year in a row, dropping 4%, to $3.1 billion. However, net income rose 15%, to more than $200.5 million. The drop in sales primarily reflected the effect of foreign exchange rates and the sale of Entenmann's Inc., a baked goods company, to General Foods in 1982.

Improved sales worldwide were registered in ethical products, including prescription pharmaceutical and health technologies, as well as consumer healthcare products.

Warner-Lambert results in the second quarter of fiscal 1984 show continued improvement in sales and earnings. Worldwide net income increased 12%, to $62 million, on sales of $797 million, up 2% from the corresponding quarter a year earlier (5% excluding the effects of foreign exchange rates). All segments of the company's domestic business registered higher sales, a reflection of the improved U.S. economy.

The Consumer Products Group went through a structural change in 1983 in an effort to further distinguish between the marketing and distribution functions within the group. W-L established two separate operating groups—Consumer Health Products and American Chicle.

Jay M. Gwynne, president, W-L's Japan region, was named to head the Consumer Health Products Group. John C. Carroll, vp-marketing, American Chicle, was named president of the group. Edward Marlowe, vp, was promoted to president of the Consumer Products Research and Development Division.

The Consumer Products Division attracts the heavy ad spending at Warner-Lambert, which had a companywide total measured spending of $132.3 million monitored by Leading National Advertisers for six media.

Within it's Consumer Health Products division, W-L introduced a variety of products in 1983. It initiated test marketing of Mediquell, an alternative to cough syrup. Mediquell is a chewable tablet that delivers eight hours of cough relief in a two-tablet dose.

Last year, the company also began test marketing Remegel, an antacid tablet with the high efficacy of liquids. W-L is positioning Remegel to compete against liquids on the basis of greater convenience, palatability and uniformity of dose.

The company, sustaining its leadership position among early pregnancy tests for home use in 1983, introduced its advanced home pregnancy test, e.p.t.-Plus in the first quarter of 1984. Through a color-change system, e.p.t.-Plus simplifies test administration and interpretation. W-L spent $1.9 million in measured advertising on e.p.t.

Last March, the company also introduced Listermint with fluoride, a dental rinse/mouthwash that combines a mouthwash with the anticavity protection of fluoride. The introduction followed in the footsteps of Johnson & Johnson's new ACT fluoride mouth rinse. Before being introduced in the U.S., Listermint with fluoride was marketed in Canada and Venezuela.

Accounting for more than 25% of the company's sales are its chewing gums, breath mints, razors and blades and pet products. W-L currently holds the No. 2 spot worldwide for sales of chewing gum.

In 1983, Trident regained its leading position among sugarless gums. Sugarless gums now account for about 25% of all gum consumed in the U.S. Sales of Trident in the U.S. increased by nearly 30% in 1983, the company reported. In the fourth quarter of 1983, W-L completed its U.S. rollout of a square-shaped sugarless bubblegum under the Trident name.

To augment its limited position in sugared stick gums, W-L test marketed two new gum products. FreshMint, a stick gum with natural mint, and Sticklets, a smaller-size stick gum, which is packaged with nine sticks to a pack, will compete directly with market segment leader Wm. Wrigley Jr. Co.

Ads for FreshMint say the gum combines the taste of eight mint leaves. The company is using tv, freestanding inserts, and a buy-one-get-one free offer. While in test markets, the company reportedly is spending at a national ad rate of $12 million. The two-item Sticklets line, in peppermint and spearmint flavors, was introduced into test in Portland, Ore., and Seattle, Wash.

Certs, the leading breath mint, had increased sales in 1983, due in part to the introduction of Sugarless Certs. In the breath mint category, W-L also introduced Ultamints, a triple-layered, high flavor mint. Ultamints is being aimed at those consumers who desire a stronger-tasting mint.

In the razor and blade category, W-L introduced the Schick Disposable, a new disposable razor featuring a sliding safety cap. Its introduction was supported by an estimated $12 million in advertising. By the end of 1983, Schick Disposable reportedly held about 2% of the disposable market. Gillette, by far the leader in the category, holds 60% of the market in dollar volume and 50% of unit sales in the $650 million retail blade/razor market. Disposable razors account for less than 40% of that market.

The company's most heavily advertised product in 1983, according to LNA, was Listerine antiseptic, which received nearly $14 million in measured spending, up $2 million over 1982. One factor in the increase was a new study by W-L indicating that rinsing twice daily with Listerine antiseptic reduced development of dental plaque up to 50%.

Other heavily advertised products included Trident sugarless gum, with $11.7 million in measured media support; Certs regular and sugarfree mints, $9.5 million, Efferdent denture cleaner, $7 million; Sinutab Sinus Remedy, $6.6 million; Bubblicious bubble gum, $5.37 million; Benylin cough syrup, $6 million; Clorets gums and mints, $5 million, and Halls Mentho-Lyptus cough drops, $7 million.

Advertising for e.p.t. was cut by more than one-third, to less than $2 million. Spending on the Personal Touch ladies razor dropped from $3.4 million to $1.5 million. The Schick Super II cartridge shaver system, with $4.3 million in 1982 was all but dropped in 1983, getting a meager $12,800 in measured spending.

Last August, W-L announced the discovery of an antitumor antibiotic that was found effective against leukemia in small laboratory animals. Coded CI-920, the experimental compound was developed by W-L's Parke-Davis Pharmaceutical Research division in Ann Arbor, Mich. The company said experimental work with CI-920 is continuing and a Phase I clinical study is expected.

In response to the increasing awareness of the general public to the problem of tampering with medicines, W-L introduced the first two advances in capsule technology. Its new Coni-Snap Supro, a two-piece hard capsule, cannot be opened without it sustaining noticeable damage. TP Sealing, a new process, discourages tampering by fusing the two halves of a capsule together.

The company's health technologies business experienced good growth in 1983 as a result of a strong sales performance by IMED, a leader in intravenous infusion systems. IMED was acquired by W-L in 1982. IMED sales in 1983 rose an estimated 35%, to $124 million.

Adding to its health technologies business, W-L acquired McBain Instruments Inc.'s high precision microscopy business. Following the acquisition, McBain, based in Chatsworth, Cal., became a unit of the AO-Reichert operation. AO-Reichert markets the company's microscopes and optical instruments for use in industrial, research, medical and teaching laboratories.

Wendy's International

	1983	1982
Sales*........	$1,922,913,000	$1,632,440,000
Earnings*.....	55,220,000	44,102,000
U.S. Advertising	64,445,000	44,875,000

*Worldwide

Wendy's International, Dublin, O., the nation's 90th largest advertiser, spent about $64.4 million on advertising in 1983, a 44% increase over 1982.

Although sales growth could not match the increase in advertising spending, 1983 was a solid year for the 15-year-old company. Systemwide sales for the 922 company-owned and 1,751 franchised stores open at yearend were $1.92 billion, an 18% increase over 1982. Average per-store sales in 1982 were $759,000, up 8% from the previous year.

While 1984 will be remembered for the phenomenal success of Wendy's "Where's the beef?" advertising campaign, 1983 was notable for almost everything but beef. Wendy's, which for many years had kept its menu limited to burgers, fries and chili, last year continued its menu-diversification program begun in 1982 with the addition of taco salad.

Menu-diversifications for 1983 included its reformulated french fries, an added bacon cheeseburger and an expanded salad bar, which it dubbed the "Wendy's Garden Spot."

In addition, it continued to test menus for two new dayparts. A breakfast menu was expanded to additional markets throughout the year, while several dinner platters were tested in Cincinnati. These included country-fried beef, filet of fish, chicken parmesan and beef with mushroom gravy.

The most important new-product introduction of the year was the November rollout of a five-variety line of stuffed baked potatoes. The "Hot Stuffed" line was coupled with a $10 million introductory advertising campaign that, for the first time, saw Wendy's advertising in consumer magazines.

The fast-food industry traditionally has had a male-intensive customer base, and, like the expanded salad bar, the baked potatoes were added as a draw for female customers. The product was greeted with competitors' skepticism but quickly proved to be such a success that several chains (such as Arby's and Ponderosa) began testing topped potatoes themselves. Wendy's now serves 600,000 baked potatoes a day.

The introductory advertising Wendy's used was almost as much of a marketing departure as the baked potatoes themselves. The jazzy musical score and new wave art direction were symptomatic of the more aggressive advertising posture Wendy's developed last year.

The baked potato campaign was only one of several different advertising efforts Wendy's used during the year.

In June, 1983, the chain unveiled its first comparative advertising, a series of humorous tv spots directed by Joe Sedelmaier depicting differences between Wendy's and its two major competitors, McDonald's and Burger King. The primary focus was on Wendy's use of fresh rather than frozen beef and its made-to-order products.

The $20 million campaign was Wendy's answer to the widely publicized Burger King comparative campaign launched in September, 1982.

Wendy's followed the humorous Sedelmaier-directed spots with a more mainstream campaign stressing the chain's chicken sandwich, salad bar and Frosty dessert. Tv spots featured patrons lip-syncing a song title "Only Wendy's" sung to The Platters' 1950s hit "Only you."

In September, the chain returned to the Sedelmaier spots before breaking the baked potato advertising. That led critics to wonder if Wendy's wasn't diffusing its message by varying its advertising too drastically and too often.

Exec vp William Welter defended the variety as being in line with the chain's belief in "event marketing." With a smaller advertising budget than either McDonald's or Burger King, Wendy's purposely has varied the look of its commercials and tied its advertising to specific events (new products or points of product difference) to maximize impact.

If Wendy's wanted impact from its advertising, it got almost more than it could handle in January, 1984, when it broke a second set of two humorous vignette tv spots directed by Mr. Sedelmaier. These ads were intended to counter the perception that McDonald's Big Mac and Burger King's Whopper were larger than Wendy's Single. Both spots carried the theme line "Where's the beef?" but one became a national phenomenon.

Clara Peller, one of three elderly ladies featured in one of the new spots, became a national celebrity. After Democratic presidential candidate Walter Mondale used the line to imply a lack of substance in challenger Gary Hart's proposed programs, "Where's the beef?" became a national chant.

The six-week campaign may have done more for Wendy's visibility than 14 years of product advertising. Consumer awareness of the chain's advertising rose from 37% in December to 53% in March, according to company research.

Sales benefited as well: Average per-store sales rose 20%. According to the Consumer Reports on Eating Share Trends, Wendy's share of the fast-food market rose 20%, to 11.6% of the market during 1984's first quarter.

A second "beef" commercial with Ms. Peller broke in the spring, and a third was planned for the fall ... in time to support the "Where's the beef" merchandise marketed as Christmas gifts.

The success of "Where's the beef?" may have solidified Wendy's relationship with its national agency, Dancer Fitzgerald Sample, New York, but Wendy's encountered problems in the past year with its local agencies. Several of its regional agencies—Burton-Campbell, Atlanta; Eisaman, Johns & Law, Los Angeles, and Clinton E. Frank Inc., Chicago—resigned their Wendy's assignments.

They were replaced by Stockton-West-Burkhart, Cincinnati, which was Wendy's first agency. It now handles the majority of company-store markets for the chain, and may pick up additional assignments should other regional agencies resign.

Wendy's long-range goal is to raise its per-store average sales to $1 million from the current $759,000. To achieve that goal, the chain plans to add more new products to broaden its customer base.

Also planned is an expansion of its national advertising presence. Toward that end, Wendy's operators last fall agreed to increase to 1.5% of sales from 1% their contributions to national advertising.

Wm. Wrigley Jr. Co.

	1983	1982
Sales*	$581,688,000	$581,459,000
Earnings*	39,164,000	35,811,000
U.S. Advertising	63,948,200	67,028,200

*Worldwide

Wm. Wrigley Jr. Co., Chicago, the nation's 91st largest advertiser, spent an estimated $63.9 million on measured advertising in 1983, down 5% from 1982.

Net earnings for the year were $39.2 million, up 9.5% over 1982. Net sales, which declined slightly between 1981 and 1982, showed a fractional gain in 1983 to $581.7 million, compared with $581.5 million in 1982. The company said the stagnation was due to the reduced value of overseas sales revenues when converted into strong U.S. dollars. A constant dollar value in 1983 would have improved net sales $18 million, the company said.

Wrigley sales, which command about 44% of the estimated $1.8 billion in total gum market sales, continue to be led by Doublemint, Spearmint, Juicy Fruit and Big Red, for which it collectively spent about $40 million in measured advertising in 1983. The four account for more than half of the sugared chewing gum market.

U.S. chewing gum sales revenues of $406.5 million up 3% from 1982, benefitted from slightly higher unit volume and improved multipack pricing. Shipments of established brands increased over 1982, resulting from continued gains by Big Red chewing gum, which got slightly more than $9 million in ad support in 1983, and a stronger performance by Wrigley's Spearmint gum, spurred by its current ad campaign begun in 1982, themed, "Really keeps you hummin'."

Doublemint's longstanding "double your pleasure" ad campaign began getting a new updated, contemporary look in 1983, a trend that continues in 1984.

Both Spearmint and Doublemint continued to rely heavily on network and spot tv in 1983, which resulted in their collectively receiving more of the marketing dollars earmarked for Wrigley's four major gums.

Juicy Fruit gum, which claims about 8% of the chewing gum market, received its first new campaign in three years late in 1983, targeted at teens with the jingle theme, "The taste that's gonna move ya." Indications so far in 1984 are that the campaign has been well-received and worked effectively to broaden Juicy Fruit's demographic appeal.

The gum was allowed broadcast clearance by the tv networks in children's time periods for the first time in about five years. Juicy Fruit's previous spots, themed, "Nothing like the flavor," were not allowed by network censors in children's time. The ability to buy ad time in more of a variety of dayparts such as daytime has allowed Wrigley to maintain about the same spending level for the brand despite the launch of a new campaign.

Freedent chewing gum continued its solid growth in 1983, according to the company, with its estimated $11 million advertising effort emphasizing its breath-freshening and nonstick qualities. A little additional print support was thrown behind Freedent in January, 1984, with the introduction of its new cinnamon flavor. Hubba Bubba soft bubble gum maintained its volume and share in a very competitive and segmented market.

The limited market testing late last year of Extra, a sugar-free chewing gum containing NutraSweet, led to the company's decision this summer to introduce the product nationally.

Sources say Wrigley plans to spend as much as $15 million or $20 million in initial advertising support for Extra.

The campaign is set to break in the latter half of 1984, depending upon the progress of nationwide distribution of the gum this summer. Wrigley made an unsuccessful attempt to enter the sugar-free gum market in the late 1970s with Orbit.

Although Wrigley was the first major chewing gum company with aspartame-sweetened, sugar-free gum, it has found itself up against stiff competition.

Amurol Products, Wrigley's associated company that had record sales in 1983 principally with new products, also invested additional funds mainly in support of its Big League Chew and Tidal Wave (a liquid-center bubble gum) brands.

Late last year, Amurol introduced the liquid-center gum Binaca Blast, which capitalizes on the consumer's familiarity with Ciba-Geigy's Airwick Industries breath freshener, Binaca, and touts the gum's breath-freshening capabilities. Binaca test markets have included Des Moines, Seattle and Dallas.

Operations in the U.S. were primarily responsible for the earnings gain in 1983 with the parent company contributing much of the increase. Cost controls, slightly higher volume, a more favorable product mix and revised multipackage pricing all had a positive impact.

The consolidated gross profit margin improved to 52.3% in 1983 from 50.5% in 1982 and 48.6% in 1981. Improved margins resulted from higher pricing in several markets and cost-containment programs.

*Worldwide

Xerox Corp., Stamford, Conn., the country's 65th largest national advertiser, spent an estimated $110.1 million in 1983, an increase of nearly 38% over 1982.

The company attributes the increased advertising spending to support of the launch of its Series 10 copiers, its Memorywriter electronic typewriters and other new products.

Company sales and earnings for 1983 proved to be mixed. Operating revenues stood at $8.46 billion, less than a 0.1% increase over 1982. Profits rose to $466.4 million, up 10.1%.

Revenues in 1983 were affected adversely by the strength of the dollar, lower year-to-year price levels of about 4%, a mix of equipment installations skewed more toward rental than sales and weaknesses in the components businesses.

The largest advertising spending was devoted to Xerox copiers, on which more than $23 million in measured expenditure were spent. Nearly half of this was allocated to network tv. Another 43% went to magazines.

Xerox at the end of July reported that losses in its property and casualty insurance operations offset gains in its office equipment business, causing net profit in the second quarter to dip to nearly 38% over the similar period a year earlier. In the second quarter, the company earned $95.5 million on total revenues of $2.26 billion.

In the first six months of 1984, Xerox profits fell to $221.6 million on higher revenues of $4.39 billion, compared with earnings of $281.9 million on total revenues of $4.36 billion for the first six months of 1983.

Total sales revenues in 1983 were $3.9 billion, an increase of 12%. By contrast, rental revenues declined 17%, to $3.3 billion in 1983.

Income from the reprographics and information systems businesses was $348 million, a decline of 5% from 1982.

Even though earned premiums from its Crum & Forster insurance subsidiary increased 11%, operating income after taxes, before capital gains and losses, declined 5% from 1982 and, according to the company, reflects losses associated with Hurricane Alicia and the severe winter storms during December.

There were some brighter moments. In the Marathon Line, Xerox introduced two photocopiers—the 1048 and the 1055—that will sell for between $8,000 and $19,000. The new copiers are expected to fill a price gap between its three small and midsize models and the highest priced 1075, which sells for more than $50,000. The company also introduced a high volume duplicator, the 9900, that will sell for $129,775.

Part of the Marathon Line advertising and promotion campaign has been signing up runners to wear the Xerox logo. The company also is sponsoring marathon races and running races between staff and customers.

Xerox launched its portable battery-powered computer in 1983 but found the market unwilling to support the product. Not surprisingly, in May, 1984, the company abandoned its line of portable computers. Contract supplier for the portable computers, Sunrise Systems Inc. of Carrollton, Tex., later filed for bankruptcy.

In another move, Xerox announced late in 1983 that it planned to sell most of its retail stores and an assortment of computers to a group of Texas entrepreneurs. Xerox initially had expected the stores to complement its direct sales force. However, in the rapidly changing marketplace, the company found it easier to sell its products through retailers who assume overhead and marketing expenses.

Nets, shops wary after RKO flap

By VERNE GAY

New York—The RKO Radio Networks scandal involving $5.9 million in overbillings to advertisers has rekindled doubts and suspicions that long have haunted the medium. Advertisers and industry experts now are wondering: Can it happen again?

The theoretical answer is a resounding "Yes."

"All networks are on guard," said a source who asked not to be identified.

The incident, in which RKO Radio Networks billed advertisers in 1983 for spots that never ran or ran in poorly rated programs, has prompted other radio networks to examine their own accounting procedures.

ABC Radio Networks reportedly called in a team of outside auditors to scour its books for any infractions.

"It can happen anywhere else," said Robert Welty, exec vp-corporate media director at Bozell & Jacobs, New York. "If someone wants to be dishonest and if you have some type of agreement with people to ignore good business practices, then sloppiness sets in."

Bozell & Jacobs, Ogilvy & Mather and Young & Rubicam are just a few of the agencies now saying they will conduct spot checks of network radio affiliates to independently confirm commercials ran when and where promised.

At the center of the hurricane is RADAR, a radio measurement

Cooler's rising star rocks wine market

By RUTH STROUD

California Cooler Inc., a rags-to-riches story that sprang from a $10,000 bathtub operation, has vigorously stirred the wine industry's status quo this summer, touching off a flurry of reactions to the lightning growth of the wine-cooler category.

The 2½-year-old Stockton, Cal.-based company, which some call the Apple Computer of the wine industry, stunned analysts and competitors alike when its July shipments of California Cooler, the company's only product, measured second only to E. & J. Gallo Winery's total among California wine producers.

The company itself, in controlling 60% of the cooler market, ranked fourth among the state's wine companies in shipments for the year to date.

According to industry reports, California Cooler shipped more than 3.6 million gals. during July, compared with Gallo's nearly 9 million gals. The Cal Cooler figures represented a 350% increase over the previous July and capped months of continuous growth.

So far in 1984, the company has recorded more than 12 million gals. in shipments, and projections are that it will reach more than $80 million in sales by the end of the year.

With its sales curve rising steeply, Cal Cooler has powered the growth of the entire category, while saving the over-all wine industry from showing dramatically declining sales.

Wine coolers, which generally contain only about 50% wine and 5% to 6% alcohol, represented about 18% of California wine shipments in July and accounted for *all* the growth of the state's wine industry during that month and the entire year to date, according to Jon Fredrikson, editor of "The Gomberg Report," a highly regarded wine-marketing report. That compared with 3% of the industry in July, 1983.

Minus the coolers, Mr. Fredrikson's research reveals, shipments of conventional wines were off 15% in July, 13% in June and 6% for the first seven months. Adding the cooler volume, shipments grew 1% for the year. At the same time, imported wines, helped by the strong dollar, have grown 8%.

But the figures just begin to tell the story of the

Coke rethinks its Tab ad pitch

By NANCY GIGES

Coca-Cola U.S.A. has postponed the follow-up campaign to "Let's taste new Tab" until next year but is replacing the current spots with a straightforward discourse: "You'll drink Tab now because you want to, not because you have to."

Starring model and aspiring actress Cindy Harrell, the new tv spot that broke Sept. 13 on ABC's "Glitter" features a head-and-shoulders shot of her noting, "I thought Tab was something you had to drink. You go on a diet, you go buy Tab, like it or not. But now Tab's got NutraSweet blend. I know NutraSweet is everywhere, but in Tab, it tastes terrific. It's crisp, refreshing. It's really satisfying. If you haven't tasted new Tab, you've got to try it. Do, and you won't drink Tab because you have to. You'll drink Tab because you want to." As the spot closes, the "Let's taste new Tab" music plays in the background, but without the words, which have raised criticism from the start.

Both company and agency admit they've had feedback that the theme has sometimes been misinterpreted as "*less* taste, new Tab." That theme was created by McCann-Erickson, New York, before the brand was switched to

(Continued on Page 86)

Cohen named new editor of 'Focus'

London—Stanley E. Cohen, vp of Crain Communications Inc. and Washington editor of Advertising Age, has been appointed editor of Advertising Age's *Focus*, the monthly magazine of European advertising and marketing.

Mr. Cohen succeeds Eugene Bacot, who has been editor since the publication's inception in 1982. Mr. Bacot will remain with *Focus* in the transition and serve as a consultant to the publication on special projects.

Mr. Cohen joined Crain as Washington editor of Ad Age in August, 1943. He is also chief of the Crain Washington bureau and editor of the Ad Age editorial page. He has been a vp of Crain since 1967.

Mr. Cohen is among the senior members of the Washington news corps and was one of five Washington journalists inducted last year into the Hall of Fame of the local Society of Professional Journalists chapter. His column, Washington Beat, was selected as first-place winner this year for best continuing feature column by the Chicago chapter of the American Society of Business Press Editors, and was the silver award winner in the recent 1984 national competition of the National Media Awards of the Consumer Federation of America.

S. Cohen

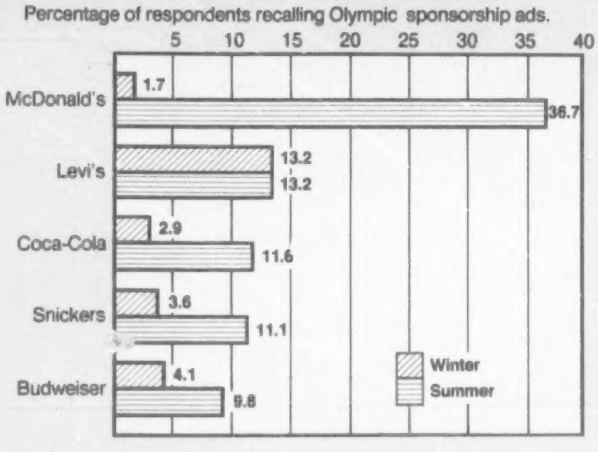
His professional activities include chairing the speakers committee of the National Press Club in 1982, where he was in charge of the club's nationally telecast speakers' luncheons.

"Stan Cohen's joining the staff of *Focus* indicates the commitment we have to *Focus* and to Europe," said Rance Crain, president of Crain Communications and editor-in-chief of Advertising Age. "Stan was my first boss, and I have the highest confidence and respect for his editorial ability. His job is to make *Focus* the most comprehensive and dependable magazine on pan-European advertising trends and developments, and I know he will accomplish that goal." #

ADWATCH

Top Olympic sponsors in awareness

Consumer awareness of Olympic sponsorship advertising during the summer games matched or exceeded recall levels from the winter games.
Source: SRI Research Center, Lincoln, Neb.



Olympic links prove bargains

By SCOTT HUME

There's a word for the millions of dollars some companies gave the Los Angeles Olympic Organizing Committee to become official sponsors of the summer games. It's "bargain."

Advertising touting corporate ties to the Olympics appearing before and during the games had very high consumer awareness, was well received and had a positive effect on buying patterns. Marketers can't ask for much more than that.

According to a study conducted last month for Advertising Age by SRI Research Center, Lincoln, Neb., 83% of the 1,255 adults polled recalled having seen, heard or read advertising mentioning Olympic sponsorship in July and August. By contrast, in a similar survey conducted during the Winter Olympics, 72% of respondents were aware of such advertising (AA, Feb. 6).

Additionally, better than four out of five persons polled were able to name at least one advertiser running an Olympics-themed message. During the Winter Olympics, 43% of respondents drew a blank when asked which Olympic sponsor's advertising first came to mind.

What remained the same between Winter and Summer Olympics was consumers favorable view of companies that sponsor the U.S. team. In last month's survey, 43% said Olympic sponsorship raises their opinion of the sponsoring company; 50% said sponsorship has no effect on their opinion; 4% said sponsorship lowers their opinion of a company and the remainder weren't sure how they felt.

Also matching the result from the Winter Olympics survey were the 30% of respondents last month who said they would be inclined

(Continued on Page 80)

Filipacchi, Murdoch a fashionable team

By STUART J. ELLIOTT

New York—Daniel Filipacchi and Rupert Murdoch, two of the world's publishing giants, are joining forces to tackle the lucrative, burgeoning women's fashion category of the U.S. magazine market.

It was disclosed last week that Hachette, Mr. Filipacchi's Paris-based company, and Mr. Murdoch's News Group Magazines here will launch in the fall of 1985 a regular monthly, English-language version of *Elle* (AA, Sept. 13), Hachette's popular weekly French women's fashion and life-style title. It is believed to be the first 50-50 partnership on a publishing venture for both Messrs. Filipacchi and Murdoch.

This arrangement replaces one that Edi Sept, a Hachette subsidiary, had since last December with The New Yorker Magazine Inc., which produced two test issues of a U.S. edition called *Elle International*. The two companies agreed to disagree in a variety of areas, leading Hachette to pick a new partner.

"Without The New Yorker, the magazine probably would not exist," said Didier Guerin, exec vp, Edi Sept, and publisher, *Elle International*, "but we agreed there was no way we could [proceed] together."

Hachette was "looking for something other than what we can give them," said Hoyt Spelman, publication director, The New Yorker.

The partnership with Mr. Murdoch "could be very interesting," said Mr. Guerin, noting that he and Mr. Filipacchi "have known each other for many years, and know each other well."

And it is "certainly not impossible the two groups could go further than *Elle International*," said Mr. Guerin, "other titles, other activities as well." But, he emphasized, for now only the one co-venture has been decided upon.

While details are still being worked out, plans call for News Group to assume, via its existing departments, responsibility for *Elle International's* circulation, finance, production and promotion, said Martin Singerman, president, News Group Magazines, which includes *New York*, *New Woman* and *Star* among its properties.

Departments handling editorial, Hachette's area of expertise, and advertising will be created; there are no details yet on editorial staffing, ad rates or rate base. Under the Hachette-New Yorker agreement, the former handled editorial and production while the latter handled ad sales and promotion.

The Hachette-News Group partnership will produce one more test issue of *Elle International*, dated spring/summer 1985, said Mr. Singerman, before regular monthly frequency begins, it is hoped, in September, 1985. September is the month when the U.S. women's fashion magazines bring forth their fat issues that usually set advertising-page and revenue records (AA, Sept. 10).

Is there room for an *Elle International* among those women's fashion books? "I think there is a marketplace in this country for another publication, with a different touch," said Mr. Singerman, "more interna-

World News Roundup

Toronto—Unilever Cos. may be consolidating its $20 million account at Harrison, Young, Personen, Canada's largest media placement specialist. The bulk of it would come from J. Walter Thompson Co. The move is seen as part of a plan to form Unilever Canada, which would centrally control all the company's activities here.

Hamburg—Procter & Gamble last week picked Saatchi & Saatchi/Compton as the first agency to handle Valensina orange juice, which P&G acquired when it bought the Dittmeyer Co. in May.

New York—CBS/Broadcast Group Worldwide is negotiating with the government of India to sell CBS programing and coordinate advertising around it on Indian tv. Indian protectionist laws now restrict such an arrangement, but those restrictions may be eased, sources say. Also, IBM has signed up as the first advertiser for a package of programs CBS has sold to China Central TV (AA, July 30).

London—D'Arcy Direct, the direct-marketing arm of D'Arcy MacManus Masius Worldwide, opened an office in London last week, the second since its first opened in New York in June. It will function within Inter-Ad Group, the holding company of D'Arcy's second network.

Bangkok—Shell of Thailand moved part of its $700,000 consumer products account to J. Walter Thompson Co. from Amex & Grey

(Continued on Page 50)

Bloom gets 'youth' look

Dallas—Bloom Cos., of which the Bloom Agency is the major subsidiary, has realigned top management of the holding company and the agency to free them for more involvement with clients and new-business efforts.

C.A. (Tony) Wainwright, 50, chairman-chief executive officer of the agency, becomes president of Bloom Cos. In that post, he will assume broader corporate responsibilities, according to Robert Bloom, company chairman.

The move creates what Mr. Bloom refers to as a "youthful management" for the agency, with Dennis McClain, 36, president-creative director since 1983, succeeding Mr. Wainwright as chair-

Can't ignore subliminal ad charges

Adfolk laugh, but students listen

By JACK HABERSTROH

Most of my professional advertising colleagues, I suspect, regard subliminal embedding as nothing more than a fictional flyspeck on a bookcase crammed with advertising memorabilia. The less said about Wilson Bryan Key, author of "Subliminal Seduction," and his fevered fantasies, the better.

Ignore him, conventional wisdom suggests, and, like the flasher he sees in your martini, he'll disappear when the ice melts.

The guy's a crackpot, some say. Finds S-E-X all over Ritz crackers. Penises in Parkay patty advertising. Orgies in cocktails. Male and female ice cubes. And fellatio on the ceiling of the Sistine Chapel.

Jack Haberstroh is a professor in the School of Mass Communications at Virginia Commonwealth University, Richmond.

Besides, they hint, his books will never sell. No one really believes any of his naughty nonsense. So just clam up and let him rest in peace.

The problem with this is: He and his notions *won't* go away!

A youngish 59 years old, Mr. Key has achieved a permanent place in American advertising folklore. Like him, loathe him, he's here to stay.

He now has written three well selling books on subliminal persuasion, and a fourth is near completion. His first, the watershed treatise on the subject, appeared in 1973. "Subliminal Seduction" now has sold nearly 1 million copies.

"Media Sexploitation" rolled off the press in 1976 and takes embedding a step further. Not only are subliminals being used in advertising, Mr. Key says, but also in products—including Ritz crackers. This book has sold more than 330,000 copies.

Nearly 200,000 copies of his latest, "The Clam-Plate Orgy," have been sold. The book appeared in 1980 and—for starters—finds S-E-X in Lincoln's beard, oral copulation in Michelangelo's Original Sin, a clam orgy on Howard Johnson placemats, an erect genital in Picasso's Woman Asleep, and a giant anamorphic skull in Holbein's Ambassadors.

"Subliminal Seduction" was christened with respectability when Marshall McLuhan wrote its meandering, but quite flattering, introduction. The book is enjoying its seventh printing and is being sold throughout Central and South America in a Spanish translation.

There are few American or Canadian college campuses that have been missed by the ubiquitous Mr. Key. Often appearing before large standing-room-only crowds, his illustrated lectures now command $3,000 fees. He will give between 80 and 90 such major lectures every year and appear in thousands of advertising classrooms along the way.

And although it may be fashionable along Madison Avenue to pooh-pooh the professor—he has taught at universities for 14 years—he continues to spread his controversial gospel on talk shows. Tv, radio and newspaper reviews of his books have appeared in major cities around the U.S.

Advertising practitioners ignore him at their own risk. Often that ignorance can be embarrassing. Thousands of students are graduating every year thoroughly conversant with Mr. Key, his books and his theories. Many may have seen or heard him personally. And some are quick to believe the worst about advertising and its practitioners.

Some support for this latter statement can be found in surveys I conducted of students in my classes to whom Mr. Key had lectured. One of every five thought that "the *majority* of artists and photographers and others involved in the creation of advertising" deliberately were placing subliminal words and symbols in advertising, and that 50% of the students to whom he lectured thought that at least *half* of all artists willfully were inserting subliminals.

ADBEAT

Everybody's gettin' into the act

Acting in commercials is a serious business. And so Tom Logan, who has acted in tv spots for Ford, Honda, Kodak and McDonald's, has written "Acting in the Million Dollar Minute: The Art and Business of Performing in TV Commercials" (Communications Press, Washington; $7.95). Along with tips on the intricacies of script terms, pacing, staging, product mentions and product handling, getting an agent and union and agency contracts, Mr. Logan notes that, in 1982, Screen Actors Guild members made a total of $230.7 million in tv commercials. And that's more than they made from tv programs and movies combined. But Mr. Logan also notes that 57% of the SAG membership earned less than $1,000 that year.

Nielsen rates

A.C. Nielsen Co., Northbrook, Ill., boasting increased success among agency subscribers in the western region for its Nielsen Station Index ratings services, has just signed Cole & Weber, Seattle; Chiat/Day, Los Angeles, and Reich Communications, Denver. Earlier this year, Nielsen signed McDonald's (and its 60-plus agencies) as NSI subscribers.

Debit debut

J.C. Penney Co., New York, and Visa Inc., San Francisco, are testing the VISA Electron Card, a new debit card, in 30 J.C. Penney stores in Oregon this month. Penney expects the card will be put into other pilot programs in Ohio and Washington, D.C., and, following that, believes it will eventually accept the card in all its 2,000 retail outlets in the U.S. and Puerto Rico. The card also may be used for catalog purchases. No advertising is planned, a spokesman said.

Banquet haul

The family meal is alive and well, according to Banquet Foods Co., Ballwin, Mo. Many families still sit down together for a nightly meal even when mother and father both work. To better meet the needs of today's "working/active meal preparer," the company is restaging and extending its Banquet Foods family entrees. Two new varieties, Charbroiled Beef Patties with Mushroom Gravy and Chicken Parmagian Patties, will be added to the line. The dishes are packed in a new cook-and-serve decorator paper tray for use in either conventional or microwave ovens. The entrees retail from $2.29 to $3.89. The introduction of the upgraded line will be supported with 25 and 35 cents-off coupons in national magazines and newspapers. D'Arcy MacManus Masius, St. Louis, is the agency. The company also is introducing two additions to its Entree Express line of frozen convenience foods. Breaded Veal Patties and Beef Pizza Patties will retail for $3.10.

To market, to market

Marketing is the most popular field among 315 1984 graduates of Stanford University's MBA program, attracting 30% of this year's graduating class, compared with last year's level of 28% and 13% in 1980. Ayse Kenmore, director of career planning and placement, attributes the steady rise to the "growing demand for marketing skills not only from the traditional consumer-goods manufacturers and distributors, but also from financial institutions and from manufacturers of high-tech equipment." Finance drew 27% of the class, down from 29%, and consulting attracted 20%, up slightly from 19% in 1983.

Fair enough

It's off to the fair we go, and, when Americans went to the park, fair or amusement center in 1983, they ate and drank more than ever before. Food and drink sales accounted for nearly $3.3 billion in income for the mass-entertainment industry in 1983, according to a survey recently conducted by *Amusement Business*. Sales were up an average 14% at fairs and expositions from a low of 11% and up 17% in the park industry

"King" of beers

One of the primary laws of physics—that for every action there is an opposite and equal reaction—apparently applies to the brewing industry, too. While Miller Brewing, Milwaukee, is testing its low-alcohol Sharp's LA brand for those who believe in moderation, it also has expanded distribution of its King Kan. The 32-oz. can of Miller High Life now is sold in 18 states after successful testing in Chicago, Houston and New Orleans.

Miller
High Life

At the movies

"Saturday night has always been a movie night, still is a movie night," despite the fact the Big 3 tv networks no longer schedule one, said John Otter, senior vp-network programing, SSC&B, New York. The big difference is that now people can watch films when pay tv services slot them or at their own convenience via videocassettes. That is the main reason for the "dramatic" dropoff in ratings for the nets' Saturday 8 p.m. to 10 p.m. fare, he maintained. Such movie viewing also is an erosion factor on Sunday evenings, where NBC is in dire straits due to heavy 7 p.m. to 8 p.m. affiliate preemptions. Even a strong NBC series in that hour would be hard-pressed to succeed because "there are only so many share points to go around," Mr. Otter said.

Not child's play

Quantum Marketing Group has been formed as a consultancy specializing in child-related products and services, because "kid marketing is no longer child's play," said founder/president Yves Coleon, formerly director-marketing, Matchbox Toys/U.S.A., New York. Quantum is located at 146-148 Sound Beach Ave., Old Greenwich, Conn. 06870. The growth in the number of children under age 12 over the next five years will be "dramatic," he said.#

Bargains

(Continued from Page 3)

to buy a specific product or service because its marketer is an Olympic sponsor. Ties to the Olympics have no effect on the buying patterns of 65% of those polled.

Appropriately, the Olympics sponsor whose advertising had the best recall was one of the summer games' biggest spenders: McDonald's Corp. More than one-third (36.7%) of the adults polled included McDonald's when asked which sponsors' advertising first came to mind.

Only 2% of respondents recalled McDonald's advertising during the Winter Olympics. (Although Burger King was the "official fast-food restaurant" of the Winter Olympics, it ran no advertising featuring that connection. McDonald's advertising at the time of the winter games touted its sponsorship of the summer games.)

McDonald's reportedly spent $35 million on advertising and promotions tied to the Olympics. That includes its "When the U.S. wins, you win" scratch-card game, which, like the U.S. teams, was highly successful.

Other advertisers among the top 10 in top-of-mind awareness (and their awareness score during the winter games) were: Levi's, recalled by 13.2% of respondents last month (also 13.2% during the winter games); Coca-Cola, 11.6% (2.9%); Snickers, 11.1% (3.6%); Budweiser, 9.8% (4.1%); M&M's, 7.8% (3.8%); Southland's 7-Eleven stores, 5.7% (no score in winter); Canon, 4.9% (1.8%); Pepsi-Cola, 4.3% (no score in winter); Wonder bread, 4.2% (1.5%).

Interestingly, awareness levels for the top two advertisers, McDonald's and Levi's, decreased as the age of the respondent increased but rose as income did. The same pattern repeated for several other advertisers.

More important—and even more encouraging—to advertisers than the over-all awareness and influence scores are the demographic breakdowns. The AD AGE survey shows that Olympic sponsorship had its strongest impact on some of the key target audiences.

For example:

- Awareness of advertising mentioning Olympic involvement rises with income. While 66% of adults with incomes of $10,000 or lower said they recalled such advertising, 93% of respondents making $40,000 or more were aware.

Awareness declines with age, but not as sharply as it rises with income. Of persons age 18 to 24, 93% said they saw or read advertising tied to the Olympics; 80% of those age 55 to 64 said they recalled such advertising.

Awareness was highest in the West (88%), lowest in the south central states (78%).

- While 34% of those with the lowest incomes were unable to name specific advertisers mentioning their ties to the Olympics, only 14% of those in the highest income bracket failed to do so.
- Persons who said Olympic sponsorship raises their opinion of a company most often were middle-income and middle-aged. They also were most likely to live in the Northeast and least likely to live in the western U.S.

Nearly equal percentages of men (44%) and women (43%) said their opinions of companies were raised.

- Persons who said they would be inclined to buy a specific product because of its manufacturer's Olympics involvement most often had incomes between $20,000 and $40,000.

The highest percentage of respondents whose buying habits were favorably influenced was among persons aged 45 to 54.#

THE ADVERTISING MARKET PLACE

Marketing

MARKETING PLANNING MANAGER

BancOhio has an immediate career opportunity for a Retail Market Planning Manager. The successful candidate must have a Bachelor's degree in marketing or related business field (MBA helpful), as well as a minimum 2-4 years banking or marketing experience in new product development or product market planning with exposure to promotional planning and implementation. Also required is the ability to develop and execute marketing strategies across multiple responsibility lines and to communicate effectively, both verbally and in writing.

We offer opportunities for growth, a competitive salary, and a comprehensive benefits package, including dental assistance. Qualified candidates, send resume and salary history, in confidence, before September 29th, to:

Doris O. Wilcher
Human Resources
155 E. Broad Street
Columbus, Ohio 43251
614-463-8106

BancOhio National Bank

Affirmative Action, Equal Opportunity Employer

Senior Writer/Producer

Here's what we offer ...
- You'll be a peer instead of a pawn.
- You'll get a lot of variety, and frontline action.
- You'll be paid what you're worth.
- You'll work hard, and have fun doing it.
- You'll have the chance to produce great work.

Here's what we require ...
- You've got to be a team player.
- You've got to have an appreciation for the business side of this business.
- You'll be expected to produce great work.

A bit about us ...

We're a $22 million agency that does it all. We've grown steadily and plan to continue. We're small enough to deal with people instead of policies, but big enough to attract good clients. And talent. We're in a nice mid-sized town, two hours from Chicago. We're good. And we want to be better.

Interested? Send your résumé and five samples (you won't see 'em again) to:

The Juhl Agency
121 W. Franklin St.
Elkhart, IN 46516
Attn: Steve Patton

MANAGER/RETAIL MERCHANDISING

This growth position is responsible for policy development and implementation of a multi-million dollar co-op ad program for Fortune 200 firm located in Northeast Ohio. Involves handling co-op inquiries from independent dealers and media, providing creative approval to retailer ads, and facilitating overall program administration. Position also develops and produces various retail-printed materials such as ads, brochures, displays, and in-store point-of-sale items.

The ideal candidate will have 3-5 years experience in co-op advertising, retail advertising and merchandising techniques, preferably in the automotive aftermarket field. Some travel required. Qualified candidates should forward a resume including salary history to:

Box 0212, Advertising Age
740 Rush St. Chicago, Ill. 60611

Crest, Aim jump on pump segment

By LAU. .IE FREEMAN

The nearly $1 billion dentifrice market is getting a fresh jolt of competition as market leader Procter & Gamble and No. 3 Lever Bros. both move into separate test markets with new pump-dispenser toothpastes.

Consumers across the country may not have to wait too long to see both products on their store shelves.

Procter & Gamble doesn't plan to spend much time in its Maine test markets for pump-dispensed Crest—in regular and mint flavors and in a gel variety. Sources said P&G has set a national rollout for early next year.

Lever Bros. has begun testing Aim gel toothpaste in a pump dispenser in selected East Coast markets, with national distribution also expected in early 1985.

The appearance of these two leading dentifrice brands in pump form indicates good sales results for Minnetonka Inc.'s Check-up brand and Colgate-Palmolive's Colgate brand pump version (AA, May 28). Check-up began a $20 million national ad campaign last May.

A retail-chain buyer in Texas said that although Check-up costs at least a dollar more than tube-dispensed toothpastes, unit sales have increased tenfold since it became available earlier this year. A New York grocery chain said it can't keep the plaque-fighting toothpaste in stock.

Colgate put both its gel and regular-flavor toothpastes in pump dispensers for market test this spring. A company spokesman said the brand now is being rolled out nationally.

The company also is testing Dentagard, a pump-dispensed, plaque-fighting toothpaste that would compete directly with Check-up (AA, March 19). Being tested in Boise, Ida., Dentagard continues to sell well, industry observers said.

Retailers speculate that one reason behind pump-dispenser dentifrice's popularity is that consumers tend to use less with the dispenser. However, Hercules Segalas, Drexel Burnham Lambert analyst, said he has not "seen any evidence that people are using less toothpaste; if anything, kids have heavy trigger fingers and are using more."

The Crest 4.6-oz. pump dispenser, being sold for about $1.35, is designed to sit upright on bathroom counters, according to a P&G

Montana goes on offensive

By ROBERT RAISSMAN

When Joe Montana quarterbacked the San Francisco 49ers to a 1982 Super Bowl championship, Adidas took out major-market newspaper ads proclaiming: "We've been with you [Mr. Montana] all the way."

But Mr. Montana is no longer *with* Adidas. Last week, he filed a $9 million lawsuit in San Francisco against the shoe manufacturer, demanding that Adidas USA stop marketing a leisure shoe called Montana. The suit also asks the company to account for all profits from the sale of the shoe, which Mr. Montana described as "garbage."

Adidas officials claim the Montana shoe name refers to the state, not the sports celebrity it had under promotional contract from 1981 through 1983.

But this appears to be less a case of usurping a celebrity's name and more an example of what can go wrong in an endorsement arrangement. Mr. Montana has learned how cutthroat things can get in the rubber-sole jungle.

To hear Mr. Montana tell it, Adidas was never with

Firestone ads play down tires

By JESSE SNYDER

Firestone Tire & Rubber Co. will drop mainline tire advertising in its change to retail-oriented sales and service marketing.

The new campaign, breaking Oct. 15 primarily on network tv, is the first creative effort by Saffer, Cravit & Freedman, Toronto, which took over Firestone's U.S. retail, passenger tire and service account from BBDO, New York (AA, July 5).

The account was estimated at $20 million at the time, but a Firestone spokesman said spending for the new campaign has increased "significantly."

"This is probably the largest network tv commitment in our history," the spokesman said.

The initial six weeks of the campaign contain two 30-second commercials airing on prime time shows such as "A Team" and "Magnum, P.I.," sports programing and news-oriented shows such as "60 Minutes."

Instead of commercials singing "There's a name that's known as Firestone, where the rubber meets the road," the new drive features a "C'mon, America, drive over to Firestone" jingle with quick-cut "vignettes of America." The commercials will push Firestone's 6,000 retail outlets as places where all a customer's automotive service needs can be met. Newspaper ads follow in major markets.

Individual tire lines or services such as wheel alignments may ap-

(Continued on Page 104)

'Infomercials' seen on at least four networks

GF unfolds cable ad plan

By SUSAN SPILLMAN

New York—General Foods will unveil a new strategy for using cable tv here this week that involves a unique series of two-minute entertainment-oriented commercials to run on at least four networks for the next year.

Handled by Young & Rubicam, the campaign represents the latest GF plan to use cable tv to counter network share erosion.

It is also the first major strategic move GF has made in cable recently. The White Plains, N.Y.-based company in the early 1980s made several multi-million-dollar, multiyear, run-of-schedule and program sponsorship deals on cable networks, but this marks the first time GF will go the infomercial route.

The General Foods approach is reportedly in response to consumer research. The two-minute spots also address what GF called a response "to new life styles and viewing patterns."

General Foods has recently spearheaded advertiser reaction to commercial "zapping"—the rapid switching of stations by viewers to avoid commercial breaks or, more importantly, the editing out of commercials on videotaped programing (AA, July 23, *et seq.*).

It is believed that GF is going the infomercial route in part, at least, because it sees the entertainment aspect of the spot as a "zap-proof" approach to tv advertising. GF estimates it's currently losing $1 million a year to zapping.

The General Foods spots will combine 90 seconds of "entertainment-oriented kitchen tips" with a 30-second product pitch for one of its food brands. Several spots promoting different products will be included.

The commercials break next month on Cable News Network, USA Network, CBN Network and Lifetime. They will run for 52

Last Minute News

Chevy punts on Super Bowl sponsorship

Detroit—Chevrolet will not "renew" its sponsorship of the National Football League Super Bowl because of its $1 million-a-minute rate. Chevy ran seven spots last year at $800,000 a minute but balked this year because of "excessive" ABC charges. "We believe it's time to tell the networks 'Enough,'" said Thomas Staudt, general marketing manager. Chevy will put its dollars on the CBS miniseries "Space" in April. Chevy will take a 50% sponsorship of college football on Entertainment & Sports Programming Network cablecasts as it reduces its tv sports buy to 50% of its tv budget from 75% last year (AA, Aug. 20). Print goes from 22% to 28%. Chevy's new ad theme, "Today's Chevrolet. Live it," replaces "Chevrolet is taking charge." The "Tough truck" line yields to "Nothing works like a Chevy truck," all via Campbell-Ewald, Warren.

Miller gets help in agency review

Milwaukee—Miller Brewing Co. has been working with New York consultant Robert Bragarnick during its latest creative review on the $50 million Miller High Life beer account (AA, Sept. 13). Mr. Bragarnick is said to have been instrumental in getting Jordan, Case & McGrath into the review that includes JWT, Ayer and Burnett (AA, Sept. 20). A new "quality reinforcement" spot for High Life by agency of record Backer & Spielvogel broke on sports programing last week. Backer also is at work on other High Life quality spots within the "Miller time" format.

Burnett may get Hewlett-Packard account

Palo Alto, Cal.—Computer sources predict Leo Burnett USA will get the Hewlett-Packard Personal Computer Group account. H-P last week dropped J. Walter Thompson/USA, San Francisco, as the agency handling the $20 million account. Dancer Fitzgerald Sample continues to handle H-P's information system group.

Viewers flip channels in pre-premier week

By JAMES P. FORKAN

New York—Viewer sampling was still the name of the game in prime time network tv last week, as CBS, ABC and NBC prepared for the official start of "premier week" today.

The latest national Nielsen ratings show that CBS' hospital-based "E/R" faced its first emergency and ABC's "Call to Glory" series about Air Force families continued a dangerous tailspin, while NBC's "TV's Bloopers & Practical Jokes" continued to succeed on others' mistakes and "The A Team" continued to hit the ratings target.

NBC also rejoiced over "Highway to Heaven's" two-hour opener, whose 35 share blockaded ABC's "Fall Guy," which had a disappointing 22-share return. The latter apparently was held back by CBS' rerun of the Burt Reynolds film "Cannonball Run," averaging a 20 share.

Over-all, Wednesday belonged to NBC, whose sudden advance of the lowly "St. Elsewhere" into "sneak week" paid off with a 29 share. That was two points ahead of ABC's "Hotel" rerun and 11 above a busted CBS pilot.

In the Thursday overnights, averaged across the eight A.C. Nielsen Co. metered markets, NBC's "sneak" attack scored again, as "The Cosby Show" and "Family Ties" won their slots with shares of 44 and 32, respectively. ABC's "People Do the Craziest Things" lagged badly with a 15 share, but "Who's the Boss" recovered somewhat to a 23 share.

CBS' effort to have "E/R" ride "M*A*S*H's" coattails in tune-in advertising for its first Tuesday outing proved futile, as viewers opted instead for NBC's "sneak preview" of "The A Team" and ABC's one-hour " 'Three's Company' became 'Three's a Crowd' " special. "Team" and "Crowd" averaged a 32 and 30 share respectively, as "E/R" and the repea of the "M*A*S*H" series finale special posted anemic shares in th upper teens.

NBC built on "A Team" to notc a 33 share for the introductor two-hour "Hunter" movie—although it remained to be see whether the series can carry thos numbers to its normal Frida berth opposite CBS' "Dallas. "Hunter" outgunned ABC's tv series preview for Lindsay Wagner' "Jessie," by four share points.

The "E/R" numbers were quite comedown from the comedy' perch as No. 1 in the Nielsen ratings for the week ended Sept. 1 when it commanded a 36 share.

However, that "E/R" Sunday sp

(Continued on Page 105)

Mondale skirts Fla., Tex. buys

Dallas—Tv stations in two key election states are wondering: Where's the ad windfall they expected from the Democratic presidential campaign?

With less than 1½ months before the Nov. 6 general election, the failure of the Mondale/Ferraro campaign to make local tv buys so far in Florida and Texas has fueled speculation that the Democrats' hopes in those states may be minimal. Stations in those markets said they have received inquiries about available spots, but they have not received any buys.

"We thought by this time, there'd be more political [advertising] on the air," said an official at an Austin affiliate who asked not to be identified.

Officials from the Mondale/Ferraro campaign refused to comment on whether they would make local buys in those two states, which together provide nearly a fifth of the electoral votes needed to win.

Although there is still time to get spots on the air, the absence of the locally placed spots could indicate that the Democrats intend to maximize media muscle in other markets, such as New York and Los Angeles. Texas, with its 29 electoral votes, and Florida, with 21, make up about 18% of the 270 electoral votes needed to win the election.

In Miami, two of three major stations have yet to receive any orders for local advertising from either party. "Mondale is not going to waste his time or money [in Florida] since Reagan has it sewed

Quasar flies off in new direction

By DIANE MERMIGAS

Quasar Co. is launching a $2 million-plus campaign for new products that tries to shift the company's traditional emphasis on dependability to one at the cutting edge of technology.

The multimedia campaign will go toward supporting a hefty array of new products, ranging from a digital compact disc player to microwave ovens.

Created by Needham Harper Worldwide, Chicago, the campaign projects a new creative direction for Quasar, said Thomas Lauterback, manager of advertising communications.

"As a good-ol'-boy company, we've always stressed the quality and reliability of our products, but people did not respond to it," Mr. Lauterback said. "Because of the rapid pace at which new technology is developing, they want to know that whatever products they are buying today will not become obsolete tomorrow."

Quasar, based in Franklin Park, Ill., is hoping the new campaign will double market share for some new audio products, as well as generate sales increases for best-sellers, including videocassette recorders.

The campaign, which accounts for three-quarters of Quasar's total annual ad budget, represents a spending increase over last fall's "Call me when you get a Quasar" new-products campaign.

The new campaign theme "Out of our minds, into your hands," is depicted in print and broadcast ads by an egg being cracked open. Inside are such new products as Quasar's digital audio compact disc player, color tv receiver-monitor, vhs videocassette recorder and stand-alone and over-the-range microwave ovens. This is the first advertising effort for the new products, currently being shipped to stores.

The tv commercials—a 30 and a 60-second version—"use futuristic

VALS ties values, buying

SRI spans the globe

By STEWART ALTER

SRI International, Menlo Park, Cal., plans to launch a new research service internationally in 1986.

The service will divide the world into life-style categories—in the U.S., these are emulators, achievers, experientials and belongers—and relate them to brand-purchase decisions. It will satisfy the need of global marketers for "psychographic" and value research that crosses borders.

Such research has been tried before, but never tied as extensively to specific brands, said James Ogilvy, director of research for the VALS (Values and Lifestyles) service.

"There is no single typology that now exists that will work cross-culturally. Our current VALS typology is very American," he said in New York, where he was a speaker at the Ted Bates Worldwide general managers' meeting.

Some ad agencies, such as Foote, Cone & Belding Communications, Chicago, are conducting their own worldwide research relating attitudes to brands.

Jennifer Stewart, senior vp-head of planning and research at Ogilvy & Mather, New York, confirmed the significance of the development.

"The benefit of VALS is that [it is] marketing-oriented," she said, comparing it to other attitudinal research being done abroad. "I think they would possibly be the

NAAP offers one-stop ads

CHICAGO—The National Assn. of Advertising Publishers is offering retailers a "one-stop forum" for advertising products and services in shoppers and small newspapers throughout the U.S.

"Advertisers can now reach 13 million readers through our members' community newspapers," said an NNAAP spokeswoman. The program, which is being tested, allows advertisers to place their ads in any or all of the newspapers, and the member newspaper has three weeks to run the ad.

The ads cost $25,000 for a full page. For more information, contact: NAAP, 111 E. Wacker Dr., Suite 600, 60601.#

Department stores big ad gainers

NEW YORK—Department stores increased their expenditures in daily newspapers 7.1% in June over the same month in 1983, leading an over-all increase in eight of 16 categories measured for the ADVERTISING AGE Flash Report by Media Records.

Department store spending increased $4.2 million from June, 1983, levels to nearly $64 million in June, 1984, leading all categories in dollar increase.

Among other big gainers were the radio-tv-phonographs-records category, with a 13.6% increase to $12.9 million; alcoholic beverages, with a 34.3% increase to $3.9 million; publishing and media, up 29.8% to nearly $8 million, and cigarets, posting their first category increase this year with a 23% jump to $5.4 million.

Other gainers included the airlines category, up 6.6% to $10.8 million; cameras, photo supplies and services, up 25.7% to $833,547, and headache remedies and sedatives, up from zero last year to $153,618 this year.

Categories showing losses were food stores, down 11.4% to $22.3 million; coffee and tea, down 59.5% to $158,562; soft drinks, down 47.8% to $419,642; soaps, cleansers and polishes, down 32.1% to $136,729; sporting and leisure-time equipment, down 42.7% to $732,159; cosmetics, makeup and manicure products, down 50.8% to $144,145, and new passenger cars, down 1.4% to $9.7 million.

The cold, cough and sinus remedies category showed no activity in June '83 or '84.#

'WSJ' sees slip in ads, circulation

By WILLIAM GLOEDE

NEW YORK—The *Wall Street Journal* is expecting third-quarter ad linage to be flat on an actual basis and down slightly on a per-issue basis, Dow Jones & Co. announced.

The slowdown was blamed on "difficult" comparisons with the third quarter of 1983, when ad linage was up substantially as the recession ended, and on the fact that the third quarter of 1984 had one less business day than the same period last year.

The *Journal* also is anticipating a slip in circulation by year's end. It has been off between 2% and 4% in recent months and is expected to end the year at slightly less than 2.1 million. The circulation softness is due to an increase in both subscription rates, which broke the $100 per-year barrier this year, and single-copy prices, which rose from 35¢ to 50¢ this year.

The softness in ad linage performance is likely to be reflected throughout the newspaper industry this fall for the same reasons as affected the *Journal*, Mr. Morton said.#

Chrysler, Chevy trimming tv ads

By RALPH GRAY
and JESSE SNYDER

Chrysler Corp., joining Chevrolet in shunning high-cost tv advertising, will cut network tv spending by about 8% for model year 1985.

That will pare tv's share of the Chrysler ad dollar by 2% or 3%. In 1983, Chrysler spent 50% of its $200 million media budget in the medium.

At Chevrolet, the auto marketer said it won't renew its sponsorship of the Super Bowl at $1 million a minute (AA, Sept. 24). That won't be the only casualty, said Thomas A. Staudt, general marketing manager.

"The contracts the networks negotiate in some of the sports and entertainment fields lead us to look very carefully at those specific properties," Mr. Staudt said.

Chrysler, too, is looking past the Super Bowl. "Chrysler couldn't afford the Super Bowl last year," said A.J. (Bud) Liebler, Chrysler-Plymouth general marketing manager. "I don't have a lot of million bucks and I can think of a lot more efficient ways of spending those million dollar blocks."

Chrysler is cutting 2% to 3% from tv's share because of "escalating costs and continuing fragmentation of the audience," Mr. Liebler said. The best guess is that Chrysler will divert $7 million to $10 million from tv. For Chrysler-Plymouth, ad spending is shifting to more print, radio and cable tv, Mr. Liebler said. And Dodge division will move more dollars to cable and magazines, said Joseph Caddell, general marketing manager. Both men were in New Orleans at a national press conference.

Chevrolet already has said it will increase cable and magazine ad spending. The magazine share goes from 22% of the ad dollar to 28%, or an estimated $6 million to $8 million gain. Chevy's total ad budget in 1983 was $178 million, of which about $96 million was on tv.

"We've been running very sharp cost in-

Landau probes expand

By ROBERT RAISSMAN

New York—Miller Brewing Co. this week reportedly staged its own investigation into the bankrupt Robert Landau Associates and decided to pay more than $200,000 to suppliers who worked on Miller projects through the sports-marketing agency.

Meanwhile, ABC Inc., listed by Landau as its biggest creditor, is said to be investigating reports questioning ABC's financial dealings with Landau. ABC Inc. is listed by Landau as owed $1.1 million, while ABC Sports is owed $96,000. Neither Landau nor ABC would explain the nature of the debt.

The Miller action comes after reports that Landau had diverted

Feds probe MTV's video license deals

By SUSAN SPILLMAN

The U.S. Justice Department is investigating possible antitrust violations stemming from MTV: Music Television's contracts with five record companies providing for exclusive play of selected music videos on the cable network.

A spokeswoman for the Justice Department, confirming the investigation, said, "There is no way of knowing how long the investigation will take." She added that the department could file suit if antitrust violations are discovered.

An MTV spokesperson said, "We have received a routine inquiry from the Justice Department and we are cooperating fully. We are confident that our agreements with the record companies do not violate the anitrust laws. In particular, we believe the exclusivity provisions are appropriate and valid—exclusivity being a common and accepted feature of entertainment-industry contracts."

In the cable industry alone, for example, both Home Box Office and Showtime/Movie Channel have similar agreements with various movie studios for the exclusive play of selected films.

MTV has contracts that provide for some exclusivity with RCA, MCA, Polygram, CBS and Geffen.

Agency gets long-range strategic assignment

Burnett with edge at H-P?

By CLEVELAND HORTON

Hewlett-Packard, which last week abruptly fired its agency, assigned Leo Burnett USA, Chicago, this week to create a long-range, strategic advertising plan for H-P's personal computer line.

The firing came as somewhat of a shock for J. Walter Thompson USA, San Francisco, the former agency (AA, Sept. 24). It occurred immediately after Angelo Pagano, formerly with Richardson-Vicks, Wilton, Conn., was installed as H-P's new advertising manager.

Although Burnett appears to have won the $20 million H-P account, a spokesperson for the Palo Alto, Cal., computer marketer noted the agency has been assigned only strategic planning.

In the interim, Dancer Fitzgerald Sample, San Francisco, which handles H-P's information systems group, will take over the personal computer account.

H-P, which introduced its first "mainstream" microcomputer only 12 months ago, markets two personal computers. It has risen quickly to the top ranks of the category, competing directly with IBM, Apple Computer and Tandy/Radio Shack.

Industry analysts are reluctant, though, to credit H-P's rapid rise in sales to JWT's work. One analyst estimated that as much as 60% of H-P's personal computer sales were completed by the company's in-house sales team, which relies less on the effectiveness of advertising than on sales through retail outlets.

Some agency insiders speculate H-P will consolidate the personal computer and information systems accounts, presenting a larger agency with an attractive opportunity for domestic and international assignments.#

Heublein drops Scali, in market for agency

Farmington, Conn.—Heublein Inc. and Scali, McCabe, Sloves have terminated their relationship, in which the agency handled advertising for Harvey's Bristol Cream sherry and Don Q rum, with combined billings estimated at $6 million. Heublein said it has no deadline for picking a new agency, but all agencies doing work for R.J. Reynolds Industries, Winston-Salem, N.C., Heublein's parent company, would be considered. Marvin Sloves, Scali's chairman, said the agency is seeking another distilled-spirits account.

New column of news with a regional twist debuts in this issue, on Page 64.

FTC acts on toothpaste ad, razor claims

By STEVEN W. COLFORD

WASHINGTON—Shane toothpaste and its lofty claims for treating herpes, mouth sores and gum diseases have become the target of a Federal Trade Commission complaint charging the product's ad claims were unsubstantiated.

In a separate and unanimous action, the FTC said it will continue to require two clinical tests to support ads for a pair of electric razors marketed by North American Philips Corp. (Norelco) and Sperry Corp.

The companies claim their products can cure or alleviate a shaving-related skin problem among black men.

The Shane case stems from past claims in radio and tv advertising by the Jerome Milton Corp., Chicago, for its $5.95-a-tube Shane toothpaste.

FTC, besides rejecting the gum disease assertions, said the marketer and Jerome Milton Schulman, the product's developer, "deceptively claimed" Shane was superior to other toothpastes in reducing or eliminating plaque and that its use would reduce tooth sensitivity to hot and cold.

Among the spots cited by the FTC was a person-on-the-street-type testimonial from a Shane user who, after only 3½ months, said the toothpaste had performed a "miracle" in her mouth.

The user "had recently visited her dentist and was told that all her bottom teeth had to be extracted," the ad copy said. "Her gums were infected, her teeth were loose and she was sensitive to hot and cold. She started using Shane toothpaste and. . .all her problems were gone. She's even back to enjoying corn on the cob."

The commission scheduled a Nov. 5 hearing for the toothpaste company to appear before an administrative law judge here.

Mr. Schulman, who is president of Jerome Milton, refuted the FTC complaint by saying that his ads make no claims. "All we do is quote dentists and people who use Shane toothpaste," he said. "We get permission from these people to quote their testimonials; we use their names and cities. I don't know why the government wants to pick on me, unless it is against small businessmen like me."

Mr. Schulman, who does his own ads, stopped airing tv spots in all 30 selected markets in December once

SUPERSTUFFED
Arby's

Arby's spuds strut their stuff

Paul Dukas' The Sorcerer's Apprentice serves as musical background for the dancing spuds in Arby's new network campaign breaking next week (AA, Sept. 10). The spots promote the chain's Superstuffed Baked Potatoes. Grey Advertising, New York, is the agency. *(See related story on Page 64.)*

Hearst, ABC offer millions for programs, ads

Lifetime gets lifeline

By SUSAN SPILLMAN

NEW YORK—The troubled Lifetime cable network will overhaul its programing and launch its first consumer advertising campaign in January, with help from a $25 million cash infusion from its parent company Hearst/ABC-Viacom Entertainment Services.

Lifetime's health-oriented programing will be traded in for a 24-hour schedule of "broader-based entertainment and informational shows," nearly all of which will have an interactive element via telephone.

The channel will borrow radio's successful call-in talk show format, said Tom Burchill, the former RKO Radio Network president who was brought in to revamp Lifetime earlier this year.

The interactive element will consist of viewers calling to ask questions, request information or register votes for polling programs.

At least half of Lifetime's schedule will be comprised of new shows, most of which are still in development. Two of the new shows are "Your Money," a call-in show offering money tips, and "America Talks Back," a call-in show in which viewers offer their opinions on issues.

Lifetime debuted in February, the result of a merger between the now defunct Daytime and Cable Health Network channels. Since then, the network's ratings

Folger's perks minus Mrs. Olson

By GAY JERVEY

Nearly 20 years to the day that Mrs. Olson began pitching "mountain-grown" Folger's coffee, Procter & Gamble, Cincinnati, O., is restaging Folger's ground with a new package and an ad effort noticeable for what it lacks—Mrs. Olson.

Now airing in major markets, the new campaign has no spokesperson, but relies instead on a slice-of-life approach that features a ranching family facing the day with Folger's. According to a P&G spokesman, the new strategy reflects the brand's repackaging, rather than any stress between P&G and its leading lady, whose real name is Virginia Christine and whose age the company would describe only as "elderly."

Asked if Mrs. Olson eventually will be phased out, P&G's spokesperson said, "There is really no way to tell," stressing the company has experimented with campaigns minus Mrs. Olson before, and that

Rosenshine to succeed Crawford

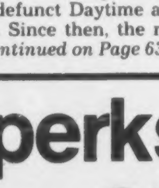
New era at BBDO

By STEWART ALTER

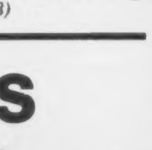
In what was more of a surprise in timing than in substance, Bruce Crawford, 55, has decided to step down as chief executive officer of BBDO International and Allen Rosenshine, 45, has been elected his successor.

Mr. Crawford will have been president-chief executive officer for eight years when he retires on March 31 and assumes the newly created post of chairman until the end of 1985.

Although his decision to step down is not surprising, the timing is. It was only a few weeks ago that he made the decision, he said, which was presented to the regularly scheduled board meeting for a vote this past Monday.



B. Crawford



A. Rosenshine

"I believe a former ceo should stay around for seven or eight months and then get out. I don't think a new ceo needs the last one

Havas gets its U.S. tie via Y&R

By STEWART ALTER

New York—In a single stroke, Young & Rubicam has found a way to double its Marsteller subsidiary's $250 million in billings and the French-based Eurocom S.A. finally has found a long-sought means to reenter the U.S. market.

When the deal is complete, Y&R also will begin to rival JWT Group and Dentsu as the next largest agency group, behind Interpublic Group of Cos.

Although there will be no equity exchange, Marsteller has reached an agreement, effective Jan. 1, to merge with Havas Conseil, one of Eurocom's five European ad agencies. The new shop, to be called Havas Conseil Marsteller, will have $500 million in 1984 capitalized billings.

Eurocom, a holding company 45%-owned by the French government, comprises four local agencies, Havas, Belier, Futurs and Ecom, and an international arm, Univas. (Havas has a strong regional network in France.)

The president-chief executive officer of Havas Conseil Marsteller will be an American, who will not come from Y&R or Eurocom and whose name will be announced soon. Eurocom vp-director general Bernard Brochand is chairman of the merged company.

Mr. Brochand told reporters in France the deal had cost Eurocom very little in the initial outlay. Eurocom will own 51% of the new agency.

The five-office U.S. operation, with $200 million in billings, remains headed by Marsteller U.S. president Louis Magnani, who will be president-chief operating officer of the merged agency in the U.S.

Alain de Pouzilhac, now president-director general of Havas Conseil, becomes president-chief operating officer of the European group, which will include about $300 million in billings distributed in 14 French offices and 13 in other European countries. Marsteller brings a London branch to Havas' network for the first time.

Y&R chairman Edward Ney observed that a size of $500 million in billings was a necessary "mass" for building a major international agency and it was "difficult" for Marsteller to accomplish that growth from the $250 million level.

Marsteller has only $50 million in European billings, distributed through five major and two service-only offices in Europe.

Y&R-France, already the fourth-largest agency in that country, now hooks up with the second-largest, Havas.

This is Y&R's second approach to international expansion through a joint venture in recent years. The first was a 1981 joint-venture agency network, DYR, owned half by Dentsu, Japan, and half by Y&R.

While DYR later swallowed up some of Y&R's less successful agencies internationally, the Eurocom-Marsteller merger includes all of Marsteller's offices.

The second big Y&R joint-venture is CDP International, a network still in the birth stages formed with Collett Dickenson Pearce, with Y&R as a minority shareholder.

There are reportedly no client conflicts and no shared brand assignments yet in the Eurocom-Marsteller merger. The only shared client is BSN, for whom Marsteller handles Dannon yogurt in the U.S., while Havas handles other products in Europe. Other main Marsteller clients include Dow Chemical, Minolta, Beatrice, Exxon Office Systems, R.T. French and Spiegel. Havas' main clients include Air France, Chanel, Meridien Hotels, Peugeot, Woolmark and Israel Tourism.

Spurred by its clients, Eurocom, with billings exceeding $1 billion, has been trying to return to the U.S. following its last disastrous entry in the late 1970s. It acquired Kelly, Nason in 1977, a New York agency whose $45 million in billings dropped precipitously to $13.5 million only two years later, at which point the shop was sold back to its American employes.

Eurocom's Univas came close to forming a link with Scali, McCabe, Sloves, New York, a subsidiary of Ogilvy & Mather International, but that deal fell through in January (AA, Jan. 14).

Sources said part of the reason for Univas' failure to buy a piece of SMS was confusion over to whom SMS would report in the pretzel-like structure of Eurocom.

Known to have approached other U.S. agencies as well, Eurocom reportedly is still looking for an American link for Univas.

Jean-Pierre Audour, Univas chairman, said he will announce a link with a big U.S. agency next month.#

M&R puts big bucks behind wine products

MARTINI & ROSSI, IN A GLASS BY ITSELF

Renfield Importers shunned the traditional "glass and bottle" shot and sought a different kind of atmosphere in this ad for Martini & Rossi vermouth. "The ad has mystery, intrigue, romance," said Frank Iorio, the company's marketing manager. McCann-Erickson is the agency.

By GAY JERVEY

New York—Renfield Importers' new campaigns for its Martini & Rossi vermouth and Asti Spumante sparkling wine demonstrate two growing axioms in the distilled-spirits product category: Winning brands will be those backed by the biggest ad budgets and those that move away from the standard "glass-and-bottle" creative approach.

The campaigns, the first by McCann-Erickson since it snared the accounts from sister Interpublic agency SSC&B in March, will have the largest dollar backing in either brand's history. The creative will spotlight people in action, with closely cropped angles intended to suggest mystery and high living.

Themed "Martini & Rossi. In a glass by itself," the $4 million vermouth campaign represents almost a 23% increase compared with last year's brand expenditures. Designed to appeal to a sophisticated, upscale audience, the campaign will kick off with a combination of full and half-page color spreads in the October issues of *Bon Appetit, Esquire, Life, People, Playbill* and *Vogue*.

The ad depicts the finishing moments of a pool game; a female, crouched, peers over the pool table with one hand on a Martini & Rossi on the rocks. Next to her, leaning in a cool pose, is a male opponent—face unseen—Martini & Rossi in hand.

"The ad has mystery, intrigue, romance," said Frank Iorio, marketing manager at Renfield Importers. "I thought the other executions lacked the mystery that

Cigaret market is burning out, analyst says

By WILLIAM GLOEDE

New York—A group of newspaper advertising executives, already smarting over the loss of cigaret advertising dollars during the past year, last week heard John C. Maxwell Jr., managing director of Ansbacher-Laidlaw here, predict that things are not likely to improve.

"I think, basically, we've probably seen the highs in smoking in this country," said Mr. Maxwell to advertising executives at a Million Market Newspapers sales seminar here.

The cigaret marketers, he explained, are suffering from a health-conscious public, a hungry government and their own pricing.

The doubling of the federal excise tax on cigarets in 1983 from 8¢ to 16¢ contributed heavily to the industry's loss of 4½% of its market that year.

Mr. Maxwell does not expect that the tax, which is scheduled to lapse in October, 1985, will disappear.

The increases in local taxes and in the wholesale prices of cigarets this year will contribute to another 1% to 2% drop in consumption, he predicted.

The brightest spot in the industry is provided by economy brands, Mr. Maxwell said. Durham, N.C.-based Liggett & Myers' generic and private-label brands, when added to Winston-Salem, N.C.-based R.J. Reynolds Tobacco Co.'s Doral generics (which had a 0.5% share in July), Louisville-based Brown & Williamson's new line of generics and private-label brands and the 25-unit, popularly priced brands from RJR and B&W now account for more than 6% of industry sales. The category will grow, Mr. Maxwell believes, but not at the fast rate of the last two years.

"I would expect that sooner or later, you're going to see Lorillard in there, probably sooner than later," Mr. Maxwell said. Philip Morris and American Brands also will be forced to join, he predicted.#

Summer ads portend active fall

By SCOTT HUME

The summer's over and it's back-to-school time for marketers in several product categories, especially soft-drinks, apparel, fast-food and cameras.

New campaigns for several products and high viewership during the Olympics combined to make August's adWatch survey of advertising recall a record breaker, producing significant gains or losses in advertising awareness for 16 different products.

As the third fiscal quarter approaches, the battle for top-of-mind awareness has become closer in some product categories, while in others, leaders are threatening runaways. Either way, last month's survey suggests that it's going to be a fall selling season worth watching.

The effects of the Los Angeles Summer Olympics can't be ignored.

The three advertisers that each registered at least a whopping 9 percentage-point gain in awareness last month were the games' official fast-service restaurant (McDonald's), official outfitter (Levi Strauss) and official airline (United).

The official 35mm camera (Canon) and soft drink (Coca-Cola) didn't do badly either.

Advertisers whose recall shares dropped last month most often were these official sponsors' competitors.

Those results match the findings of Ad Age's earlier survey of Olympic advertiser awareness

Grocery Marketing

John Craig

Popularity of premium desserts, sweets soars

By Mary McCabe English

One of the hottest stories at the Food Marketing Institute's convention this year was the return of sweets and desserts to prominence on the grocery scene as one of the fastest growing new product categories.

In the marketplace, this trend translates to all kinds of premium ice creams and frozen novelties, exotic sorbetto and gelato, super-rich cheesecakes and candy, specialty cookies, decadently dense brownies and, while we're on the subject, chocolate, chocolate and more chocolate, running the gamut from dark to light to white.

Sweet stuff is *in*.

So, what, you might ask, has happened to the fitness movement. Have Americans forsaken sodium, caffeine and cholesterol counts for the hedonistic highs of chocolate mousse cake, caramel pecan flan and candied walnut apple pie smothered in sour cream custard?

Not at all, say researchers who track food consumption patterns. In fact, FMI reports in its 1984 update of "Trends/Consumer Attitudes & the Supermarket," "Consumers continue to be generally very concerned about the nutritional content of what they eat. This year, 63% indicate they are very concerned, while another 32% say they are somewhat concerned about nutritional content."

MRCA Information Services, the Northbrook, Ill., company that tracks American eating habits through its Menu Census Service, says Americans actually are eating less dessert. The news lies in a shift in the quality of desserts and sweets being consumed. The catchwords here are premium and pricey.

The popularity of such treats seems to stem from the same socioeconomic factors that have caused so many other changes in today's marketplace.

With more women working, there is less time for home baking and more demand for quality sweets that can be carried home. And although their price tags might knock the socks off the average food budget, travel, social mobility and the media have predisposed many consumers to a myriad of sophisticated new tastes.

In addition, expensive food treats are still an affordable self-indulgence when considered against the expense of other splurges.

Many people are eating less dessert and being more scrupulous about the nutritional value of what they do eat, so they may feel justified in rewarding themselves when they do indulge, observers say.

"We've been investigating just this subject . . . and a number of food editors have told us that two of the most popular topics in their magazines are dessert and diet, so we're really in this dichotomy of things," a Pepperidge Farm spokesman says.

You won't get any argument from *Family Circle* food editor Jean Hewitt.

"The best selling stories in the magazine are dessert stories and diet stories," she says. "And the biggest thing of all is this absolute mania for chocolate."

Research shows that when

Tracking a decade of taste buds

Whither goest desserts? That's what MRCA Information Services tries to find out. The Northbrook, Ill., company's Menu Census Service has tracked distinct shifts in dessert consumption patterns between 1973 and 1983, with most continuing through 1984, according to I.J. Abrams, vp-special projects.

For example, in the cold sweets category (which includes ice cream, pudding, gelatin, frozen novelties and yogurt), over-all at-home consumption in 1983 declined 13% from 1973. The category was pulled down by a 40% drop in pudding and gelatin consumption as well as a 20% drop in regular ice cream eating during the 10-year period.

Fighting the dip was the increasing popularity of frozen novelties, premium ice cream and yogurt, which grew even more in away-from-home consumption.

Although over-all away-from-home consumption of cold sweets has grown slightly, the big growth within the category has come from ice cream consumption (much of it premium), which grew nearly 20%.

In the baked or fried products category (which includes cakes, pies, doughnuts, brownies, cookies and individually wrapped items), over-all at-home consumption declined about 20%. Cakes purchased from bakeries were down about 40%; frozen cakes, 30%, and mix cakes, 20% to 25%, although scratch cakes have held at 1973 levels.

Pies were down about 30%, with scratch pies declining least.

At-home cookie consumption was down by as much as 20% but has been creeping back up and is holding at about 10% less than 1973 levels. At-home brownie consumption is up 15% over 1973.

Individually wrapped cakes have experienced significant up and down movement for at-home consumption but, according to Mr. Abrams, regained 1973 levels in the past several months.

Both at-home and away-from-home consumption of doughnuts, sweet rolls and coffee cake has grown some 30%.

Over-all, the consumption of baked or fried products away from home has grown about 10%. Cookies dominated this growth, shooting up nearly 30% and still climbing.

MRCA also tracks fruit consumption as part of the desserts picture, and Mr. Abrams' data show 10% growth in at-home fruit consumption; 50% growth in away-from-home consumption. Canned and frozen fruit consumption is down. Dried fruit consumption is up, but the biggest increases have come from fresh fruit consumption.

The biggest gainers for at-home consumption have been apples and bananas, up 20%; grapes, up 180% and climbing (probably because the increased acreage devoted to grapes far exceeded long-term wine-making needs anticipated some 20 years ago, Mr. Abrams says), and melons, 20%.

Away-from-home grape consumption has grown 300%. Strawberries, apples, melons and citrus also have experienced substantial gains. The peach is the only fresh fruit that hasn't risen in away-from-home consumption, and Mr. Abrams speculates that this could result from the increased availability of similar varieties, such as nectarines. *—M.M.E.*

Premium desserts

(Continued from Page 11)

Americans make their own desserts and sweets, they rate convenience nearly as high as chocolate.

Small wonder, then, that the top dessert entry in *Prepared Foods* magazine's eighth annual retail new products contest was Pillsbury's Spread 'N Bake fudge brownies, refrigerated brownie batter that requires home bakers to do nothing more than pop the contents into a greased pan and stick it in the oven.

Patricia Gorman, coordinator of the competition, says *Prepared Foods* editors have noticed a definite swing toward richer, more gourmet desserts. She says the over-all quality of entries in the contest has been improving steadily and points to the increasingly frequent combination in new groceries of ingredients that satisfy both good nutrition and the sweet tooth.

"It's interesting in line with this subject that granola bars, for example, are now filled with stuff like chocolate chips, coconut, nuts and honey, which may be all-natural but are certainly not low in calories," Ms. Gorman says. "This also applies to many of the yogurts."

This yen for the sweet and the good-for-you all at once is at least partially responsible for one of the summer's trendiest dessert hits—Tofutti, an ice cream-like confection made from the soybean derivative tofu, but, unlike ice cream, devoid of cholesterol, lactose or butterfat.

At 128 calories per 4-oz. serving, Tofutti, manufactured by Tofu Time Inc. in New York and distributed nationally by Haagen-Dazs, also boasts only about half the calories of ice cream. At $2.49 per hard-pack pint, it—like many of the "new" desserts—also will help cure any weight problem your wallet might have.

"Because of the trend toward simplifying meals, with fewer courses and less dessert, many marketers have begun compensating by targeting the sophisticated sweet tooth of upscale customers with indulgent or specialty dessert entries like super-premium ice cream and cakes," says a spokeswoman for Pillsbury, whose Haagen-Dazs ice cream also joins the wallet-lightening category.

"The decline of the average household's size has also prompted marketers to offer small size desserts such as individually packaged pie slices and small portion items," she says.

Kitchens of Sara Lee, Deerfield, Ill., is revamping its product line "to stay in sync with the way the world is moving," says Richard J. Sharoff, senior vp-general manager, retail division.

"I wish I could say the dessert market is staging a miraculous recovery, but I think what's really happening is that it's changing in composition because of all the life-style and demographic changes we've seen in the past several years," he says.

"At the same time, the growth of health and diet consciousness hasn't necessarily helped the dessert market, but the trends have converged in that people are more selective in their dessert-eating patterns. They're not having dessert every night, but when they do, they want it to be top quality, and they're not discouraged by calories."

Although cheesecake has been a traditional cornerstone of Sara Lee's product line, the company's new Elegant Endings cheesecake was a response to the changes Mr. Sharoff describes, as were its croissants and the premium ice cream Sara Lee has had in test market in the Midwest for a little more than a year. And, Mr. Sharoff says, the company has plans "to do more along those lines to respond to that change."

In contrast to Sara Lee's evolution, six-year-old Ms. Desserts Inc. in Baltimore is one of the many small companies that have cut their corporate teeth on the premium dessert market. Unlike the others, however, Ms. Desserts carried off the grand show, product line and domestic food awards at the 30th annual International Fancy Food & Confection Show sponsored by the National Assn. for the Specialty Food Trade in Washington last June.

According to Jeff Peisach, a Ms. Desserts partner, the company distributes about 35 items, including several chocolate cakes, carrot cake, brownies, "blondies," pecan pie and deep-dish apple pie in the Washington-New York corridor and expects sales to hit $3 million this year.

Its customer list includes gourmet shops, restaurants, natural food stores and large department chains including Bloomingdale's and John Wanamaker.

"Even during the recession our business was growing 40% a year," Mr. Peisach says. "We came to the conclusion that people saw desserts as affordable luxuries. I think, too, it's part of the whole quality thing that started around the late 1970s when Haagen-Dazs ice cream got so big, and I think that feeling's continued."

Ice cream has been a major ingredient in the dessert market's metamorphosis, and its development as an individual category has left behind the simple world of vanilla, chocolate and strawberry for a mind-boggling galaxy of flavors, textures and mix-ins. If you believe the statistics, Americans don't seem to miss the old days one bit.

According to the Milk and Ice Cream Assn., a dairy trade group, nearly 879 million gals. of ice cream were made commercially in the U.S. last year, a 3% increase over 1982 and enough to keep Americans in first place for worldwide total ice cream consumption.

The total 1.2 billion gals. of frozen desserts made here in 1983 also included ice milk, sherbet, frozen yogurt and assorted ices, and Americans also lead the world in consumption of these items. Americans consumed 20.9 quarts of ice cream and related products per capita in 1983 and spent approximately $1.9 billion on the products.

Frozen novelties, which fall into this category, are a big growth area in the current sweet-stakes, with all manner of iced confections finding their way into grocery freezer cases. For example, the Mexican food craze inspired one enterprising executive at Jack & Jill Ice Cream Co. in Philadelphia to invent the Choco Taco, a taco-shaped cone filled with vanilla fudge ice cream, dipped in chocolate and coated with peanuts. It should be turning up across the country soon.

A General Foods spokesman says a major factor in the popularity of such items is convenience, an element the White Plains, N.Y., company believes will ensure the success of its newest entries in this category—Jell-O Fruit & Cream dessert bars and Jell-O Gelatin Pops. General Foods' Jell-O Pudding Pops became available nationally in mid-1983 and since have done more than $100 million in business at retail.

Convenience is also the prime mover behind San Francisco-based Castle & Cooke Foods' Dole Fruit 'N Juice bars, a frozen fruit novelty. Strawberry Fruit 'N Juice bars won top prize in the snack category of Prepared Foods retail new products contest, and contest coordinator Ms. Gorman says that despite the excitement over rich sweets, the combined convenience and lightness of products of this type are definite pluses in today's dessert market.

Gourmet candy as a market segment also is growing.

"We saw lots of candy at our June show, but that's always the case . . . I think what's worth mentioning is that we're seeing more interest in very expensive candy," says Jean Frame, executive director of the National Assn. for the Specialty Food Trade.

The willingness of Americans to pay premium prices for their candy is obviously sweet news to

Desserts and the female buyer

Females are still the principal buyers in American households, according to Simmons Market Research Bureau, but their interest in buying various types of dessert products varies according to the buyer's demographics. Here are some common dessert categories and what portion of various female buyer groups regularly purchase them.

Source: "Trends: Consumer Attitudes & The Supermarket," Food Marketing Institute, 1984

confectioners such as Reading, Pa.-based Godiva Chocolatier, whose sales are up, according to company president Tom Fey. Mr. Fey relates what appears to be happening to sweets consumption patterns these days to previous observations in the fast food business.

"When I worked in fast food, I used to marvel at the people who would order diet soda and french fries," Mr. Fey says. "It didn't make sense until I realized that these people were aware of the nutritional aspects of what they were eating and that they were willing to make the tradeoff of having a sugar-free soft drink so they could enjoy the taste of french fries. I think the same sort of thing's happening in the world of desserts. People are willing to eat a tomato stuffed with tuna so they can have chocolate mousse cake for dessert."

The lowly cookie also has taken on new dimensions. Specialty cookie shops have become standard fixtures in many shopping malls, and the so-called cookie wars have chronicled the emergence of "just-like-home-made" package cookies, the main players being Procter & Gamble's Duncan Hines brand; Frito-Lay, Dallas; Keebler Co., Elmhurst, Ill., and Nabisco Brands, New York.

Company spokesmen would not discuss specific sales, but one industry spokesman credits the new cookies with boosting package cookie sales for the first time in several years.

"Within the industry, sales were pretty flat or even down, but for the first time in a number of years we've begun to see tonnage increases among our members," says Michael Brown, president of the Biscuit and Cracker Manufacturers' Assn. "For the first quarter of 1984, we saw a 6% to 7% increase, and all signs are that it wasn't just a fluke."

It's no fluke, either, that dessert ingredients such as Hershey Foods Corp.'s cocoa and Borden's Eagle Brand sweetened condensed milk continue to do well at retail despite a decline in home dessert making. Spokesmen for these companies say the circulation of recipes that are in tune with contemporary tastes is an effective marketing tool.

For example, Borden featured a recipe for ice cream made with Oreo cookies next to a cents-off coupon for Oreos on cans of Eagle Brand sweetened condensed milk. Annie Watts, director of Borden Kitchens in Columbus, O., says other attempts to tie the 127-year-old product to current dessert trends are evident in the 128-page "Classic Desserts" book the company released this month.

"For instance, we've linked Eagle Brand with other popular ingredients such as chocolate and fresh fruit," Ms. Watts says.

Premium sweets are expected to maintain a conspicuous niche in tomorrow's marketplace, too.

"We believe premium quality desserts are the thing of the future and the whole market is moving up the premium quality price scale," Sara Lee's Mr. Sharoff says.

"The way in which the ice cream market has evolved is not atypical from the way we expect the whole dessert market to evolve . . . from a lot of low-quality belly stuffers to high-quality products that people won't eat every night but that will meet their demands for quality and taste when they do."

All of which promises to give new meaning to having your cake and eating it too . . . .

Home baking falls

Americans are eating fewer desserts of their own making, Borden Inc. reports.

Drawing on data compiled for the Columbus, O., company by the National Eating Trends Service of NPD Research, Borden Kitchens director Annie Watts says the percentage of American households making desserts at home during any two-week period has declined significantly during the past two years.

Cake baking, for example, has dropped as a household activity from 32% of households in 1982 to 27% estimated for 1984. Cookie baking has shrunk as an activity from 20% of households in 1982 to 16% in 1984. Gelatin dropped from 18% to 13%.

Only pies and brownies showed some deviation from a generally declining rate of activity. Pie baking actually increased in households from 1982 to 1983, growing from 18% to 20%, but it then dropped to 17% in 1984. Brownie baking dropped from 6% of households in 1982 to 5% in 1983 and then held steady in tests this year.

In general, Ms. Watts says, dessert preparation from scratch is declining, although dessert preparation that incorporates convenience ingredients is holding at 1982 levels.

The NPD report also found that a majority of the pies and cookies prepared at home are made from scratch, although cakes and brownies are heavily skewed to mixes.

Ms. Watts says cakes, pies and cookies are the most popular desserts prepared at home. Over-all, chocolate is the most popular flavor for homemade desserts. *—M.M.E.*

adWatch

(Continued from Page 3)

(AA, Sept. 17). That study found that 83% of adults polled recalled having seen, heard or read ads touting Olympic sponsorship.

Good news for McDonald's

Again matching the previous survey's results, last month's adWatch reserved its best news for McDonald's Corp. With its new "It's a good time for the great taste" theme, scratch-card game promotion and multi-million-dollar network buy to promote both, McDonald's advertising last month scored the highest in unaided awareness. Even better, it boosted by 10.8 percentage points its share of responses in the fast-food category.

The adWatch survey is a joint project of AD AGE and SRI Research Center, Lincoln, Neb. Advertising awareness is measured by asking a nationally projectable sample of consumers to name the advertising that first comes to mind over-all and in 22 product and service categories from all they have seen or read in the previous 30 days.

In August, 1,255 adults were questioned by phone. Under adWatch methodology, an increase or decrease of 2.8 percentage points in a given month is considered statistically significant and attributable to more than sampling variation.

Last month's 10 most frequently recalled advertisers without regard to product categories were (in descending order) McDonald's, Coke, Pepsi, Miller/Lite, Budweiser/Bud Light, Wendy's, Levi's, ABC's advertising for the Olympics themselves, Burger King and Ford Motor Co.

But the more important recall shifts took place within the individual product categories:

- McDonald's 10.8 point leap—to 50.3% of first responses from 39.5% in July—in the **fast-food** category was the best performance of the month.

It also was McDonald's largest single-month gain ever, and gave Big Mac its largest share of first mentions in the category since adWatch was inaugurated in April, 1982.

McDonald's gain was its competitors' loss. Top-of-mind awareness of Burger King's advertising fell 8.1 percentage points, dropping from 20% of first mentions in July to only 11.9% in August. Wendy's was a close third with 11.7%, down slightly from 14% in July.

But does higher advertising awareness automatically mean greater sales?

Not according to one market researcher. Middletown, N.J.-based Restaurant Trends' monthly survey of restaurant-chain sales shows a different rank order last month. RT figures show Burger King's real sales (adjusted for price increases) in August up 15% over the year-earlier level; Wendy's sales were up 11%; McDonald's were up 9%.

- Say what you will about them, those commercials for Levi's corduroys and 501 jeans caught consumers' eyes and stayed in their memories. Levi's share of awareness in the **apparel** category nearly doubled, rising to 21% of first mentions in August from 11.2% in July.

Sears, an Olympics advertiser but not a sponsor, held the No. 2 spot with 5.5% of first mentions in this survey.

Gaining the No. 3 spot for the first time in awareness of apparel advertising was Lee. Its catchy "Don't you wish everything fit like Lee?" campaign was named first by 3.6% of respondents, a strong enough showing to bump Jordache to the No. 4 spot (3.3%), just ahead of J.C. Penney (3.1%).

- The Olympics provided an especially strong competitive edge for United, the games' official airline, which moved back into the No. 1 spot in the **airlines** category for the first time since March.

The sponsorship and some clever creative helped boost United's share of first mentions 9.7 percentage points to 20.6% from 10.9% (and third place) in July. American Airlines, which had been tied for No. 1 with 14.4% in July, dropped 2.9 points and fell to an 11.5% share and second place. Eastern Air Lines lost more than one-third of its share of first mentions, falling to 9%, 5.4 points below its 14.4% in July.

- Tennis wasn't an official Olympic sport, but Chris Evert Lloyd's Lipton commercials that ran during the games were noticed. Lipton's share of first mentions in the **tea** category rose 6.2 points to 48.9%, compared with 42.7% in July.

Nestea (7.6%) and Tetley (3.7%) once again had to be content with leftovers.

- Canon, the games' official 35mm camera, last month made its strongest move on Kodak, traditional leader in the **cameras and equipment** category. With a 5.8 point increase to a 22.6% share, Canon was closer than it ever has been to Kodak, which held steady with a 27.1% share.

The big loser was Polaroid, which dropped out of the category's top three for the first time. Its advertising was named first by only 3.7% of the sample in August, 4.6 points below its July score. Polaroid's plummet allowed Nikon to move into the No. 3 spot (with 4.8%) for the first time. Minolta was No. 4 (4.3%).

By the way, Fuji—maker of the official film, photographic papers and photo-processing equipment—registered only a 1% share.

- Coca-Cola finally made its move after months of watching Pepsi's share of awareness rise on the strength of Michael You-know-who.

In August, 27.6% of respondents named Coke's ads first when asked to name **soft-drink** advertising they had seen. That share was 5.6 points better than Coke's 22% score in July.

It moved Coke close once again to Pepsi, whose awareness fell 3.2 points to 32.5%.

Also hurt in the ongoing cola war last month was innocent bystander 7UP. It lost 3.1 points of its share to Coke, dropping from 9.3% in July to 6.2% last month.

Worth noting are last month's No. 4 and No. 5 in the category, Diet Coke and Sprite. That gave Coca-Cola Co. the unparalleled distinction of having three brands among the top five in awareness in a single product category.

- Things have been quiet in the **cars & trucks** category for several months, but Ford suddenly boosted its advantage over Chevrolet to better than 2 to 1 last month.

Awareness of Ford's advertising rose 5.2 points last month to 27.6% of first mentions, while Chevrolet could muster only 13.5%. Toyota held the No. 3 spot with 9.2%.

Much of Ford's surge can be attributed to advertising for Ford's Mustang, specifically named by 5.9% of respondents. That means Mustang had better consumer awareness last month than any advertising for Chrysler.

Perhaps Lee Iacocca should have returned as on-camera spokesman earlier.#

For additional information or data, contact: Gary Gabelhouse, SRI Research Center, 301 S. 68th St., Lincoln, Neb. 68506. Phone: (402) 489-0351.

THE ADVERTISING MARKET PLACE

The University of Oklahoma School of Journalism and Mass Communication is seeking applicants for four tenure-track positions to start August 1985.

Teaching positions include specialization in advertising, in public relations and in television/film. In addition to specialty, candidates also must have expertise in another area such as graphics, media management or energy communications. Opportunity exists for a half-time administrative appointment as well.

M.A. required with substantial recent media experience. Ph.D. preferred, with quantitative research skills and at least one year of media experience.

Salary and rank negotiable.

We are looking for people with ideas, enthusiasm and initiative who are dedicated to quality growth and able to develop funding opportunities. Successful candidates must have a demonstrated capacity to teach well, to publish and to build ties with the mass communications industry.

Located 20 miles south of Oklahoma City, the School is expanding. Sequences accredited by ACEJMC are Advertising, News Communication, Professional Writing and Public Relations. Other areas include the M.A. program, radio, television, film studies and teacher certification. Majors number more than 1,000.

Application deadline December 1, 1984. Send letter of application, curriculum vitae, and names, addresses and phone numbers of three references to:

Elizabeth S. Yamashita, Director
H.H. Herbert School of Journalism and
Mass Communication
University of Oklahoma
860 Van Vleet Oval
Norman, OK 73019

The University of Oklahoma is an Equal Opportunity/Affirmative Action Employer. Women and minorities are especially encouraged to apply.

SENIOR CREATIVE DESIGNER

We have an immediate opening for a Senior Designer within our Creative Design department.

The individual we are seeking will be a self-motivated, disciplined, conceptualizer who is thoroughly knowledgeable with layout design, type specing, and directing photography. Must have abilities to communicate articulately and work well with marketing and communications professionals and others inside and outside the Amway organization.

Ideal candidate will have 5 or more years agency or corporate experience in print media and a supporting portfolio. Individual will be personally involved with a wide range of quality consumer products that include: electronics, cosmetics, jewelry, laundry care, car care, food supplements, and many more.

We offer an excellent salary commensurate with experience; complete benefit package including profit sharing and relocation to desirable Western Michigan. Please send your resume with current salary information in confidence to:

An Equal Opportunity Employer M/F

ADVERTISING SALES MANAGER

Cars & Parts Magazine, the largest consumer magazine in the car hobby field, is looking for a strong space salesperson to head our Advertising Department. We need someone who is experienced enough to manage our already sizeable base of advertisers and aggressive enough to make the personal sales calls and the telephone calls to sell new advertisers. You'll need several years experience in either consumer or trade magazine sales. Familiarity with the collector car and automotive aftermarket industries would be a plus.

We're located in south central Ohio, just north of Dayton. Cars & Parts is published by Amos Press Inc., publishers of consumer publications for over one hundred years. We offer an excellent salary and benefit package for the ad salesperson with a solid track record and the ambition to advance.

Send resume to:

Personnel Manager
Box 783
Sidney, Ohio 45367
Re: Ad Manager

ACCOUNT SUPERVISOR

A major mid-west agency (not in Chicago) seeks an Account Supervisor to handle several brand assignments for a leading national package goods client. Outstanding growth opportunity. A minimum of 5 years experience required, including agency and package goods responsibilities. Compensation commensurate with experience.

Send resume and salary requirements to:

Box 0297, ADVERTISING AGE
740 Rush St., Chicago, IL 60611

DIRECT RESPONSE ACCOUNT EXECUTIVES: TAKE A TEST

NEWSPAPER

Nets' top-rated series hold off CBS' 'Mistral'

By JAMES P. FORKAN

New York—The Big 3 tv networks' "premier week" started with a bang.

The fall season's first miniseries, CBS' $14 million "Mistral's Daughter," dominated the first night's combat and beat most of the second night's opponents before succumbing to ABC's heavily promoted "Dynasty" return and Elizabeth Taylor's "Hotel" guest shot.

"Mistral" concluded with a disappointing 16.3 rating/26 share nationally (and thus a 17.3/27 three-night average), proving that just as tv movies tend to outdo theatricals head-to-head, so miniseries can be beaten by regular series with loyal followings. After the first hour on Sept. 26, when ABC's "Fall Guy" and NBC's "Highway to Heaven" were virtually tied, ABC soared to a 22.2/34 with "Dynasty" and 18.7/31 with "Hotel."

ABC easily won Wednesday, with CBS' "Mistral" finale slightly ahead of NBC's series. In the three-night season to date, NBC averaged a 17.1 rating, one-tenth of a point over CBS as ABC lagged with a 15.9.

In the fall ratings war's opening volleys on Sept. 24, CBS claimed victory on Night 1, with a three-hour installment of the steamy "Mistral" averaging an 18.2 Nielsen rating and 29 share, ahead of NBC and ABC.

NBC, whose "TV's Bloopers & Practical Jokes" for the second week beat ABC's "Call to Glory" from 8 p.m. to 9 p.m. (ET), pulled much closer to CBS with some sexy ammunition of its own in the next two hours—the tv movie "Secrets of a Married Man." The latter had a 17.5/27.

ABC's "Monday Night Football" scored a 15.5/27 average, its second-lowest Nielsen since its season began on Sept. 3. "MNF," with a 16.7/31 average after four games, was held back not only by the double-barreled, female-appeal counterprograming but to a degree by clearance snags. ABC had 95% clearances for "MNF" and 97% for "Glory," versus 99% for its rivals.

NBC won Tuesday night on the strength of a two-hour "A Team," whose 34 share put severe dents in the performances of CBS' "AfterMASH," "E/R" and an hour of "Mistral's Daughter" plus ABC's "Foul-Ups, Bleeps & Blunders," "Three's A Crowd" and "Paper Dolls." CBS' first pairing of the medic-comedy duo "AfterMASH" and "E/R" was held to a 20 share, as ABC's shows hovered in the 21-to-24-share range, "Crowd" faring best.

"Mistral," shot mainly in France,

$1.25 a copy, $52 a year, $95 two years. Add $99 per year for air delivery to Europe & Middle East. Add $31 for surface mail to all other foreign countries. WILLIAM STRONG, vp-circulation; ROGER Di GREGORIO, fulfillment director; HEIDI SCHULTZ, senior circulation manager. Four weeks' notice required for change of address. Address all subscription correspondence to circulation department, Advertising Age, 740 Rush St., Chicago, Ill. 60611 (312) 649-5200.

Ad Age to run newspaper linage

With this issue, Advertising Age begins publishing, on a continuing basis, monthly comparative total advertising linage figures of U.S. newspapers supplied by Media Records, New York.

The first of this series, May 1984 vs. May 1983, is on Page 66. June and July data will appear in upcoming issues and subsequent monthly data will follow.

The newspapers listed are subscribers to Media Records. Figures for those on full-service levels are measured, audited and standardized by Media Records. For newspapers that subscribe to Media Records' National Advertising Report, where various ad classifications (such as retail, financial or classified) are not measured by Media Records, the newpapers provide the linage figures to arrive at a total advertising figure.

Though in July most newspapers adopted the Standard Advertising Unit inch unit (on a six-column format), as opposed to lines, Media Records will continue to provide data in linage to be comparable with 1983 figures.

In addition, some 1984 linage figures have been converted to prior 1984 column formats, also to maintain comparability. The "Conversion Methodology" shown with the linage figures explains this procedure.#

Japanese car marketers pitch luxury, trucks

By BOB MARICH

The leading Japanese-import-car marketers, breaking advertising this month to introduce their 1985 models, are stressing luxury and performance, plus small trucks—their one product not restricted by quotas.

The three top import makers—Toyota Motor Sales USA, Torrance, Cal.; Nissan Motor Corp. USA; Carson, Cal., and American Honda Motor Co., Gardena, Cal.—are all pushing high-price luxury models. The strategy is the only alternative for growth—to raise average selling prices of their cars—because voluntary import quotas limit Japanese sales to 1.85 million units.

An American Honda tv spot pictures a new Accord model, the four-door SEI, pulling up to a fancy restaurant, touting the luxury and comfort of standard leather seats and performance of a fuel-injected engine. Toyota's Cressida and Nissan's Maxima are the luxury standard-bearers at the other two companies.

Toyota is plunging into the performance area with the Corolla GTS. The car's engine has four valves per cylinder (instead of the usual two), a high-performance design feature. Tv commercials cultivate a speedy image by portraying the GTS at a drag-racing track, said Jack Collins, Toyota national advertising manager.

Beyond emphasizing luxury and performance, the Japanese car makers are sticking with their existing ad themes.

In 1983, Nissan ad spending reached $86 million via William Esty Co., New York. Toyota's budget, via Dancer Fitzgerald Sample, Torrance, Cal., was $80 million, according to Leading National Advertisers.

Honda spent $40 million, via Needham Harper Worldwide, Los Angeles. Honda's import quota is 360,000 units, but a U.S. assembly plant produced 150,000 units this

(Continued on Page 94)

Sweeps, ads back food group

Beatrice promo set

Chicago—Beatrice Cos.' U.S. food group is preparing a national campaign and consumer promotion for January, involving a variety of the group's brands.

The campaign, considered a "follow-through to the Olympics," one source said, is expected to involve both regional and national Beatrice food brands and will include a sweepstakes promotion.

Beatrice would not comment on the effort except to say that, like the corporate-identity campaign conducted during the Winter and Summer Olympics, the promotion will be supported with advertising. Flair Communications will handle the bulk of the promotion.

Beatrice has converted its heavyweight corporate marketing department, which conducted the corporate-identity campaign, into a marketing department for its U.S. foods groups. This is part of the latest reorganization (AA, July 2) of the six Beatrice groups—formed in the 1983 marketing-oriented restructuring—into three major business segments: U.S. food; international food, and consumer goods. The marketing department will direct future corporate campaigns, too, but will concentrate on the U.S. food group.

Beatrice earlier said marketing efforts in the U.S. food segment would be "supplemented" by the corporate marketing services staff.

Among the executives now involved in the U.S. food group are Harold Handley, director of marketing; Patrick Kane, director of

(Continued on Page 94)

Crain slates 'City & State'

New York—Crain Communications Inc., publisher of Advertising Age, will begin publication of a new tabloid newspaper focusing on public finance in January.

Called *Crain's City & State*, the new publication will report on the financing of local and state government.

It will be published in 10 editions in 1985, with Jan./Feb. and July/Aug. combined into single issues.

At first, circulation will be controlled, with 30,000 copies of the newspaper mailed to the chief executive officers of all 50 states, mayors of the 1,000 largest U.S. cities and key department heads, legal officials, state and city legislators and financial people. Roughly 8,000 copies will be mailed to Wall Street investment bankers who deal principally in state and municipal finance.

Stephen Gilkenson, publisher and editor-in-chief of *Crain's City & State*, said the publication intends to convert to paid circulation "as soon as possible."

Subscription rates will be $10 annually, and special promotional discounts and sampling campaigns will be used to achieve that goal, he said.

"There are a number of books out there that focus on how state and city governments are spending money, but nobody focuses strictly on the financing of public operations," explained Michael Clowes, editor of *Crain's City & State*, and its mother publication, *Pensions & Investment Age*. "We'll focus on the financing issue, first and foremost."

The publication intends to "target and identify a relatively small number of companies that need to advertise to this market," Mr. Gilkenson said.

Among those companies, Mr. Gilkenson said, will be investment banking houses, office and business equipment suppliers, automotive fleet suppliers and municipal bond insurers.

Mr. Gilkenson said the publication also intends to develop a classified help-wanted section.

Advertising page rates for *Crain's City & State* will be $5,040 for a tabloid-size b&w ad.

The newspaper has published two prototypes, with a third scheduled to coincide with the annual meeting of the National League of Cities in Washington.

S. Gilkenson

B. Bisson

Mr. Gilkenson was publisher and editor-in-chief of *Pensions & Investment Age*, another Crain Communications publication, before his appointment at *Crain's City & State*.

Bill Bisson, ad director for *P&I Age*, will assume the post of publisher.

Mr. Gilkenson will assume the new position of publishing director of *P&I Age*.#

Buck gets Crain post

Detroit—Phillip Buck has been named ad director of *Crain's Detroit Business*, a newsweekly scheduled to debut in early 1985.

Mr. Buck had been Detroit ad representative for *Automotive News* since 1972. *Crain's Detroit Business* will provide timely local business news for business leaders in Wayne, Macomb, Oakland and Washtenaw Counties, said Keith Crain, vice-chairman of Crain Communications Inc. and publisher of the new weekly.

Peter Brown, a *Detroit Free Press* reporter, has been appointed editor of *CDB*.

Crain publishes 23 magazines and papers including Advertising Age, *Automotive News*, *AutoWeek* and *Monthly Detroit*.#

CORRECTIONS & CLARIFICATIONS

- A chart with a story about newspapers in Singapore (AA, Aug. 13, P. 38) should have listed the circulation of the *Lianhe Zaobao* newspaper as 190,000. Also, the circulation of the *Lianhe Wanbao* should have been 80,000, and the cost of a b&w page ad in the *Straits Times* should have been $11,200.
- The caption for a frame from a tv spot for WGN, Chicago, should have identified Dawson, Johns & Black, Chicago, as the agency (AA, Sept. 24, P. 3).
- Photos depicting two new Yardley of London products were inadvertently switched (AA, Sept. 27, P. 1). Pictured here is Black Label, a men's cologne. The other product, shown in the Sept. [illegible] issue, is Love Notes, a fragrance aimed at more sophisticated teens and young women.

Linage figures have been provided by Media Records for the exclusive publication of Advertising Age. They may not be reprinted or published in any form without explicit permission from Media Records. All newspapers represented are subscribers to Media Records. For those newspapers that subscribe to Media Records National Advertising Report Service, total advertising linage shown were provided by the newspaper to Media Records and included in this compilation.

CONVERSION METHODOLOGY

Due to the introduction of the SAU 6 column format, Media Records applies the following conversion methodology to report comparable figures (1984 month vs. 1983 data) for newspapers that changed column formats in 1984. These newspapers are indicated with an asterisk (*).

7 column tabloids which have adopted a 5 column tabloid format are converted back to the original 7 column format.

8 column broadsheet standards which have adopted a 6 column broadsheet standard format are converted back to the original 8 column formats.

9 column broadsheet standards which have adopted a 6 column broadsheet standard format are converted back to the original 9 column formats.

Motion on the go

Ads for Pontiac's newest "image car," Grand Am, always show the car in motion because "it's a true driver's coupe." The car is one of five youthful, sporty vehicles that dominate Pontiac's advertising for the 1985 model year. *(See story on Page 3.)*

P&G Special Touch puts lotion in Puffs

By NANCY GIGES

Procter & Gamble moved into test last week with Special Touch by Puffs, a facial tissue impregnated with lanolin. The move comes despite the mediocre performance of P&G's Certain moistened toilet tissue.

The test involves introducing Special Touch into Wisconsin and parts of Michigan and Iowa. P&G will support the products with a heavy multimedia campaign, couponing and sampling, which are expected to break within several weeks. The new item is positioned as a tissue "with the comforting touch of lotion to help protect consumers' noses from irritation that's caused by frequent use of ordinary dry facial tissues."

The debut comes just weeks after Kimberly-Clark Corp., Neenah, Wis., began testing a specially treated facial tissue claimed to kill many common cold and flu viruses (AA, Aug. 23). But these two new items, being tested in different areas, won't meet head-to-head this winter unless either company speeds up rollout plans.

Puffs is the third-largest facial tissue in the $1 billion category, trailing K-C's Kleenex and Philadelphia-based Scott Paper Co.'s Scotties.

There are several similarities between Certain and Special Touch. They are handled by the same agency, Cunningham & Walsh, New York, and are in some of the same markets.

Special Touch is designed to meet consumer demands for a "stronger, softer, less irritating tissue for use during periods of frequent nose-blowing," said a spokesman for Cincinnati-based P&G.

Available in five colors—beige, blue, pink, yellow and white—cartons are parity priced with other premium-price tissues, but boxes do not contain as many tissues as other regular brands.

On a tissue basis, the new entry is priced 50% higher than premium-price dry tissues, a spokesman said. For example, although the boxes are expected to be priced the same, the regular-count Puffs contains 175 tissues, while Special Touch has 100; family-size Puffs contains 250, while Special Touch has 150.

Several buyers contacted said they believe there is a market for Special Touch, but as a specialty tissue

Third-place ABC first with changes

By JAMES P. FORKAN

New York—The fall season was barely in its second week when ABC-TV, obviously stung by its No. 3 finish in premiere week, moved to doctor Tuesday and Thursday ratings anemia.

A Thursday night movie, filling 8 p.m. to 10 p.m. (ET), will start Oct. 18 and run through the November sweeps. "People Do the Craziest Things" and "Who's the Boss?" will be pulled from the 8 p.m.-to-9 p.m. span, "People" going into hiatus and "Boss" moving to a new night. The lackluster "Glitter" will lose its 9 p.m. slot, but Lew Erlicht, ABC Entertainment president, said it will remain in production and return when another time period becomes available. All three shows hovered in the abysmal 15-to-17 share range in Week 1. ABC's "20/20" will stay put.

Meanwhile, the ax man may cometh to CBS as well. CBS' own Tuesday starters "AfterMASH" and "E/R" are considered early candidates for cancelation or hiatus, if they don't appreciably improve in the next few weeks, sources said. CBS' backups include "Crazy Like a Fox," "Agony" (aka "The Lucie Arnaz Show"), "Other-World" and "House Detective."

NBC is, for now, in the unaccustomed position of not needing to rush in reinforcements, which include "Berrenger's," "Scene of the Crime," "High School Confidential" and a Michael Nesmith series.

The ABC movie-filler package is seen as a stop-gap ploy to give ABC more time to decide which backup shows to run and where. On the production end, the backups seen as most readily available are "Streethawk" (originally slotted for the Monday 8 p.m. position but bumped by "Call to Glory"), "The Brothers-in-Law" and "Jennings & Jennings" (whose pilot was "The Return of Marcus Welby").

ABC's Thursday movies will be theatrical reruns and new tv movies, which will not appreciably affect its strong Sunday movie

(Continued on Page 102)

Last Minute News

ABC preempts nose-diving 'Call to Glory'

New York—ABC-TV, in its first reaction to the ever-slipping Monday ratings for "Call to Glory," will preempt that series at 8 p.m. (ET) on Oct. 15 with a special, "World's Greatest Mysteries." "Glory" began strongly after the Summer Olympics but has since lost to NBC's "TV's Bloopers" and now CBS' "Scarecrow and Mrs. King" *(see earlier story on Page 1).*

Scott tears into South with junior towels

Philadelphia—Scott Paper Co. is rolling out in the South with Scot-Towels Junior, a towel smaller than standard size. Heavy tv via J. Walter Thompson USA, New York, is planned. Scott also is expanding on the West Coast its Viva paper towels with the theme "So absorbent we dare to call it a paper sponge." Tv spots are by BBDO.

Epson computer campaign tagged to Series

Torrance, Cal.—Epson America starts a network tv campaign for both desktop computers and printers this week during the World Series. The campaign was created by Foote, Cone & Belding Communications, San Francisco.

'Gaffebusters' check on celebs

By WILLIAM GLOEDE

Attempting to cash in on the recent publicity surrounding the "exposure" of former Miss America Vanessa Williams, a unit of the George F. Valassis Co. is seeking to do some exposing of its own, though not of the same kind.

Promotion Watch, a Livonia, Mich.-based unit of GFV Communications, has begun a new service it says "will provide a company contemplating a celebrity spokesperson with advice and assurance on their choice." Read: If they've bared it for a skin book, Promotion Watch will ferret it out—discreetly, of course.

"Discretion is everything—people are very sensitive about this," explained Barry Hoffman, president of Promotion Watch, which specializes in cents-off coupon security and sweepstakes clearance investigations.

Mr. Hoffman believes that, had the Miss America Pageant hired the company to look into the backgrounds of its contestants, it would have uncovered Ms. Williams' 1982 sessions with photographer Tom Chiapel. Those were the infamous sessions that produced the photos in *Penthouse* that cost Ms. Williams her crown.

For a fee Mr. Hoffman calls "nominal," Promotion Watch will investigate just about any celebrity a marketer is considering as a spokesperson. Before any investigating is started, however, the company will ap-

Smirnoff relaunch readied

By GAY JERVEY

New York—McCann-Erickson's much-awaited $12 million relaunch of Heublein's Smirnoff, the account it won in an agonizing creative runoff last summer, will debut just in time for holiday-gift and party-giving sales.

This month Heublein, a subsidiary of R.J. Reynolds Industries, Winston-Salem, N.C., and McCann will start with outdoor boards that will pop up across the country with the theme "Friends are worth Smirnoff." Several weeks later, print ads, reportedly featuring a large bottle shot superimposed on a photograph of smiling, socializing people, will appear in the Decem-

Crawford: Met, BBDO similar

By STEWART ALTER

Despite some obvious differences between a profit-making venture and an arts organization, Bruce Crawford's new job will not be all that different from heading an ad agency. The president-chief executive officer of BBDO International is the new general manager of the Metropolitan Opera in New York.

"Conceptually, the responsibility of running the Metropolitan Opera is not so different from running an ad agency," said Mr. Crawford. "What you have there is an artistic director, as there is a creative director at an agency, to whom are delegated creative or artistic decisions."

Mr. Crawford resigned his BBDO post two weeks ago, effective April 1, 1985 (AA, Sept. 27). The resignation obviously came in anticipation of the announcement last week that he would be succeeding Anthony Bliss, the Met's current general manager, on Jan. 1, 1986.

But the reason Mr. Crawford was selected had nothing to do with the analogy between an ad agency and a nonprofit arts organization. Rather, he has been very active in management of the Met for the last seven years as a member of the executive committee, since 1981 as a vp and since last May as president of the board.

Mr. Crawford's experience in the communications business already has been put to use.

Since 1977, he has been chairman of the Met's tv and radio committee, responsible for Public Broadcasting Service telecasts of

Alcohol advertisers fear more U.S. control

By STEVEN W. COLFORD

WASHINGTON—Is the federal government laying the groundwork for a more active role in controlling the promotion and availability of alcoholic beverages?

This fear appears to be growing among a select group of alcohol beverage marketers and media executives who attended a Department of Justice conference here on juvenile alcohol abuse.

Ad industry representatives who attended the closed two-day workshop last week were less suspicious, but they were nevertheless perplexed by what the department wanted to accomplish. It invited more than 40 groups to discuss what can be done to stem juvenile abuse of alcohol and drugs.

The inclusion of illegal drugs as a discussion topic also left a bad taste in the mouths of many attendees, sources said. They disagreed with contentions by department officials that alcohol use, or abuse, is the first step down the path to drug abuse and addiction. First Lady Nancy Reagan has been involved in a number of activities aimed at curbing drug abuse.

Another sore point was the exclusion—inadvertent, the department said—of the Advertising Council, the industry's public service arm, from the meeting.

The session's list of invitees reads like a Who's Who in the world of alcohol advertising: Adolph Coors Co., Anheuser-Busch, Miller Brewing, U.S. Brewers Assn., Distilled Spirits Council, Assn. of National Advertisers, American Assn. of Advertising Agencies, Advertising Federation of America, U.S. Chamber of Commerce, American Newspaper Publishers Assn., American Council on Alcoholism, National Conference of State Legislators, Television Bureau of Advertising, ABC, CBS and NBC. Interspersed among them were some interested but not officially invited groups, including the Center for Science in the Public Interest, one of the bigger thorns in the saddles of alcohol advertisers.

Several attendees agreed to discuss the session only if their identities were not disclosed.

A representative of a media group said James Wooton, deputy administrator at Justice, through veiled suggestions, conveyed the impression that the federal government was prepared to take a tougher stand on what might be permitted in alcohol ads if the assembled groups were unable to reach a consensus on how to attack the problem of juvenile alcohol abuse.

Even more incensed by the meeting's tone was an

Landau hoists Dittler over ABC as top creditor

By ROBERT RAISSMAN

NEW YORK—Robert Landau Associates last week revised its list of creditors in a petition for reorganization under federal bankruptcy rules. It dropped ABC as its biggest creditor, replacing the network with Atlanta-based Dittler Bros.

The move indicates ABC believes it is not liable for a $1.5 million loan given to RLA by Dittler in 1983, sources said.

RLA secured the loan after John Lazarus, then vp-sports marketing and sales at ABC-TV Network, signed an "assignment of accounts receivable" letter to Dittler on behalf of American Broadcasting Cos.

The letter stated that ABC would not object to transferring payment of money owed RLA—for its work catering ABC parties during the 1984 Summer Olympics in Los Angeles—directly to Dittler.

Mr. Lazarus resigned his post at ABC two weeks ago after an internal investigation of ABC's dealings with RLA, an advertising/sports marketing company (AA, Oct. 1). Mr. Lazarus resigned over a contract squabble, ABC said.

ABC believes it is not responsible for the money owed Dittler, sources said, because Mr. Lazarus, though a vp, was not an officer of ABC and did not have authority to approve the transfer of payments.

RLA's revision of its filing still may not deter Dittler from trying to collect payment from ABC. Dittler is a printing company that had worked with RLA.

Sources said ABC was dropped as RLA's No. 1 creditor because RLA chairman Robert Landau reportedly approached an unidentified ABC executive and said that to protect Mr. Lazarus and to repay ABC, he would sign a personal

(Continued on Page 100)

Seoul tv rights may go for less

'88 'gold' on hold

By VERNE GAY

NEW YORK—Network tv bidding for the broadcast rights to the 1988 Summer Olympics in Seoul, South Korea, will be delayed until next spring, if not later. The rights had been expected to be sold during the summer of 1984.

In addition, tv network sports executives say the price tag for the '88 Summer Games will be between $300 million and $400 million, with the possibility that for the first time the summer games' rights could cost less than the '88 winter games. ABC this year paid $309 million for the Calgary games.

"I expect to leave the month of March open" for bidding, said Barry Frank, group vp of Trans-World International, the company appointed by the International Olympic Organizing Committee to sell U.S. tv rights. Mr. Frank said the Seoul Olympic Organizing Committee will have final say about when the bidding will begin.

Meetings between international amateur sports federations will be held this month and in late November to decide whether swimming, track and field and gymnastics events will be held early in the morning. If the events are slotted at 9 a.m. Seoul time, they could be

Pontiac out to bump Buick from No. 4 spot

By JESSE SNYDER

PONTIAC, MICH.—Pontiac is aiming at a smaller bull's-eye for 1985, one roughly the shape of a Buick tri-shield.

A new 60-second Trans Am tv commercial scheduled for network tv in late October captures the essence of Pontiac's 1985 marketing strategy: Concentrate on the distinctive, ignore the ordinary and the eventual reward will be the wresting of the No. 4 sales spot from Buick division.

Once behind only Chevy and Ford in sales, Pontiac fell to eighth in 1981, passed by Oldsmobile, Buick, Toyota, Chrysler-Plymouth and Nissan. But Pontiac rallied back to fifth, finishing with more than 700,000 units for 1984, up 40%. "And fourth is not out of sight," said general manager Michael Losh.

"If we continue to lead the industry in percentage sales gain, eventually it will happen," Mr. Losh said. He forecast 825,000 to 850,000 sales for the 1985 model year, an increase in share to 8% from 7% in '84, largely on the strength of projected sales of 125,000 for the new Grand Am coupe.

Pontiac already has the youngest and best-educated buyer averages among General Motors divisions, and the new Trans Am spot is aimed at the young end of that group. It demonstrates Trans Am's "life-style uses after dark," said Norm Nauber, creative director for agency D'Arcy MacManus Masius, Bloomfield Hills.

The spot cuts between a stylish young woman preparing for an evening out and her date's progress across town in his Trans Am. A rock arrangement of Pontiac's "We build excitement" theme is the only audio until a final voiceover: "Trans Am. Only from Pontiac."

The commercial, which fits into Pontiac's triple-distilled ad strategy, will alternate between network tv and specialized media such as MTV: Music Television starting shortly before the delayed '85 debut of Fire-

A BIG MAC SANDWICH FREE!

Neat!

WITH CERTIFICATE AND THREE PROOFS-OF-PURCHASE FROM CREST, IVORY SOAP OR CHEER.

Here's How To Get Yours:

1. Collect the Golden Arches proofs-of-purchase from specially marked packages of Crest 6.4 oz., 4-bar personal Size Ivory Soap or the words "Giant Size" from the top of any Cheer 49 oz. box.

2. Look for the Free Big Mac Sandwich certificate in your newspaper or where you buy Crest, Ivory Soap or Cheer. Attach any combination of the three proofs-of-purchase to the certificate in the spaces provided.

3. Bring the certificate to any participating McDonald's and get a Big Mac Sandwich—FREE!

FREE BIG MAC SANDWICH

VOID

Offer good through November 4, 1984.

IT'S A GOOD TIME FOR THE GREAT TASTE

Soap and burgers: McDonald's and Procter & Gamble are teaming up in the St. Louis area, offering a free Big Mac in return for proofs of purchase from three P&G products. The print, newspaper, radio and tv campaign broke Oct. 7 via Stolz Advertising, St. Louis.

McDonald's in local tie-in with 3 P&G brands

By LORI KESLER

ST. LOUIS—Two giant marketers—McDonald's and Procter & Gamble—have joined forces for a local tie-in promotion.

The area's 100 McDonald's franchisees late last week broke an ad campaign offering free Big Macs for customers who bring in a redemption certificate with three proofs of purchase from Cheer detergent, Ivory soap and Crest toothpaste. The offer is being supported by newspaper, radio and tv advertising running through Nov. 4.

Popeyes loss pushes Frank shop to brink. Saatchi executive warns that all restaurant ads look alike. See Page 103.

"This is a first for Procter & Gamble, and we hope the tie-in eventually will have national application," said Glenn Jamboretz, president of Stolz Advertising Co., which handles McDonald's for Missouri (except Kansas City), eastern Illinois and parts of Iowa, Nebraska and Arkansas.

He added, however, that McDonald's 1985 marketing plan is already in place, so this campaign probably won't be reviewed by the

World News Roundup

LONDON—Doyle Dane Bernbach, which won the $50 million Brown & Williamson account last week, has been terminated by Philip Morris Inc. here because of a conflict. DDB picked up the $6 million U.K. Marlboro account last month (AA, Sept. 24). No new agency yet.

PARIS—The French government has approved early-morning tv programing starting in 1985. Breakfast tv will be able to start as early as 7:30 a.m. instead of noon. However, no ad slots will be added.

HEIDELBERG—Capri Sun Multivitamin Nectar is being introduced here by SiSi-Werke as an extension of its Capri Sun fruit-flavored drink line, via Intermarco-Farner. A launch in the U.S., Japan and other European countries is expected.

TOKYO—Meiji Seika has decided to postpone a joint marketing venture with Brown & Williamson, scheduled to begin next year, because anti-smoking groups claimed the involvement of Japan's largest confectionery marketer in tobacco would encourage youths to smoke.

PARIS—French car marketer Citroen has been lambasted by the French minister of transport, who claims ads for the new CX GTI turbo model, which emphasize a top speed of 140mph, go against an auto makers' agreement in April that said top speeds would not be mentioned in consumer ads. Roux, Seguela, Cayzac & Goudard handles.

SEOUL—SSC&B:Lintas has affiliated with Samhee Advertising, the in-house agency for the Samhee explosives company, in anticipation that the government eventually will approve joint agency ventures.

TORONTO—Coca-Cola Co. and Eastman Kodak Co. are among several companies that have signed for a $190,275 sponsorship package with the Masters Game, an Olympic-style competition for athletes 25 and

RCA tries compact disc club

NEW YORK—RCA Direct Marketing, a subsidiary of RCA Corp., is launching a new direct-mail club for users of compact discs.

RCA's Compact Disc Club will offer most major record labels, including Angel, Arista, Atlantic, Capitol, Chyrsalis, Deutsche Grammophon, Elektra/Asylum, EMI, Erato, Geffen, L'Oiseau-Lyre, London, Motown, Philips, PolyGram, CA and Warner Bros.

Those labels plan to make most of their disc titles available through the club.

RCA is getting the club under way this fall with a three-pronged direct-marketing effort. Its first targets for club membership are current members of the International Preview Society, a classical music record club also under the

'Esquire' posts new ad medium

By STUART J. ELLIOTT

NEW YORK—*Esquire* is muscling into the health-and-fitness market with a new wall poster ad medium that already has attracted $5 million from some of the nation's top marketers.

The poster, called *Esquire* Magazine's Health & Fitness Clinic, debuted Sept. 1 in 1,000 health and exercise clubs in the top 50 markets. Those that have signed up to sell out the first year of participation include Procter & Gamble (Coast and Safeguard); Quaker (Gatorade); Sears, Roebuck & Co. (Allstate Insurance); Campbell Soup; Gillette; Johnson & Johnson, and Mennen.

The Clinic, a white oak and plexiglass unit measuring 42 ins. by 59 ins., is designed to serve as a health-and-fitness "information

Media and purchasing

On major purchases

"When making major purchases (*i.e.*, autos, home appliances, etc.) do you rely a great deal, some or very little on information provided by advertising in the following medium?" *Source: SRI Research, Lincoln, Neb.*

Medium	Mean scores*: August	November	February	July
Newspaper	1.71	1.65	1.64	1.63
In-store	1.68	1.67	1.70	1.67
Magazines	1.59	1.60	1.54	1.53
Tv	1.58	1.58	1.56	1.56
Yellow Pages	1.43	1.48	1.52	1.52
Radio	1.38	1.37	1.36	1.38
Direct mail	1.32	1.31	1.28	1.30

On day-to-day purchases

When making day-to-day purchases, do you rely a great deal, some or very little on information provided by advertising in the following medium?

Medium	Mean score*: August	November	February	July
Newspaper	1.95	1.86	1.82	1.81
In-store	1.82	1.80	1.81	1.87
Tv	1.77	1.73	1.63	1.68
Yellow Pages	1.75	1.77	1.81	1.78
Magazines	1.69	1.69	1.63	1.62
Radio	1.54	1.53	1.49	1.54
Direct mail	1.41	1.41	1.36	1.40

*Mean scores derived by assigning 3-great deal, 2-some, 1-very little

Consumers vote for point-of-sale

CHICAGO—Point-of-sale advertising is emerging as the favorite medium of consumers when making purchases.

According to the latest Image of Advertising tracking study done for ADVERTISING AGE by SRI Research Center, consumers rely most on in-store advertising when making day-to-day purchases and major purchases. Among seven media *(see chart)*, in-store ads got the highest mean score when consumers were asked what type of ads they rely on when buying. The mean score was derived by assigning 3 points to "a great deal" answers, 2 points for "some" and 1 for "very little."

Newspaper advertising came in second in the scoring. Yellow Pages was the third-most-popular medium for day-to-day purchases, and tv advertising was third for major purchases such as autos and home appliances.

The latest tracking study was done in July by SRI, which interviewed 1,252 consumers nationwide by phone.

SRI noted the following demographic breakouts in its questions on media and purchasing:

For day-to-day purchases:

- Males are more likely to use Yellow Pages than females, and respondents in the North Central region of the U.S. are less likely to use Yellow Pages than in other

CORPORATE CLOSEUP

Sentimental spots paying off for Pearle

By SARAH STIANSEN

DALLAS—A year after Pearle Health Services assigned its advertising to Foote, Cone & Belding, Chicago, it did a shrewd thing: Pearle gathered the agency's personnel together—from creative directors to secretaries in the media department—and offered a champagne toast to FCB for its role in the vision care company's increased sales.

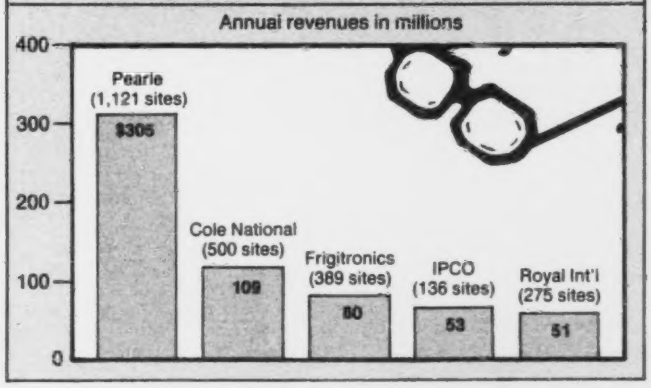
If it sounds familiar, it's because Pearle is known for the heart tug. It is the device Pearle has used in its advertising and in its relations with its agency, propelling the company and its 1,121 Pearle Vision Centers to become the McDonald's of the $6.5 billion optical industry.

Pearle, through a combination of smarts and sensitivity to changing consumer attitudes, has reached this lofty status by successfully pioneering a marketing strategy in healthcare. The company, employing tactics used by retailers, has persuaded consumers to make the leap from conventional eyecare to the more commercial services of Pearle Vision Centers.

Central to the strategy has been the kind of emotion—detractors might call it schmaltz—suggested by the FCB toast. While competitors tend to tough out the market with more cerebral messages stressing price, selection or location, Pearle uses emotion to reach its target: Consumers reluctant to leave the professional service of a private optician or optometrist, but who more than ever are in the market for convenient, cheaper and faster eyecare.

The 'McDonald's' of eyecare

Pearle's dominance in the optical industry stands out when looking at sales levels. The company's revenues exceed the combined totals of the next four largest retail competitors. *Source: Eppler, Guerin & Turner.*



Since 1981, the former unit of G.D. Searle & Co. (which retains a 44% interest after spinning the company off in 1983, 10 years after acquiring it) has put all its ad money on this message of trust and quality. This includes the $16 million to $18 million the company says it is spending in 1984.

The 3-year-old "Nobody cares for eyes more than Pearle" campaign, schmaltzy or not, has proved its drawing power. Last year, its first year as a publicly owned company, Pearle stores recorded systemwide sales of $305 million, up 18% over 1982. Total stores in operation by the end of 1983 increased 8% and, on a per-store basis, sales rose 15%. Over the last five years, systemwide sales increased at an annualized rate of 26%.

The next five years also seem to favor Pearle. Although the market is mature and cyclical, demographic patterns prompt financial analysts to be optimistic about prospects for optical retailers.

According to Charles Glovsky, vp-financial analyst with Dallas-based Eppler, Guerin & Turner, retail optical chains will be able to hold the line on profitability, taking share away from private practitioners and not each other.

But Pearle, having proved its ability to market eyecare on a mass scale, is not content to concentrate solely on eyes. The company is moving to capitalize on other health-services markets.

Pearle, which claims to have the only national healthcare retailing network, is experimenting in two new areas. It holds interest in eight dental care centers in South Florida, and plans an additional 12 units for 1984. Pearle has also opened four immediate medical care facilities, called EmCare units, in the Dallas market.

Donald Phillips, president and chief executive officer of Pearle Health Services, believes the company's strengths, including its marketing expertise, will give it an edge in those markets. "We think we're going to have the opportunity to hit home runs in both [dental and medical]. . .We think we have the talent," he says. "But if we can't, we'll fold up our tent and try something else."

The 44-year-old Mr. Phillips can afford to be sanguine about new markets. He can look at demographic trends and see a baby-boom generation growing older—and needing glasses. Just about 90% of the population over age 45 requires vision correction, and it is the 45-plus segment that will contribute most to the growth of the industry. It also helps that these "aging" baby-boomers are particularly receptive to retail eyecare.

More significantly, the company believes its strengths in operations, real estate, franchising and multi-location management leave it in an excellent position to take advantage of its know-how as it enters new battles in the healthcare market. It also helps, Pearle says, that over the years it has gained experience in dealing with complex state regulations governing healthcare professionals.

Eyecare, of course, remains the central focus. In 1984, Pearle expects to open an additional 115 Vision Centers as it continues its franchising program. About 46% of Pearle units worldwide—there are Pearle stores also in Canada, Europe, Mexico and Puerto Rico—are franchised, and the company plans to convert 70% to 80% of its stores by mid-1986. This year, the conversion of about 90 company-operated stores to franchises will generate some $10 million for reinvestment.

These stores operate in a fragmented market long dominated by independent professionals. Retail chains now control about 20% of that market, but shares for these commercial operators, typically able to sell product and services at about 30% less than independents, are expected to rise.

Pearle's sales account for about 18% of all commercial volume and are greater than the combined sales of the next four largest optical retailers. The company claims that in 1983 it had 5% of the total eyecare industry, which by some accounts was as large as $8 billion, though Pearle puts it at $6.5 billion.

A large number of Pearle's

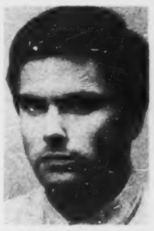
Horton, Gay join AA staff

NEW YORK—Verne Gay and Cleveland Horton have joined the ADVERTISING AGE staff as reporters in New York and Los Angeles, respectively.

Mr. Gay, former broadcast editor at *Marketing & Media Decisions*, will cover advertising spending and media strategies in network and spot tv. He also will have principal responsibility for AA's coverage of the radio industry.



V. Gay

C. Horton

J. Neiman

Mr. Horton will cover a variety of industries from the Los Angeles bureau, including airlines, computers, retailing and transportation.

Also, Janet Neiman, a reporter in the Chicago bureau of AD AGE since September, 1980, has been promoted to senior reporter-copy editor.

In her new post she will assist the Chicago bureau chief and the AA editing desk, as well as continue her coverage of food and grocery marketers and other beats.

Mr. Gay, most recently a staff writer with *Investment Dealers' Digest*, a New York-based trade publication, spent five years at *Media Decisions*, writing, among other things, the "Broadcast Beat" newsletter. He also has written articles for *Barron's*, the *Boston Globe* and *Venture*.

He is a graduate of Colgate University, Hamilton, N.Y.

Mr. Horton, one of the early male graduates of Vassar College, joined the *Lakeville* (Conn.) *Journal* in 1978, as a general-assignment reporter and later as a section editor for the weekly newspaper.

In 1980, he moved to the newsletter department of Knowledge Industry Publications, White Plains, N.Y., a professional publisher, where he reported on microcomputer software, tv commercials and the education market. Most recently, he served as Knowledge Industry's West Coast editor in San Francisco.

Apart from his work with periodicals, Mr. Horton has contributed to several major-market studies published by Knowledge Industry, including "Consumer Media" and "Microcomputer Hardware and Software in the El-Hi market, 1983-1987." In addition, he wrote a forthcoming Knowledge Industry study, "Floppy Disk and Microcomputer Cartridge Duplication Market."

Ms. Neiman, a 1975 graduate of the University of Illinois with a degree in journalism, worked for Pioneer Press, a suburban newspaper chain, and Bernard E. Ury Associates pr agency before joining AA. In 1983 she was awarded a master's degree in urban studies from Loyola University, Chicago.#

New post for Jones

NEW YORK—Allison Jones has been named manager of ADVERTISING AGE's public relations/educational division here.

Ms. Jones will be developing pr programs for AA under the guidance of division director Susan J. Kaplan.

She also will oversee the promotion and marketing activities of AA's Creative Workshop and the Best Tv Commercials of the Year—an annual collection of outstanding U.S. commercials selected by the editors of AA and available on videocassette.

Ms. Jones joined Crain Communications' Chicago-based information center as a parttime employe in 1979. In 1981, Ms. Jones began working on educational projects for Crain.#

Moerlein heads south

CINCINNATI—Hudepohl Brewing has expanded distribution of its Christian Moerlein superpremium beer to Jacksonville, Orlando, St. Petersburg and Tampa, Fla. Distribution in the remainder of Alabama, Florida, Georgia, North Carolina and South Carolina will be added soon. The brand, originally available in Cincinnati, was introduced to 25 states west of the Mississippi earlier this year (AA, May 7).

Celebrities dress up 'McCall's' trade ads

McCall's
McCall's

McCall's new trade campaign features a 10-second spot with Tina Turner, whom the commercial dubs "one of the drab homebodies who reads *McCall's*."

By STUART J. ELLIOTT

NEW YORK—A quartet of surprising celebrities is featured in a new trade advertising campaign for *McCall's* (AA, Oct. 4), meant to convince media buyers and planners that the monthly is read by those oh-so-desirable baby-boomers.

Rock singers Tina Turner, Cher and Carly Simon and designer Diane von Furstenburg appear in the print, tv and outdoor campaign that will break Oct. 15.

It is the first work for the magazine by Levine, Huntley, Schmidt & Beaver, which took over the account last March from McCall Publishing Co.'s in-house effort.

Using the theme "*McCall's*. More than the expected," the campaign "does the job of breaking through the clutter, the sameness" of media advertising, Harold Levine, chairman, Levine, Huntley, told a press breakfast recently.

Aimed at all the media buyers and planners who "knew *McCall's* but weren't reading it," he said, the campaign is designed to "stop them, shock them and influence them."

To do that, Ms. Turner is termed "one of the drab homebodies who reads *McCall's*," Cher is "one of the typical mothers," Ms. Simon is "one of the boring housewives" and Ms. Furstenburg is "one of the plain Janes."

None of the four is identified in the ads, a la Blackglama, Emba *et al*. The quartet was selected as the type of women who would appeal to agency media people aged 20 to 30.

Print versions of the ads will appear in trade publications, the *New York Times*, New York and Chicago regional editions of *People* and as transit and telephone booth posters.

Ten-second tv spots in which Ms. Turner and Ms. Simon appear will run during such shows as "60 Minutes," "Saturday Night Live" and "Dynasty."

Spending will be at an annual rate of about $2.5 million, said Raymond Eyes, president, McCall Publishing, and publisher, *McCall's*, about triple what it was for the in-house campaign.

The new campaign is the latest by a member of the Seven Sisters women's book category to influence the perceptions of Madison Avenue agency types about its readership, to get them to think, as Mr. Levine put it, the magazine is "talking directly to the baby-boom generation, talking in a language they understand."

The Simmons Market Research Bureau's 1984 Study of Media & Markets shows *McCall's* with a median reader age of 41.6 among women and an age of 42 among all adults.

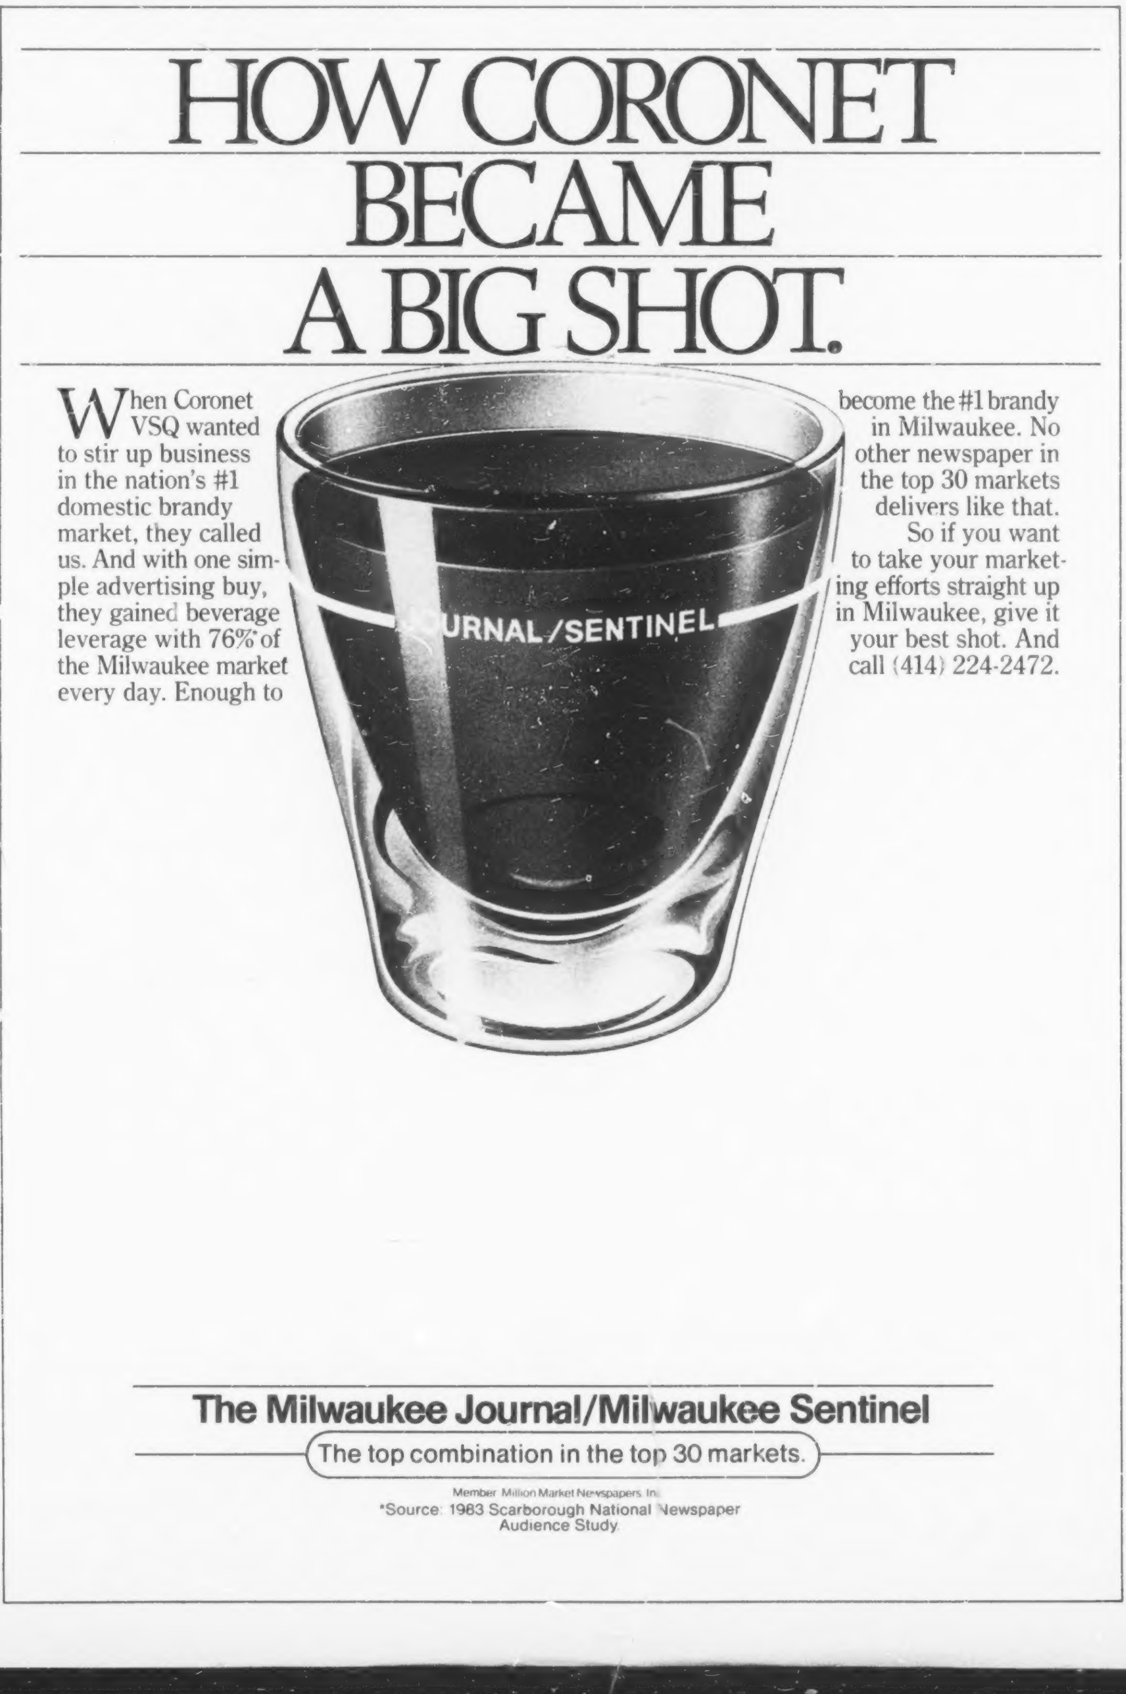
Those figures closely match the median ages of readers of the other six Seven Sisters, which range from 37.1 to 42.2 among women and from 37.5 to 42.3 among all adults.

Those in the baby-boom generation, born from 1946 to 1960, today range in age from 24 to 38.

The choice of additional celebrities to include "will evolve," said Mr. Levine, as the campaign progresses beyond its initial yearlong run.#

CORRECTIONS & CLARIFICATIONS

- For the full week ending Sept. 30, CBS-TV Network was the ratings winner, not NBC-TV, as reported (AA, Oct. 4, P. 1). As noted in the story, NBC was the ratings leader through Sept. 27. Ratings for the entire week were delayed by a computer breakdown at A.C. Nielsen Co.
- Paul John, vice-chairman of Campbell-Ewald, not Richard O'Connor, chairman of Marschalk C-E Worldwide, said in a story about the retirement of Tom Adams that Mr. Adams had told him (John), "Now you're Mr. Chevrolet and Mr. GM for us" (Oct. 1, P. 14).
- The publisher of *Houston Home & Garden* and *Dallas-Fort Worth Home & Garden* is Bayland Publishing, Houston (AA, Oct. 1, P. 89). The company was acquired by City Home Publishing, New York. Robert Krefting, former president of CBS Publications, is president of City Home. Arthur Diedrick, founder and president of Communications International, is chairman.
- The $100,000 "Reach for the best" contest ad insert in *TV Guide* that tied in with CBS' Emmy Awards telecast (AA, Sept. 27, P. 63) was by Bristol-Myers' Clairol division.
- Laura C.K. McCorvie is the associate product manager on Fruit & Fibre cereal (AA, Sept. 27, P. 30).
- Contrary to the headline, Heublein Inc. and Scali, McCabe, Sloves terminated their relationship by mutual agreement (AA, Sept. 27, P. 1).
- *Western Outdoors* year-to-date figures in the September Consumer Magazine Ad Linage Report should have been 349.0 for 1984 and 255.2 for 1983. Also, *Bon Appetit's* September, 1984, figure should have been 91.1 (AA, Sept. 17, P. 59).#



HOW CORONET BECAME A BIG SHOT.

When Coronet VSQ wanted to stir up business in the nation's #1 domestic brandy market, they called us. And with one simple advertising buy, they gained beverage leverage with 76%* of the Milwaukee market every day. Enough to become the #1 brandy in Milwaukee. NOTE Part run figures not available

Linage figures have been provided by Media Records for the exclusive publication of Advertising Age. They may not be reprinted or published in any form without explicit permission from Media Records. All newspapers represented are subscribers to Media Records. For those newspapers that subscribe to Media Records National Advertising Report Service, total advertising linage shown were provided by the newspaper to Media Records and included in this compilation.

CONVERSION METHODOLOGY

Due to the introduction of the SAU 6 column format, Media Records applies the following conversion methodolony to report comparable figures (1984 month vs. 1983 month data) for newspapers that changed column formats in 1984. These newspapers are indicated with an asterisk (*).

7 column tabloids which have adopted a 5 column tabloid format are converted back to the original 7 column formats.

8 column broadsheet standards which have adopted a 6 column broadsheet standard format are converted back to the original 8 column format.

9 column broadsheet standards which have adopted a 6 column broadsheet standard format are converted back to the original 9 column formats.

Pearle

(Continued from Page 4)

nonretail competitors—about half the number of practicing optometrists—are at least 50 years old. Young optometrists coming out of school are less likely to assume practices left by retiring professionals and are more frequently becoming associated with chains.

Pearle and competing chains, including Cole National, Royal International and D.O.C. Optics, are likely to gain business from the declining number of sole operators.

Within this competitive environment, Pearle vows to continue on the marketing and advertising track it has established. According to Eppler, Guerin & Turner estimates, Pearle's ad expenses amount to 6.4% of sales. By comparison, Royal International spent about 8.5% of sales on advertising, and D.O.C.'s budget is believed to be "significantly higher relative to sales" than the other two.

The intent of Pearle's advertising is a long-term educational process that constantly reinforces Pearle's professionalism.

People have a "built-in distrust" of commercial eyecare, says Joseph Dono, vp-marketing for the company, and the aim of the ads has been to erase the negative image.

Louis Centlivre, managing director of creative at FCB, points out that the main thing Pearle's advertising has to accomplish is to "reassure the customer that it's okay" to be buying glasses at Pearle. And FCB, with its family vignettes, has tried to convey caring and trust in Pearle's ads. What Mr. Centlivre calls "the heartbeat of the idea" is distilled in that caring, which could be found in the agency's work for Hallmark Cards when it had that account.

"For years, I've looked into those eyes for strength," says a concerned son about his father in one commercial. "Do you think I'd trust them to just anyone?" The concept, Mr. Centlivre says, is "ephemeral and highly, highly subjective.

"Besides," he laughs, "it works."

One key element of Pearle advertising is how it has managed to sidestep the issue of price or name associations. Other retailers may tout Bausch & Lomb lenses or Sophia Loren frames or lower prices, but not Pearle.

"We don't talk about our price. . . We're not the cheapest guy in town," says William Sullivan, president of Pearle Vision Centers, which includes the well established 184-unit Texas State Optical chain. "We're not going to play that game." (Advertising for TSO, which operates in four states, is similar to Pearle's. The agency is McCann-Erickson/Houston.)

Instead, the marketing strategy focuses on the value of Pearle, on its quality, service and accessibility. The positioning of the Vision Centers avoids what Mr. Centlivre calls the "used-car ambiance, get-'em-while they're hot" quality of other optical retailers.

One area the ads may have to address—and a possible vehicle for future growth in the optical segment—is Pearle's development of the optical superstore. The company's experimental effort in that segment, Visionary, now is under management scrutiny.

The optical superstore, expected to control about 2% of total market sales and 9% of sales by commercial operators by the end of 1985, is a concept several companies are hoping to develop. Quaker Oats has seven of them, called Eyelab, and U.S. Shoe operates eight Precision Lenscrafters and Lenscrafters.

These stores, from 6,000 to 8,000 sq. ft., are much larger than conventional optical shops and have thousands more frames to choose from. (The typical optical chain store contains 1,500 sq. ft.)

But the positioning for such a concept is vague. Pearle's conventional stores already are equipped with a large selection and fast turnaround time for about 60% of its products. Having a thousand or more frames, as well as a lab for grinding lenses on the premises, means that at Visionary, about 90% of patrons can have their glasses or contact lenses in an hour.

According to Mr. Dono, Visionary is a little more trendy, a little more upscale, than a conventional Pearle. "It's more of an exciting place to shop," he says.

But answers to whether those stores would cannibalize the sales of those of Pearle Vision Centers, or whether the cost of installing grinding labs is justified, are still not certain. One notable failure was that of Manhattan Eyelab, which closed recently.

"My hunch is that it won't be a particularly viable concept," says Pearle's Mr. Phillips of the superstore category.

Whether Pearle's other ventures—in dental and emergency care—will be viable is also uncertain.

Glen Konkle, senior vp-group management supervisor at FCB, gives one reason why he thinks they will make it.

The "Nobody cares for eyes" campaign, says Mr. Konkle, has lifted advertising for retail medical services "out of the trenches," building equity for the Pearle name "for later auxiliary medical services as well."

Outsiders are less certain. Skip Helm, an analyst with William Blair & Co., Chicago, points out that existing dental chains haven't been tremendously profitable. "I don't think they're setting the world on fire," he says.

But he also observes that "somewhere out there, there's a tremendous opportunity in the dental business," and that Pearle has a better chance of success than other companies.

The dental market is estimated at $19 billion, more than twice the size of the optical market, and Pearle believes it is similar in many ways to the optical market of 15 years ago. Locations and hours are inconvenient, and little advertising is done.

Hospital emergency room services (nontrauma) are estimated to make up a $5 billion market, while the services of general practitioners generate another $45 billion annually.

Mr. Phillips, although optimistic about Pearle's chances in these other medical areas, is also a little skeptical. "We're not going to dump $50 million or $60 million" into developing those chains to find out whether people will accept such medical care, he says.

Instead, Mr. Phillips says, investments will be gradual, a luxury Mr. Phillips says he can afford, since "no one appears to be about to rush out and lock up the market."#

Liquor sales during '83 unspirited

WASHINGTON—The Distilled Spirits Council has singled out growing taxation as a major culprit for declining over-all sales in 1983.

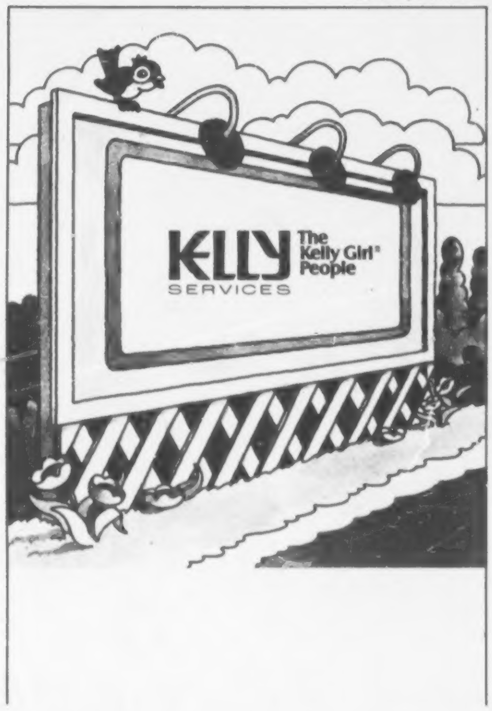
Unit sales of distilled spirits dropped to 420 million wine gals., a drop of 1.2% from the 1982 total.

Average consumption of distilled spirits in the U.S. fell for the fifth straight year. Apparent consumption in '83 fell 1.5% to 431 million wine gals. That was a smaller drop than the 2.6% posted in '82. Per-capita consumption in '83 declined 2.7%.

Despite tax hikes, however, imports continue to grow smartly—up 9.5% last year to 116 million proof gals., the council says. The strength of the dollar is believed at least partly responsible for keeping import levels healthy especially since exports fell off.#

Kelly Marketing checks billboards for America's largest outdoor advertiser.

©1984 Kelly Services, Inc.



Now what can Kelly do for you?

When a national company wanted to know if their cross-country billboard buy was effective, they found Kelly Marketing a cost-effective answer across the board. Kelly monitored thousands of postings–on billboards and bus cards–in over 70 locations. Without overhead! Without overtime! Without costing their sales force time!

The Marketing Division of Kelly Services has qualified temporary help to manage just about any routine marketing task you might have–just about anywhere. With 460 branch offices across the U.S. and our exclusive Video Training Network, we can teach qualified people to handle even detailed assignments.

And you're assured satisfaction with Kelly's 100% guarantee!

For more details on what Kelly Marketing can do for you, call or write John Merana, GPO Box 1179, Detroit, Michigan 48232, (313) 362-4444.

KELLY The Kelly Girl® People SERVICES

PART-TIMER ROLLS UP AMAZING SALES RESULTS.

21st Century Robots are drawing crowds and driving up sales wherever they go: at grand openings, retail promotions, trade shows and special events.

They deliver a hassle-free sales promotion program in a cost-effective rental plan. A total program, complete with a talented operator who's part technician, part entertainer, and *all* salesperson.

So call today for a state-of-the-art promotional program designed to suit your needs. By the month or by the day, 21st Century Robots are sell on wheels. **800-334-7903** or 404-925-0021.

Vote

(Continued from Page 3)

regions.

- People relying on tv tend to be younger.
- People 25-to-34 years old report considerably more reliance on magazines than do other age groups.
- Males and younger respondents are more likely to rely on radio advertising.
- Females and younger respondents are more likely to rely on direct mail.

For major purchases:

- In-store advertising was rated higher than average among minorities, females, those with incomes under $10,000 and people aged 18 to 24.
- Newspaper advertising is rated highest in the 18-to-24 age category; minorities rate newspapers higher than do whites.
- Tv was more likely to be mentioned by minorities and younger respondents.
- Males and those aged 18 to 24 rate magazine advertising higher than the average.
- Males 18-to-24 years old and minorities rated Yellow Pages higher than the average.
- Radio advertising did best among males, minorities and households with incomes between $10,000 and $19,000.
- Direct mail was rated highest by females, young people and minorities.

Image. There were more negative than positive responses when respondents in SRI's July study were asked if they agreed or disagreed that "advertising is generally trustworthy and honest." Based on a 1-to-5 rating scale (from "strongly disagree" to "strongly agree") the mean score was 2.93. However, that mean score is up from 2.90 and 2.84 in the previous two surveys.

Advertising was rated most honest and trustworthy by females, Hispanics, people in the North Central region of the U.S. and by households with incomes less than $20,000.

Respondents with incomes more than $40,000 rated advertising lowest, with a mean score of 2.80.

Quality. When consumers were asked to rate "the over-all quality of the advertising you are presently reading, seeing or hearing," the answers totaled a mean score of 2.62, which is at the low end of "good" on a rating of 1 to 4. The average was slightly below those of the previous three quarterly studies.

Among respondents to the latest study, men tended to be more critical than women (2.54 mean score compared with 2.69). Also, the higher the household income, the lower the rating score.

As in previous studies, consumers rate the over-all quality of tv advertising below that of advertising in general (mean score of 2.57 for tv vs. 2.62 over-all). Again, males and higher-income households were more critical.

Creativity. Consumers also were asked to rate current advertising as more or less creative than advertising of a year ago, and the mean score in July was 3.59, which is on the low end of the "better" scale. The mean scores have been rising slightly over the past three surveys.

Believability. In the matter of believability of advertising claims, there has been a steady downward trend in scores. Three categories of ad claims received mean scores in the "somewhat unbelievable" range: Qualitative claims ("new and improved," etc.), statistical claims ("3 out of 4 prefer...") and product demonstrations. Of the three categories, consumers consistently have rated demonstrations higher than the other two in terms of believability. Again, males and higher-income households were more critical than the average.

Purchasing influence. In the July study, 49% of consumers said "yes" when asked if they had ever purchased a product solely on the basis of advertising. That was almost 4% higher than the average of the previous three studies. Minorities and people with incomes less than $10,000 were above average in this category.

Those who said they had purchased a product based on advertising were asked if the advertising was accurate or misleading; 69% said it was accurate. That is a lower score than in previous studies and continues a downward trend from the 78% reported in an August, 1983, survey. Respondents over 65 were most likely to indicate the advertising was misleading.#

POPAI prescribes shift to 'hard sell'

By LAURIE FREEMAN

Advertisers could increase their market shares by taking media dollars out of "traditional advertising campaigns" and putting them into "the hard sell at the point-of-purchase."

That was the message for retailers, advertisers and suppliers at the Point-of-Purchase Advertising Institute's fall convention last week in Chicago.

"The attention given to point-of-purchase advertising has mushroomed in the past two years, as advertisers are realizing that the market has become more segmented. They may have the greatest ad campaign but still lose the marketing battle if there's no follow through at the point-of-purchase," said one supplier.

Statistics provided by POPAI show that 60% of all buying purchase decisions are made in stores, and "many of those decisions hinge on whether or not the marketer has used point-of-purchase materials," said Rob Chipman, director of marketing, AdMedia International, a point-of-purchase advertising agency in Midvale, Utah.

He said many advertisers are turning to p.o.p "to supplement their traditional tv and print campaigns."

Some retailers expressed concern that the increase of p.o.p. materials would add to store "clutter," and many shoppers "turned off by clutter wouldn't want to shop in that kind of atmosphere."

Point-of-purchase "clutter," as defined by POPAI exhibitors and advertisers, includes any material that distinguishes a product from other items.

"As more manufacturers take point-of-purchase materials more seriously, there will be a shift in advertiser media expenditures to p.o.p.," said J. Patrick Kelly, professor of retailing at Brigham Young University.

Mr. Kelly predicted that point-of-purchase signage will increase significantly in the next few years, including the use of more electronic media at the point of sale.

The latest in video technology was demonstrated during the POPAI show, including the p.o.p. interactive video system from Visage, Natick, Mass. The company's V:Link system creates interactive video programs for point-of-sale product demonstrations, displays and information distribution.

Ledan Inc., showed its Neon Optics signage board, combining fiber-optics technology with color photographs. The lightbox construction provides additional space for sales messages, which can be wiped clean and reused. Remy Martin Amerique used one of the boards to advertise its high-price Remy Martin cognac at U.S. bars and liquor stores.#

'Esquire'

(Continued from Page 3)

center," said Alan Greenberg, *Esquire* publisher. It consists of three editorial panels changed every other week: "The Health & Nutrition Report," "Body Parts" and "The Training & Sports Adviser." Beneath these are three advertising panels, 12 ins. by 18 ins., where the marketers' messages appear. The ad panels are rotated among the clubs, which are being called the *Esquire* Fitness Network, each time the editorial panels change.

The new medium is best for advertisers that "spend heavily in tv to [try to] reach the young, active adult," said Mr. Greenberg. "The location does the audience segmentation for you. And it closely associates the product with the life style of the audience," which sports desirable demographics.

Though the Clinic is *Esquire's* first wall medium, its sister company, 13-30 Corp., has four such ventures nationwide: Campus Voice Biweekly (formerly Wallpaper Journal), Pet Care Report, Sports Page and the new Physician's Weekly. Like the Clinic, these posters are put up in out-of-home sites, such as college campuses and hospitals. The 13-30 field force handles the Clinic.

Why would *Esquire* post words on a wall rather than bring out a new health-and-fitness magazine? A goal was "to be a force in the market," said Mr. Greenberg, and that could not be accomplished with a vertical magazine, even if it were to attain a circulation of 500,000. The Clinic provides "mass reach," he added, with "selectivity of audience."

The chief selling point of the Clinic, said Bill Longley, vp-marketing, a former vp-group advertising director of *Esquire*, is "the combination of the opportunity for exposure and the editorial that has significant interest to the audience." Plans call for at least a 50% hike in the number of clubs, to 1,500, for the second year.

There are four types of annual buys marketers can make in the Clinic: Regular, $190,000, in 125 clubs; major, $375,000, in 250 clubs; maxi, $730,000, in 500 clubs, and buyout, $1.38 million, in all 1,000 clubs. Among the clubs that have agreed to post the Clinic are Vic Tanny's, Jack LaLanne and American Fitness Centers.#

Disc club

(Continued from Page 3)

aegis of RCA Direct Marketing.

IPS members were polled by RCA, and it found 3,000 owned cd players and another 30,000 were interested in buying one within the next six months.

The 3,000 who have players will be sent direct-mail pieces offering enrollment in the club. As a teaser to join, the club will offer one free disc (postage and handling is extra) with no commitment required to buy discs in the future.

The 30,000 who've expressed an interest in buying a player will be offered one for $499.95 sometime next year as an inducement to join.

Although RCA Corp. is marketing its own players, the one offered might be provided by another supplier and privately labeled.

RCA's second target consists of new buyers of compact discs. The company is cooperating with most major cd player marketers, and will be mailing out brochures to those who send in warranty cards.

The club's third effort is the broadest. RCA is scheduling ads inviting inquiries for more information in *Audio*, *Geo*, *High Fidelity*, *Natural History*, *New York Times Book Review*, *The New Yorker* and *Stereo Review*.

A page ad with complete membership offer and details is scheduled for *Digital Audio*.#

City Home explores new markets

New York—City Home Publishing, the new owner of Houston-based Bayland Publishing, eventually may take the concept of Bayland's successful *Houston Home & Garden* and *Dallas-Fort Worth Home & Garden* into other markets.

But according to Robert Krefting, president and chief executive officer of City Home, the company first is exploring opportunities to work with publishers of other home-and-garden magazines. One area may be in cooperative advertising sales efforts.

R. Krefting

Similar magazines are published in San Diego, Phoenix, South Florida, Oklahoma, Colorado and Ontario, Canada, Mr. Krefting said.

Many major metropolitan areas, though, do not have such a publication, he added.

No development of new markets, however, is scheduled. His first task is to "enhance" the Bayland Publishing operation, which he said already is on the right course and can only get bigger and better.

The 10-year-old *Houston Home & Garden*, first local shelter magazine in the nation, now has paid circulation of 85,000 and 1,020 ad pages through October, with ad pages for the year projected at 1,240, about even with 1983.

Dallas-Fort Worth Home & Garden, published since 1978, has paid circulation of 62,000 and 737 ad pages through October.

The publication's projected ad pages for the year total 922, an increase of about 10% compared with 1983.

Revenues for the Dallas-Fort Worth monthly already are up 22% compared with 1983.

City Home Publishing was formed earlier this year by Benchmark Communications and Des Moines-based Meredith Corp. Benchmark Communications was formed by Mr. Krefting, formerly president of CBS Publications, and by Communications International, of which Arthur Diedrick Jr. is president, editor-in-chief and owner.

Mr. Diedrick also is chairman of City Home. Chris King continues in the position of president at Metro Home & Garden Magazines, the umbrella under which the two magazines operate.

Terms of City Home's acquisition of Bayland were not released.#

Midweek News Summary

Cellular mobile telephones will shift from a local to a national advertising category by the end of next year, Western Union marketing executive Scott Slater told a meeting of the Newspaper Advertising Sales Assn. *See Page 3.*

CBS Software is boosting its fourth-quarter ad spending by 25% while other computer software marketers, confronted by a softening market, are cutting back their budgets. *See Page 3.*

The Reagan-Bush '84 campaign broke new spots this week, projecting the president as forceful and authoritative. GOP strategists say the rollout was not connected to the Oct. 7 Mondale-Reagan debate, which gave Mr. Mondale new confidence. *See Page 3.*

San Diego became paradise lost for Chicago Cubs fans Oct. 7. Editor-in-chief Rance Crain, a Cubs loyalist, saw the dreams dashed. *See Page 3.*

Advertising legends are gathering in New York next week for a luncheon marking the publication of "The Benevolent Dictators," authored by Bart Cummings. *See Page 9.*

Acorn Computer's plan to wrest part of the educational computer market from Apple ran aground when a new distribution network disintegrated. *See Page 9.*

Jack LaLanne, at 70 America's foremost fitness fanatic, is hoping to make a comeback with his first videocassette and a possible new tv show. *See Page 62.*

Otto Silha, former chairman of Cowles Media Co., is turning 45 years of newspaper experience into a consultancy for communications companies on marketing, management, mergers and acquisitions. *See Page 62.*

DIRECT MARKETING

Franklin Mint surprised catalogers last week when it decided to bail out of the catalog business by the end of the year, less than a year after the marketer sank significant money and personnel into the fledgling operation. *See Page 6.*

CBN Cable Network has developed a new plan that enables it to analyze the effectiveness of direct-response ads overnight. *See Page 7.*

Brewer charges net promos crowd out ads

A-B asks better NFL slots

By VERNE GAY

New York—Anheuser-Busch is expected to press the tv networks to slot some of its commercials on National Football League games during choice positions normally reserved for the networks' own promotional messages.

A-B intends to push this point, among others, as negotiations for 1985 first-quarter tv sports packages begin in early November. The primary thrust of the negotiations, said A-B sources, will be to make commercials work harder in the face of increased costs and to improve their efficiency as audience ratings decline.

Sources said the brewer's latest demands are countermeasures to what are expected to be 10% across-the-board rate increases in network sports.

In addition, sources speculated ABC may move "Monday Night Football" ahead one hour by 1987. The action could have the effect of stabilizing the program's ratings, which have been in a nosedive since last season.

This season's premiere "MNF" broadcast Sept. 3 had an 18.9 rating; the Oct. 3 broadcast dropped to 14.9.

A-B executives long have complained that commercials placed in clusters at the conclusion of the game or before halftime deliver far fewer impressions than spots placed during more strategic parts of the game, such as the time-outs. The NFL guarantees each network four time-outs per quarter. Ideally, spots would run during the first half when ratings are strongest, especially on "MNF."

A.C. Nielsen Co. figures showed that for a recent game, ratings dipped by six points from 9 p.m. to midnight (ET).

But the move would be difficult. First, affiliate approval would be necessary. Second, ABC would have to decide whether it wants to sacrifice a dual-audience delivery from 8 p.m. to 9 p.m.

Any schedule changes would not happen until 1987, when the Mon-

Miller weighs Landau suit on $2 million debt

By ROBERT RAISSMAN

Miller Brewing Co. is considering litigation against the bankrupt advertising/sports marketing agency Robert Landau Associates after the brewery's own investigation revealed RLA owes Miller as much as $2 million, according to sources.

In its petition for reorganization under the federal bankruptcy code, RLA listed Miller as a creditor owed $200,000 (AA, Sept. 20). Sources report, however, any litigation by Miller will concern what RLA did with money prepaid by Miller to service numerous sales-promotion programs. Since RLA filed for bankruptcy protection, Miller Brewing reportedly began paying the major RLA creditors involved with Miller projects. That total, sources said, reached $2 million.

Obrie Smith, director of corporate communications at Milwaukee-based Miller, said, "The Miller Brewing Co. will work with the

Dole shining up its image

By JENNIFER PENDLETON

Castle & Cooke will introduce a new worldwide graphic identity for *its* Dole brand this week (AA, Oct. 8), a move that reflects the company's drive to establish itself globally as a premier marketer of fruits.

The new look, to be unveiled at the company's board meeting today in Honolulu, is the latest development in Castle & Cooke's ambition to become a market-driven, rather than commodity-oriented, food company.

Castle & Cooke has followed this course since the arrival of Ian Wilson, a former vice-chairman at Coca-Cola Co. (AA, Nov. 7), as its president a little less than two years ago.

Since Mr. Wilson's arrival, Castle & Cooke has been changing from an unfocused collection of loosely related businesses to a company concentrating its resources on three main areas—fresh produce, packaged foods and real estate.

The new yellow, blue and red logo, which features a starburst breaking out of the letter "o" in Dole, will be introduced soon on

Survey finds hostility

Pols' ads flop

By SCOTT HUME

Should Reagan vs. Mondale be no different than Coke vs. Pepsi?

The American presidential election process increasingly is being viewed as a marketing battle primarily waged through advertising, and the American public isn't pleased.

Political advertising probably won't be discussed during tonight's Ferraro-Bush debate or the Oct. 21 Mondale-Reagan rematch, but the 1,200 adults surveyed for Advertising Age by SRI Research Center, Lincoln, Neb., had some questions about the advertising both parties are running. For example:

- More than half those responding agreed (39%) or strongly agreed (13%) that political advertising has more impact on how Americans vote than it did even four years ago.
- An even greater percentage (55%) strongly disagreed with the proposition that such advertising is more truthful than four years ago.
- Respondents were divided on political advertising's informativeness, with 38% agreeing that the ads are more informative than

Schering-Plough tests St. Joseph's vitamins

Memphis—Schering-Plough is testing in Green Bay, Wis., and Boise, Ida., St. Joseph's chewable vitamins for children in three age/weight formulas. The fruit-shaped, fruit-flavored vitamins come in a bottle of 60, retailing for about $4. Tv and print by Warwick Advertising, New York, support.

K&E scoops up Babe, Brut advertising

New York—Faberge's Babe and Brut brands have been reassigned to Kenyon & Eckhardt from Nadler & Larimer. The latter retains the Organics line of shampoos, Faberge body sprays and Tigress fragrance. Aqua Net hair spray remains unassigned, though new products are scheduled under that brand name, the company said. K&E also will coordinate international advertising for Faberge. U.S. ad spending for Babe and Brut is expected to reach $10 million next year. Spending for Nadler's remaining business should be $7 million next year, Faberge said.

Wine Group adds new flavors to cooler

San Francisco—Wine Group is extending its 20/20 Wine Cooler line to include strawberry and apple flavors. The company claims its orange-

Mobile phones calling on national ads: Exec

By WILLIAM GLOEDE

New York—Cellular mobile telephones will shift from a local to a national advertising category by the end of 1985, a Western Union Corp. executive said.

"As more and more cities come on stream and offer cellular phone service, advertising will move into a national strategy," said Scott Slater, director-advertising and marketing for Western Union's cellular mobile communications unit.

Speaking at the monthly meeting of the Newspaper Advertising Sales Assn.'s chapter here, Mr. Slater predicted that the mobile cellular phone business would be an $8 billion industry by 1990. Telecommunications giants—including AT&T, the Bell operating companies, Ericsson, GTE, Matsushita Electric Co., MCI Communications Corp., Motorola, Oki Telecom Group, Tandy Corp. and Western Union—are vying for a piece of the business, either to supply the service or the equipment.

Several media companies—including Knight-Ridder Newspapers, Metromedia Inc., Time Inc. and Washington Post Co.—have filed applications in various markets to supply service. So has American Express Co.

(Knight-Ridder last week announced it was abandoning its licence applications in eight markets in Florida, North and South Carolina and Texas. The announcement came after the Federal Communications Commission, flooded with applications, decided it would conduct a lottery to determine the franchisees. At press time, the major companies with pending applications were considering the formation of a confederation under which they all would share the license as investors in each system.)

Marketers of the phone and necessary radio transmitter equipment will be the primary national advertisers, Mr. Slater said. The service companies are likely to target their ad budgets to the markets they serve.

To date, Western Union has used mostly local newspaper and some spot radio and tv to advertise its cellular equipment and service.

The company expects 30 markets to be equipped with cellular mobile service by the end of this year and more than 90 by the end of 1985, Mr. Slater said. Among the markets with service in operation are Chi-

CBS Software in ad push

By BRIAN MORAN

While slackening demand has forced some computer software marketers to cut advertising budgets, CBS Software has boosted its fourth-quarter spending by 25%.

As part of a bid to build brand awareness for the holiday season, the Greenwich, Conn.-based unit of CBS Inc. also has trimmed prices on almost a third of its 47 educational software programs and has added 25 reps to its national sales force.

The heavy pre-Christmas spending will bring CBS Software's 1984 ad budget to $5 million. Cunningham & Walsh, New York, handles.

CBS' moves come on the heels of an announcement by Spinnaker Software, the educational software market leader, that it would trim its ad spending about 35%. Spinnaker, Cambridge, Mass., cited the slowdown in home computer sales in cutting its '84 ad budget to slighty more than $3 million.

Heightened competition in the educational software market squeezed Reader's Digest Assn. out of the category last summer and has contributed to steep losses at Scholastic (AA, July 9, *et seq.*).

CBS Software's new ad push will feature an eight-page color catalog insert breaking in the Nov. 25 *Newsweek*.

The insert also will run in December issues of *People, Personal Computing, Time* and six other computer magazines.

In addition to the catalog insert, CBS Software's expanded print lineup includes spreads and full and half-page ads promoting product categories as well as individual titles.

Also, an advertorial will run in *Woman's Day*. The campaign continues CBS' "Making you the best" theme.

CBS' price cuts of $8 to $15 per title on 14 programs in its Preschool and Fun & Learning series reflect recent reductions by competitors in the educational software category.

Prices for many educational programs, which hit the market at $30 to $60, have fallen to less than $30.

The 25 new retail service reps will train dealers, demonstrate CBS Software programs and develop in-store promotions.#

Dashed dreams in San Diego

By RANCE CRAIN

Photo by Wide World

Back in Chicago, gloom descended on ever-suffering Cub fans.

San Diego—"Dreams come true" headlined the *San Diego Union* after the Padres beat the Chicago Cubs last Sunday to take the National League pennant.

I guess it depends on whose dreams you're talking about. As a lifelong Cubs fan, I had other dreams in mind as I watched the Padres slowly and methodically strip the Cubs of their hopes.

Steve Garvey, the hero of the playoffs, said that time stood still when he hit his two-run homer in the ninth inning to win game 4 for the Padres.

I know what he means. For me the whole weekend will always be a series of stop-action photos. But always—always—I'll hear the ground-rattling, deep-throated roar of the San Diego crowd. When Garvey hit his home run, Jack Murphy Stadium shook as if an earthquake had enveloped it.

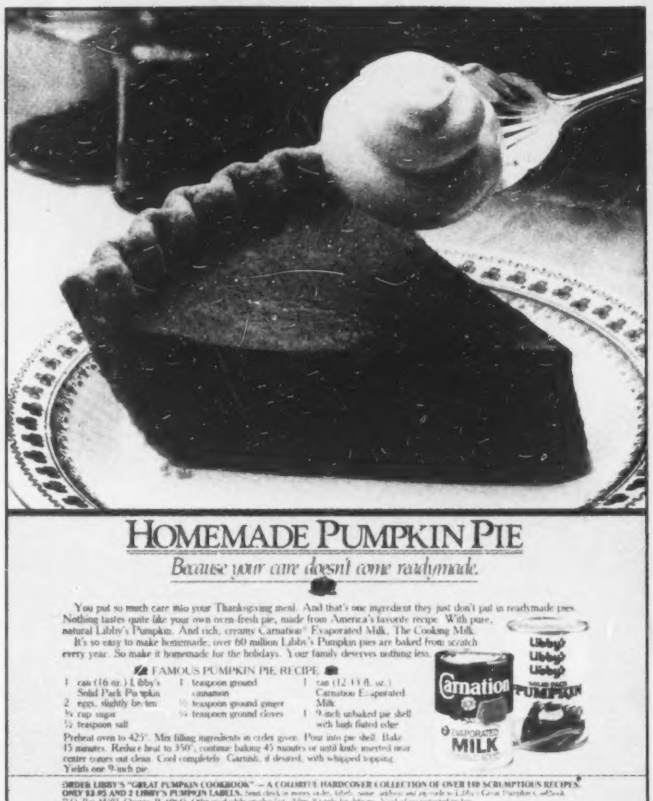
"Laid back? What does that mean? That's a word thought up by Madison Avenue back east," an incensed San Diego fan fumed on a radio call-in show after the Padres had won the fourth game. I can attest that the Padres' fans are definitely not laid back.

I guess I should have realized that the omens weren't good for the Cubs. Harry Caray, the Cubs' play-by-play announcer on WGN, showed up for the final game wearing a "Sutcliffe's Sluggers" t-shirt. But how could Harry know that the sluggers would turn out to be on the other side? Rick Sutcliffe, the Cubs' pitching ace who hadn't lost since June 29, got shelled by the Padres for six runs in the Cubs' final loss of the season.

Earl Weaver talked about the "agony of defeat" before the game. "You carry it with you all winter, until the opening day of spring training," Earl said to nobody in particular. Cubs fans will be lucky to get off that easily.

And when Reggie Jackson was about to leave for the ABC broadcast booth, he told Jim Frey: "I hope this is the last time you see me today. You don't want to see me after the game. Tim McCarver interviews the winners. I do the losers."

As it turned out, Frey and Reggie had some unfinished business.#



HOMEMADE PUMPKIN PIE

Because your care doesn't come readymade.

You put so much care into your Thanksgiving meal. And that's one ingredient they just don't put in readymade pies. Nothing tastes quite like your own oven-fresh pie, made from America's favorite recipe. With pure, natural Libby's Pumpkin. And rich, creamy Carnation® Evaporated Milk. The Cooking Milk.

It's so easy to make homemade; over 60 million Libby's Pumpkin pies are baked from scratch every year. So make it homemade for the holidays. Your family deserves nothing less.

FAMOUS PUMPKIN PIE RECIPE

1 can (16 oz.) Libby's Solid Pack Pumpkin
2 eggs, slightly beaten
¾ cup sugar
½ teaspoon salt
1 teaspoon ground cinnamon
½ teaspoon ground ginger
¼ teaspoon ground cloves
1 can (12-13 fl. oz.) Carnation Evaporated Milk
1 9-inch unbaked pie shell with high fluted edge

Preheat oven to 425°. Mix filling ingredients in order given. Pour into pie shell. Bake 15 minutes. Reduce heat to 350°, continue baking 45 minutes or until knife inserted near center comes out clean. Cool completely. Garnish, if desired, with whipped topping. Yields one 9-inch pie.

ORDER LIBBY'S "GREAT PUMPKIN COOKBOOK" — A COLORFUL HARDCOVER COLLECTION OF OVER 100 SCRUMPTIOUS RECIPES. ONLY $3.95 AND 2 LIBBY'S PUMPKIN LABELS.

A tie-in that binds

An annual rite of fall—ads featuring Libby, McNeill & Libby's famous pumpkin pie recipe using Carnation Evaporated Milk—takes on new meaning this year. The tie-in is more appropriate than ever now that Nestle Co., parent of Chicago-based Libby, is acquiring Carnation Co., Los Angeles. Bloom Agency, Dallas, handles the ads.

GOP spots follow debatable defeat

By STEVEN W. COLFORD
and MARK LIFF

With Republican strategists disavowing any connection, the Reagan-Bush '84 campaign has unleashed new spots projecting the President as something even loyalists said he wasn't during the Mondale-Reagan debate: Forceful and authoritative.

As recharged Mondale supporters oozed confidence after the 1½-hour nationally televised debate, the Reagan-Bush team already was pulling the trigger on its latest fusillade of campaign spots, which broke Oct. 8 on ABC-TV's "Monday Night Football" game.

Most of the new 30-second spots, created by the Tuesday Team, feature President Reagan using the White House as a dais to underscore the differences between his track record and the campaign promises of his Democratic opponent. It's the President "speaking of choices before the electorate," a Tuesday Team member said.

The latest GOP volley comes right after an earlier series of spots broke last week (AA, Oct. 8), but campaign officials said the debate neither caused nor sped up the new wave.

'84 Marketing the CANDIDATES

Last week's rollout featured 30-second testimonials from "average" Americans crediting President Reagan for their improved fortunes and a series of five-minute monologs by the President.

In the latest flight, the first spot (sans Mr. Reagan) looks at economic issues and comes down hard

Direct tactics get politicians' votes

By Richard Edel

The 1984 election may go down in the history books as the year the cost of electing candidates to national office topped $1 billion, according to projections by the Federal Elections Commission. How do politicians hustle that incredible sum of money? They mine the U.S. mail.

Political battles aside, experts say direct mail is the most effective weapon in an arsenal of fund-raising, image-making and constituency-building strategies. It was the foundation of the Republican Party's phoenix-like flight from near oblivion in the mid-1970s to its spectacular success a decade later in raising a projected $100 million for candidates to Congress and the White House.

On the other side of the political fence, direct mail is offering the best hope for the future of the Democratic Party, says Frank O'Brien, director of the mail department for the Democratic National Committee. The Democrats have set a goal in 1984 of raising a $27 million "Victory Fund" to cover expenditures for national elections, and they hope to raise a total of about $50 million.

(National committees for the Democrats and Republicans operate independently of the federally funded campaign committees for their presidential nominees. Presidential election committees in 1984 each will receive $40.4 million from the FEC and $6.9 million in donations from the national parties. The election committees are barred by law from fund raising for the campaign.)

Mr. O'Brien estimates the GOP will collect between $35 million and $40 million through mail-related efforts during the 1984 election cycle, compared with between $10 million and $12 million for the Democrats. The DNC is hoping to slash the fund-raising gap by 1988 by investing 20 cents on each dollar raised.

So far, the Democrats have scored major successes. Their mailing list, virtually nonexistent in 1980, now stands at 500,000 names; Republican sources say their active list contains 2.2 million names.

But the unfolding political struggle involves more than simply gaining fresh donors in election campaigns. "It's not just a matter of money," Mr. O'Brien says. Demographic information, survey data and sophisticated market research is being combined into a body of knowledge to create more effective political advertising.

"The real story is which party plays 'information age' politics," Mr. O'Brien says. To play state-of-the-art politics, his department is poised to make the best possible use of direct mail combined with telemarketing, print and broadcast media.

Donors receive photographs of the President and Vice-President for contributing regularly.

For instance, on the opening night of the Democratic National Convention, the committee mailed 300,000 pieces focusing on New York Gov. Mario Cuomo and the issues he raised in his keynote address. Described by Mr. O'Brien as "the single most effective piece we've ever sent," the effort raised just less than $1 million with an average contribution of $31.

Following up, the DNC began hammering away at the GOP with mailings of 300,000 every 10 days focusing on party spokespeople and candidates.

Returns have been strong, averaging $1 million every 10 days, Mr. O'Brien says. At that pace, the DNC could eclipse the $4 million it hopes to raise through direct mail for the Victory Fund.

Terry Michael, a spokesman for the DNC, says direct mail and, to a lesser extent, telemarketing, play a broad-based role in fund raising. For example, one mailing urged loyal Democrats to host house parties Oct. 7, when the Mondale/Ferraro campaign was scheduled to air a 30-minute paid political announcement. Phone calls to likely respondents followed the mailing, an approach similar to one Mr. Mondale used successfully during the primaries.

At press time, 20,000 parties were planned, and the DNC hoped to raise $3 million.

The DNC increasingly is relying on direct marketing because of the changing political environment, says Jim Nathan, director-research and development for Targeted Communications, Falls Church, Va., which conducts direct mail campaigns for the Democrats. A gradual fragmenting of traditional constituency groups is resulting in smaller ad hoc constituencies that are more informed and aware, Mr. Nathan says.

As a result, targeting media to individuals rather than traditional groups is increasing the effectiveness of the party's fund raising. But, Mr. Nathan says, the Democrats still lag behind the Republicans in constituency-building techniques, "where you're looking more for a vote than for dollars. It takes a little more education and persuasion to show how direct marketing and telemarketing can be targeted to nonfund-raising activities. The Democrats are catching up, but there is no doubt the Republicans have a valuable lead."

The GOP hopes to parlay this lead into both money and votes with an array of well-planned, carefully executed programs, says Stephen H. Winchell, whose Washington, D.C.-based fund-raising operation is deeply involved with direct mail campaigns for the Republican National Committee and other

Richard Edel wrote about political direct marketing in the last Direct Marketing Special Report.

GOP organizations.

"This will be the Republican Party's single most aggressive and successful fund-raising campaign in history. Direct mail is an indispensable arm of the party. Without it, the GOP could never have accomplished the things that it did or had the political impact that it has had," he says.

The GOP's direct marketing program, combining voter registration with fund-raising projects, was operating well before the 1984 election cycle began, Mr. Winchell says.

"Direct mail has an incredible lead time. At this stage of the campaign, there are no new projects," he says. Lead time may not have been much of a factor anyway, because projects are exceeding all expectations.

One example, a package mailed two days before President Reagan announced his intention to seek a second term, tells the story. Nearly 2.1 million letters were mailed, netting gross income of about $5.4 million. The cost to prepare and mail the package was about $700,000, leaving a net income for the Reagan-Bush '84 primary campaign of $4.7 million.

The entire program of primary mailings produced the following results for Reagan-Bush '84: $11.5 million raised through direct mail and $4.8 million raised through volunteer fund raising. The average contribution was $56, resulting in a 70% federal match of funds raised.

Add to these statistics the over-all cost of fund raising—only 15% of gross collections—and a startling fact emerges: Reagan-Bush '84 was the first campaign in history to receive 100% of the available federal matching funds of $10.1 million. For good measure, the campaign earned $300,000 in interest on funds raised, Mr. Winchell says. "These results show that direct mail is an incredibly cost-effective medium. That's why Republicans like it."

In comparison, Mr. Mondale's primary campaign went to the national convention with a debt of more than $2 million.

The Republicans' results also show the unmatched power of President Reagan's name on fund-raising vehicles, says John Buckley, spokesman for Reagan-Bush '84. "Ronald Reagan's name is the single biggest draw of any name in direct mail fund-raising history."

Indeed, much of the GOP's success is attributed to President Reagan's popularity as "the

(Continued on Page 52)

Phones get fund raisers off the hook

Direct mail may be the most effective medium for political fund raising, but telephone marketing is the most immediate.

A well-orchestrated telephone campaign may salvage some impressive results where direct mail comes up dry.

One example is a campaign waged last year by Campaign Marketing Group, Alexandria, Va., for the National Republican Senatorial Committee. The assignment was to make an "urgent personal appeal" to former contributors to the Republican Presidential Task Force who had not responded to two mailings during a three-month period, says Bruce McBrearty, CMG's president.

The job was complicated because the committee stressed the need for speed in reaching about 40,000 names and the importance of personalizing the appeal.

CMG adopted a strategy of segmenting lists geographically and preparing taped messages either from Republican senators representing each state or from Indiana's Sen. Richard Lugar, chairman of the task force. In New York, for instance, the message was from Sen. Alfonse D'Amato. Other senators included John Danforth (R., Mo.), John Heinz (R., Pa.) and Slade Gorton (R., Wash.).

"The idea was to break up the file and target different segments of the audience with a unique message," Mr. McBrearty says. The approach carried the added bonuses of increasing productivity and good will.

CMG staffers used scripts oriented toward the issues most affecting the potential contributor's home state. The staffer thanked the member for past support, extolled a few of the Republican-controlled Senate's accomplishments and explained the current need for funds.

Using a computer-assisted telemarketing system, CMG reached 95% of the list in 30 days. The system placed calls automatically, based on the time

Direct Mail Effectivene[illegible] Without The High Cost

Any media expert will tell you that the most effective advertising medium is direct mail. They'll also tell you it's the most expensive. But maybe they don't know about Val-Pak.

You save, dramatically, by sharing the cost of postage and handling with a group of non-competitive advertisers together in the same envelope. Your message is included in mailings that are already scheduled…in over 200 key markets in the U.S. and Canada. But cutting costs isn't the only miracle we perform.

Val-Pak can give you 100% penetration of your market with virtually no wasted coverage. You can reach as few as 10,000 households or as many as 90,000,000 homes annually. This kind of targeting makes Val-Pak ideal for couponing, test-marketing or co-op advertising with your retailers.

And, on the subject of couponing, Val-Pak consistently delivers a high redemption rate with very low misredemption.

So if you thought only a miracle could make direct mail practical…look into Val-Pak. We've got a packetful.

Education delivers students directly to market

By Don Veraska

Most people wouldn't consider direct marketing education to be new wave. But, according to Jim Kobs, president of Kobs & Brady, Chicago, it already has entered its third wave.

"Going back 10 years, maybe there were a dozen direct marketing classes in the country—and a lot of them were just a half-hour in some survey course," he says. "In the past 10 years, it has come to the point where a lot of schools have at least one solid direct marketing course, two or three hours, so the kids knew what it was.

"Now, we're in the third wave, developing full programs and schools of direct marketing," Mr. Kobs says. "Nobody quite expected this quick explosion. It's a real rush today with all these direct marketing programs."

Since the early beginnings of college-level direct marketing classes some 10 years ago, the following universities are leading the pack that is rushing into direct marketing:

- The University of Missouri at Kansas City, which didn't even have a direct marketing class until five years ago, has created the Center for Direct Marketing Education and Research, funded through a $570,000 grant from the New York-based Direct Marketing Educational Foundation.

Five students graduated this spring with a bachelor's degree in business administration, with a concentration in direct marketing. Next spring, about that many students are scheduled to receive the first direct marketing master's degree, and the number of undergraduate direct marketing degrees may rise to about 20.

- The University of Cincinnati is creating a direct marketing policy center through a private grant of $225,000 and is itself funding grants for direct marketing research. The university offered its first market research class last month.
- Students at the College of William and Mary, Williamsburg, Va., three years ago organized Direct Marketing of Williamsburg, a student-run independent, computer-based company, gross sales of which will run into six figures this year. The college offers three credit hours for Direct Marketing of Williamsburg, provides seminars staffed by direct marketing professionals and plans its first academic direct marketing class next spring.
- Dozens of other institutions are offering direct marketing classes. The Direct Marketing Educational Foundation lists 51 such colleges and universities with credit courses, and another 12 that are planning to do so. In addition, about a dozen offer noncredit or continuing education courses in direct marketing. Several have diploma programs for professionals in the field.

> **"Frankly, the companies were getting very tired of training these people on the job . . . ."**
>
> *—Richard Hamilton*
> *University of Missouri*
> *at Kansas City*

The fact that any direct marketing programs are available is largely because of the efforts of the Direct Marketing Assn.'s DMEF, supported by several hundred businesses. The foundation has fostered and nurtured direct marketing education during the past two decades.

A lot of credit also must go to direct marketing professionals. They wrote most of the college-level textbooks, aided institutions in structuring classes, spent countless hours lecturing and, in general, spread the direct marketing gospel.

The interest of those professionals isn't entirely altruistic. The direct marketing industry admittedly suffers from a serious shortage of middle managers.

"There's a lot of senior management of my era," says Mr. Kobs, who is 46, "and a lot of young people coming into direct marketing out of college. But the gap is in middle management, people with five to ten years of experience. Those with college instruction in direct marketing can get to this level a lot more quickly."

Says Richard Hamilton, associate professor of direct marketing at UMKC, "Frankly, the companies were getting very tired of training these people on the job; it was very expensive."

Student interest in direct marketing has been fostered by professors who, in turn, were exposed to the discipline at the DMEF's institutes. These semiannual seminars enlighten up to

Politicians

(Continued from Page 51)

great communicator." GOP fund raisers say he embodies the conservative message that is the theme of all mailings from GOP national committees.

Another reason for the GOP's success is that its national committees target their mailings to individuals, personalizing them to an extent never before possible in political direct mail, Mr. Winchell says.

In addition, the committees offer benefits, bonuses and premiums for regularly contributing ever larger sums. For example, the National Republican Senatorial Committee created a Republican Presidential Task Force program that asks for $120 a year, or $10 each month.

"The idea is to get donors into the habit of contributing regularly," Mr. Winchell says. In return, donors receive premiums such as a bronze task force medal, a monthly task force bulletin and color photographs of the President and Vice-President. Larger donors are given a "Gold Pass" that entitles them to attend social gatherings.

"It is clear that the GOP fund-raising effort is moving more and more in the direction of monthly giving and strong fulfillment pieces in order to involve the contributors more deeply in the groups they join," Mr. Winchell says. In addition, clubs emphasize the importance of individual members."

To bring new members into the fold, the GOP searches about 700 mailing lists annually,

Phones

(Continued from Page 51)

of day previous calls were answered. To help personalize the call further, past contribution figures and individual data about the prospect were listed on the computer screen. When a call was completed successfully, a fulfillment letter, thanking the contributor for the pledge, was generated automatically.

The response was overwhelming, with 33% of the prospects renewing their task force memberships and 13% agreeing to contribute an unspecified amount, Mr. McBrearty says.

Over-all, the campaign generated more than $500,000 at a cost per completed decision of $3. CMG staffers averaged 10

MAILING LIST COMPILERS AND BROKERS

30 professors on the fundamentals of direct marketing. The foundation also approaches students directly, conducting semiannual, five-day seminars for 30 college seniors.

"We really just had to acclimate students with the fact that direct marketing existed," says Robert Stone, president of Stone & Adler, Chicago, who has been a trustee of the Direct Marketing Educational Foundation for some 15 years.

And, once they were exposed to direct marketing the interest took off, because, as Mr. Kobs says, "The kids just got turned on once they found out that direct marketing is measurable. Unlike advertising, they are seeing a field where the results are precisely measurable."

And, he says, direct marketing has evolved into a multimedia discipline, enticing students who weren't interested in it because they thought it encompassed only direct mail and catalog sales.

"Things like television, like the 800 numbers, make direct marketing a more acceptable career alternative," Mr. Kobs says. "Once, [students] just whispered

(Continued on Page 54)

Mr. Winchell says. The Republican Party hopes to have an active mailing list of about 2.5 million names by the end of the year and up to 2.8 million names in 1985-86.

"There is virtually no plateau seen in the foreseeable future. The party's budgets are going to continue to go up because there are more people contributing," Mr. Winchell says.

decisions an hour, he says.

A similar campaign in 1984 is yielding even more impressive results. With only a slightly larger file, the campaign is producing three times more revenue, Mr. McBrearty says. Reasons for the improvement include a 9% increase in dials per hour and a 16% increase in completed decisions, mainly because of improvements in the computer-assisted system.

The simple fact that Republican national committees use telemarketing is a testimony to its value, he says. "If national committees are using it successfully, think how much more successful it could be in smaller campaigns. Telemarketing can and should be included in every fund-raising strategy." *—R.E.*

Programs receive favorable response

To those students who have graduated from college with a degree or practical experience in direct marketing—a breed still about as rare as a whooping crane—the experience has been a rewarding one.

No specific figures are available on the number of college graduates with direct marketing backgrounds, but only five—former undergraduate students of the University of Missouri at Kansas City—have bachelor's degrees.

Several dozen graduates of the College of William and Mary, Williamsburg, Va., although not possessing a direct marketing degree, received experience as employes of a student-run direct marketing company, Direct Marketing of Williamsburg.

Graduates and participants in these two programs are enthusiastic about the value of their college experience in the real world of direct marketing. "Direct Marketing of Williamsburg was very beneficial in preparing me for the professional sector," says John E. Berger, 22, who founded the student-run company three years ago as an independent study project and has seen it grow from a one-person operation to about 25.

Now working in the Falls Church, Va., office of R.R. Donnelley & Sons, Mr. Berger says, "When you're dealing with the real world, when you're dealing with the bread and butter of a business, it gives you a discipline you just can't get in the classroom. There's no books, no tests—just how well you perform in the community."

Mr. Berger spent three years at DMW. Despite the value of his practical experience, he says classes in direct marketing, which William and Mary does not offer yet, would be beneficial. "No question, it would have helped me to have classroom experience as well. If I had, it would have prepared me even more."

Another 1984 graduate of William and Mary, Caleen Norrod, 22, was creative director of DMW. As an English major with

When it comes to paper, if you want more to weigh less

THINK LIGHTER

Thinking light about paper is not a new idea. The search for high-performance, lightweight coated printing paper started over 30 years ago. The rising costs of postage and distribution for mass circulation magazines made finding such an alternative an economic necessity.

That's when St. Regis, working directly with these magazines, began to develop lightweight coated papers with all the quality and printability of the magazines' regular stock. It was a gradual and dramatic breakthrough as basis weights dropped from the standard 47 lbs. to 34 lbs. Today, of the [illegible] largest circulation magazines using lightweight coated paper, St. Regis supplies all but one.

Others have also cashed in on the lightweight technology. Catalog and direct mail merchandisers, directory publishers, producers of mass circulation newspaper inserts have all been part of the movement to think lighter about paper. And why not? Lighter weight paper equals lower paper costs and lower shipping and postage bills. With big increases expected in 2nd and 3rd class mail, it pays even more to think lighter. For you, these savings can mean more circulation reaching more people and creating more opportunities for sales.

Today the market has shifted and supplies are tight. And it's not easy to get all the paper you want. It will take time for supplies to ease and St. Regis is planning for future capacity. In the meantime, thinking lighter is our long term strategy and it might be a good idea for you, too.

Exec explains suit: 'Can't trust' agency

Godfather's slams Chiat

By SCOTT HUME and RUTH STROUD

A Godfather's Pizza restaurant chain executive has reacted angrily to the advertising industry's support of Chiat/Day in a landmark legal dispute involving confidential client material.

Ted Murphy, vp-marketing for Costa Mesa, Cal.-based Godfather's, told ADVERTISING AGE that the reasons for the chain's suit against Chiat/Day have not been fully reported. While conceding that the chain wants to prevent Chiat/Day from using in its work for Pizza Hut information it gained from its earlier competition for the Godfather's account, Mr. Murphy charged Chiat/Day with "a classic case of playing both ends against the middle." He said the agency simultaneously dealt with both Godfather's and Pizza Hut, thereby creating the distrust that contributed to the suit.

"The way this story is being reported is that Godfather's is challenging the accepted ways advertising agencies work," Mr. Murphy said. "But there's another question that hasn't been reported and that's 'Did Chiat/Day play by the accepted rules?' Chiat/Day's position has been that we should trust them, backed by a gentleman's agreement" that the agency won't divulge confidential Godfather's information to Pizza Hut. "But there are reasons for us not to trust them."

Chiat/Day president Guy Day vehemently denied any unethical conduct on the part of the agency.

Godfather's filed suit against Chiat/Day June 29, seeking to bar agency staffers who worked on the agency's solicitation of the $5 million Godfather's account from working on the $20 million Pizza Hut account (AA, July 16). Godfather's was granted a preliminary injunction against the Chiat/Day

Contac follows upbeat route to fight new rivals

WE KE MERICA
FEET.
CONTAC

Lots of feet—and only feet—are on view in this new Contac cold remedy spot. BBDO, New York, is the agency.

By NANCY GIGES

After some rough sailing in recent years, SmithKline Beckman Corp. is taking a new tack to reinstate Contac as the cold remedy of choice.

Although Contac has weathered the attack of the multisymptom products, it now faces a strong new contender, Burroughs Wellcome Co.'s Actifed. In the two years since Actifed shifted from prescription to over-the-counter marketing, it has caught up with the two other market leaders, Contac and Nyquil. The latter is marketed by Richardson-Vicks, Wilton, Conn.

These three brands trade shares between 10% and 12% of the $750 million market.

Victor Galef, vp-marketing at Philadelphia-based SmithKline's Menley & James Laboratories division, which markets Contac, has no delusions that what he has set out to do will be easy. He also knows that the atypical upbeat approach Contac has taken to the cold-remedy market is not without risk.

But he candidly admitted, "Our brand hasn't responded the way we wanted with typical drug advertising. So we believe there is more risk on the down side if we don't make this departure."

The advertising from BBDO, New York, the first from the agency since it succeeded Ogilvy & Mather on the brand last fall, is an outgrowth of last year's theme "Keeps you going."

But this year, with the theme "Contac keeps you on your feet," SmithKline is using an upbeat tv commercial with singing and dancing, essentially depicting "wellness," not illness. The spot shifts from one vignette to another, showing only the feet of people going about their everyday activities—an aerobics class, a wedding, a farmer's field being harvested.

"Consumers still think that Con-

Last Minute News

Amoco studies agencies, but denies move

CHICAGO—Amoco Oil Co. has contacted several agencies about its advertising but says it isn't planning to move its $25 million account from D'Arcy MacManus Masius. The subsidiary of Standard Oil Co. (Indiana) called the move a "routine credentials-review procedure to keep current in the industry" and said DMM "will remain agency of record in 1985."

Godfather's lashes Four A's support of Chiat

LOS ANGELES—Godfather's Pizza urged the California judge hearing its client-confidentiality suit against Chiat/Day to ignore an American Assn. of Advertising Agencies brief filed on Chiat's behalf (*see story on Page 97*). Godfather's said Four A's wasn't aware of all the details in the case because the judge had ordered the court files sealed and, therefore, wasn't in a position to submit "any authoritative commentary."

Texas Instruments takes on IBM

DALLAS—Texas Instruments is upping its attack on IBM with "Dare to compare" print ads that claim "TI is better" in comparisons of the TI Professional Computer with the IBM Personal Computer. TI's attack shifts focus from operational features to the company's "superior service"

Jobs going like hotcakes, recruiters say

Boom time for creatives

By STEWART ALTER

Some of the advertising industry's leading creative-talent recruiters report that they've never been busier than in the last six months.

"I feel like an order taker. I've been in the business 20 years, and I have never had as much work as I've had in the last six months," said one top recruiter, Judy Wald of the Judy Wald Agency, New York. She added that she had to "put in a traffic flow chart and add a man to deliver portfolios."

Ms. Wald, who had just hung up the phone after speaking to one agency client who wanted to add two more openings to the 16 he had already placed, observed that the demand is at all kinds of agencies—small, medium and large. In the last six months, she has had about 130 positions to fill, twice the norm.

Similarly, rival headhunter Susan Friedman observed, "There are a tremendous number of job openings," so much so that she has restructured her business in response.

A month ago, Ms. Friedman left Friedman Huss Viseltear, New York, which at that time had an all-time high of 158 creative positions to fill, and formed Susan Friedman Ltd. She has decided to become more specialized, concentrating only on placing senior creative executives and going in a new direction as well: Acting as a consultant both to creatives in planning their careers and to agencies on building their creative departments.

Why are creatives so much in demand?

Ms. Friedman believes the surge is traceable primarily to the new attention being given to creative by some of the major agencies. "We're moving into a phase where creative is once again going to be the selling point for a product," said Ms. Friedman.

Saatchi & Saatchi Compton Worldwide is but one example of an agency that this year started adding senior creative talent (AA, May 28). "We're adding a lot of creative people," said president Edward Wax. "We're focusing on the creative product more than we ever did."

The other agencies frequently mentioned are J. Walter Thompson Co., Ted Bates Advertising/New York and Benton & Bowles.

"We have a budget to hire more top-quality creative people than we've been able to find," said JWT/New York exec vp-general manager Stephen Bowen, who said the office has hired about 20 new creatives this year.

Mr. Bowen felt the special emphasis some major

'Bed,' Tigers help NBC ratings spurt

New tv season

By JAMES P. FORKAN

New York—In the opening rounds of the fall season's Week 3 ratings battle, NBC-TV got off to a scorching Monday start with "The Burning Bed," then fueled that surge Tuesday with the Detroit Tigers in World Series Game 1.

CBS, which a year ago was locked in a much tougher battle with ABC for the ratings lead, continued to be the fledgling season's front-runner.

Meanwhile, homes-using-tv and three-network-share levels are down slightly this fall. In Week 2, hut levels stood at 61.9 versus 62.0 a year earlier, while combined network shares were 82.3, down from 82.9. Week 1 saw huts at 60.8 versus 62.1 last fall and shares at 79.2 versus 80.5.

Another 24-hour computer delay at A.C. Nielsen Co.—the second in the three-week season—kept everyone in doubt at press time as to the national ratings winners for Wednesday, Oct. 10. "Our computer went down almost all day [Wednesday]," a Nielsen source said.

However, overnights for nine major markets (now including Dallas) indicated that CBS was the loser Wednesday, squeezed by the femme-appeal ABC series lineup and NBC's World Series Game 2. Meter data showed NBC's game night averaged a 38 share, compared with a 31 for ABC's "Dynasty" and "Hotel," leaving CBS with a 16 share.

The Thursday overnights covered a program slate truncated by the George Bush-Geraldine Ferraro vice-presidential debate. The opening hour of series fare went to NBC's urban-skewed "Cosby

(Continued on Page 96)

Ford eyes berth in Super Bowl

By VERNE GAY

New York—Ford Motor Co., Dearborn, Mich., is ready to snag the domestic auto sponsorship of the Super Bowl broadcast on ABC next January. It's an expensive privilege that Chevrolet relinquished three weeks ago.

Ford and ABC-TV, however, are negotiating the Super Bowl sponsorship as part of a prime time big-events package, rather than as a stand-alone sports buy.

The unusual step by ABC to combine sports with prime time sales is seen as reflecting the pressure ABC Sports is under to get its $1 million-per-minute Super Bowl price tag while maintaining automotive exclusivity between only one domestic and one import advertiser.

"[The Super Bowl] is being actively considered," said Joe Schulte, exec vp-general manager at J. Walter Thompson USA, Detroit, Ford's agency. "It's a prestige event and, yes, it's expensive."

Super Bowl auto exclusivity costs a minimum of $2.5 million for

West Coast test set for B&W's 2nd new cigaret

By WILLIAM GLOEDE

Brown & Williamson Tobacco Co., Louisville, is gearing up for a West Coast test of its second new cigaret, called Eli Cutter.

The new smoke is in the trade pipeline and is about to hit retail in Sacramento, Fresno and San Francisco, according to industry sources.

Advertising will follow the exploits of the mythical Eli Cutter, giving B&W a chance to convey an image of Americana not unlike that used by Brown-Forman Distillers for its Jack Daniel's whisky.

Trade sources report that long-copy ads will tell the story of Eli Cutter, associating the rugged individualism of a 19th-Century pioneer with the full-flavored cigaret brand family.

At press time, the agency assigned the account could not be determined definitively, but sources indicated that Geer, DuBois, New York, which has B&W's Richland account, may have the assignment.

The cigaret packaging is black, with the brand name emblazoned in gold in a half-moon configuration. "Legendary taste" appears at the bottom of the package beneath two interlocked, gold letter C's.

Although only the 85mm soft pack has been spotted, sources indicated the brand will have three styles, a 70mm straight, an 80mm box and the soft pack.

At press time, advertising had not yet appeared in the test area.

B&W is testing another new brand, St. James Court, in Portland, Ore. Sources believe that brand, which is packaged in copper-colored foil, may be moved to another market in the near future and tested at a premium price (AA, Sept. 17).

Ogilvy & Mather, New York, handles St. James Court.#

Brewer gears up for market

A-B wines on line

By SCOTT HUME

Anheuser-Busch is setting the stage to become a more important player in the wine market.

The St. Louis company last week said it was moving responsibility for its Anheuser-Busch Wines unit from the corporate planning department of the parent company (Anheuser-Busch Cos.) to its brewing subsidiary (Anheuser-Busch Inc.). T. Michael Carpenter, group vp for the brewery's wholesale operations division, also will oversee the wine subsidiary.

The unit now markets four wines—dry chablis, classic chablis, vin rosé and burgundy—under the Master Cellars name. The wine is produced exclusively for A-B by Lamont Winery, DiGeorgio, Cal., a wholly owned subsidiary of Canadian brewer John Labatt Ltd. (which holds the Canadian brewing rights to Budweiser). The Master Cellars brands now are distributed for on-premise consumption only in Denver and a few nearby ski-resort markets and in a crescent around San Francisco.

With no package-goods sales for Master Cellars, A-B has done no real advertising for the brand, although the line has been assigned to Adamson Advertising, St. Louis.

Moving the wine unit under the brewing operations' wing gives it more direct access to A-B's formidable distribution system and facilitates expanding availability. What has kept A-B the nation's leading brewer has been the strength of its on-premise visibility. Expanded distribution of Master Cellars would further A-B's effort to become a full-line supplier to taverns, making it a distributor of wine as well as beer and its Eagle snack-food line.

The company wouldn't discuss

Source: Media Records

Linage figures have been provided by Media Records for the exclusive publication of Advertising Age. They may not be reprinted or published in any form without explicit permission from Media Records. All newspapers represented are subscribers to Media Records. For those newspapers that subscribe to Media Records National Advertising Report Service, total advertising linage shown were provided by the newspaper to Media Records and included in this compilation.

CONVERSION METHODOLOGY

Due to the introduction of the SAU 6 column format, Media Records applies the following conversion methodology to report comparable figures (1984 month vs. 1983 data) for newspapers that changed column formats in 1984. These newspapers are indicated with an asterisk (*).

7 column tabloids which have adopted a 5 column tabloid format are converted back to the original 7 column formats.

8 column broadsheet standards which have adopted a 6 column broadsheet standard format are converted back to the original 8 column formats.

9 column broadsheet standards which have adopted a 6 column broadsheet standard format are converted back to the original 9 column formats.

6 column broadsheet standards or tabloids which have a slight depth change in 1984 but did not change column format are converted back to original depth.

Ferber opens own publishing consultancy shop

New York—Sam Ferber has started his own business as a publisher's consultant, with offices at 200 W. 58th St., 10019.

Mr. Ferber formerly was a publisher of *Esquire* and a vp at Nadler & Larimer and Altman, Stoller & Weiss.#

Floral service cultivates ads

By TOM BAYER

The current test of four tv spots in Chicago for 800-FLOWERS Inc. is the beginning of a rollout designed to take the new telemarketing floral service national by the middle of 1985.

John Davis, general partner and vp-marketing of Irving, Tex.-based 800-FLOWERS, said the rollout will get the backing of a $12 million campaign by Chiat/Day, New York (AA, July 2). The campaign, which also will include radio, print and outdoor, aims to to expand the $3.5 billion cut-flower market, already growing at the rate of 10% annually.

The 800-FLOWERS budget represents a 50% increase in media spending for the entire floral industry, Mr. Davis said. It also represents a gutsy move on the part of investors who pooled 800-FLOWERS' startup $18 million last summer in a series of limited-partnership offerings.

Company president John Douglas, formerly president of Dallas-based Docutel/Olivetti, said the seed money has provided for the company's new administrative headquarters and telemarketing center, which will accommodate 600 operators.

According to Mr. Davis, 800-FLOWERS has no competition, although Florists Transworld Delivery Assn. (FTD), Teleflora Inc. and 800-FORLOVE already are well established in the national flowers-by-phone market.

These companies, he said, are clearinghouses that process payments between the sending and receiving florists.

By contrast, he said, 800-FLOWERS' trained "floral marketing representatives" take orders directly, along with credit-card information, delivery address and sentiment to be expressed on a card.

Staff florists keep the FMRs apprised of what's seasonal, what's new and what the 5,000 member florists have fresh in stock that day.

The minimum order via 800-FLOWERS is $30 including delivery charge.

The company's tv spots focus on the convenience of calling the toll-free 800-FLOWERS 24 hours a day for local delivery or delivery in another city and a replacement guarantee.

The spots are airing in Chicago, where they are to be supported by ads in *Chicago* magazine. Mr. Davis said the campaign rolls into Dallas-Fort Worth Oct. 18 with print support in *D* and *Texas Monthly*, beginning the national market-by-market rollout.#

We're Full Service in Los Angeles.

The next time business takes you to Los Angeles, take yourself to Le Parc, the fashionable full service hotel located conveniently between Hollywood and Beverly Hills that's become the inn of the industry.

Le Parc offers the business traveler a home-like setting. Each spacious suite features a sunken living room with fireplace, wet bar, kitchenette and private balcony.

Jordan soars for Nike deal

New strategy seen

By ROBERT RAISSMAN

Michael Jordan, the Chicago Bulls' rookie and captain of the U.S. men's Olympic basketball team, has been signed by Nike Inc. to the largest sneaker and sportswear deal ever given a professional basketball player.

Although Nike executives and Mr. Jordan's agent, David Falk, senior vp at ProServ, declined comment on the exact worth of the pact, sources said it is a five-year deal worth at least $2.5 million. That number does not include a long-term security package provided by Nike that Mr. Jordan will be able to draw on when he retires from basketball.

The endorsement deal is linked to a new-product introduction expected from Nike next spring. The product is the Air Shoe, which uses an innersole with air pockets. A separate sportswear line also is expected from Nike, and the ads and promotions for that line will feature Mr. Jordan.

The signing of Mr. Jordan also indicates a shift in Nike's strategy. Nike is expected to tone down its appeal to the running-shoe market and go head-to-head with Converse for the gym-shoe segment. The strategy is dictated by the leveling off of running shoe sales (AA, June 18).

"Our agreement with Nike hinged on getting marketing commitments that guaranteed Michael as being the preeminent basketball spokesman for Nike," Mr. Falk said. He said Nike originally planned to break a campaign featuring Mr. Jordan at Christmas, but it now is likely to break in the spring.

"Because of Michael's style of play—we like to call him a flier—he fits in well with the whole line of the shoe [Air Shoe] which is high tech," Mr. Falk said. "That's where the upper end of Nike's marketing strategy is going."

Robert Strasser, vp-marketing at Beaverton, Ore.-based Nike, could not be reached for comment.

Nike's decision to sign Mr. Jordan to such a lucrative deal further signals a new trend in the basketball-shoe market.

Although Nike may be spending heavily to sign Mr. Jordan, it and other shoe companies probably will spend less for basketball-player endorsements than in previous years.

In the past, almost every college player drafted in the first three rounds was guaranteed a deal

Somehow, you can always tell which stores offer 100% Colombian Coffee.

Juan Valdez never had it so good. Prestige is the lure in the Colombian coffee federation's new trade and consumer advertising.

Coffee group brews new, tasteful image

By GAY JERVEY

The National Federation of Coffee Growers of Colombia is launching a campaign that will tout Colombian as the coffee of choice for those who expect only the very best, in everything from cars to cheese to chocolate.

A new print effort, created by Doyle Dane Bernbach and slated for this fall, will show an expensive shattered coffee cup, with the words "Luckily, the Colombian coffee hadn't been poured."

That tack—a direct descendant of ads DDB created for Chivas Regal—will accelerate during the first quarter of 1985, when the federation breaks additional print ads, as well as a tv campaign, along the same lines.

Such a move comes at a time when the coffee industry is doing all that it can to fight a 20-year erosion in consumption. Both individual roasters and their collective consortium, the National Coffee Assn., have inaugurated during the past year numerous new, revamped or strategically shifted products.

Their hope is to woo drinkers, particularly younger ones, who tend to opt for colas, white wine and other, usually decaffeinated cold drinks.

In fact, early next year NCA, supported by the Colombian federation and others, will break a new campaign, its first from McCaffrey &

Cuts into ESPN sports slate

'Biz Times' grows

By SUSAN SPILLMAN

NEW YORK—"Business Times," the early-morning business show that airs on Entertainment & Sports Programming Network, will expand further into ESPN's sports schedule with a new, hour-long show on weekends.

"Wharton/Business Times Management Report" will air 9 a.m. to 10 a.m. (ET) Saturdays, beginning Oct. 27, and be repeated at 11 a.m. Sundays. "Business Times" will continue to air weekdays from 6 a.m. to 9 a.m. The new show will feature professors and experts from Wharton College of Business.

The decision to expand "Business Times" was made before Don Ohlmeyer and John Martin, chairman and president, respectively, of Ohlmeyer Communications were retained last month as consultants to ESPN as part of Nabisco Brands' $60 million purchase of 20% of the sports network (AA, Sept. 13).

However, with Messrs. Ohlmeyer and Martin on board, more programing changes are likely. Among the changes Mr. Martin would like to see are an upgrading of the network's nightly "Sports Center" news show, the introduction of daytime sports programs aimed at women and a new on-air promotional look.#

Hunt-Wesson spends millions to push tomatoes

FULLERTON, CAL.—Beatrice Cos.' Hunt-Wesson Foods will launch a multi-million-dollar print campaign next month in women's magazines. The ads will focus on whole tomatoes, tomato sauce and tomato paste. The campaign, through Ketchum Advertising/San Francisco, for the first time compares Hunt-Wesson's vine-ripened canned tomatoes to fresh produce.

Grey buys shop specializing in entertainment

NEW YORK—Grey Advertising has reached an agreement to purchase Charles Schlaifer & Co., an agency specializing in entertainment and motion picture advertising. The shop will be combined into Grey's leisure and entertainment division.

IBM rolls out new typewriter line

RYE BROOK, N.Y.—IBM Corp. has introduced a new line of electronic typewriters, the Selectric System/2000. New features include easy-to-use function keys and a "dictionary" that detects possible spelling errors as soon as a word is typed. The company also has unveiled two new letter-quality printers for its Personal Computer family. Doyle Dane Bernbach, New York, handles.

First ads prepared for Calvin wine cooler

BROOKLYN, N.Y.—Joseph Victori Wines over the next few weeks will launch its first ads for Calvin wine cooler, now available in 30 states. The radio spots by Shapiro Budrow Associates, New York, initially will run in 15 major markets. The theme will be "Wine is fine, but Calvin is cooler." Ad budget is $1.5 million.

Chrysler out to wear movie-producer tag

By VERNE GAY

New York—Chrysler Corp. is embarking on a network tv advertising strategy that will include its participation as a multi-million-dollar investor in the production of made-for-tv movies.

Chrysler's new "five-year plan" will include co-production ventures for at least two tv movies per season, beginning in 1986. The tv movies, which will carry Chrysler as the exclusive automotive sponsor, are designed as hedges against anticipated network prime time price increases in the face of declining network audience shares. Also, the scheduling of the Chrysler tv movies will be pinned to launches of new Chrysler cars.

The Chrysler strategy is similar to efforts by such major advertisers as General Motors, General Electric and Hallmark Cards, which have produced their own network tv movies or miniseries.

The first Chrysler effort will be "Last Days of Patton," a tv movie sequel to the theatrical "Patton." Like the original, it will star George C. Scott.

The movie, to be carried in spring '86 on CBS, goes into production in January, with Chrysler and Entertainment Partners splitting the $8 million production and network clearance budget.

If successful, "Last Days of Patton" will be the first of several network tv movies that Chrysler will produce or co-produce. Kenyon & Eckhardt, Chrysler's agency, persuaded its client to earmark funds for two movies or miniseries for network play per year. A second movie or miniseries may be forthcoming in '86.

"To borrow a phrase from Stalin, we have a 'five-year plan' for Chrysler in which we hope to produce two movies per year," said Werner Michel, senior vp in charge of new program development at K&E. He added that K&E is exploring prime time tv vehicles for Ocean Spray and Massachusetts Mutual Insurance Co.

K&E persuaded Chrysler that the production avenue was the road to take in the face of anticipated 8% increases in the household cost-per-thousand rate for upfront network tv buys next season. K&E projects

Subscriber growth slows, program costs high

Time to step in at HBO

By SUSAN SPILLMAN

New York—With last week's resignation of Frank Biondi, chairman of Home Box Office, parent Time Inc. is expected to take firm control of its troubled cable tv service, imposing staff cuts and renegotiating costly film deals (AA, Oct. 15).

HBO's problems stem from a continuing slowdown in subscriber growth and overextended programing commitments, estimated at nearly $1 billion.

Mr. Biondi left HBO Oct. 12, and three days later Time Inc. reported that for the second quarter in a row, pretax earnings of its video division had declined. In the second quarter, HBO's troubles caused a 3% decline, and in the third quarter they were off by 2.8%.

For the third quarter ending Sept. 30, Time's video group, which also includes Cinemax and American Television & Communications, had pretax income of $56 million, down from $57.6 million in the same period a year ago. Over-all, Time reported a 52% increase in third-quarter net income, thanks to strong performances by its magazines and book publishing.

F. Biondi

Any decline in the video group's pretax profit "is serious, because HBO contributes so much to Time Inc.'s bottom line," said Tony Hoffman, entertainment analyst at Cralin & Co. "When HBO sneezes, the whole company gets a cold."

According to Mr. Hoffman, HBO will add only 1 million new subscribers this year to its current 13.5 million, half the amount Mr. Biondi predicted.

Expecting more subscribers to offset its costs, HBO made a series of expensive movie deals. "Now HBO can't afford to pay so they're going back to the studios on bended knee," said Mr. Hoffman, "and the studios aren't sympathetic."

Along with trying to renegotiate these programing deals, HBO is expected to make significant staff cuts. But a company spokesperson would not confirm that.

Although Michael Fuchs, HBO's president and chief operating officer, will succeed Mr. Biondi as chief executive officer, he will retain his current title.#

Diversifoods offered buyout of $525 million

By JANET NEIMAN
and SCOTT HUME

Diversifoods president Donald Smith has a reputation for knowing a good opportunity when he sees it. His decision this week to head an investor group that proposed a $525 million leveraged buyout of Diversifoods appears in line with that reputation.

Mr. Smith is joined by Diversifoods' key management executives and more than 40 persons in middle-management posts, along with New York investment banker Allen & Co. in proposing the buyout.

Rumors that Pillsbury might be considering an unfriendly takeover of Diversifoods (which operates or subfranchises 377 Burger King units) have circulated for the past few weeks. A Diversifoods spokesman said of the Pillsbury rumors "no offers have been made [to Diversifoods] and none were anticipated."

But most industry analysts preferred to view the proposed buyout as an attempt by management to capitalize on Diversifoods' depressed stock price, rather than as a defense against outside acquisition.

However, Prudential-Bache analyst Michael Culp said he "would not be surprised" if the Smith group's $15.50 per share offer is topped by another buyout investor—not necessarily Pillsbury.

He noted that 90% of the capital for the Smith group's buyout would have to be financed, and obtaining the funds would be "no sure thing."

Pillsbury vice-chairman Winston Wallin told stockholders last month the company intends to increase its company-owned Burger King holdings from the current 14% to 20% (McDonald's owns 25% of its system), but he offered no time frame. The addition of Diversifoods' 267 Burger Kings (it subfranchises 110 more to other parties) would meet Pillsbury's goal.

Additionally, Burger King executives earlier this year expressed interest in starting or acquiring another restaurant concept, possibly a pizza chain (AA, April 2). Mr. Wallin said last month Pillsbury will "actively pursue our intention to diversify within the fast-food industry by acquiring a nonbeef-oriented business." Itasca, Ill.-based Diversifoods owns the 900-unit Godfather's pizza chain.

George Novello, vp at E.F. Hutton, New York, said Minneapolis-based Pillsbury is "looking at [the situation] very carefully," but he believes "the ideal thing" would be for Pillsbury to take over only the Diversifoods Burger King operations.

"It would be a lot of money to [acquire] the whole thing," he said. "They'd have to offer substantially more than $525 million, and they'd have to borrow to do it. It would be cheaper to take just the Burger King operations."#

Presstime

Haagen-Dazs adds McCann as finalist

Teaneck, N.J.—At the request of parent Pillsbury Co., Haagen-Dazs has added McCann-Erickson as a finalist for its account, sources say. Still under review are Doyle Dane Bernbach; Ketchum Advertising, and McCaffrey & McCall. Incumbent Advertising Management has dropped from the running.

Other late news

● New York—**Opti-Ray** is introducing Coppertone Sun Protectors line of sunglasses. Paul Anzalone Associates, Huntington, N.Y., handles.

● Endicott, N.Y.—**Endicott Johnson**, a footwear marketer, has named Silverman Mower as its broadcast agency and media buyer, succeeding HBM/Creamer, Pittsburgh. Syracuse-based Silverman Mower already handles print advertising for the company.

● Shawnee Mission, Kan.—**James Barickman**, a well known name in Kansas City, Mo., advertising circles, is returning to the area in the new post of chairman at Barkley & Evergreen. Mr. Barickman, who founded Barickman Advertising, Kansas City, in 1959, most recently was senior vp for business development, Doyle Dane Bernbach, New York.

● New York—**MCI Communications** is expected to announce Oct. 17 its plans to expand to Europe with its low-cost, long-distance telephone and electronic mail services. The $6 billion international long-distance telephone market is controlled by archrival AT&T. MCI's initial European markets are expected to include Belgium, Greece and the U.K.

● New York—**Cuisine** is increasing the size of its December issue, following advertisers' requests to appear in the monthly's last issue (AA, Oct. 8). It will now run 164 pages, the same as November's record issue. Publisher Anne Sutherland Fuchs and Peter Clancey, vp-advertising sales director, said they are considering offers both from parent CBS Magazines and from outside.

● New York—**Gil Spencer**, new editor at the *New York Daily News*, has revealed several management changes. Mr. Spencer termed the changes "a natural shifting of things." The shifts include: Robert Lane promoted to assistant to the editor from a newsroom administrative post, succeeding Robert Keene, who left; Madeline Rogers to the new post of editor-operations from assistant managing editor-features; Anthea Disney succeeds Ms. Rogers, from family/living editor, and Steve Yahn to business editor from deputy business editor at the *Philadelphia Daily News*, where Mr. Spencer was previously editor. Mr. Yahn replaces Brian Moss, who asked to be transferred within the *Daily News*. Mr. Yahn is a former editor of *Crain's Chicago Business*, a sister publication of Advertising Age.

● Dallas—**A U.S. circuit court of appeals** this week remanded to a lower court a complaint alleging that American Airlines and its president, Robert Crandall, broke antitrust laws by proposing in 1982 to rival Braniff International that both airlines hike their fares (AA, May 31, '82, *et seq.*). American plans to appeal the decision to the U.S. Supreme Court.

● San Diego—**Kaufman, Lansky & Baker** will merge with WFC's office here Nov. 10, creating the city's second-largest ad agency at $17 million in projected 1984 billings. The new agency will be known as WFC Advertising. There are no conflicts as a result of the merger. Kaufmann, Lansky may eventually merge with WFC's two other offices, in Phoenix and Tucson.

● Walnut Creek, Cal.—**Jacuzzi Whirlpool Bath** has named seven finalists for its $1 million-plus account, which leaves JWT, San Francisco, Nov. 30. The finalists are Allen & Dorward, San Francisco; D'Arcy MacManus Masius, San Francisco; Joel Goldstein, Santa Monica; Grey Advertising, San Francisco; McCann-Erickson, Los Angeles; Thorn Shepherd & Rogers, Phoenix, and Tycer Fultz Bellack, Palo Alto. A decision is expected within two months.

● **NEWSLINE: First Federal Savings & Loan Assn.**, Rochester, N.Y., is down to five ad agencies, including incumbent Wolff Associates, in its agency review, expected to end in mid-December. Ad budget reportedly is in the $4 million range. . .**Esquire's** December issue, introducing its *Esquire* Register of outstanding Americans under age 40 (AA, Jan. 9, *et seq.*), will be themed "The best of the new generation". . .**General Motors Corp.'s** Chevrolet division is boosting its motor sports program with a joint venture to develop a 2.6-liter V-6 for the Indianapolis 500. The new engine is designed to compete with power plants built by European companies like BMW and Renault. The joint venture is with the Roger Penske racing team and Ilmore Engineering, a British company. . .**Creative Programming**, New York, buoyed by its production of 15-minute "infomercials" for Goodyear and De Beers (AA, Oct. 15), is forming a CPI Infomercials division to produce such long-form informational program/commercials for advertisers. . .**Don Kamens** joins Hearst Magazines' *House Beautiful* as ad director, from the same post at *Natural History*, succeeding **Clifford Tallman Jr.**, who remains associate publisher.

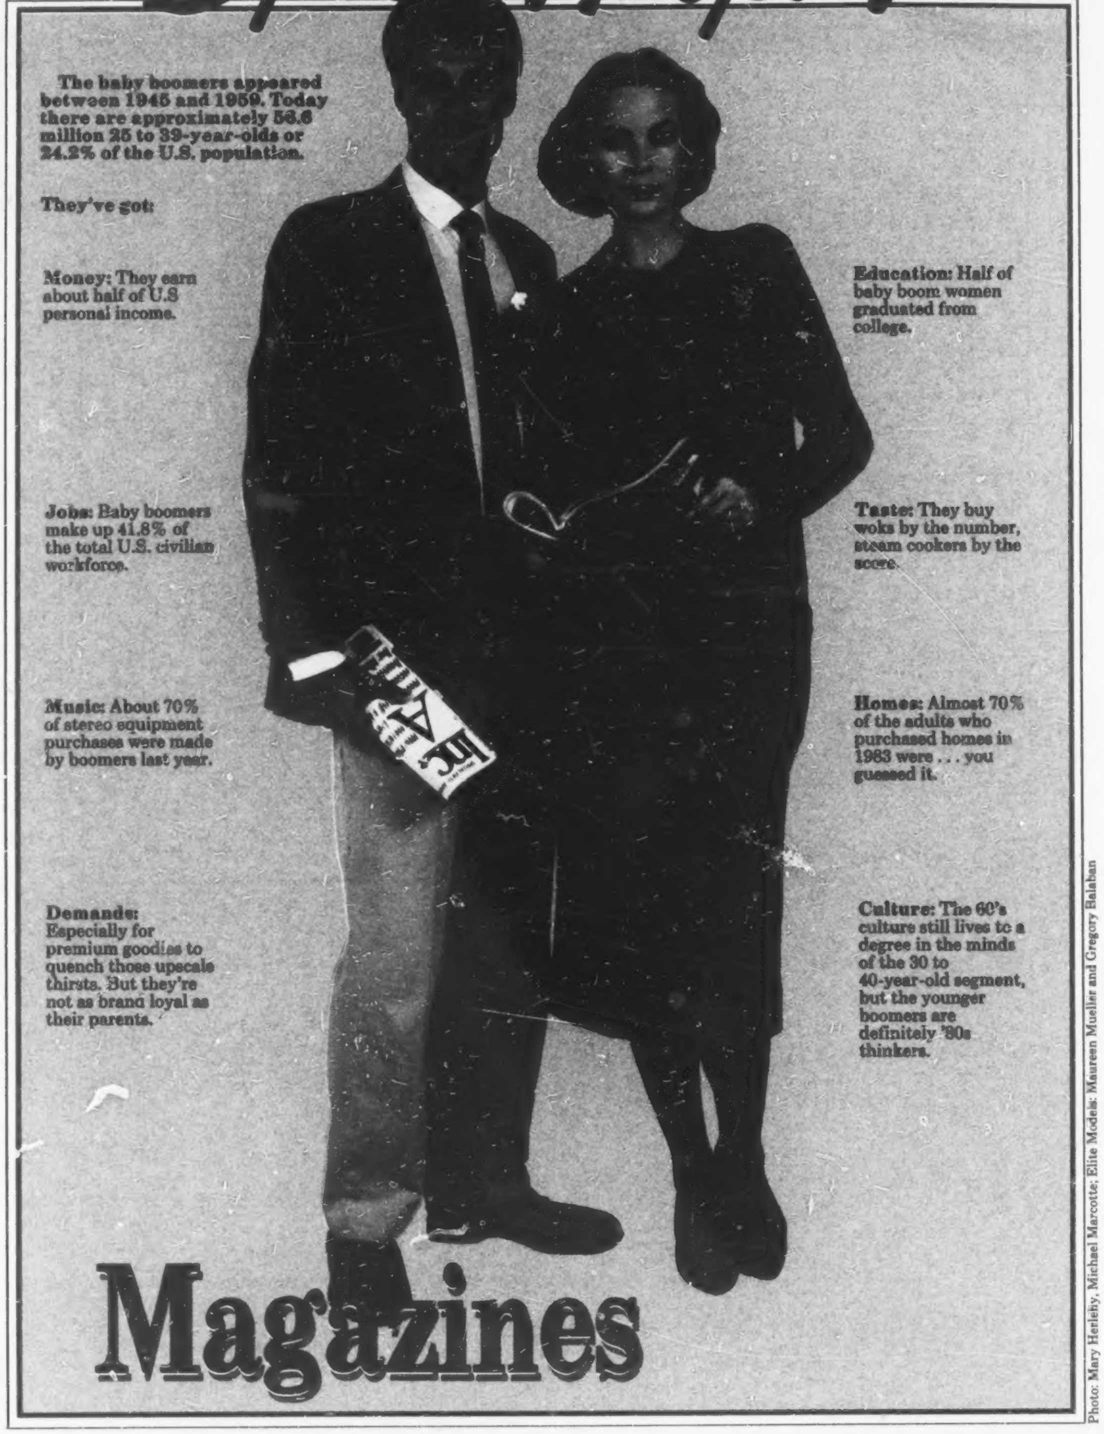
Special Report



The baby boomers appeared between 1945 and 1959. Today there are approximately 56.6 million 25 to 39-year-olds or 24.2% of the U.S. population.
They've got:
Money: They earn about half of U.S personal income.
Jobs: Baby boomers make up 41.8% of the total U.S. civilian workforce.
Music: About 70% of stereo equipment purchases were made by boomers last year.
Demands: Especially for premium goodies to quench those upscale thirsts. But they're not as brand loyal as their parents.
Education: Half of baby boom women graduated from college.
Taste: They buy woks by the number, steam cookers by the score.
Homes: Almost 70% of the adults who purchased homes in 1983 were . . . you guessed it.
Culture: The 60's culture still lives to a degree in the minds of the 30 to 40-year-old segment, but the younger boomers are definitely '80s thinkers.

Getting a reading on the baby boom

By B.G. Yovovich

Magazine publishers take heed: Beware of the *Bride's* magazine syndrome.

For *Bride's*, the syndrome is a successful way of life. The typical reader is intensely interested in the magazine for the six months or year before her wedding, but she rapidly loses interest afterward and is replaced by someone from the next batch of brides-to-be.

In the case of other magazines —including publications such as *Architectural Digest, Esquire* and *Money* that have been some of the industry's biggest success stories recently—the syndrome will not be as obvious nor strike as swiftly, but, nonetheless, it may combine with changes in the much-discussed baby boom generation to force many magazine publishers to confront some knotty problems.

For example, when young adults are beginning careers and forming households, magazines such as *Architectural Digest, Esquire, Gentlemen's Quarterly, Glamour, Money, Savvy* and *Working Woman* can be invaluable sources of information. However, says Peter K. Francese, publisher of *American Demographics* magazine, "Over a period of years, a magazine like *Money* or *Architectural Digest* can outlive its usefulness for a particular reader."

Publishing consultant Christine D. Urban says, "Magazines like *Money, Self, Success, Working Woman* and *Esquire* are 'becoming' magazines. They are publications that readers go to in order to learn new ways of being, and, if the magazine does its job well, eventually its readers 'get there.' In a way, if the book is successful, it becomes obsolete."

Though *Bride's* has learned to live with this ebb and flow of readers, the phenomenon will present new challenges for those magazines whose audiences were swelled by the surge of baby boom generation readers who, during the past decade, began looking for magazines that would help them buy and decorate their first homes; embark on and manage their careers, and give them guidance on entering affluent lives.

For the most part, this type of "life management" magazine is a relatively new product, one fueled by the many social changes that have occurred in the past two decades.

"People have always gone through life cycles, but people today go through more of them than they did in the past," says Lillian Deitch, vp, Futures Group consulting company, Glastonbury, Conn. "We've added a few new ones. The baby boom generation added living independently from their parents before they got married. There is also the cohabitation mode, and we have the serial marriages, all of them different cycles to go through."

In particular, says Boston University marketing professor Mary Lou Roberts, "When people move from one role to another—when a student is just getting his or her first job, or a young person is getting married or setting up a cohabiting household—these role-transition periods tend to cause people to reach out and search for more information because they are not sure what they are doing."

Getting that information is not always easy, however. In the case of today's two-career households, for example, "The vast majority of the members of such households grew up in traditional households, and they are lacking in role models to help them establish their more contemporary kinds of households," says Ms. Roberts, who recently completed a study of dual-income families for Conde Nast.

Reading

(Continued from Page 11)

As a result, many magazines stepped in to fill these information gaps. Take the examples of *Esquire* and *Glamour*.

"There are so many more eligible people in that 25-to-35 age group that there is now a massive market for a magazine like *Esquire* and its counterpart, *Glamour*," Mr. Francese says.

In the case of *Glamour*, the magazine is "in the business of giving women advice on the kinds of things their mothers could never tell them about because their mothers don't know anything about them: Advice on how to live with a man; what are the legal ramifications of living with a person or what it means in terms of insurance and investments. They talk about how to have a satisfying career that doesn't conflict with your boyfriend's. How to break up with someone you have been living with. You don't go get a divorce. What do you do, just leave? How do you leave?

"The previous generation didn't do these things," Mr. Francese says. "You have a whole group of people who are living a life style that large numbers of people had never lived before.

"Women today have tremendous career opportunities and are living professional lives, but their mothers were housekeepers and don't have any advice for them."

Similarly, magazines such as *Savvy* and *Working Woman* stepped in to provide much-needed information regarding the new levels of women's involvement in the work force; personal finance magazines such as *Money* moved to provide guidance for those about to buy their first homes or make their first investments in the stock market, and magazines such as *Architectural Digest*, *Connoisseur* and *Gourmet* and other upscale life-style publications served as primers for those just beginning to enjoy the pleasures of affluent living.

Ms. Roberts points out that "it goes beyond magazines, that you can even see it in catalogs and catalog shopping, where certain catalogs are becoming the same sort of primers and are providing the same sort of insight and are confirming the expectations of what life ought to be like."

The more heightened sense of time constraints felt by this generation also has contributed to its turn to life-management publications.

In previous generations, for example, an affluent household generally consisted of "one person making the money, and the other person spending it on the family and household," Mr. Francese says. "The spouse that stayed home would take care of the children and be able to hunt around for the right fabric, or the right couch, and to decorate the home.

"Now you have vast numbers of affluent households where both adults are actively pursuing careers and neither has the time to manage the money or decorate the home," says the publisher of *American Demographics*. "This is where a magazine like *Architectural Digest* comes in. These people are replacing the time that they used to spend [on learning about such things] with a prepackaged piece of knowledge."

On the other hand, there is the danger of attributing too much to the post-World War II cohort.

For example, Ms. Deitch says it wasn't only the baby boom generation that got more interested in things financial during the 1970s.

"Prior to 1973, the financial markets were pretty stable. You put your money in the bank. There wasn't much of a choice," Ms. Deitch says.

As a result of the rise in inflation, the Organization of Petroleum Exporting Countries shocks to the economy, deregulation and other economic dislocations, "The whole financial services industry changed," Ms. Deitch says. "Money market funds were invented, CDs were invented, and everyone got interested in money instruments. It wasn't just the baby boom—older people were interested in these things too."

Ms. Deitch also says members of the young baby boom households are not the only affluent individuals who are moving into new homes and becoming interested in getting tips on how to decorate their new quarters.

Nonetheless, the sheer size of the baby boom population, 20 to 39 years old and 76 million strong, meant it had a special impact on the markets for these kinds of magazines.

Consequently, "the newer, more specific special-interest kinds of magazines will have to track this population very carefully and see what kinds of interests are emerging," says Ms. Roberts of Boston University.

Generation opens new doors for publishers

At the same time that the aging of the baby boom generation is creating new challenges for magazine publishers, it also is presenting them with a variety of new opportunities.

For example, "There is great interest in publications about children, a great deal of interest in information about children age 1 to 5, about parenting and about learning," says Lillian Deitch, vp, Futures Group consulting company, Glastonbury, Conn.

Education is a particularly hot topic because "the baby boom generation is going to be very uptight about their children's education on several different scores. They feel guilty because they are leaving them alone [or with child care help] all the time. Because they are educated themselves, they want their children to be educated."

There also are likely to be efforts to start "magazines geared to various aspects of families," Ms. Deitch says. "I'll invent a new magazine for you: The Blended Family. It's for families where both parents have been divorced and they have different sets of children. There are so many problems: How to get along with your stepsisters and half-brothers, and the like.

"Anything that has to do with children and family relationships is very fertile ground."

However, *Reader's Digest's* disappointing experience with its *Families* magazine—which reportedly had difficulty establishing a clear-cut identity because it tried to reach too many different kinds of families—makes it clear that, despite the fertility of the ground, any new family magazine will require expert cultivation to prosper.

Magazines dealing with midlife career changes and continuing education also are expected to do well.

"In the next five to 10 to 15 years, there is going to be a tremendous squeeze in the middle-management ranks in most companies and an unfortunate dearth of opportunity because there are just too many people" competing for those jobs, says Peter Francese, publisher of *American Demographics*.

"You only need a few senior management people, and yet you have millions of these 30-to-35-year-old people, all of whom are bright, well-educated, and want to advance. The fighting for certain jobs is going to be ferocious."

One result will be a continued growth in entrepreneurial activity—as individuals leave deadlocked jobs—and good opportunities for magazines such as *INC.* and *Venture* that serve that market. There also is likely to be a great deal of midlife career switching.

"It is more in style now to change careers in midlife, to really do something drastic, like go to medical school at age 40 or become a priest at age 50," Ms. Deitch says. "The baby boom generation is particularly prone to disappointment because its members had such high expectations," and this is likely to further accelerate career switching.

There also is likely to be an increasing interest in adult education.

"People learn by observation and in this last recession, there were hundreds of thousands of middle-age men who were retired," Mr. Francese says.

"Everybody can tell you a story about a guy who spent 20 years with a company, and the company put him out to pasture because he had basically outlived his usefulness.

"I suspect that there are a lot of unhappy 55-year-old men out there, and that has not been lost on today's 35-year-olds. They are saying, 'Hey, not this kid,' and the tendency is to always learn more, to have options open, always to have a broad kind of education," Mr. Francese says.

"Education is going to take a much larger fraction of total household income than it did 20 years ago," and magazines tying into these changes have a good chance of doing well.

Even individuals who do not make career changes will find it challenging to keep up with changes under way in their professions—changes that will create opportunities for new magazines. For example, there are likely to be "all kinds of magazines for doctors that will concentrate on the new kinds of practices and that sort of thing," Ms. Deitch says.

The same way that *Medical Economics* has enjoyed success by providing information for doctors on how to manage their money, "there probably will be new magazines that will tell doctors what kinds of practices are the best, the new trends in advertising, and how to manage their offices," the Futures Group vp says.

There may even be an opportunity for several different kinds of psychologically oriented mag-

"They need to change with this group as it matures in order to avoid some of the very difficult repositioning situations that some of the older publications have had to face."

Moreover, the aging of the baby boom is likely to cause new challenges not only to the obvious "life management" publications, but also to related categories. City and regional magazines "could be vulnerable," Ms. Urban says. A large part of the popularity of a city magazine comes from its role as a guide to its community, particularly for newcomers to the area or for young adults just beginning to partake of the locale's restaurant and entertainment.

The changing demographics also may spur the major magazine publishing houses to adopt a new set of strategies. Instead of the traditional approach in which a publishing house focuses on cross-selling subscriptions to similar audiences, the new strategy might be to "graduate" readers who are moving out of the audience of one magazine into another, the way a reader of *Bride's* might "graduate" to *American Baby.*

Some experts also argue that there will come a time when the baby boom market will cease being so distinctive.

"There may be a second wave of aging baby boomer magazines, but something tells me that, at some point, the traditional books like the *Reader's Digests, The New Yorkers* and the *Atlantics*, if they are smart, will be able to pick up the baby boomers," Ms. Urban says. "I don't think that there will be an indefinite evolution."

Then again, perhaps the baby boom has a few more surprises in store.

"Just as the individuals of this generation haven't had role models," Ms. Roberts says, "our society doesn't have a model for what will happen with this kind of a generation."

Rolling Stone moves into mainstream

By Jack Hafferkamp

As Vietnam, the 1968 Chicago Democratic National convention, Woodstock, John Lennon and Yoko Ono's peace events, and Watergate all merged into one heady socio-political brew, *Rolling Stone* was there to cover it, make sense of it and transmit an us-vs.-them attitude to a hungry audience.

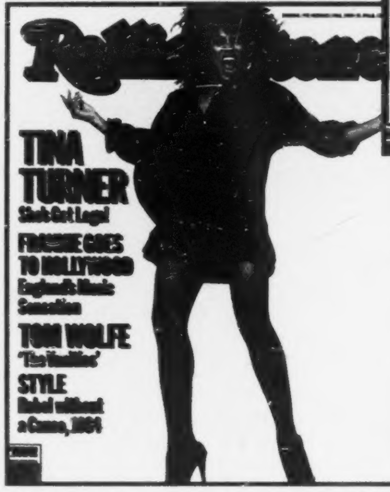
Rolling Stone has prospered because founder-editor-publisher Jann Wenner's instincts hooked directly into the gills of a generation. But now those first readers have moved on in life. The ones behind them are different.

Rolling Stone has had to change to accommodate the interests of 1980s readers. As the later baby boomers have moved into the cultural mainstream, *Rolling Stone* has followed and often led, polishing itself to a higher and higher gloss that reflects both the generation's and Mr. Wenner's maturation.

The challenge to *Rolling Stone* is to pass with its readers from yippie to yuppie. Some of the signs of maturity are physical—it is going from newsprint to all slick stock in January. But will this upgrading give it the boost it needs to fend off middle-age spread? And has Mr. Wenner's commitment to his music-and-politics formula caused *Stone* to become irrelevant to growing numbers of young men whose primary interests lie in career and financial matters rather than rock and roll?

Has *Rolling Stone's* time passed it by?

After 17 years of publishing, the signals are mixed. There are many questions about this *Stone's* ability to roll on through the 1980s. In January, *Rolling Stone* will guarantee a base circulation of 875,000. It would appear alive and well with estimated total 1982 revenues of $33.1 million and estimated ad revenues of $17.2 million, according to *Folio 400* figures.



TINA TURNER
She's Got Legs!
FRANKIE GOES TO HOLLYWOOD

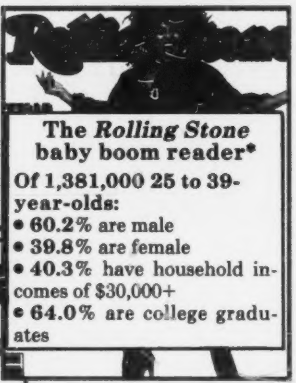
Rolling Stone *must move with its readers from yippie to yuppie.*

Yet, as they say in the record business, *Rolling Stone* has lost its three-bullet rating. It has lost momentum. This year, says associate publisher Henry Marks, *Rolling Stone's* ad pages are down 5%. Upward mobility in the baby boom magazine business has passed to such yuppie interest magazines as *Byte, Harvard Business Review, High Technology, Money, Venture, Working Mother* and even *Southern Living*. There is speculation that *Rolling Stone* today is merely spinning its every-other-weekly wheels.

This is not the first time in *Rolling Stone's* history that such talk has been heard. So far, however, the magazine has managed to find a new way to grow.



The *Rolling Stone* baby boom reader*

Of 1,381,000 25 to 39-year-olds:

- **60.2%** are male
- **39.8%** are female
- **40.3%** have household incomes of $30,000+
- **64.0%** are college graduates

Information for this chart on baby boom readers and subsequent charts in this report marked with an asterisk (*) is taken from Simmons Market Research Bureau data.

This time Mr. Wenner is putting his chips on slick stock: A 70-lb. glossy cover and 40-lb. super calendar stock inside.

"It's a natural evolution," he says, a "sharpening and improvement" that is "consistent with the maturation of the youth culture. All of these changes *Rolling Stone* has gone through [from double-folded, black-and-white newsprint to four-color, heavier stock, trimmed and stapled] are a reflection of people's desire for a more professional, polished thing."

One ex-employe, however, finds some irony in this chain of "improvements," saying the magazine seems to have made a 180-degree turn from its original, very alternate, funky newsprint look. "Now," he says somewhat nostalgically, "it's very different." *Rolling Stone* is no longer "an outsider. Now it's very inside." In short, *Rolling Stone* has gone mainstream.

Mr. Marks agrees that the magazine consciously has abandoned its old image, "when the reader dressed solely in blue jeans and had long hair, which he didn't wash very often." That reader, Mr. Marks says, was "very politicized, and against the government."

Today *Rolling Stone's* readers still fall primarily into the category of 18-to-34-year-old male with some college education. At 25.5, the median age is somewhat higher than in the past, yet the real difference from the stereotypical 1960s hippie reader, Mr. Marks says, is that he now "has fairly short-cut hair, he is very interested in his career; is acquisitive, and tends to have the opportunity to express his individuality. He has gone from yippie to yuppie." Today's *Rolling Stone* "reflects that young people today have many sides to them," Mr. Marks says. They have money to spend on a wide variety of diversions and entertainments.

Mr. Wenner stresses, however, that *Stone's* changes are essentially issues of format, style and advertising, and are not content-related. *Rolling Stone's* editorial formula, he says, "still reflects the same things."

Its major ingredients are rock music (star profiles and re-

(Continued on Page 14)

Jack Hafferkamp, who teaches a course on magazines at Roosevelt University in Chicago, is a frequent contributor to Special Report.

azines.

"The focus might be on how to succeed in the small groups with which people interact on a daily basis," Mary Lou Roberts, Boston University marketing professor, says.

This represents something of a return of baby boom interest in things psychological. This time, however, "the focus of interest [in things psychological] is narrower," Ms. Roberts says. "People are not interested in global concerns or their inner souls, but in how they can do better in their own personal spheres of activity."

There also may be an opportunity for a magazine that would help individuals deal with disappointment in their careers and the traumas of midlife career changes.

However, Mr. Francese warns that such a magazine "is going to have to be extremely carefully positioned because it is likely to run into the same buzz saw that *Families* did, where you try to be so many different things to so many different people that you end up speaking to no one."

—B.G.Y.

Summer issue leaves no stone unturned

Rock 'n' rollers tend to measure time by summer songs and events. Woodstock happened in 1969. Michael Jackson's "Thriller" album dominated the summer of 1983. This year's big stories were the Jacksons' tour, Bruce Springsteen's tour and Prince's rock movie "Purple Rain."

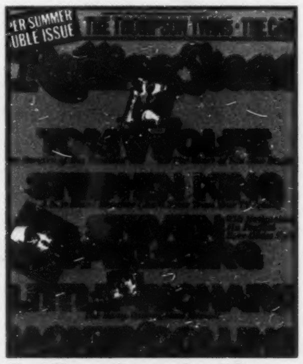
Rolling Stone measures summers with its "Super Summer Double Issue." It's a living time capsule—a direct glimpse into the currency of the youth culture.

Beyond the fully expected record reviews and the "Random Notes" gossip column, this summer's 130-page issue was devoted to fun in the sun. Politics was passed over in favor of providing readers with entertainment in four categories:

- "Summer Music" looked in on Bruce Springsteen, Huey Lewis, the Thompson Twins, (a two male, one female trio from Britain) and the Cars. If you don't recognize any of these acts, you are beyond the *Rolling Stone* demographic.
- "Summer Fun" had a marvelous confessions piece on one of rock's original wild men, Little Richard, which was aptly titled "Tutty, Fruity," the title of one of his early hit records. It also offered fashion insight (Hawaiian shirts) and the word on roller coasters.
- "Summer Reading" offered two kinds of escapism; a sleazy short story, "The Rock Star and the Lifeguard" by Jackie Collins, and fiction by novelist and Hollywood horror master Stephen King, "The Revelations of 'Becka Paulson."
- "Summer Movies" had a feature on Steven Spielberg, "Will Hollywood's Mr. Perfect Ever Grow Up?" and cinema sleaze—the subculture that has formed around gory drive-in movies.

The really big feature this summer was the first installment of a new novel by Tom Wolfe called "The Bonfire of the Vanities." It will run on a monthly installment basis for a year.

Advertising in this summer's issue totaled about 76 pages. The leading categories, in order, were audio equipment, liquor, autos, tobacco, records, shoes, and health and personal care. Records and tapes did not dominate as they once did; in fact, there were only five in the issue. B. Dalton Co. had a 12-page four-color insert.



Rolling Stone's *"Super Summer Double Issue" is a living time capsule.*

Associate publisher Henry Marks predicts *Rolling Stone* will be up 10% in advertising pages next year, with opportunities for growth in home video, grooming aids, autos, liquor and tobacco.

And finally, for those who have been dying to know what this summer's "Random Notes" revealed: "There's nothing to those Billy Joel-Christie Brinkley breakup rumors; she's got tickets to many of his upcoming shows" . . . David Bowie has finished recording a new album . . . Cyndi Lauper's new single "She-Bop" is "an ode to self-abuse," and Teddy Pendergrass, "wheelchair bound since a controversial car accident left him quadriplegic," has denied rumors that he was engaged in sex with his transsexual passenger when his $109,000 Rolls slammed into a tree . . . ."

No matter what else happened this summer, *Rolling Stone* readers got their necessary dose of gossip.

—J.H.

PEOPLE PATTERNS

Women keep Republicans on their toes

By PETER FRANCESE

Because older people generally are considered to be more conservative than younger people, one would think Republican candidates would walk away with easy victories this November, if only because more older people vote than younger ones.

Only 40% of people 18 to 24 years old voted in the last presidential election, but 70% of those older than 55 did so.

However, the reason complacency does not pervade the Republican party may be because among older people, a larger and larger majority of potential voters are women.

Among those 18 to 24 who seldom go to the polls, there are only 98 women for every 100 men.

There's not much of a gender gap between 24 and 44 either, only 102 women per 100 men. But among potential voters 45 to 64, there are 110 women for every 100 men, and 65 and older, there are 150 women.

In the last presidential election, this meant there were nearly 3 million more women older than 45 who voted than men of the same age.

For the upcoming election, there will be about 73 million people older than 45. If 70% of them vote, the polling places will see 5.4 million more women voters in that age group than men. Clearly older women are a potent political force.

But the issues that are important to younger women may not be as relevant to those older than 45. For example, two-thirds of women 25 to 45 are in the labor force. But less than half of those 45 to 64 are employed, and only 10% of those older than 65 are.

Equal pay for equal work may not be as important an issue for those older than 45. Unless they are being pressed to take care of grandchildren, day care may not be a critical issue either.

However, the desire for economic security is more acute with advancing age, and how to pay for one's medical bills becomes a top-of-the-mind matter.

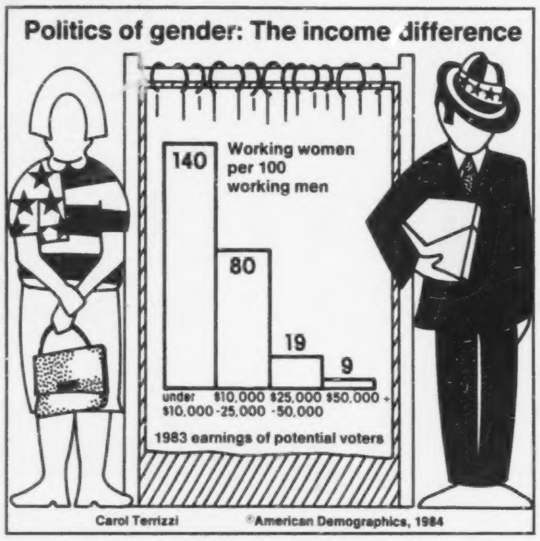
No politician in his or her right mind would touch Social Security, but there has been a lot of talk about controlling the cost of medical care.

Women approaching 65 might require a great deal of medical care if they live close to their life expectancy. They probably would like to be reassured by the candidates that the cost of healthcare is not going to be controlled by reducing Medicare payments.

Winning a presidential election, of course, involves a lot more than saying the right things to older voters. But as our population continues to age and the majority of women voters grows larger, issues such as healthcare and pension rights will move closer to the top of political agendas.

The makers of consumer products and services spend lots of time and money finding out and keeping up on what women—young and old—want.

Political candidates who want to be elected may wish to do the same.



Carol Terrizzi ©American Demographics, 1984

The presence of Geraldine Ferraro on the Democratic ticket has focused our attention on the economic and political issues that are important to women. One of those issues is money and the difference between what men and women are paid.

There are many reasons put forth why women make less money than men: More discrimination, fewer expectations, more career interruptions, less training, less experience, different choice of occupations.

Whatever the reason, for every 100 men who made more than $50,000 in 1983, there were only nine women that did so.

But for every 100 men who earned less than $10,000 a year, there were 140 women.

Between $10,000 and $25,000, there are 80 women for every 100 men. But between $25,000 and $50,000, there are only 19 women for every 100 men.

Does this income gap mean women will vote differently from men?

This lower earnings profile ought to predict that women would vote less often than men because fewer low-income people go to the polls—except that in the last presidential election, the same percentage (59%) of men and women voted.

In previous presidential elections, more men than women voted, but the gap became steadily smaller until it disappeared in 1980. This voting gap did not close because the income gap narrowed. It may have closed because family income has become more important than individual income.

The rise of the two-income family has changed how individuals behave both politically and economically. In the old days of one-earner husband-wife households, making political predictions based on income was much easier. The lower income people voted Democratic, and the upper income people voted Republican.

Today, a married woman whose family income is $30,000 because her husband makes $20,000 and she makes $10,000 may feel very differently about political issues than a single woman earning $10,000 a year.

It's also a safe bet the married woman spends her $10,000 quite differently from the single one. More than half (56%) of all women with incomes less than $10,000 are married.

Only about one-third are single, divorced or separated, and one in seven is a widow.

There is no question that women as a group get paid less than men. The question for this election year is, how do they feel about it?

If most of them are not concerned because their spouse is well-paid, then the Republican ticket might do better than expected among women.

However, if most working women feel underpaid, regardless of how much their husbands make, then the Democratic ticket will benefit.

If the past is any guide, most low-income women who are supporting themselves or their families will vote Democratic.

Women make up the majority of the population older than 18, so if the same percentage of women as men vote this November, there could be as many as 5 million more women than men casting ballots.

The large gap in the income of men and women, combined with the rise of two-income families, creates some degree of uncertainty about how that majority will vote in November.

Parting Shot / *BY RANCE CRAIN*

School program builds for the future

Crain Communications Inc.'s Adopt-a-School program has taken a new turn.

I've written about the Adopt-a-School program on several occasions because I'm proud of Crain Communications' involvement in it and because I'd like to encourage other business people to participate. The program isn't unique to Chicago. Oakland, Cal., has a very active Adopt project, and several other cities have successfully formed a partnership between business and the public schools to help students.

And that's what the Adopt-a-School program is all about. It's a way to enhance public education by bringing into the classroom the expertise and insight that the business community has in its own people. It helps students see how basic skills such as reading, writing and computing are applied in the business world, and it helps business people by giving them a practical understanding of the successes and problems facing public education today. Most importantly, though, I firmly believe that business has a big stake in the education system that turns out the employes, employers and consumers of tomorrow.

The school that *Crain's Chicago Business*, a sister publication of ADVERTISING AGE, adopted three years ago is Schurz High School on Chicago's Northwest Side. For the first two years, our program centered on lectures in the classroom and field trips to *CCB*. Our staffers—including myself—talked to journalism and English students about newspapers and the various beats we covered. Our illustrators talked about illustrating articles, demonstrated use of art materials and the production and graphic procedures we use for putting out our weekly paper. And our advertising staff talked about careers in selling and the role advertising plays.

The program worked well, and I think the kids who wanted to learn something acquired some valuable information. This year, we're trying something different, however.

> ***I firmly believe that business has a big stake in the education system that turns out the employes, employers and consumers of tomorrow.***

Editor Dan Miller will be at Schurz for four consecutive Tuesday mornings talking to English students about writing editorials, something he does for us every week. In the first week, Dan explains what an editorial is, how to pick a topic, how to research it and how to write it effectively. He then assigns the kids an editorial to write of their own choosing.

In the second week, he returns to Schurz to pick up the editorials (they have been corrected by teachers and rewritten by students) and goes through the first week's explanation for a new set of students. In the third week, he returns with the first batch of editorials, which he has read, and discusses them with the students, pointing out such things as effective arguments and good writing. He also picks up the revised editorials from the second class. In the fourth week, he repeats the critique session.

That's not a complicated process. And it doesn't take a lot of time. But it brings our expertise in writing into the classroom where I hope we can teach the students something about writing—and teaching the students those basic skills is what the program is supposed to do.

Any business can tailor its expertise to an Adopt-a-School program. One school needs a program to improve reading and writing skills through advertising programs (a likely adopter would be an ad agency or the in-house ad department of a corporation), and another needs help in establishing a computer club. A high school would like to set up a Banking Club but needs a bank to help out.

Our experience in the program has shown us we can set up any kind of program we want. The Schurz teachers are glad to have us because we bring new skills to the classroom. We can set up a program one year and change it the next. Or we could end our involvement. We sign up for only a year at a time.

It's worth trying.

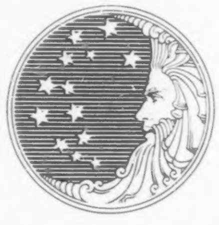
Rumor returns to bedevil P&G

By LAURIE FREEMAN



Procter & Gamble once again is fighting the trademark rumor that won't go away: That the company is in league with the devil and its corporate man-in-the-moon logo is Satan's symbol.

The Cincinnati-based company launched a national pr blitz in 1982 (AA, June 28, '82) to dispel notions about the company's supposed link to the devil, and the rumors died down. But for "some unexplained, unknown reason, the number of calls concerning the moon and stars has climbed back up again," said a P&G spokesman.

The number of telephone calls P&G has fielded this time around is nowhere near the record levels set in 1982, when P&G answered 12,000 calls per month on the toll-free lines it lists on product packages.

In September, the company received more than 1,000 Satan-related calls, and to date in October, the number of incoming calls has tripled to 3,000.

The telephone calls are coming from areas in California, Nebraska

Fraud charge hits ABC in Landau case

By ROBERT RAISSMAN

Dittler Brothers has filed a suit in Atlanta federal court accusing American Broadcasting Cos. of conspiring with Robert Landau Associates, the now-bankrupt advertising/sports marketing company, to defraud Dittler.

Dittler alleges it was defrauded of $1.5 million it paid Landau to finance parties for network employes and advertisers during the 1984 Summer Olympics. The company is suing for $5 million plus court costs and is seeking a jury trial.

In response, ABC last week filed for dismissal of the Dittler suit in New York federal court.

The suit is the latest development in the unraveling of RLA's financial troubles. In the throes of a cash crunch in 1983, Robert Landau, chairman of RLA, approached Dittler for a $1 million cash loan. The Landau and Dittler companies had worked together in the past.

In response to Dittler's demand for collateral, Mr. Landau pledged payment from ABC for the Olympics parties catering assignment would be used to repay the Dittler company.

John Lazarus, then vp-sports marketing and sales at ABC-TV and a close friend of Mr. Landau, signed a letter authorizing the payment of RLA's Olympics funds directly to Dittler. At issue in the suit is whether Mr. Lazarus, who resigned from ABC at the end of September, had the authority to commit the ABC funds to Dittler.

Dittler Brothers, an Atlanta-based printing company, maintained in its suit that "assignments of accounts receivable" signed by Mr. Lazarus helped RLA secure a loan from Dittler to finance ABC's Olympics parties (AA, Oct. 1). The parties were held on 15 consecutive nights and attended by about 1,400 people each night.

The Dittler suit alleges that Charles Stanford, vp-legal and business affairs, ABC Sports, informed Dittler attorneys that Mr. Lazarus had the authority to secure such a loan. That charge is the key claim in the case.

According to ABC's suit, a letter dated Oct. 5 was sent to Dittler denying any liability. ABC contends it paid RLA for its Olympics work and had no obligation

Eyes of Texas on political ads

By SARAH STIANSEN

A Texas brouhaha drew national fire last week when a U.S. Senate candidate's tv spots dragged the American Assn. of Advertising Agencies into the bitter campaign.

The controversy started when U.S. Rep. Phil Gramm, the Republican nominee in a senatorial battle characterized by sharp exchanges, introduced advertising last week that called his Democratic opponent the "only candidate in America to be officially cited for unethical advertising by the American Assn. of Advertising Agencies."

In addition, he raised the issue frequently during a debate Oct. 18 to further disparage his opponent, state Sen. Lloyd Doggett.

But the Four A's last week denied that it ever issued such a citation to Sen. Doggett. "The Four A's resents its name being used this way," said John O'Toole, chairman of both the trade association and Foote, Cone & Belding Communications, Chicago. Mr. O'Toole was reached at at the Four A's western

Michelob moments

Anheuser-Busch lays it on the line with new advertising for Michelob that targets the upwardly mobile. Network tv spots for Michelob and Michelob Light broke Oct. 21. Ted Bates Advertising/New York, handles Michelob, and Needham Harper Worldwide, Chicago, has Michelob Light. *(See story, Page 6.)*

Phone war moves overseas

By BRIAN MORAN

AT&T's domination of the international long-distance business is likely to erode even faster than its domestic monopoly, analysts predict, following the entry of MCI Communications and GTE Sprint into the overseas market.

MCI and GTE Sprint, AT&T's two largest competitors in the U.S., both announced agreements last week that set up a global showdown for long-distance customers by providing international direct-dial service at rates up to 40% lower than the current AT&T standard.

Despite recent problems largely caused by higher fees to tie into local phone networks, the challengers' domestic experience should help them make major inroads on AT&T's 90% market share overseas, industry watchers said.

"The competitors have shown they are viable and established—the business market is no longer gunshy about them," said Robert Self, president of Market Dynamics, a New York telecommunications consulting company. "If their pricing is right, the international market will be up for grabs."

Both MCI and GTE Sprint plan to market the new services through direct mail to their existing customer base.

MCI does not plan any consumer advertising, said Howard Crane, senior vp of Washington-based MCI. GTE Sprint expects to pitch its overseas service via a network tv and print advertising campaign in the first quarter of 1985, said Robert Craver, manager of international marketing. J. Walter Thompson USA, San Francisco,

Honig joins to Geers Gross in new post

New York—Marvin Honig, who left Doyle Dane Bernbach International as vice-chairman-creative director in June, will join Geers Gross Nov. 1 in the new post of vice-chairman-executive creative director. Geers Gross vice-chairman Dick Tarlow, the agency's top creative executive, will now only concentrate on some key accounts. Mr. Honig, best known for his classic "Groom's first meal" tv commercial for Miles Laboratories' Alka-Seltzer, most recently had worked on the American Greetings, Atari and Citicorp Travelers Checks accounts at DDB.

Burchill to testify on RKO overcharges

Washington—Thomas Burchill will be subpoenaed by Fidelity Television in February to testify on his role in the RKO Radio Networks overcharges (*see related story on Page 2*). Mr. Burchill, currently president at Lifetime, was president at the RKO networks when advertisers were overbilled $7 million. Fidelity is an applicant for RKO's KHJ-TV license in Los Angeles.

DDB locks up Clairol hair colorings

New York—Clairol has moved Frost 'n Tip and Summer Blonde hair colorings to Doyle Dane Bernbach from Foote, Cone & Belding. DDB also gets Quiet Touch, which did not have an agency of record and was not

Network seeks to maintain credibility

RKO execs quit, sale talk denied

By VERNE GAY

New York—The sudden departure last week of three top executives at RKO General's scandal-ridden radio division is being viewed as a drastic step by RKO to disassociate itself from anyone who may have had prior knowledge of the radio network's $7 million overbilling of advertisers.

At the same time, RKO General denied widespread reports that parent company GenCorp was preparing to sell the radio networks, the only broadcast property RKO is not prohibited from selling by a 1977 consent decree with the FCC.

"Shane [O'Neil, president of RKO General] and his team have taken every action possible to establish the networks' credibility with customers and the various people it does business with," said William Reynolds, president of Akron-based GenCorp. He said these reassurances also covered shareholders and the regulatory community. "If we were interested in disposing of the networks it would probably have been more propitious for us not to make these investments," he said.

The possibility of a sale was raised after an administrative law judge at the FCC said two weeks ago he would examine the radio networks' billing improprieties in 1983, while considering RKO's suitability to own its Los Angeles tv station, KHJ-TV. Fidelity Television, Norwalk, Cal., which has challenged RKO's Los Angeles tv

'AfterMASH,' 'E/R' singled out

Shops review nets' blemishes

By JAMES P. FORKAN

New York—The tv networks may be holding up their fall schedule changes, but advertising agencies have no qualms about pointing out what appear to be obvious chinks in their prime time armor.

CBS' weakest time period, most agency executives agreed as Week 4 of the Nielsen ratings battle got under way, is 8 p.m.-to-9 p.m. (ET) Tuesday, where "AfterMASH" and "E/R" have been consistent losers, despite heavy viewer sampling at the season's outset when scheduled behind "60 Minutes." A couple of admen went out on a limb and predicted their successor well could be "Crazy Like a Fox," a one-hour comedy starring Jack Warden as a private eye.

Dancer Fitzgerald Sample described "Fox" as a "comic sendup of typical detective series" and Ted Bates Advertising labeled this comedy/adventure a "strong 8 o'clock entry."

After having tracked the season-to-date results, Paul Schulman of Paul Schulman Co., New York-based network tv buying subsidiary of Gardner Advertising, said "NBC is in super shape, CBS is in pretty good shape and ABC has a lot of problems."

The viewing changes going on

(X) Represents the number of times published each year; publications are monthly unless otherwise specified.

A. Sectional linage included but prorated to circulation of regional editions. B. Sectional linage included but not prorated to circulation of regional editions. C. Combined unduplicated regional ads. D. 1984 year-to-date figure reflects 5.5 pages of paid advertising in an advertorial section of the Sept. issue. E. 1984 year-to-date figure reflects adjusted total. The magazine erroneously reported its Sept. 1984 figure. It should have been 28.9. * All affiliated with Sunday Mag/Net. except Los Angeles Times Home Magazine and New York Times Magazine.

Midweek News Summary

Doyle Dane Bernbach International is "contemplating" selling its ECOM/DDB public relations unit as part of a plan to streamline operations. *See Page 2.*

"Split-30" ad units will proliferate on network tv during the next year despite concerns that the resulting clutter will undermine the effectiveness of the standard 30-second unit. *See Page 2.*

Time Inc.'s sale of the Pioneer Press chain of suburban Chicago weeklies to Marshall Field V's Field Corp. will put the former *Chicago Sun-Times* owner back into the newspaper business just as it eliminates Time from the category. *See Page 3.*

Adolph Coors Co. next month will withdraw its Golden Lager premium beer from the shelves in the brand's last test market. *See Page 3.*

Prince Foods is introducing its pasta line into its first West Coast market as part of a plan to roll national. *See Page 3.*

Public broadcasting stations again face the question of whether to accept advertising after President Reagan vetoed a funding bill. *See Page 3.*

Pillsbury Co. is raising the competition in the active, dry-yeast category as it enters new Best instant dry yeast into three test markets. *See Page 3.*

Rent-a-Center is embarking on a campaign to tell consumers it's all right to rent goods rather than own them. *See Page 5.*

Warner Cosmetics, after months of speculation, confirmed it will develop a fragrance and cosmetics line under the Norma Kamali name. *See Page 9.*

DIRECT MARKETING

AT&T Communications is moving quickly to quell unrest over its entry into telemarketing among independent telemarketing service bureaus. *See Page 6.*

Robert DeLay, outgoing president of the Direct Marketing Assn., challenged the group to stop being defensive in his last address. *See Page 6.*

Sakowitz Inc. is selling romance in its 16th annual "Ultimate Gift Suggestions" catalog. *See Page 7.*

The U.S. magazine industry's top leaders, Jack Rehm (l.), president-publishing group, Meredith Corp., and chairman, Magazine Publishers Assn., and MPA president William Gorog (r.), were shoulder-to-shoulder with the Bahamas' leader, Prime Minister Lynden Pindling, at this week's American Magazine Conference.

Newhouse in rare appearance

Magazines see good business

By STUART J. ELLIOTT

Nassau, Bahamas—Conde Nast Publications chairman S.I. Newhouse Jr. used a rare appearance at an industry gathering this week to express confidence in his company's struggling *Vanity Fair*.

The low-profile Mr. Newhouse, star of a panel that was the talk of the 1984 American Magazine Conference here, said he's encouraged by the magazine's performance and vowed it will "keep going."

"Recently there was a very nice turnabout in circulation," Mr. Newhouse said. "Renewals are coming in at a much higher rate and ads will hit 50 pages in December. As long as it's going well, and we're encouraged by all the vital signs, we're going to keep going with *Vanity Fair*." Since its revival in March, 1983, *Vanity Fair* has struggled with problems that have kept it losing what industry observers estimate is $10 million to $12 million a year.

Organizers of the conference, co-sponsored by the Magazine Publishers Assn. and the American So-

(Continued on Page 55)

Surf to pound away at Tide

By NANCY GIGES

Lever Bros. is waving another potential success story at Procter & Gamble with the rollout of Surf laundry detergent (AA, March 13) into Texas and Oklahoma.

Set for ad spending exceeding a $50 million national rate, Surf captured more than 13% of the market in a Houston test, moving into the No. 2 slot behind P&G's Tide within six months.

New York-based Lever Bros., using the low-key yet hard-hitting approach it took with Snuggle fabric softener, is playing down the expansion. But the company has told the retail trade it expects Surf to be the first major new laundry powder in many years.

Lever believes Surf will follow Snuggle fabric softener and Sunlight liquid and dishwasher soaps in its parade of new-product successes. Those hit P&G entries hard, and each of those P&G brands is No. 1 in its market: Cascade leads the dishwasher detergent market, Downy tops fabric softeners and Ivory and Dawn share first place among dishwashing liquids.

Surf could be the biggest windfall yet for Lever because of the size of the heavy-duty detergent category—a whopping $3 billion at retail. The brand is positioned as ideal for modern fabrics because it removes not only dirt but odors. Ogilvy & Mather, New York, is the agency.

In addition to tv support reaching 97% of all women aged 25 to 54 an average of 74 times every four weeks during the introductory period, Lever is running ads in women's magazines, distributing two million 7.25-oz. samples and conducting a public relations program with spokeswoman Pat Van Patten, wife of actor Dick Van Patten. Daniel J. Edelman Inc. handles the pr program.

According to Lever, consumer research indicates that one-third of consumers complain that their current laundry detergent does not adequately remove odors from clothes. Other testing suggested that Surf was overwhelmingly preferred to the market leader (Tide), the company said. Nationally, Tide holds 22% of the market.

Surf is a standard-density powder detergent, the largest segment of the laundry-detergent category, accounting for some two-thirds. Liquids make up about 22% and concentrated powders, 11%. Lever's other major entries, Wisk liquid and Concentrated All, compete in the other two segments.#

Two admen die in copter crash

By BRIAN MORAN

A Wells, Rich, Greene art director and a former staff photographer for *National Geographic* were killed Oct. 19 in a helicopter crash near St. Thomas, Virgin Islands, while filming an assignment for WRG client Pan American World Airways.

Joseph Capitelli of Wells, Rich, Greene and free-lance photographer Gordon Gahan were taking aerial shots of sailboats when their helicopter apparently malfunctioned and plunged into the ocean just off the coast of St. Thomas.

Mr. Capitelli, 34, and Mr. Gahan, 38, had been working in the Caribbean five days when the crash occurred, said Andre van Stom, exec vp at WRG, New York. Mr. Gahan, co-owner of a New York photography business, had been hired for the shoot.

"It had rained the first three days and the weather had just broken for them," Mr. van Stom said. "They should have been on their way back home already."

The pilot of the helicopter, identified as Steve Booker of St. Thomas, also was killed. The Federal Aviation Administration and the National Transportation Safety

DDB can cite Kidde, exec in suit against client

New York—Doyle Dane Bernbach International will be allowed to include Kidde Inc., Saddle Brook, N.J., and its chairman, Fred Sullivan, as defendants in its $8 million suit against former client Victor Technologies. A New York state supreme court justice this week ruled in DDB's favor. Kidde and Mr. Sullivan owned a majority of Victor when the DDB client filed for bankruptcy in February, leaving DDB with $3.3 million in uncollected receivables (AA, Feb. 6). DDB is charging that Victor's fourth-quarter, 1982, financial position was misrepresented. Kidde and Mr. Sullivan had moved to dismiss the suit against them but were denied that motion.

Beatrice sells liquor unit to Whitbread

Chicago—Beatrice Cos. has signed a definitive agreement to sell its Buckingham Corp. liquor importing operation to Whitbread (U.S.) Holdings. The unit of London-based brewer Whitbread & Co. PLC will acquire Buckingham for $110 million in cash. Beatrice expects to announce several other divestitures by the end of this year.

Ammirati waves goodby to Club Med account

New York—Club Mediteranee and Ammirati & Puris have ended their relationship on the $7 million national Club Med account. Although the parting was described as amicable, there have been reports of personality conflicts on the account.

Ad campaign fired off for Trigger software

Coconut Grove, Fla.—Thoughtware breaks a $1 million fourth-quarter print campaign in today's *Wall Street Journal* for Trigger, a new business

(Continued on Page 2)

Ron vs. Fritz —in Nassau

NASSAU, BAHAMAS—Outside events rarely intrude on the proceedings at the American Magazine Conference. But the presidential debate Oct. 21 had its impact on the 1984 conference here.

The debate overlapped a conference reception, so three tv sets were set up in the hotel, enabling nearly 200 attendees to watch the proceedings.

The next day, two participants in a session on foreign policy had to cancel appearances. Robert McFarlane, national security adviser, accompanied the President to the debate and could not get here in time. And Richard (Rick) Smith, editor-in-chief, *Newsweek*, remained in New York as his magazine extended its deadline to include debate coverage.

A total of 78% at the session called the debate a toss-up, 12% said President Reagan won and 10% said Walter Mondale won, said Marvin Stone, editor-in-chief, *U.S. News & World Report*.#

Split-30 boom expected; is 15-second unit next?

By VERNE GAY

NEW YORK—The "split-30" ad unit will proliferate on network tv during the next year, despite concerns that the resulting clutter will undermine the effectiveness of the standard 30-second unit.

The advent of the stand-alone, 15-second unit also may be in the near future.

J. Walter Thompson USA soon will begin to press for the sale of individual 15-second units. The networks have opposed individual 15s because affiliates fear the national spot market will be hurt as a result. All 15-second units now are sold only in pairs.

"We think use of the 15-second unit will escalate rapidly," said Richard Kostyra, senior vp-media director, J. Walter Thompson USA. "In Japan, the shorter commercial comprises 70% of all spots. In England, 38% are either 10s or 20s."

There are several factors behind the coming boom in split-30s, said advertising and agency experts, but much of it will be fueled by major package goods advertisers who are beginning to see them as media weight builders for brands that don't require major budget increases.

There also is room for growth. About 27% of the networks' inventory base is earmarked to run split-30 ads; only 5% of the total base is being used. A split-30 may run once in a 90-second pod on ABC and NBC and once in a two-minute pod on CBS.

Many advertisers are entering a period of intense experimentation. While these same advertisers have decried the advent of split-30s, they want to determine the effectiveness of the unit as a frequency builder for established brands. They include Carter-Wallace, Chesebrough Pond's, Coca-Cola's Columbia Pictures, Esmark, Johnson & Johnson, Heinz, Lever Bros., RJR Foods and at least a dozen others.

General Foods' Jell-O is using the split-30 as a reach and frequency builder. Beecham Products' Ace Combs and Aqua Velva, as small network brands, are attempting to stretch their awareness through the use of split-30s. American Home Products' Chef-Boy-Ar-Dee also is testing the unit as an awareness builder. Gillette, which has used it for Foamy, Bare Elegance and razor-blade products, wants to see how the small and large brands can benefit. For the first time, Gillette used split-30s during the World Series.

In part, tv cost inflation is forcing some of these advertisers to scrutinize the split-30. "One problem many brands currently have is that spending has not kept pace with inflation," said Robert Bolte, director of media services, Clorox,

Divestitures being weighed

DDB ponders sale of pr unit

By STEWART ALTER

NEW YORK—Doyle Dane Bernbach International is "contemplating" selling its ECOM/DDB public relations unit as part of a streamlining strategy, exec vp Robert Pfundstein said.

Consideration of the sale comes two months after DDB quietly closed its 20-year-old Director's Studio commercial production unit.

Noting that "no firm decision" on ECOM will be made for another few weeks, Mr. Pfundstein indicated that one of the more likely options being considered was selling the unit back to its principal, Robert Frost.

Asked whether DDB was generally considering divestitures, Mr. Pfundstein, the agency's chief financial and administrative officer, said, "Candidly, yes. We are looking at everything we've gotten into in the last few years."

But he qualified that by saying the company was "extremely happy" with its agricultural, direct-marketing, pharmaceutical and recruitment operations.

DDB acquired ECOM Consultants, which specializes in corporate and investor relations, in April, 1983. "Our goal was to use their very small base of business and build product and corporate pr capabilities," Mr. Pfundstein said. "If we had invested enough, it probably would have worked."

He said ECOM would remain DDB's investor relations consultant even if it were sold back and that DDB has not closed the door on reentering the product and corporate pr area more directly again.

ECOM/DDB, which has about 30 clients and $1 million in revenues, closed its two West Coast offices last summer.#

analysis software program that the company claims will eliminate the need for management consultants. Spreads also will appear in *Business Week* and *Forbes*. Fredericks Kullberg Amato Pisacane handles.

Other late news

- NEW YORK—**BBDO International**, the first of the public ad agencies to report its third-quarter figures, says revenues rose 15% to $72.3 million in the three months ended Sept. 30. Earnings hit $3.9 million, a 30% increase over the total for the same period in 1983. For the nine months, revenues rose 20% to $223.1 million, and net income was up 36% to $15.2 million.

- NEW YORK—**Halloween costumes** shaping up as the strongest sales prospects include Ben Cooper Inc.'s Cabbage Patch Kids, Care Bears, "Gremlins" and Masters of the Universe, say Toys "R" Us, Rochelle Park, N.J., and other sources. Other popular costumes include Collegeville Costumes' Dungeons & Dragons, Rainbow Brite and Transformers.

- ST. LOUIS—**Anheuser-Busch** has decided on King Cobra as the permanent name for its new malt liquor. A-B had been testing both the King Cobra and Jaguar names in six markets each since April (AA, Feb. 20). King Cobra now will be available in all 12 test markets. J.P. Martin Associates, New York, is agency of record for the brand.

- NEW YORK—**Seagram Wine Co.** is introducing Seagram's Cooler into the greater New York area later this year. Kenyon & Eckhardt handles.

- ST. LOUIS—**Ralston Purina Co.** is testing Purina T-Bonz dog treats in midwestern markets, including Milwaukee. Tv spots describe the product as "Nice and solid like a real T-bone. Loaded inside with real beefy taste." Gardner Advertising, St. Louis, handles.

- LODI, N.J.—**Italusa Corp.** is expanding into California and the Midwest with its Pomi spaghetti sauce and strained tomatoes, as well as Santal fruit juices and nectars. The products, all of which come in aseptic packaging, have been marketed for about a year in New York and New England. Wellington & Messina, New York, handles.

- ROCHESTER, N.Y.—**Eastman Kodak Co.** is promoting its new line of diskettes, the company's first foray into the electronic media market, through an extensive print campaign beginning Nov. 14 in the *Wall Street Journal*. Other consumer print advertising will break in early 1985, with trade ads beginning in November. Rumrill-Hoyt handles. Kodak also is introducing its Kodavision 8mm videorecorder in an extensive print campaign Oct. 30. In addition, it will heavily promote its disc camera and improved disc film for Christmas. Fourth-quarter disc advertising is estimated at some $20 million. McCann-Erickson, New York, is the agency for Kodavision, and J. Walter Thompson USA handles Kodak disc ads.

- NOVATO, CAL.—**Fireman's Fund Insurance Cos.** has named McCann-Erickson, San Francisco, to handle its $300,000 account. The agency was the only one left in consideration after incumbent Cunningham & Walsh withdrew. Earlier, Ogilvy & Mather dropped out due to a conflict. Budget for the financially troubled subsidiary of American Express Co. was about $1.5 million last year.

- MEMPHIS—**Plough Inc.** has narrowed its agency review for Coppertone from 11 to five agencies, which will begin making presentations next week, says a source close to Plough. Warwick Advertising, the incumbent, remains in the $3 million review (AA, Sept. 6). No decision is expected until mid-November.

- DETROIT—**General Motors** may import the Rekord 2.2 sedan into the U.S. from its West German Opel subsidiary to counter Lincoln-Mercury's German Merkur. Meanwhile, Ford Motor Co. is planning to expand its line of imported European cars under the Merkur brand. Two and four-door sedans and a wagon will join the marque soon.

- YOUNTVILLE, CAL.—**Domaine Chandon**, fueled by strong growth and increasing competition in the superpremium sparkling wine category, has moved its account to Tatham-Laird & Kudner, San Francisco. It replaces Maxwell Arnold, Jackson & Co. on the $500,000 account.

- SECAUCUS, N.J.—**Consolidated Cigar Corp.**, recently acquired by MacAndrews & Forbes, the Camden-based candy and chemical company, is talking to ad agencies, sources say. Robert David, account supervisor for incumbent Nadler & Larimer, New York, said he was unaware of any search. Consolidated senior vp-marketing Barry Nova had no comment. Consolidated's ad spending in measured media in 1983 was less than $100,000, says Leading National Advertisers

- **NEWSLINE: Walter Carlson** reportedly has moved to senior vp-public relations director, a new post at Doyle Dane Bernbach, New York, from senior editor, *Folio*. Mr. Carlson, who wrote the *New York Times* advertising column from 1964 to 1966, more recently headed his own pr agency. . .**Spectragraphics Corp.**, San Diego, a marketer of high-performance computer work stations and terminals, to **Reiser Williams DeYong/Cunningham & Walsh**, Irvine, Cal., for its $1 million account from Salvati Montgomery Sakoda. . .**Tower Air**, New York, next week will announce its first scheduled domestic service, one daily flight in each direction between New York's Kennedy Airport and Los Angeles. The peak-hour service reportedly will offer a $119 fare, matching People Express' off-peak fare. Burger Lang Partners handles. . .**Ford Motor Co.**, Dearborn, Mich., and the United Auto Workers reportedly have agreed to work together on developing a new U.S.-built small car, similar to General Motors Corp.'s Project Saturn (AA, Nov. 7). Code-named Alpha Project, the program is aimed at competing profitably with Japanese imports. . .**Ford Motor Co.'s** Ford division says that it and its ad agency, J. Walter Thompson USA, are "definitely looking" at producing made-for-tv movies in a move similar to that of Chrysler Corp. (AA, Oct. 18). An "initial project" is under study. . .**Alberto-Culver Co.**, Melrose Park, Ill., is introducing four new Alberto VO5 products: Shampoo, conditioner and aerosol and nonaerosol hair sprays for permed and color-treated hair. The new line will be advertised via regular VO5 advertising. Bozell & Jacobs, Chicago, handles. . .**Lorus Products**, New York, will become the "official timekeeper" for ESPN in a 15-month, multi-million-dollar deal. Lorus replaces Timex, which in July backed out of a 10-year, $20 million commitment with ESPN made in 1981.

Seeing that special events measure up

By Mary McCabe English

Three months before the 1984 Summer Olympics started in Los Angeles, researchers at Needham Harper Worldwide began a series of surveys designed to gauge attitude and awareness regarding the Olympics and corporate sponsorship of the games.

With negotiations for the 1988 Summer Olympics already under way, Needham is ready to provide farsighted marketers with an analysis of just what Olympic sponsorship can mean to their bottom line.

Mary McCabe English frequently writes on marketing technology and measuring for Special Report.

The Needham surveys continued throughout the Olympics and into the last week of September. Various aspects of the results have been released to interested parties, and Jim Crimmins, director-marketing decision systems at the Chicago-based company, says a formal presentation of all the information gathered during the five months will take place by the end of November.

Most folks agree that the use of special events as a sales promotion tool is growing by leaps and bounds. A pity, many add, that the incidence of solid events research—such as the Needham Olympics survey—isn't keeping stride.

"There's no doubt that people are measuring more today than before, but that's easy because they weren't measuring them at all before," says Bill Robinson, president of William A. Robinson Inc., a Chicago marketing company.

Mr. Robinson says there are a number of reasons behind the growth that does exist, chief among them the demand for more accountability in-house as more money is pumped into events and the emergence of a more competitive attitude as more companies get into the sponsorship act.

"There's definitely more measurement, mainly because more money is going into it, and companies are loathe to spend money on things they can't measure," says Don Dixon, managing director-promotional group, Howard Marlboro Group in New York.

"I think the major trend in measurement started back in 1981-82 when the Los Angeles Olympic Organizing Committee started selling their sponsorships and they were in the multiple millions of dollars. But the trend goes back even a little further, because between 1980 and 1984 the number of companies using special events as a marketing tool probably doubled."

The tale of the tape

Split of advertising vs. promotion budgets

Year	Advertising	Promotion
1976	42.1%	57.9%
1979	40.6%	59.4%
1980	39.5%	60.5%
1981	38.1%	61.9%
1982	38.0%	62.0%
1983	38.0%	62.0%

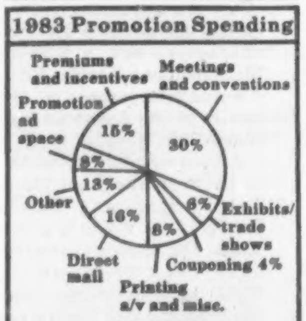
1983 Promotion Spending



Source: Russell D. Bowman, vp, John Blair Marketing, New York. First appeared in Marketing Communications.

Lesa Ukman, executive editor of "Special Events Report" newsletter in Chicago, also attributes some of the growth in measurement to a change in the perception of special events' function.

"I think in the past special events were looked at as good pr, and that's about as far as it went," Ms. Ukman says. "Money for special events used to come out of pr budgets, which aren't nearly as big as advertising or marketing budgets. But then about eight years ago, companies began to see sponsorship as a good marketing tool rather than just good pr. I think all of this contributed to a more serious approach to special events, including more interest in measurement."

Although no one was willing to discount the effect more sophisticated technology will have on all research areas, most of those

Measure

(Continued from Page 20)

questioned believe that traditional measurement tools are more than adequate for measuring special events.

Those tools are statistical research for base information, focus groups, panels, door-to-door or phone surveys to determine appeal level and, sometimes, a small-scale test event if pretesting is feasible.

According to Mr. Robinson, this process first should determine the appropriateness of a special event against the total marketing picture for the brand or product in question.

For example, Barbara Doljack, marketing director for *Seventeen*, says various interests had been trying to persuade the magazine to sponsor a tennis tournament for years, but nothing proposed suited the *Seventeen* image.

"Then, the people from the Maureen Connolly Brinker Foundation came to us and suggested a tournament for amateur young women, and it seemed like a natural for our audience," Ms. Doljack says.

That was 10 years ago, and *Seventeen's* instincts, bolstered by the research data the magazine accumulates with continual reader surveys, proved sound.

According to Ms. Doljack, every one of *Seventeen's* special events and promos—including its annual Tennis Tournament of Champions, Swim Meet of Champions, Now You're Cooking National Menu Planning Competition (co-sponsored with General Foods), National Concerto Competition (co-sponsored with General Motors) and new cover girl competition—is designed "to have a positive impact on our audience and reinforce the wholesome and tasteful image of *Seventeen*."

Having clear goals is vital for accurate special events measurement, Mr. Robinson says.

What is the event supposed to accomplish—image enhancement or change, awareness, trial, an increase in shelf space? Is a special event the best way to accomplish this goal? Does it target its audience well? Is it cost-efficient? What about timing—would a special event at a different time be better?

Assuming that this homework has been done, Ms. Ukman cautions against being too hasty in judging an event a failure.

"I think this is a mistake a lot of companies make," Ms. Ukman says. "I believe it takes at least three years for an event to really pay off. If you look at the classic success stories—Coors, for example, which started its bike race sponsorship about 10 years ago, began small, but now the same race is scheduled to have major network coverage next year—you have to commit for at least three years."

Crucial to all this is budgeting for measurement, a step where many marketers fall short. All the more pity, critics say, when the shortage is weighed against the potentially lucrative impact a well-planned special event can have on a company's bottom line because of nearly perfect targeting ability.

Blue Bell Inc.'s Wrangler, for example, makes no secret of the return it has realized from special events.

Considered one of the most progressive companies when it comes to special events measurement, Wrangler realized some $3.5 million from major events sponsored in 1983.

> **"To me, special events are very much an advertising effort, and if you're not forcing the fan back to retail, I don't know why you do it."**
>
> ***—David Allen Wrangler***

According to David Allen, director-special events for Wrangler Brand Marketing Division of Blue Bell in Greensboro, N.C., this return stemmed from the company's consistent use of a measurement formula based on market research surveys of buying habits taken before, during and after an event and set up to pinpoint incremental sales generated by each event.

Wrangler's integration of its special events, marketing and advertising functions under the same organizational umbrella is also a definite plus.

"Everything we do here has to be tied to moving product," Mr. Allen says. "To me, special events are very much an advertising effort, and if you're not forcing the fan back to retail, I don't know why you do it."

The Wrangler director says he believes it is foolish to assume any sponsorship without measuring.

"The return can be two or three times what you spend [on a special event] if you do it right," he says. "I think the key, though, is to measure against what your over-all goal is—am I actually creating a propensity to purchase my product, and am I in the right area to move my product or am I trying to move my product in the wrong demographic.

"Let your national advertising focus on image . . . special events are too targeted not to be used for promoting sales."

Nonetheless, Mr. Allen concedes that it is easy for a company to get caught up in the excitement of a special event and overlook the measurable return the right event can and should produce.

"I think one of the biggest problems is that a company will get caught up in the drama of the particular event—get too far into it to see out of it," he says. "In our case, we're not in the

(Continued on Page 24)

You don't need Nielsen anymore.

Open a bottle of champagne. Send yourself some flowers. You don't need Nielsen anymore.

No more meetings that take two hours to say what could be said in one. No more fees that practically rival your net profits. No more Nielsen.

Because now you have National Scanning Services. A service that gives you the truth, the whole truth and nothing but the truth. For a fraction of what Nielsen costs.

First, let's talk about the truth. Nielsen uses averaging which obscures the immediate impact of every factor working on your business. But National Scanning Services gives you actual *sales* on a monthly or even *weekly* basis. So you always know what's going on, when. In other words, you always know the truth.

Next, let's talk about money. Nielsen can cost you as much as $500,000 or even more. But National Scanning Services only charges from $20,000 to $90,000. And you're getting a lot more truth for your money.

Now Nielsen is trying to muscle in on the truth by forcing you to take their new scanner service every time you buy the NFI. But, since you can only get it along with the NFI, it hardly can be called a bargain. And, since you're being *forced* to buy it, it can't even be called good manners. (Actually, you can't blame them. They don't have enough scanner markets to offer the service all by itself. In fact, they have fewer markets than we do. Which means, you're being forced to buy a more *limited* scanner service at four to ten times what it should cost.)

So, the next time you're in the market for the truth, come to National Scanning Services. You'll get more truth for less. And we'll even buy the flowers.

NATIONAL SCANNING SERVICES INC.
Scanners don't lie.

Measure

(Continued from Page 22)

racing business or the sports business. We're in the apparel business, and that has to be kept firmly in mind."

Al Guerrara, manager-special events and community relations for Milwaukee-based Pabst Brewing Co., says he also believes focusing on end results is the best way to initiate a special event sponsorship.

"Basically, you have to look at the program and see some value," Mr. Guerrara says. "Depending on your goals, this may not be dollar for dollar return—it could be exposure, it could be image enhancement, it could be positive pr—although, generally, with beer, a foremost consideration is, will it sell more beer.

"The point is, when you're talking about the kind of money this takes, you have to justify it. You have to figure out just what it is you want out of the event and not go in cold and hope that something good turns up."

Mr. Dixon of Marlboro agrees with Mr. Allen that sales growth should be part of the picture.

"Part of the problem in selling special events is that whether you want it to be or not, it's an emotional buy, let's sponsor the U.S. Track and Field team because it feels good," says Mr. Dixon, who was formerly director-sports programing at Anheuser-Busch, St. Louis.

"I think a lot of this comes from the fact that sponsorship is still seen more as an image and awareness builder than a way to build sales, unless you have a marketer that coordinates special events with its advertising, pr and other marketing functions. Wrangler, Anheuser-Busch and R.J. Reynolds, for example, do a superb job of this.

"I'm not saying special events shouldn't be used to build image and awareness, but I think a much greater emphasis should be made on taking special events right back to point of sale, right back to the store. There's not enough of this."

Other observers say creating advertising and other promotion tie-ins not only strengthens a special event, it expands a marketer's opportunities for securing measurable data about the event's effectiveness.

J.C. Penney Co. put a great deal of effort (not to mention a reported $10 million) into staging its just-concluded Salute To Italy promo as part of a total marketing-ad campaign that included heavy print and broadcast advertising as well as company sponsorship of the Public Broadcasting Service's September telecast of Puccini operas "Turandot" and "Tosca."

Retail merchandisers see foreign promotion events as a vehicle for building traffic and sales, attracting new shoppers and enhancing image, and Penney's conducted extensive on-site exit interviews with customers in addition to telephone interviews of the general market to determine whether these goals were met.

"We were also Burke-ing [telephone interviews done by Burke Marketing Research the day after tv ads appear to measure recall] at the same time," says Ira Ostroff, manager of apparel research for the New York-based retailer.

"We normally put a lot of weight behind research, but this one was very special because of the heavy investment both from an advertising and promotion standpoint. We don't measure every event we put on to this extent, otherwise we'd be spending more on research than merchandising. Our involvement [in research] depends on the impact the event is expected to have on the company," Mr. Ostroff says.

> **"You have to figure out just what it is you want out of the event and not go in cold and hope that something good turns up."**
>
> *—Al Guerrara*
> *Pabst Brewing Co.*

Mr. Ostroff, like Messrs. Allen and Dixon, expects sales to play a major role in that impact.

"I think sales almost always have to be part of the equation," the Penney's manager says. "We could improve image forever, but without the sales we'd be out of business pretty quickly. I think that dual purpose is necessary in any event."

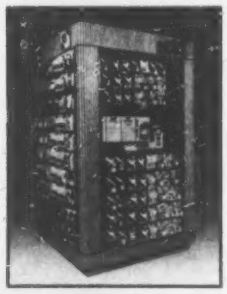
Special events measurement undoubtedly will change.

"I think it's still an infant kind of activity, so I believe we're going to see more special events, with more industries using them that have never used them before . . . for example, computer people, computer software, data delivery, telecommunications," Mr. Robinson says. "As these emerging industries achieve advertising parity with one another, I think they'll begin asking themselves what else they can do—as the beer people did—to set their products apart, and they'll be looking hard at other means of communication."

Mr. Robinson also sees marketers making greater use of special events' targeting ability to achieve specific goals.

"As we see new industries using special events, we may well see them using new kinds of special events that are more segmented," he says. "We're already seeing segmentation with events that are black oriented, Hispanic oriented . . . . Special events are a good way to talk to these groups because they're so targeted.

"I'm sure there'll be other changes, too. In general, as these new companies use them [special events] more, I think we'll see more flexibility and less predictability in the way special events are used."



miller displays

When You Don't Have All Your Oars In The Water,

your big splash might just ripple away.

You've got your big promotion ship-shape.
TV. Radio. Print. The works. It's bound to be B-I-G.

Or will it?

Remember the old saying? The difference between success and failure often depends on the last 5 percent of the effort, rather than on the 95 percent that preceeded it.
It's a truism particularly apt if you overlooked the importance of point of sale merchandising in your promotional mix.

We'd like to send you a free Harvard study called, "Better Marketing At The Point Of Purchase," pointing out the increasingly vital role of point-of-purchase in the promotional mix.

We'll also send our free brochure pointing up how we can help give you the selling edge at the point of sale.

Which all goes to say—that when you don't have all your oars in the water, your big splash might just ripple away.

Gillette goes all out for split-30s

By VERNE GAY

Gillette Co., Boston, intends to have 15-second commercials for most of its nationally advertised brands over the next year, becoming the first major advertiser to integrate the split-30 into its entire tv buying strategy.

The ads, expected to be condensed versions of 30-second ads now on the network schedules, will support "beds" of 30-second units. Each will incorporate the core selling message of the 30-second unit.

The speed with which Gillette undertakes the project depends on the success of split-30s Gillette is running on network tv, according to Hans Lopater, vp-market research at Gillette's personal care division. These include ads for Foamy shaving cream, Bare Elegance and Toni Silkwave and Lightwave home permanents, he said.

Creative Review Board tackles the split-30 issue. See Page 3.

"It is likely that the majority of Gillette's brands [will be supported by 15-second versions]," said Mr. Lopater. He noted 22 major brands will be affected. They include Atra, Trac II, Good News! and Daisy from the safety-razor division; Paper Mate, and selected personal care products.

Like other package-goods advertisers, Gillette is exploring the feasibility of the 15-second unit as a way to build reach and frequency for heavily advertised brands.

The unit also is being used as a way to build exposure for small-budgeted brands. "Nobody wants to go to 15s, but the economics are such that for the $2 million-to-$5 million advertised brands it is the only way they can be on tv," said Thomas Ryan, vp-advertising services, Gillette North America.

Brands with similar target audiences will be paired within the split-30, according to Mr. Lopater. For example, Toni and Bare Elegance would be incorporated into a split-30; Foamy and other male-oriented products will be slotted on a split-30.

Part of the creative strategy is to incorporate the "core selling message" of each 30-second commercial into the 15. After the 30 is created, the message then will be edited to a 15 which will reflect the message of the larger unit. No special 15-second units will be created, Mr. Lopater said.

Other major advertisers using split-30s include Beecham Products, Pittsburgh, for Calgon products, Aqua Velva and Aqua-Fresh; Warner-Lambert Co., Morris Plains, N.J., for Efferdent and Rolaids, and Alberto-Culver Co., Melrose Park, Ill., for selected Alberto VO5 products.#

Distillers inching toward cable tv

By GAY JERVEY and STEVEN W. COLFORD

Distilled-spirits marketers, intensely cautious over the very mention of liquor advertising on tv, soon may be enticed to cable tv as an ad medium.

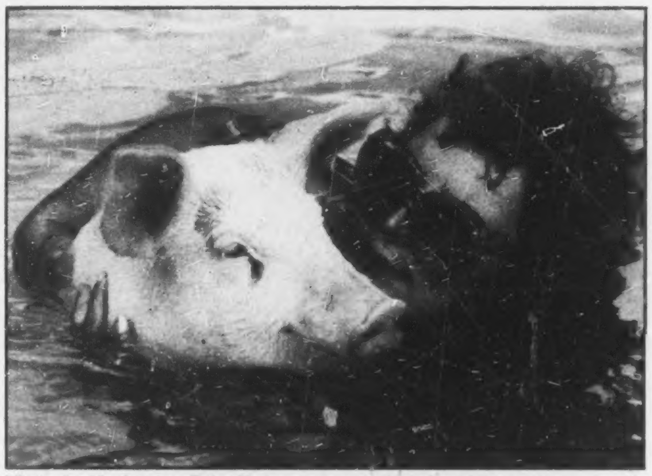
At the same time, a small but growing number of distilled-spirits companies are experimenting with the use of in-flight video advertising solely on international routes, in some instances with an eye to domestic use—which also could incite public antagonism.

From the standpoint of cable—in addition to USA Cable—a likely candidate for liquor advertising is Entertainment & Sports Programming Network, which along with USA, said it would judge any proposed ads case by case.

But if history is to repeat itself, the activist Center for Science in the Public Interest could expand its anti-alcohol advertising campaign from tv and radio to cable. Only last week the CSPI asked Ted Turner not to solicit liquor ads for either WTBS or Cable News Network, and a Turner Broadcasting spokesman said the company decided not to.

"We felt there were still some legal questions [unanswered] and that the climate was just not right for it," said Art Santos, vp-public

(Continued on Page 88)



Victoria Herberta, Priscilla's owner and swimming partner, wants Pepsi-Cola to commemorate the pig on a soft-drink can.

This little piggy cries for Pepsi

By SARAH STIANSEN

DALLAS—Pepsi-Cola has Michael Jackson and now its Mountain Dew soft drink is gaining new friends because of a local hero named Priscilla.

Priscilla is a 6-month-old piglet that swims. She sty-rocketed to celebrity status last summer after rescuing a drowning boy from a Houston lake.

An ardent Mountain Dew drinker, Priscilla even drinks it while performing on the banquet circuit. Drinking Mountain Dew, in fact, is part of this pig's repertoire.

And if plans go as her trainers hope, Priscilla's fame will continue to spread. She is booked for West German tv in December, and Johnny Carson is interested in booking her for NBC's "Tonight Show," according to Chere Hickock, owner of Animal Trackers, an animal talent agency here that is working with Priscilla.

But on the subject of pig promotions, the response from PepsiCo—which gained wide exposure and incidental publicity for its Pepsi brand's association with Michael Jackson and Jackson family tour—is decidedly tempered.

As animal actors go, pigs are relatively uncommon. One star was Arnold Ziffel, a pig who gained a sort of cult following his perfor-

Brew blitz at Miller taking premium turn

By SCOTT HUME

Considering the beer industry's current pace of new-product introductions and business diversification, one could easily forget that the industry suffers from stagnant sales growth.

Miller Brewing last week stepped up that pace with the introduction into five test markets of Plank Road Original Draught, a new premium beer.

The industry's fast pace of new-product development isn't even limited to the beer market. Coors' food-products unit is test-marketing a candy bar that uses a no-caffeine chocolate substitute derived from brewer's yeast. Anheuser-Busch is expanding distribution of its wines and, like G. Heileman Brewing, increasing the scope of its snack-foods business.

Miller Brewing, however, continues to concentrate on beers. Plank Road is the fourth new beer it has introduced in the last 18 months, but the first brand introduced in the premium-price category, where it will have to fight for market share not only with Anheuser-Busch's Budweiser, but with Miller High Life, Milwaukee-based Miller's own faltering flagship brand.

Some industry observers viewed the Plank Road test as Miller's attempt to offer a differently posi-

Cigarets face sports storm

By VALERIE MACKIE

Antismoking groups around the world are pressuring cigaret marketers to stop sponsoring sporting and cultural events and cease promoting cigarets during telecasts of these events with tv-oriented "reminder" boards that adorn stadiums and other sports arenas.

In Australia, telecasts of sporting events sponsored by cigaret marketers were found to have violated the tv ban on cigaret advertising. Similar moves to stop cigaret marketers from sponsoring these events are under way in the U.K. and Canada, and the U.S. is about to get hit as well.

The American Cancer Society, New York, is about to write a letter to the Federal Communications Commission, the tv networks and owners of the football teams saying the telecast of a cigaret outdoor board is a violation of the spirit of the 1971 tv advertising ban, according to ACS spokesman Irving Rimer, vp-public information.

The ACS is "very concerned about the indirect advertising of cigarets on tv" and "particularly concerned about football games where tv cameras focus on billboards of cigaret advertisers," Mr. Rimer said.

As an example, he cited the Marlboro cowboy outdoor board located behind the goalposts in the San Francisco 49ers stadium, Candlestick Park.

"The American Cancer Society is seeking voluntary action from people who can control it. . .whether it be the people who place ads or control sports stadiums or tv cameras," said Matthew Myers,

Coke bubbles over overseas prospects

By NANCY GIGES
and LISA PHILLIPS

New York—Coca-Cola Co. is targeting the expansion of per-capita soft-drink consumption internationally as a key growth opportunity.

Company management told financial analysts here that increasing per-capita soft-drink consumption outside the U.S. is so important that company managers from around the world will gather at a weeklong meeting next month devoted solely to the subject.

"Given our already high share of market, simply expanding market share is not the answer, and expanding geographically is the answer in certain underdeveloped areas, but it is not a major opportunity on a worldwide basis," Coca-Cola president Donald Keough said.

Secondarily, Coca-Cola is actively looking for ways to use its frozen-foods marketing expertise and leverage its extensive but underused frozen-food distribution system.

Focusing on the exceptional performance of the Columbia Pictures subsidiary, the company brought its top management here to outline plans and tell how the company intends to exceed its 6% historical soft-drink growth rate outside the U.S.

Other plans include:

- Aggressive promotion of Diet Coke and Sprite internationally.
- Use of debt to finance high-return investments, with the frozen specialty foods area an acquisition target.
- Possible delay of the rollout of Minute Maid orange soda in the U.S. because so many Coke bottlers already market Sunkist (soon to be acquired by R.J. Reynolds Industries).
- Reduced rate of increase for spending domestically in 1985 for marketing soft drinks.

"The real answer. . .is getting more people to drink more of our product in more places and on more occasions," Mr. Keough said.

He noted that consumption of Coca-Cola soft drinks overseas is 49 6.5-oz. drinks per person, per year, compared with 272 in the U.S. Mr. Keough said the company's efforts will focus on greater product availability and product variety. That's where emphasis on Sprite lemon/lime and on Diet Coke comes into play.

He pointed out that outside the U.S. per-capita consumption of Sprite is four drinks a year, compared with 27 in this country. "In the past, Sprite has been viewed by some as a kind of filler to engage some of the bottler's excess production capacity. That view has changed," he said. "We are increasing our efforts behind Sprite to the point that marketing spend-

General Foods drops options on daytime ads

By VERNE GAY

New York—General Foods will not exercise options it holds for about $5 million in network daytime ads during the first quarter of 1985, a move that partly reflects poor sales performances by several brands.

The decision last week not to exercise its options on time reserved last spring during the upfront daytime market will result in GF's first-quarter '85 daytime budget being cut in half, according to network tv sources. Still, GF is expected to spend as much as $70 million in daytime during 1985, its biggest daytime budget since 1981. It is the first time since 1983 GF has canceled network daytime options (AA, Dec. 6, '82).

Network sources said GF was the only major daytime spender to forego its options. However, the sources reported at least four major daytime advertisers, including Lever Bros., tried to shift first-quarter '85 spending to the second quarter. The networks refused those requests, sources said, because the networks believe daytime, which was the first daypart to sell out in the upfront market, will garner much higher prices on the scatter market. In addition, calendar-year second quarters traditionally are higher-priced than first quarters, thus the tradeoff would have left the networks with greater available scatter inventories in a lower-priced quarter.

The spending cutbacks at GF

Two form new company

Landau execs split

By ROBERT RAISSMAN

New York—The two executives responsible for turning Robert Landau Associates into one of the top three sports marketing companies in the world—before it filed for bankruptcy in September—have resigned from RLA to start their own company.

Michael Trager, senior vp at RLA and president of its international division, and Michael Leites, RLA's vp-sports marketing, left the company last week to form Sports Marketing & Television International in Greenwich, Conn.

Their departure leaves RLA virtually without a sports marketing division. Other employes of the division already have been released. In fact, RLA in total has pared down to 12 employes from a high of 250.

The resignations of Messrs. Trager and Leites were not the only bad news for RLA last week. It is already at the center of a $5 million fraud suit filed by Atlanta-based Dittler Bros. against ABC Inc. over a $1.5 million loan to RLA (AA, Oct. 22). In addition, RLA was forced last week to file suit against a small New York production company to prevent the release of embarrassing outtakes from a film on the Ford Big Foot.

Two Plus Two Productions allegedly had threatened to release or "re-edit" footage of the Big Foot, a modified Ford truck with 6-ft.-

Fast-food's favorites fire fast, furious flurries

By SCOTT HUME

An open letter to Keith Reinhard, chairman and chief executive officer, Needham Harper Worldwide:

Are you sure you still want the McDonald's account back?

Why put yourself and your agency through the stress that must come with handling a fast-food assignment? It's such a volatile product category to be creating advertising for.

Consider the September results from ADVERTISING AGE's adWatch survey of consumer advertising awareness. Last month, Wendy's International introduced new advertising featuring Clara Peller and, boom, the top-of-mind-awareness rankings for the fast-food category got rearranged again.

McDonald's still is No. 1. Its advertising came to mind first for 40% of the 1,260 adults surveyed last month. But that represents a drop of 10.3 percentage points from August's 50.3% share of first mentions.

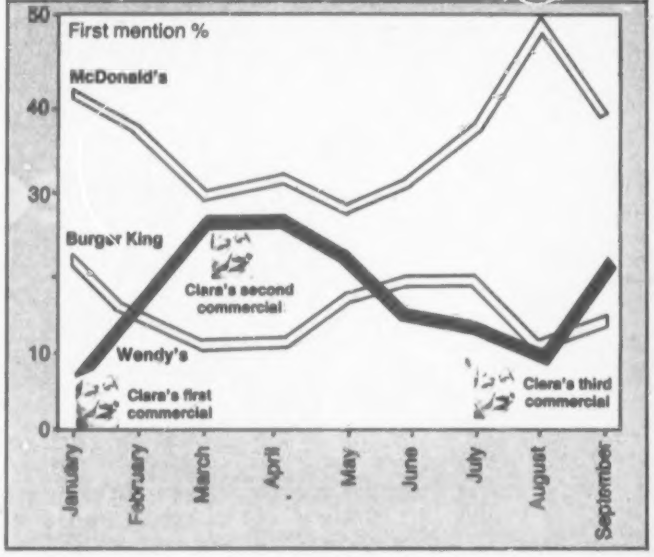
Wouldn't you rather let Leo Burnett USA, Chicago, lose sleep over such roller-coaster results, Mr. Reinhard?

McDonald's loss was Wendy's

(Continued on Page 82)

Clara beefs up Wendy's recall

When Wendy's has run advertising featuring Clara Peller, the percentage of respondents for whom Wendy's ads come to mind first soars. When the chain gave the "Where's the beef?" campaign a rest during the summer and switched to product advertising, Wendy's share of first mentions declined. But Clara's back and Wendy's share is up again.



Warner cutting cable losses

By MAURINE CHRISTOPHER

Determined to continue to trim the losses that hit $99 million in 1983, Warner Amex Cable Communications is expected to intensify the search for investment partners for new franchises in Milwaukee and New York, now that its Pittsburgh system has been sold to Tele-Communications Inc. for $93.4 million.

That sale, at upwards of $1,200 a customer, sets a high price tag for a losing system, but it does not cover the company's $130 million investment in the country's most lavishingly programed and produced system.

Also sold this week, subject to municipal approval: Warner Amex's St. Louis and suburban systems to Cencom Cable Associates, St. Louis.

Drew Lewis, Warner Amex chairman, could not be reached for comment. The key question has become whether he wants to bail out on any of his other financially ailing big-city systems. Warner Amex's stake in Chicago was sold earlier this year.

Since taking over as head of Warner Amex, Mr. Lewis has been methodically trying to renegotiate franchise contracts in cities where Warner executives, in hindsight, realize they overpromised to win the territory. Adjustments already have been made to scale down in Milwaukee and in Dallas. Some changes also are being made in the blueprint for all the new systems to be built soon in New York City. Warner Amex has parts of Brooklyn and Queens.

Some industry observers have the impression Mr. Lewis' instructions from his bosses at Warner Communications are to convert each costly big-city operation to a financially viable setup or get out. WCI had just reported earnings of $24.4 million for the third quarter of 1984 compared with a $122.4 loss in the comparable quarter last year due to red ink from its then subsidiary Atari. Without specifics, the report said cable losses were down.

The sale of an intricately priced and tiered 73,000-subscriber system in Pittsburgh was completed after the mayor and city council agreed to allow TCI to cut the channels from 63 to 44, to discontinue the two-way Qube service and to reduce local access and studio production requirements.

John Sie, TCI senior vp, promised Pittsburgh officials to lower basic rates for subscribers for the slimmed-down schedule. He said Denver-based TCI, the country's largest multiple-systems operator, charges customers from $5.25 to $9.50 a month for basic service compared to Warner Amex's $5.35 to $11.50. Warner Amex, he estimated, has been spending $42.8 million annually to run a $22.4 million-grossing cable company in Pittsburgh.

Mr. Sie said TCI was the only mso to step forward to rescue Pittsburgh from an economically unsound formula devised during the national cable-franchise frenzy of the late '70s when "many cable companies promised anything in order to outdo their competition and satisfy the cities' demands."#

FTC lifts S&H order on stamps

WASHINGTON—The public's growing aversion to trading stamps during the last 10 years has injured Sperry & Hutchinson enough that it no longer has to offer cash to collectors of its Green Stamps.

That was the gist of a Federal Trade Commission order last week that unanimously lifted an 11-year-old FTC requirement that S&H satisfy consumers who want dollars instead of merchandise for their stamps.

"Conditions have now changed to the extent that consumers can readily avoid both S&H stamps and trading stamps in general in virtually all markets," the commission order said, "and, as a consequence, can avoid injury that might otherwise arguably result from a merchandise-only policy."

In asking for the modification in July, S&H noted the trading-stamp industry's sales in 1983 were only about 20.1% of their 1965 level, measured in constant dollars.#

Alda stays on top of his 'Q'

By JAMES P. FORKAN

Alan Alda remains the "favorite" tv personality in the over-all 1984 Performer Q study released by Marketing Evaluations. Bill Cosby led among the black audience and Clint Eastwood among the Hispanic segment.

Mr. Alda's popularity probably continues to derive from the consistently popular syndicated "M*A*S*H" series, while Mr. Cosby's exposure until this fall owed to guest appearances and commercials for General Foods Corp.'s Jell-O. Mr. Eastwood's popularity can likely be attributed to his theatricals on the tv circuit.

The research was tabulated last spring, well before Mr. Cosby's highly rated NBC-TV comedy series "The Cosby Show" began.

Harry Morgan, another ex-"M*A*S*H" regular who now costars in CBS-TV's "AfterMASH" comedy series, ranked No. 7 out of 1,107 personalities in the latest Q report.

Marketing Evaluations, Port Washington, N.Y., arrives at the Q rating scores by dividing the percentage of the sample who regard a performer as "one of my favorites" by those who are "familiar" with that personality. It also publishes periodic TvQ reports on viewers' "favorite" tv series, which sometimes indicate to tv networks and others whether a program that scores only so-so in the A.C. Nielsen Co. audience ratings might have potential for greater popularity.

This marks the first year that the research company has done an analysis of performers' popularity within the Hispanic community, said Marketing Evaluations president Steven Levitt. That's because previously the company had not been able to identify "a sufficient number of Hispanic respondents to allow for a separate breakout," he explained.

The research company has done breakouts among blacks, however.

Acknowledging that Marketing Evaluations for the past year or so has been under fire in some quarters (for example, from some Los Angeles legislators) for perpetuating discrimination in the casting of Spanish performers in tv programing, Mr. Levitt said that the new study "shows that we're trying" to correct that situation.

Among the Q top-10 performers, Emmanuel Lewis and Daniel Travanti are the newest, the rest qualifying as show business veterans. Emmanuel is in his second season in ABC's "Webster"; Mr. Travanti is in his third year on NBC's "Hill Street Blues."

Another relative newcomer, Eddie Murphy, who just missed the top 12, was a "Saturday Night Live" regular a couple of seasons on NBC before shifting to the big screen. Mr. Murphy scored a 38 Q rating in the general sample, compared with a 55 among blacks and 58 among Hispanics; the latter put him second only to Mr. Eastwood with the Spanish viewers.

Most of the top-10 Performer Q personalities do not star in weekly series but rather are most visible through either theatrical films shown on tv (including Mr. Eastwood, Dustin Hoffman and Paul Newman) or through specials (including George Burns, Carol Burnett and Bob Hope). Lucille Ball, besides appearing periodically on specials, is highly visible via her syndicated "I Love Lucy" and "Here's Lucy" comedy series.

Marketing Evaluations now is gathering data on the performers in this fall's new tv series.#

Top 1984 performer Q ratings

The dozen favorite tv performers, and how they ranked among black and Spanish viewers. The Q ratings are arrived at by dividing the per cent who rank a performer "one of my favorites" by those who are "familiar" with that personality. Note: The all-performer "norm" Q rating is 17 in the total sample, 21 in the black sample, 19 in the Hispanic. The top-ranked stars among the ethnic samples are shown in boldface. *Source: Marketing Evaluations, Port Washington, N.Y.*

Rank	Performer	Q Rating Total sample	Q Rating among Blacks	Q Rating among Hispanics
1.	Alan Alda	50	38	45
2.	Clint Eastwood	45	52	**59**
2.	Bob Hope	45	35	53

Viewer involvement helps tv ads

By MAURINE CHRISTOPHER

Put tv commercials in a program that targeted customers watch with more than the usual amount of involvement and they will be more likely to stick around during the ad breaks and respond favorably to the commercials.

It may not be a high-profile, well publicized or even a high-rating program, but if would-be customers are wrapped up in it, it's a good choice for an ad.

That advice comes from Elizabeth Roberts, president of Television Audience Assessment, Boston, after TAA's latest qualitative ratings and commercial effectiveness study. TAA so far has spent $2.5 million of the John & Mary Markle Foundation's money trying to find the best method to provide qualitative ratings for a continuing regular service to show not only what programs viewers watch, but how they react. The service, once it begins, also aims to give sponsors data on how many people watched the commercial and how effective it was.

TAA's latest commercial effectiveness study covered 470 young (aged 18 to 49) female heads of household gathered in small laboratory groups last year in Kansas City. The participants were divided into distractions-available and no-distractions-available environments for their tv screening sessions. Distractions meant a living room setting with food, drink and magazines. The no-distraction panelists watched tv on a theater set.

TAA reported that people "involved with the programs" being screened were more likely to remember what the commercial said, to like and believe the commercial and to indicate they might buy that product in both groups. Asked how behavior in such an artificial setting could reflect what a viewer would do at home, Steven Holt, TAA general manager, said this study confirms what they found in earlier diary and phone studies made in the home.

These researchers use four criteria to gauge commercials' effectiveness: Brand name and message recall, over-all evaluation of the commercial, credibility of the message and intent to purchase. For qualitative program ratings, TAA has created two yardsticks—program impact index (based on whether a program touches one's feeling and/or provides information) and program appeal index (rated from zero to 10 for its entertainment value).

Mr. Holt said TAA hopes to begin providing TAA qualitative ratings for programs and effectiveness data for commercials annually during crucial sweeps periods if the company can find a partner to finance the service. Markle is helping with the search. They probably would start using diaries and phone checks and move into electronic data collection later.#

VU/TEXT adds AP, 'Globe'

PHILADELPHIA—Knight-Ridder Newspapers' VU/TEXT, an interactive informational database here, will add the full text of the *Boston Globe* as well as the news reports of the Associated Press in January.

Editions of the *Globe* dating back to 1977 will be included in the database. Each day's newspaper will be available the following day. The AP national and international news reports will be put into the database with a two-day lag.

VU/TEXT carries the full text of the *Allentown* (Pa.) *Morning Call, Lexington* (Ky.) *Herald-Leader, Miami Herald, Philadelphia Inquirer & Daily News, Sacramento Bee, Wall Street Transcript, Washington Post* and *Wichita* (Kan.) *Eagle-Beacon*.

VU/TEXT next year will add the *Chicago Tribune, Detroit Free Press, Gary* (Ind.) *Post-Tribune, San Jose Mercury* and Knight-Ridder's *Journal of Commerce*.

The database can be connected with any personal computer equipped with a telecommunication modem, for charges ranging from $75 to $100 per hour.#

AdWatch

(Continued from Page 12)

gain. The third "Where's the beef?" commercial and spots promoting a scratch-card game promotion tied to ABC's "Monday Night Football" broke Aug. 27.

For September, Wendy's advertising's share of first mentions was 21.3%, up 9.6 points from 11.7% in August. Dancer Fitzgerald Sample, New York, has to worry about keeping its renewed momentum going, Mr. Reinhard. Do you really want to worry about such things again?

And take a look at Burger King. When new comparative advertising from J. Walter Thompson USA, New York, broke in May, Burger King's advertising awareness jumped nearly seven points. In August it dropped 8.1 points. Last month it was up two points to a 13.8% share, putting it in third place.

The account execs at JWT now have to worry about Wendy's again as well as McDonald's.

I don't want to tell you your business, Mr. Reinhard, but in the past two years, fast-food advertising has emerged as the most changeable, unpredictable category of the nearly two dozen surveyed each month.

Needless to say, it's a jungle out there.

The adWatch survey is a joint project of ADVERTISING AGE and SRI Research Center, Lincoln, Neb. Advertising awareness is measured by asking a nationally projectable sample of consumers to name the advertising that first comes to mind over-all and in 22 product and service categories from all they have seen, heard or read in the previous 30 days.

In September, 1,260 adults were questioned by phone. Under adWatch methodology, an increase or decrease of 2.8 percentage points from the previous month's results is considered statistically significant and attributable to more than sampling variation.

Wendy's also was the most frequently named advertising overall in September, returning the chain to the No. 1 spot it had held from February through May this year.

The top 10 in over-all unaided recall last month were, in descending order, Wendy's, Pepsi, Coke, Miller/Lite, McDonald's, Burger King, Ford, Budweiser/Bud Light, Chevrolet and IBM.

Several advertisers last month lost ground they had gained during the Summer Olympics broadcasts. McDonald's 10.3 percentage-point drop in awareness is undoubtedly due to the termination of its Olympics scratch-card game and Olympics advertising campaign as well as to Clara's return.

Advertisers in other categories also felt the effects of the Olympics' absence:

- Levi Strauss, a major Olympics advertiser whose awareness score jumped nearly 10 points during August, fell back 6.6 points in the **apparel** category last month. But with 13.4% of first mentions it still maintains a solid lead in that category.

Jordache moved from 3.3% in August to 5.9% and the No. 2 spot in the September survey. Calvin Klein, with a new campaign for its underwear line, moved into the No. 3 spot with a 5.2% top-of-mind recall share.

- The Olympics' official airline, United, also lost some of its August gain in September. United's advertising in the **airlines** category came to mind first for 14.9% of those polled, a 5.7 point decline from August's 20.6% share.

American Airlines' advertising, carrying its new "Something special in the air" theme, was a close second with 13.1%, up slightly from the previous month's 11.5%. Eastern Air Lines made an even better showing last month, rising 2.9 points to an 11.9% share in September.

- Kodak and Canon, both Olympics advertisers, each lost awareness as they continued their battle for supremacy in the **cameras and photographic equipment** category. Kodak's advertising came to mind first for 23.7% of the sample, 3.4 points less than in August. Canon claimed 17.3% of first mentions last month, a decline of 5.3 points.

In the No. 3 spot last month for the first time was Minolta, with 6.4% of first mentions. Close behind were Nikon (5.5%) and Polaroid (5.2%).

- Apple lost share to primary competitors IBM and Commodore, but still kept a huge lead in the **computers** category. Apple's 35.4% share of first mentions in September represented a 3.4 point decline but still was nearly three times greater than No. 2 IBM's 13.1% share. Commodore was third with 7.5%.

Even with its aggressive new "Dare to compare" campaign, Texas Instruments' advertising failed to place among the top five in the category for the first time this year.

- "Bingo!" as Miller Lite pitchman Bob Uecker says in one of the brand's most recent and most popular commercials. For the first time, Miller Lite last month ranked second in the **beer** category behind perennial leader Budweiser. Lite ads came to mind first for 9.2% of the sample, compared with 16% for Budweiser. In that No. 2 spot, Lite replaced Miller High Life, which dipped three points to 7.4% and fourth place.

Coors remained No. 3 with 8.4%.

- Now that Procter & Gamble has put the Ivory name on shampoo and conditioner, it's not surprising that the brand's awareness level has jumped. Ivory was recalled first for 11.7% of the sample, up 3.9 points from August. Ivory threatens to become the dominant brand in the **soap and shampoo** category, which had been a fairly closely contested one.

Head & Shoulders remains No. 2 (6.3%), with Prell in the No. 3 spot (5.9%).

- Tide already had an insurmountable lead in the **laundry products** category, but it boosted that lead even further last month. Tide's awareness share rose 3.6 points to 27.9%. Far behind are Cheer (4.8%) and All (4.2%).
- Ford's lead in the **cars and trucks** category was whittled down last month. After picking up 5.2 points in August, Ford's share dropped back 6.5 points to 21.1% in September. Chevrolet was second with 13.9%; Toyota third with 9.8%.

Making a move last month was Datsun/Nissan, which passed Chrysler and Dodge to move into the No. 4 spot with 5.5%. By the way, that share breaks down to 3.2% who said Nissan and 2.3% who said Datsun. The name-change campaign is working.

- Last month's adWatch summary failed to note the strength of the impression advertising for American Home Products' ibuprofen-based pain reliever Advil has made. Advil moved into the No. 2 spot in the **medicine and drugs** category in August with a 7.7% share and a 3.8 point increase. Advil's September score dipped a bit to 6.6%, but it still holds second place behind Tylenol (28.5% last month).#

"IT'S LIKE HAVING A STAT HOUSE IN THE HALLWAY."

–Alex Stefanishin, President
Anders Advertising, New York City

Anders Advertising used to spend a lot of money on photostats. From their own stat machine and from outside stat houses

"Then I heard about Minolta's Beta 450Z copier," says Owner/President Alex Stefanishin.

The Beta zoom lens can reduce and enlarge originals to a virtually limitless range of copy sizes. From almost 50% larger than the original to 50% smaller.

"I wanted the 450Z for the time it would save us in preparing artwork for layouts and mechanicals," says Stefanishin.

"It was only later that I realized how much money we were saving.

"70% or so of our work is routine sizing. And that's where the 450Z's speed, convenience and cost savings beat the pants off a stat machine."

Your Minolta dealer can show you how the Beta 450Z can save you time and money. Look in the Yellow Pages under the Minolta trademark. Or call toll-free 800-526-5256. In New Jersey, 201-342-6707.

The Minolta Beta 450Z. Because life gets a lot easier when your copier can double as a stat machine.
